Research and Debate in Primary Geography

2017-10-02 Simon Catling This book brings together recent papers which make important contributions to understanding and developing primary geography. It considers primary teachers' and trainee teachers' knowledge of geography; how the primary curriculum uses geography; teachers' planning of geography teaching; the way in which aspects of geography are taught; what high quality geography might look like; and children's geographical understanding and voices. Though geography curricula change quite often in countries around the world, the core matters noted above remain of constant and vital importance. The papers in this book either concern research with primary teachers and children, or consider key concerns in primary geography, providing important perspectives for thinking about future developments in geography teaching and curriculum initiatives in primary schools. This is a stimulating and enticing collection written by leading exponents of, and experts in, primary geography education. This book was originally published as a special issue of Education 3-13.

Learning Geography Beyond the Traditional Classroom

2018-05-08 Chew-Hung Chang This book provides a collection of critical pieces that support the idea that good teaching and learning of geography in fieldwork and using technology should consider the dimensions of curriculum design, instructional design and resource provision, as well as assessment for such learning activities. Further, it clearly describes the thinking, experiences and critical comments concerning two broad areas of learning outside the traditional classroom - in the field and with technology.

Geography and Geographers

2015-12-22 Ron Johnston Geography and Geographers continues to be the most comprehensive and up-to-date overview of human geography available. It provides a survey of the major debates, key thinkers and schools of thought in the English-speaking world, setting them within the context of economic, social, cultural, political and intellectual changes. It is essential reading for all undergraduate geography students. It draws on a wide reading of the geographical literature and addresses the ways geography and its history are understood and the debates among geographers regarding what the discipline should study and how. This extensively updated seventh edition offers a thoroughly contemporary perspective on human geography for new and more experienced students alike.

Debates in Geography Education

2017-09-07 Mark Jones Debates in Geography Education encourages early career teachers, experienced teachers and teacher educators to engage with and reflect on key issues, concepts and debates. It aims to enable readers to reach their own informed judgements with deeper theoretical knowledge and understanding. The second edition is fully updated in light of the latest research, policy and practice in the field, as well as key changes to the curriculum and examination specifications. Expert contributors provide a range of perspectives on international, historical and policy contexts in order to deepen our understanding of significant debates in geography education. Key debates include: geography's identity as an academic discipline; what constitutes knowledge in geography; places and regional geography; what it means to think geographically; constructing the curriculum; how we link assessment to making progress in geography; the contribution of fieldwork and outdoor experiences; technology and the use of Geographical Information; school geography and employability; understanding the gap between school and university geography; evidence-based practice and research in geography education. The comprehensive, rigorous coverage of these key issues, together with carefully annotated selected further reading, will help support and shape further research and writing. Debates in Geography Education is a key resource that is essential reading for all teachers and researches who wish to extend their grasp of the place of geography in education. Mark Jones is Senior Lecturer in Education at the University of the West of England, Bristol, UK David Lambert is Professor of Geography Education at UCL Institute of Education, London, UK

A Gripping Tale of Unrelenting Pursuit

This is not a mere work of fiction, nor is it a product of cinematic imagination. This is the chilling reality, the chronicle of a serial killer who, with cold-blooded intent, extinguished the lives of 17 innocent souls. He relished in the infamous moniker "Zodiac," taunting the authorities and the public with cryptic messages and elusive clues. His actions were driven by a twisted sense of purpose, a self-proclaimed divine mission. He harbored the delusion of intellectual superiority, believing himself to be an unstoppable force. But his arrogance proved to be his undoing. This is the narrative of his eventual downfall, orchestrated by the one individual who possessed an intimate understanding of his psyche – his own brother.

It was a shadowy and turbulent night. The rain was falling heavily, and the wind was roaring. In the center of the city, there was an exhibition, where an invaluable diamond was on display. The diamond was named the African Star, and it was the biggest and most stunning diamond in the world. It was secured by a high-tech security setup, and a group of weaponized guards. No one could pilfer it, or so they believed. But an individual did. Someone managed to circumvent the protection, to elude the sentinels, to smash the window, and to take the diamond. And no one observed them, no one overheard them, no one knew who they were. They left no mark, no clue, no testimony. They vanished into the nightfall, with the African Star. And the enigma of the missing diamond commenced.

The field of Engineering Economics and Cost Estimation is a crucial aspect of any engineering project. It involves present and future economic factors, making it vital to obtain reliable estimates of future costs, benefits, and other economic parameters. Engineers frequently deal with projects whose scale, complexity, and uncertainty call for advanced approaches to planning and budgeting^[2][1]. Several methods are used for cost estimation, including rough estimates, semi-detailed estimates, or detailed estimates, depending on the needs for the estimates^[1][2]. Key concepts in this field include overhead costs, cost driver identification, cost allocation methods, capital budgeting, flexible budgeting, zero-based budgeting, budgets, and estimates. Various models are available for developing cost (or benefit) estimates, such as the per-unit model, the segmenting model, cost indexes, the power-sizing model, and learning curve cost estimating. The quality of a cost estimate usually increases as the resources allocated to developing the estimate increase.

The publication “Analyzing Casual Conversation” by Suzanne Eggins and Diana Slade, first issued in 1997, establishes a systematic model for the examination and portrayal of casual conversation in English. The writers assert that in spite of its occasionally aimless look and ostensibly unstructured substance, casual conversation is a highly structured activity and plays a vital function in the social building of reality. The publication proceeds through authentic samples of casual conversations including participants varying in age, gender, ethnicity, and socio-economic class. Pulling on insights from sociology, linguistics, and critical semiotics, the publication provides readers with the examinative skills to depict the levels of structure and critical interpretive models to elucidate the ‘social work’ that occurs on through chat.
