Bilingualism and Bilingual Education: Politics, Policies and Practices in a Globalized Society 2019-01-14 B. Gloria Guzmán Johannessen This volume presents a multinational perspective on the juxtaposition of language and politics. Bringing together an international group of authors, it offers theoretical and historical constructs on bilingualism and bilingual education. It highlights the sociocultural complexities of bilingualism in societies where indigenous and other languages coexist with colonial dominant and other prestigious immigrant languages. It underlines the linguistic diaspora and expansion of English as the world's lingua franca and their impact on indigenous and other minority languages. Finally, it features models of language teaching and teacher education. This book challenges the existent global conditions of non-dominant languages and furthers the discourse on language politics and policies. It does so by pointing out the need to change the

Banking's Final Exam 2017-05-30 Morris Goldstein Spurred by the success of the first stress test of US banks toward the end of the global economic crisis in 2009, stress testing of large financial institutions has become the cornerstone of banking supervision worldwide. The aim of the tests is to determine which banks are adequately capitalized under severe economic shocks and to order corrective measures for those that are vulnerable. In Banking's Final Exam, one of the world's leading experts on banking regulation concludes that the tests administered on both sides of the Atlantic suffer from fundamental weaknesses, leading to a false sense of reassurance

about the safety and soundness of the banking system. Some weaknesses can be corrected within the existing bank-capital regime, but others will require bold reforms—including higher minimum capital requirements for the largest and most systemically-important banks. The banking industry is likely to resist these reforms, but this book explains why their objections do not hold water.

The Lawyer Bubble 2016-03-08 Steven Harper A noble profession is facing its defining moment. From law schools to the prestigious firms that represent the pinnacle of a legal career, a crisis is unfolding. News headlines tell part of the story—the growing oversupply of new lawyers, widespread career dissatisfaction, and spectacular implosions of pre-eminent law firms. Yet eager hordes of bright young people continue to step over each other as they seek jobs with high rates of depression, life-consuming hours, and little assurance of financial stability. The Great Recession has only worsened these trends, but correction is possible and, now, imperative. In *The Lawyer Bubble*, Steven J. Harper reveals how a culture of short-term thinking has blinded some of the nation's finest minds to the long-run implications of their actions. Law school deans have ceded independent judgment to flawed U.S. News & World Report rankings criteria in the quest to maximize immediate results. Senior partners in the nation's large law firms have focused on current profits to enhance American Lawyer rankings and

individual wealth at great cost to their institutions. Yet, wiser decisions—being honest about the legal job market, revisiting the financial incentives currently driving bad behavior, eliminating the billable hour model, and more—can take the profession to a better place. A devastating indictment of the greed, shortsightedness, and dishonesty that now permeate the legal profession, this insider account is essential reading for anyone who wants to know how things went so wrong and how the profession can right itself once again.

The Ladder 2021-02-19 Andrew Bernard Foreword by Colonel Dame Kelly Holmes. Regardless of one's plans for the future, many people's careers are founded on a series of chance encounters, experiences and serendipity. School, college, university, jobs, family, sports, hobbies, friends, relationships - these are all fertile grounds for career-related conversations and explorations. What if we teachers, guides, mentors, parents and peers started to notice these seemingly unconnected happenings and, indeed, started to engineer and encourage them to happen? Using the mantra 'every adult is a careers teacher', *The Ladder* will inspire teachers to explicitly link their subject area to students' futures, both in school and outside its walls, and support them in doing so. Bernie draws upon his 30-year career in education and business development to bring clarity, focus and ideas to educators as to how they can best start students on their own ladders to success. Ultimately, in writing this book, Bernie's aim is to bring young people's futures to life with some personal skills reflection and forward planning designed to help them as they embark on their fulfilling futures - regardless of their upbringing, academic achievements or ethnic background.

Power, Legal Education, and Law School Cultures 2019-10-10 Meera E. Deo There is a myth that lingers around legal education in many democracies. That myth would have us believe that law students are admitted and then succeed based on raw merit, and that law schools are neutral settings in which professors (also selected and promoted based on merit) use their expertise to train those students to become lawyers. Based on original, empirical research, this book investigates this myth from myriad perspectives, diverse settings, and in different nations, revealing that hierarchies of power and cultural norms shape and maintain inequities in legal education. Embedded within law school cultures are assumptions that also stymie efforts at reform. The book examines hidden pedagogical messages, showing how presumptions about theory's relation to practice are refracted through the obfuscating lens of curricula. The contributors also tackle questions of class and market as they affect law training. Finally, this collection examines how structural barriers replicate injustice even within institutions representing themselves as democratic and open, revealing common dynamics across cultural and institutional forms. The chapters speak to similar issues and to one another about the influence of context, images of law and lawyers, the political economy of legal education, and the agency of students and faculty.

State Schooling and the Reproduction of Social Inequalities 2022-12-30 Sharon Jones
This book critically explores the role of state schooling in the reproduction of social class inequalities in the UK. By uniquely combining critical ethnographic methods with participatory and visual research, it foregrounds the experiences and recollections of working class adults in relation to their past schooling. Drawing upon her own lived experiences, Jones theorises the experiences of her participants using an analysis of Marxist, Bourdieusian and Freirean frameworks to uncover relations of power and illustrate how schooling has reduced individual agency and sustained lived inequalities. By creating space for a Visual Intervention within Critical Ethnography (VICE) alongside her analysis of class and society, Jones successfully illuminates that working

class struggles are not permanent, and that agency can be activated. The book also addresses an important need by centring research from the lived educational experiences of the working class, and, in particular, working class adults. Making a unique theoretical and methodological contribution using an innovative combined methodology approach, the text ultimately highlights the potential of empowering disadvantaged individuals by raising critical consciousness. Though it is focused on the experiences of adults, this book has important understandings for all sectors of education and will be of interest to academics, researchers and students interested in the sociology of education, research methods in education, social inequality, social class and education politics.
