The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a widely recognized vocabulary evaluation that has been in use for nearly half a century. Developed by Lloyd M. Dunn and Douglas M. Dunn, the evaluation is made to evaluate vocabulary comprehension for Standard American English. It is quick and simple to administer, saving precious time so that concentration can be put on implementing successful approaches.

The PPVT-4 evaluation content covers a extensive range of vocabulary comprehension levels, ranging from preschool through adult age. The evaluation problems broadly include words that represent 20 topic domains (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and household and educational vocabulary.

The assessment gives two equal versions which hold different vocabulary items, making sure that the test-taker has not “learned” the assessment. One edition can be utilized ahead of intervention implementation to assess people’s vocabulary comprehension and the second version can be used for re-evaluation to measure and document advancement. The PPVT-4 also features a distinctive Growth Scale Value (GSV) which is reactive to small changes with time.
