Sons of Cain 2018-08-14 Peter Vronsky From the author of Serial Killers: The Method and Madness of Monsters comes an in-depth examination of sexual serial killers throughout human history, how they evolved, and why we are drawn to their horrifying crimes. Before the term was coined in 1981, there were no "serial killers." There were only "monsters"--killers society first understood as werewolves, vampires, ghouls and witches or, later, Hitchcockian psychos. In Sons of Cain--a book that fills the gap between dry academic studies and sensationalized true crime--investigative historian Peter Vronsky examines our understanding of serial killing from its prehistoric anthropological evolutionary dimensions in the pre-civilization era (c. 15,000 BC) to today. Delving further back into human history and deeper into the human psyche than Serial Killers--Vronsky's 2004 book, which has been called the definitive history of serial murder--he focuses strictly on sexual serial killers: thrill killers who engage in murder, rape, torture, cannibalism and necrophilia, as opposed to for-profit serial killers, including hit men, or "political" serial killers, like terrorists or genocidal murderers. These sexual serial killers differ from all other serial killers in their motives and their foundations. They are uniquely human and--as popular culture has demonstrated--uniquely fascinating.

The Sartrean Mind 2020-01-24 Matthew C. Eshleman Jean-Paul Sartre was one of the most important philosophers of the twentieth century. His influence extends beyond academic philosophy to areas as diverse as anti-colonial movements, youth culture, literary criticism, and artistic developments around the world. Beginning with an introduction and biography of Jean-Paul Sartre by Matthew C. Eshleman, 42 chapters by a team of international contributors cover all the major aspects of Sartre’s thought in the following key areas: Sartre’s philosophical and historical context Sartre and phenomenology Sartre, existentialism, and ontology Sartre and ethics Sartre and political theory Aesthetics, literature, and biography Sartre’s engagements with other thinkers. The Sartrean Mind is the most comprehensive collection on Sartre published to date. It is essential reading for students and researchers in philosophy, as well as for those in related disciplines where Sartre’s work has continuing importance, such as literature, French studies, and politics.

Local Energy Communities 2022-09-06 Gilles Debizet This book draws on social science analysis to understand the ongoing dynamics within and surrounding local energy communities in reliably electrified countries: Belgium, Canada, Colombia, France, Germany, India, the Netherlands, Spain, Switzerland and the United Kingdom. It offers a comprehensive overview of recent results and thus outlines a diversity of drivers and levers for scaling up energy communities or, at least, local energy sharing. Analysing the main types of energy communities such as collective self-consumption, citizen cooperatives and peer-to-peer digital platforms, the book does not only raise new questions for social scientists, but also offers a comprehensive overview for all those contributing to the circular economy and the decentralization of energy production in inhabited areas where energy consumption is concentrated. This book provides input for the ongoing debates in many European countries implementing the national law on the European directives for energy communities. Furthermore, without evading the antagonism between cooperative and market approaches, or the contradictions between different issues, the book outlines the innovative decision-making tools that can facilitate the development of local energy production and sharing systems. As well as being of interest to postgraduates and researchers in the field of energy studies, this book will be vital to energy professionals looking to support local energy communities’ decision-making and design, who wish to consider sociological, organizational and territorial dimensions.

Droit social et travailleurs pauvres 2013-10-09 Philippe Auvergnon Les premières lois sociales apparaissent en Europe au 19e siècle à la suite de la révolution industrielle. Elles constituent alors une réponse ponctuelle à la misère des travailleurs. Elles résultent indéniablement de l’action ouvrière, mais aussi du souci des classes dirigeantes de maîtriser les classes laborieuses devenues dangereuses. L’invention du droit social, va contribuer au cours du 20e siècle à la disparition des « travailleurs pauvres ». En revanche, ce début de 21e siècle est marqué par leur augmentation dans un bon nombre de pays. Des personnes ayant une activité, généralement salariées, y ont un revenu familial inférieur au seuil de pauvreté et sont dans l’incapacité d’accéder à certains droits fondamentaux, alors même qu’existent des droits du travail et de la protection sociale substantiels, des réglementations, des statuts d’emploi, des salaires minima légaux et/ou conventionnels. Comment le droit social et les politiques publiques permettent-ils ou limitent-t-ils l’existence de « travailleurs pauvres » ? Intégrant l’éclairage d’autres disciplines et des points de vue internationaux, cet ouvrage réunit et croise les analyses de spécialistes reconnus de droit social de pays d’Europe mais aussi d’Afrique du sud, d’Australie, du Canada, des États-Unis et du Japon. Dans un contexte d’accentuation de la concurrence économique et sociale, d’individualisation des relations de travail, d’affaiblissement des organisations syndicales, cet ouvrage rappelle l’importance de normes de droit social protégeant réellement la qualité de la vie de tous les travailleurs. Il intéressera les responsables économiques et sociaux, les praticiens du droit social et les professeurs et chercheurs en droit social et en droit européen.

Creative Approaches to Planning and Local Development 2016-07-15 Abdellillah Hamdouch This book project highlights creative approaches to planning and local development. The dynamic complexity, diversity and fluidity which characterize contemporary society represent challenges for planning and development endeavours. While research and policy work has extensively focused on large cities and on metropolitan regions, there has been relatively little work on ‘smaller places’. This book shows that if these new challenges affect all places and regions, small and medium-sized towns (SMSTs) are suffering many specific problems that call imperatively for the design and implementation of very imaginative, creative approaches to planning and local development. What could enhance creativity in local development and planning? Is it possible to talk about creative capacity building at the level of a town that might release imaginative and innovative activities? Under what local and non-local conditions is creativity being initiated and flourishing? What are the major obstacles and in what way can these be contained in order to safeguard pockets of creative action? Interdisciplinary and with case studies from France, Norway and other European countries, this volume presents a wide range of approaches and territorial contexts of small cities and towns in which spatial dynamics and the consequences of the city-region for urban planning theory and practice in Europe are highlighted, with a special focus on the challenges for - and understanding of - planning and development of SMSTs. It provides a significant body of critical, comparative and contextual perspectives on the quest for urban sustainability and resilience in SMSTs, therefore emphasizing collaborative and potentially innovative approaches that can be detected, but also the shortcomings, pitfalls and ‘traps’ that can lie behind the approaches aimed at concerting ecological, economic, and socio-cultural concerns, and the discourses promoting them.

L’administration des territoires et les instruments de l’action publique 2017-02-22T00:00:00-05:00 Serge Belley Les territoires sont soumis à des phénomènes sociodémographiques, économiques, environnementaux et culturels qui obligent les gouvernements et les administrations publiques à sans cesse réviser et ajuster leurs politiques, programmes et services. C’est notamment au moyen de ce que l’on appelle les « instruments de l’action publique » que les gouvernements matérialisent leurs intentions et leurs interventions sur le territoire. Ces instruments sont de plusieurs types : légal et réglementaire, fiscal et financier, nodal et informationnel, collaboratif et organisationnel. En plus d’une introduction générale sur ce que sont, font et changent les instruments de l’action publique, cet ouvrage compte 13 études de cas – produites par des chercheurs québécois, canadiens et européens – sur le rôle que jouent ces instruments dans l’aménagement, le développement et la gestion des territoires. Ce livre intéressera les décideurs publics, les chercheurs et les citoyens qui veulent mieux comprendre les multiples enjeux et défis liés aux territoires.

Le long de la Main cosmopolite 2017-04-26T00:00:00-04:00 Marie-Laure Poulot À Montréal, le boulevard Saint-Laurent résume à lui seul les différentes dimensions du cosmopolitisme. L’artère représente autant une coupure dans la ville – la frontière entre les « deux solitudes », francophone et anglophone – qu’une couture, puisqu’elle a été un lieu d’accueil privilégié pour les nouveaux venus tout au long du XXe siècle. Dans cet ancien corridor de l’immigration, devenu espace d’échanges et de récits, se rencontrent et parfois se confrontent les diverses expressions du cosmopolitisme (commerciale et quotidienne,

politique et culturelle). L’enquête rapportée dans cet ouvrage témoigne d’une pratique approfondie des quartiers traversés par le boulevard, s’appuie sur les représentations littéraires, artistiques et citoyennes qu’il inspire, et s’attarde à comprendre les relations entre ses différents acteurs – commerces, associations, administration municipale.

Pidgins and Creoles beyond Africa-Europe Encounters 2014-01-15 Isabelle Buchstaller Most of what we know about pidgin and creole languages is the result of research into contact languages that developed as a consequence of European expansion into Africa and the Caribbean. The narrow focus on European lexifier and West African substrate languages has resulted in insufficient investigation of other contact varieties. Even more perniciously, lesser known and often under-described contact languages have not been taken into consideration when formulating supposedly general tendencies about the linguistic properties of contact languages. This volume aims to give a platform to research on the history, genesis, and typology of a number of non-European language-based contact languages. A more encompassing and diverse data-base will contribute to more accurate and comprehensive inventories of the typological features of contact languages.

Republik - Anlass für einen kritischen Rück- und Ausblick auf das Regierungssystem unseres Nachbarlandes. So entsteht ein facettenreiches Bild der V. Republik, die sich trotz wiederkehrender Fundamentalkritik als wandlungs- und leistungsfähig erwiesen hat, aber auch vor neuen Herausforderungen und Veränderungen steht.

O tempo que resta 2017-06-06 Giorgio Agamben Num de seus primeiros livros, Infância e História, Giorgio Agamben sustenta que a cultura moderna não conseguiu elaborar uma ideia do tempo de acordo com sua concepção da história. Isso se deve, explica, à herança grega que, para além de suas diferenças, segue presente na representação cristã do tempo que a cultura moderna secularizou. De fato, retomando uma expressão de Santo Agostinho, quer se trate do círculo, quer se trate da linha, ou seja, da temporalidade circular dos antigos ou da linearidade dos cristãos, o tempo é sempre concebido como uma sucessão contínua de pontos. E, desse modo, a experiência cristã do tempo permanece presa na subordinação ao espaço. O presente trabalho procura confrontar esse duplo desafio: trazer à luz a experiência cristã do tempo, isto é, do tempo do Messias, para dispor de uma ideia do tempo à altura da dimensão histórica do homem. Dividido em seis jornadas, o autor se ocupa das dez primeiras palavras da Carta de Paulo aos romanos. Cada uma delas é objeto de um comentário erudito que se alimenta das mais diversas fontes: da própria Escritura, da filosofia, dos midrashim judaicos, do direito romano, da literatura, etc. Todas se encaminham para o mesmo lugar, até um agora que já não é um ponto na sucessão do círculo ou da linha, mas um tempo que resta, que se contrai para abrir o presente à sua dimensão mais íntima. Dois livros de Agamben são originalmente seminários, A linguagem e a morte, em que aparece pela primeira vez a figura do homo sacer, e o presente trabalho. Na minha opinião, eles representam, em grande parte, os pilares conceituais de sua vasta obra. Edgardo Castro

Towers of Gold 2010-01-05 Frances Dinkelspiel Isaias Hellman, a Jewish immigrant, arrived in California in 1859 with very little money in his pocket and his brother Herman by his side. By the time he died, he had effectively transformed Los Angeles into the modern metropolis we see today. In Frances Dinkelspiel's groundbreaking history, the early days of California are seen through the life of a man who started out as a simple store owner only to become California's premier money-man of the late 19th and early 20th century. Growing up as a young immigrant, Hellman quickly learned the use to which "capital" could be put, founding LA's Farmers and Merchants Bank, that city's first successful bank, and transforming Wells Fargo into one of the West's biggest financial institutions. He invested money with Henry Huntington to build trolley lines, lent Edward Doheney the funds that led him to discover California's huge oil reserves, and assisted Harrison Gary Otis in acquiring full ownership of the Los Angeles Times. Hellman led the building of Los Angeles' first synagogue, the Wilshire Boulevard Temple, helped start the University of Southern California and served as Regent of the University of California. His influence, however, was not limited to Los Angeles. He controlled the California wine industry for almost twenty years and, after San Francisco's devastating 1906 earthquake and fire, calmed the financial markets there in order to help that great city rise from the ashes. With all of these accomplishments, Isaias Hellman almost single-handedly brought California into modernity. Ripe with great historical events that filled the early days of California such as the Gold Rush and the San Francisco earthquake, Towers of Gold brings to life the transformation of California from a frontier society whose economy was driven by the barter of hides and exchange of gold dust into a vibrant state with the strongest economy in the nation.

Anfractuosit  et unification 2009 Michel Dalissier This work is a presentation of the philosophy of Nishida Kitaro (1870-1970) according to the notion of unification (toitsurusu). What does to unify mean: is it reaching a final unity or endlessly pursuing unity? Is not such a pursuit of unity pure nothingness? Does not this very fear come from the fact that man cannot face the infinity that stands behind being itself? But then what kind of place could correspond to such a beyond? Is finiteness the limit of the self, is the notion of being the only key to the story of reality? Might an absolute nothingness still have something to do with being? We follow Nishida's answers through three explorations of his major works, emphasizing his intellectual relation to Western philosophy as well as the study of the annotations he left in his books. Published with support from the Foundation for the Study of Language and Civilization in Japan. French text."

Freud et le mouvement de p dagogie psychanalytique 2007 Danielle Milhaud-Cappe Des 1908, s'est cree et developpe, tout d'abord a Zurich et a Vienne, un mouvement de pedagogie psychanalytique, en etroite relation avec le fondateur de la psychanalyse. Envisager l'influence que les figures de proue de ce mouvement ont eue sur Freud, c'est en venir a adopter un point de vue different sur les rapports de la pedagogie et de la psychanalyse. C'est aussi decouvrir un visage inattendu de Freud et de ses rapports a l'anthropologie et a la philosophie. La vision de l'auteur renouvelle donc tout d'abord la perspective sur quelques polemiques recentes concernant la psychanalyse et son fondateur. En outre, l'analyse a la fois historique et conceptuelle des travaux d'Aichorn, Zulliger et Pfister, reactualise les apories constitutives de l'un des trois impossibles metiers: celui d'educuer. Les difficultes soulevees par la reeducation des jeunes delinquants, par l'education des enfants issus des milieux les plus frustes ou par l'attention portee aux nevroses religieuses anticipent celles que connait le monde contemporain vis-a-vis de sa jeunesse. En parcourant differentes modalites d'application de la psychanalyse a la pedagogie, ce livre eclaire notre present.

The Ocean Challenge Badge 2018-05-08 Food and Agriculture Organization of the United Nations The ocean covers 70 percent of the Earth's surface, and is essential for life on our planet – even for those of us who live nowhere near the sea! It provides us all with food and other materials that we need, regulates our climate and provides half of the oxygen we breathe. The ocean also offers us various means of transport and opportunities for recreation. People have long thought that the ocean was so wide and bountiful that it would go on supplying our needs forever, but this is not the case: human activities are causing significant damage to life in the ocean. People are often unaware of the problems created by this heavy reliance, as few of us have the opportunity to look beneath the surface of the sea and see the damage that our actions have caused. This is where the Ocean Challenge Badge comes in: let it take you on a journey to discover the ocean! It is packed with activities to help you learn about how the ocean works, the creatures that live in it, and just how important it is in our everyday lives. You will also discover how YOU can play a role in protecting our ocean for future generations. We hope you will be inspired to take the challenge and celebrate our ocean. So dive in and begin your aquatic discoveries!

The Begum's Millions 2013-09-01 Jules Verne When two European scientists unexpectedly inherit an Indian rajah's fortune, each builds an experimental city of his dreams in the wilds of the American Northwest. France-Ville is a harmonious urban community devoted to health and hygiene, the specialty of its French founder, Dr. Fran ois Sarrasin. Stahlstadt, or City of Steel, is a fortress-like factory town devoted to the manufacture of high-tech weapons of war. Its German creator, the fanatically pro-Aryan Herr Schultze, is Verne's first truly evil scientist. In his quest for world domination and racial supremacy, Schultze decides to showcase his deadly wares by destroying France-Ville and all its inhabitants. Both prescient and cautionary, The Begum's Millions is a masterpiece of scientific and political speculation and constitutes one of the earliest technological utopia/dystopias in Western literature. This Wesleyan edition features notes, appendices, and a critical introduction as well as all the illustrations from the original French edition.

Financing Health Services in Developing Countries 1987-01-01 John S. Akin This report discusses several different approaches that support reforming health care services in developing countries. For some time now, health care services have been supported by government funds. As demands for improving health care services continue to increase additional demands will be placed on governments to respond. This, however, will not be easy. Slow economic growth and record budget deficits in the 1980's have forced reductions in public spending. Alternative approaches to finance health care services are needed. Such possible changes could involve: decentralization of federal government involvement; the promotion of nongovernment involvement; the imposition of user fees; and, establishing health insurance. Finally, the role of the Bank in pursuing new financing strategies is discussed.

Karl Leonhard Reinhold and the Enlightenment 2010-07-24 George di Giovanni Karl Leonhard Reinhold (1757-1823) is a complex figure of the late German Enlightenment. Sometime Catholic priest and active Mason even when still a cleric in Vienna; early disciple of Kant and the first to try to reform the Critique of Reason; influential teacher and prolific author; astute commentator on the immediate post-Kantian scene; and at all times convinced propagandist of the Enlightenment—in all these roles Reinhold reflected his age but also tested the limits of the values that had inspired it. This collection of essays, originally presented at an international workshop held in Montreal in 2007, conveys this multifaceted figure of Reinhold in all its details. In the four themes that run across the contributions—the historicity of reason; the primacy of moral praxis; the personalism of religious belief; and the transformation of classical metaphysics into phenomenology of mind—Reinhold is presented as a catalyst of nineteenth century thought but also as one who remained bound to intellectual prejudices that were typical of the Enlightenment and, for this reason, as still the representative of a past age. The volume contains the text of two hitherto unpublished Masonic speeches by Reinhold, and a description of recently recovered transcripts of student lecture notes dating to Reinhold's early Jena period.
