Business and Development Studies

2019-10-16 Peter Lund-Thomsen Business and Development Studies: Issues and Perspectives provides a comprehensive collection of cutting-edge theoretical and empirical contributions to the emerging field of business and development studies. Compared to more traditional business-school accounts of business in developing countries which focus on the challenges and opportunities of doing business in developing countries, this anthology explores whether, how, and under what conditions business contributes to the achievement of economic, social, and environmental goals in developing countries. The book consolidates the current status of academic work on business and development, identifies state of the art in relation to this academic field, and establishes a future research agenda for ‘business and development studies’ as an emerging academic discipline within the social sciences. The book will be of interest to researchers and students, including economists, geographers, sociologists, political scientists, corporate social responsibility specialists, and development scholars who are seeking an in-depth overview of current debates about the role of business as a development agent in the Global South. The book is also of relevance to practitioners that are engaged in work with the private sector seeking to enhance the positive effects and minimize the negative economic, social, and environmental consequences of business activity in the Global South.

Ritorni

2023-09-15T00:00:00+02:00 James Clifford Un tempo si riteneva che le società native, o tribali, fossero destinate a scomparire a causa di inarrestabili forze economiche e politiche che prima o poi avrebbero completato il lavoro di distruzione avviato dai contatti interculturali e dal colonialismo. La realtà odierna dimostra invece che molti gruppi aborigeni continuano a resistere, rendendo così più complesse le classiche narrazioni della modernizzazione e del progresso. Prendendo in esame i popoli nativi di California, Alaska e Oceania, James Clifford prova come questi siano parte attiva di un processo di trasformazione ancora in atto che implicherebbe una lotta ambivalente dentro e contro forme dominanti d’identità culturale e di potere politico. Spesso contro ogni previsione, i popoli indigeni stanno infatti costruendo con creatività e pragmatismo percorsi identitari originali all’interno di una modernità intricata e indefinita.

Management of International Institutions and NGOs

2023-08-31 Eduardo Missoni This second edition of Management of International Institutions and NGOs covers all key topics in global governance from a unique management perspective. It analyzes the management challenges associated with international cooperation rather than the more commonly explored political or economic lenses. This text is structured to enable students to connect theory with practice, beginning with the main management frameworks developed in the context of corporate and national public/nonprofit organizations and adapting them to the specificity of international institutions and international non-governmental organizations. This leads to the identification of a “tailored” approach to international organization management based on their institutional and operational settings, stakeholder groups, core business, staff profiles, and financial arrangements. The authors then connect this theory with practice by linking frameworks to several case studies and best practices of organizations currently experimenting with management systems and tools, with case studies including the World Bank and the Gates Foundation. This edition has been extensively revised and updated, with an expanded conceptual framework inclusive of systemic theories of organization, new cases throughout, and new chapters on leadership, supply chain and operations, and human-centered digitization. This comprehensive textbook is a must-own resource for students and academics involved with studying and working with international organizations.
