The Peabody Picture Vocabulary Test Fourth Edition (PPVT-4) is a well-respected vocabulary evaluation that has been in practice for nearly 50 years. Developed by Lloyd M. Dunn and Douglas M. Dunn, the test is made to assess receptive vocabulary for Standard American English. It is swift and simple to administer, conserving valuable time so that attention can be placed on implementing effective interventions.

The PPVT-4 test content encompasses a broad scope of vocabulary comprehension levels, extending from preschool through adult age. The evaluation problems broadly feature words that represent 20 subject areas (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and home and school vocabulary.

The evaluation gives two identical forms which include different vocabulary items, guaranteeing that the individual has not "learned" the evaluation. One edition can be employed prior to intervention implementation to evaluate individuals' vocabulary knowledge and the alternative version can be used for re-testing to assess and record advancement. The PPVT-4 also contains a distinctive Growth Scale Value (GSV) which is sensitive to slight changes in time.
