The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a well-respected vocabulary test that has been in operation for almost 50 years. Created by Lloyd M. Dunn and Douglas M. Dunn, the test is crafted to measure receptive vocabulary for Standard American English. It is swift and effortless to carry out, preserving precious time so that attention can be set on implementing successful strategies.

The PPVT-4 assessment material includes a extensive array of receptive vocabulary ranks, extending from preschool through adult age. The evaluation questions widely feature words that portray 20 content fields (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and home and school vocabulary.

The test offers two equivalent forms which include various vocabulary words, making sure that the test-taker has not “mastered” the test. One edition can

be used before intervention to evaluate individuals' vocabulary comprehension and the second version can be employed for re-assessment to evaluate and note progress. The PPVT-4 also contains a special Growth Scale Value (GSV) which is reactive to minor changes in time.
