Objects: USA 2020

2020-10-27 Glenn Adamson Objects: USA 2020 hails a new generation of artist-craftspeople by revisiting a groundbreaking event that redefined American art. In 1969, an exhibition opened at the Smithsonian Institution that redefined American art. Objects: USA united a cohort of artists inventing new approaches to art-making by way of craft media. Subsequently touring to twenty-two museums across the country, where it was viewed by over half a million Americans, and then to eleven cities in Europe, the exhibition canonized such artists as Anni Albers, Sheila Hicks, Wharton Esherick, Wendell Castle, and George Nakashima, and introduced others who would go on to achieve widespread art-world acclaim, including Dale Chihuly, Michele Oka Doner, J. B. Blunk, and Ron Nagle. Objects: USA 2020 revisits this revolutionary exhibition and its accompanying catalog--which has become a bible of sorts to curators, gallerists, dealers, craftspeople, and artists--by pairing fifty participants from the original exhibition with fifty contemporary artists representing the next generation of practitioners to use--and upend--the traditional methods and materials of craft to create new forms of art. Published to coincide with an exhibition of the same title at the renowned gallery R & Company, and featuring essays by some of the foremost authorities on craft at the intersection of art, including Glenn Adamson, curator and former director of the Museum of Arts & Design; James Zemaitis, curator and former head of twentieth-century design at Sotheby's; and Lena Vigna, curator of exhibitions at the Racine Art Museum; an interview with Paul J. Smith, the cocurator of Objects: USA; archival photographs of the original exhibition and important historical works; and lush full-color images of contemporary works, Objects: USA 2020 is an essential art historical reference that traces how craft was elevated to the status of museum-quality art, and sets its trajectory forward.

American Furniture, 1620 to the Present

1981 Jonathan L. Fairbanks Meant for both connoisseur and amateur, this is the definitive book in its field. During ten years of research, the authors examined furniture from coast to coast, in museums and private collections. American Furniture has a running text along with its identification captions, which places furniture in its social and historical context. In its 100 color pictures and 1300 black-and-white photos, the book frequently presents furniture in the rooms they were made for. There is extensive coverage of the masterpieces from the seventeenth century to the present, many of them newly photographed for this book, but coverage is by no means restricted to these pieces. This is the first book to encompass furniture "away from the mainstream"--Pieces made away from the furniture centers of New York, New England, and Pennsylvania. Thus, there is discussion of the furniture of the Southwest; furniture made in Dutch, Spanish, French, and Norwegian settlements; and furniture made in religious enclaves or as part of social or

aesthetic reform movements. Also, line drawings reveal how antique furniture was made--and therefore how to tell a genuine antique from a forgery.--From publisher description.

Films You Saw in School

2013-12-27 Geoff Alexander Millions of dollars in public funds were allocated to school districts in the post-Sputnik era for the purchase of educational films, resulting in thousands of 16mm films being made by exciting young filmmakers. This book discusses more than 1,000 such films, including many available to view today on the Internet. People ranging from adult film stars to noted physicists appeared in them, some notable directors made them, people died filming them, religious entities attempted to ban them, and even the companies that made them tried to censor them. Here, this remarkable body of work is classified into seven subject categories, within which some of the most effective and successful films are juxtaposed against those that were didactic and plodding treatments of similar thematic material. This book, which discusses specific academic classroom films and genres, is a companion volume to the author's Academic Films for the Classroom: A History (McFarland), which discusses the people and companies that made these films.

The Furniture of Sam Maloof

2001 Jeremy Elwell Adamson Nietzsche's philosophy stands at the intersection of many currents in science that animated the 19th century. Dynamic change in the humanities, natural and social sciences generated new methods, perspectives, and hierarchies of the sciences. This context is essential for understanding his philosophy. The 18 essays each discuss one academic discipline and its effects on Nietzsche's thought. It is thus a valuable guide to the history of science and ideas in the 19th century.
