Clinical Practice Guidelines We Can Trust
2011-06-16 Institute of Medicine Advances in medical, biomedical and health services research have reduced the level of uncertainty in clinical practice. Clinical practice guidelines (CPGs) complement this progress by establishing standards

of care backed by strong scientific evidence. CPGs are statements that include recommendations intended to optimize patient care. These statements are informed by a systematic review of evidence and an assessment of the benefits and costs of alternative care options. Clinical Practice Guidelines We Can Trust examines the current state of clinical practice guidelines and how they can be improved to enhance healthcare quality and patient outcomes. Clinical practice guidelines now are ubiquitous in our healthcare system. The Guidelines International Network (GIN) database currently lists more than 3,700 guidelines from 39 countries. Developing guidelines presents a number of challenges including lack of transparent methodological practices, difficulty reconciling conflicting guidelines, and conflicts of interest. Clinical Practice Guidelines We Can Trust explores questions surrounding the quality of CPG development processes and the establishment of standards. It proposes eight standards for developing trustworthy clinical

practice guidelines emphasizing transparency; management of conflict of interest ; systematic review-guideline development intersection; establishing evidence foundations for and rating strength of guideline recommendations; articulation of recommendations; external review; and updating. Clinical Practice Guidelines We Can Trust shows how clinical practice guidelines can enhance clinician and patient decision-making by translating complex scientific research findings into recommendations for clinical practice that are relevant to the individual patient encounter, instead of implementing a one size fits all approach to patient care. This book contains information directly related to the work of the Agency for Healthcare Research and Quality (AHRQ), as well as various Congressional staff and policymakers. It is a vital resource for medical specialty societies, disease advocacy groups, health professionals, private and international organizations that develop or use clinical practice guidelines, consumers, clinicians,

and payers.

Marketing and Managing Tourism Destinations 2023-07-31 Alastair M. Morrison Marketing and Managing Tourism Destinations is a comprehensive and integrated introductory textbook covering destination management and marketing in one volume. It focuses on how destination management is planned, implemented, and evaluated as well as the management and operations of destination management organizations (DMOs), how they conduct business, major opportunities, and challenges and issues they face to compete for the global leisure and business travel markets. Much has changed since the publication of the second edition of this book in 2018. The COVID-19 pandemic was unpredictable at the time and has caused havoc for destinations and DMOs. The third edition includes many materials about the COVID-19 impacts and recovery from the pandemic. This third edition has been updated to

include: four new chapters (Chapter 2—“Destination Sustainability and Social Responsibility”; Chapter 3—“Quality of Life and Well-Being of Destination Residents”; Chapter 11—“Destination Crisis Management”; and Chapter 20—“Destination Management Performance Measurement and Management”) new and updated international case examples to show the practical realities and approaches to managing different destinations around the world coverage of contemporary topics including, for example, COVID-19, social responsibility, metaverse, mixed reality, virtual meetings, teleworking, digital nomads, viral marketing, blended travel, regenerative tourism, meaningful travel, and several others a significantly improved illustration program keyword lists It is illustrated in full color and packed with features to encourage reflection on main themes, spur critical thinking, and show theory in practice. Written by an author with many years of industry practice, university teaching, and professional training

experience, this book is the essential guide to the subject for tourism, hospitality, and events students and industry practitioners alike.

Enterprising Women 2013-06-10 Mary Hallward-Driemeier This book brings together new household and enterprise data from 41 countries in Sub-Saharan Africa to inform policy makers and practitioners on ways to expand women entrepreneurs' economic opportunities. Sub-Saharan Africa boasts the highest share of women entrepreneurs, but they are disproportionately concentrated among the self-employed rather than employers. Relative to men, women are pursuing lower opportunity activities, with their enterprises

more likely to be smaller, informal, and in low value-added lines of business. The challenge in expanding opportunities is not helping more women become entrepreneurs but enabling them to shift to higher return activities. A central question addressed in the book is what explains the gender sorting in the types of enterprises that women and men run? The analysis shows that many Sub-Saharan countries present a challenging environment for women. Four key areas of the agenda for expanding women's economic opportunities in Africa are analyzed: strengthening women's property rights and their ability to control assets; improving women's access to finance; building human capital in business skills and networks; and strengthening women's voices in business environment reform. These areas are important both because they have wide gender gaps and because they help explain gender differences in entrepreneurial activities. It is particularly striking that while gender gaps in

education tend to close with higher incomes, gaps in women's property rights and in women's participation in reform processes do not. As simply raising a country's income is unlikely to be sufficient to give women equal ability to control assets or have greater voice, more proactive steps will be needed. Practical guidelines to move the agenda forward are discussed for each of these key areas.

Handbook on Antimicrobial Resistance 2023-07-18
Mukteswar Prasad Mothadaka Antimicrobial resistance (AMR) is a global public health threat. The menace of antimicrobial resistance is present across health, animal, agriculture, food, and environment sectors. It, therefore, requires an interdisciplinary combat approach- the one health approach, envisaged by the FAO-UNEP-WHO-WOAH Quadripartite (Food and Agriculture Organization of the United Nations (FAO), the UN Environment Programme (UNEP), the World Health Organization (WHO) and the World Organisation for

Animal Health (WOAH). This comprehensive reference book provides a thorough understanding of antimicrobial resistance across different sectors. It presents deep insights and gives a global perspective on antimicrobial resistance for policymakers. The book offers essential and up-to-date information that enables researchers from multiple fields to design research on antimicrobial resistance. The book discusses molecular mechanisms and antibiotic resistance genes of significant antimicrobial-resistant pathogens, regulatory frameworks available worldwide, and mitigation strategies across the sectors, including probiotics, prebiotics, antimicrobial peptides, bacteriophages, phytochemical compounds, immunostimulants, vaccines, bacteriocins, etc. It compiles essays from leading experts in the field of antimicrobial resistance research. The book is meant for students and researchers in microbiology, medical microbiology, and public health. It is also helpful for clinicians and policymakers.

Learning in a Digital World 2019-06-29 Paloma Díaz
This book aims at guiding the educators from a variety of available technologies to support learning and teaching by discussing the learning benefits and the challenges that interactive technology imposes. This guidance is based on practical experiences gathered through developing and integrating them into varied educational settings. It compiles experiences gained with various interactive technologies, offering a comprehensive perspective on the use and potential value of interactive technologies to support learning and teaching. Taken together, the chapters provide a broader view that does not focus exclusively on the uses of technology in educational settings, but also on the impact and ability of technology to improve the learning and teaching processes. The book addresses the needs of researchers, educators and other stakeholders in the area of education interested in learning how interactive technologies can be used to overcome key educational

challenges.

The Government Manager's Guide to Plain Language 2013-07-01 Judith G. Myers PhD
The ability to write well correlates highly with the ability to think well—to analyze information, weigh alternatives, and make decisions. Government managers must make instructions and policies clear to employees, give effective presentations, and communicate effectively with the public. In addition, government managers must model clear, effective writing for their staffs. A comprehensive chapter on using social media effectively and appropriately is included.

Competition Policy and Intellectual Property in Today's Global Economy 2021-08-05 Robert D. Anderson The fast-evolving relationship between the promotion of welfare-enhancing competition and the balanced protection of intellectual property (IP) rights has attracted the attention of policymakers, analysts and scholars. This interest is inevitable in an environment that lays ever greater emphasis on the management of knowledge and innovation and on mechanisms to ensure that the public derives the expected social and economic benefits from this innovation and the spread of knowledge. This book looks at the positive linkage between IP and competition in jurisdictions around the world, surveying developments and policy issues from an international and comparative perspective. It includes analysis of key doctrinal and policy issues by leading academics and practitioners from around the globe and a cutting-edge survey of related developments across both developed and developing economies. It also situates current policy

developments at the national level in the context of multilateral developments, at WIPO, WTO and elsewhere.

Banking the World 2021-08-03 Robert Cull Experts

report on the latest research on extending access to financial services to the 2.5 billion adults around the world who lack it. About 2.5 billion adults, just over half the world's adult population, lack bank accounts. If we are to realize the goal of extending banking and other financial services to this vast “unbanked” population, we need to consider not only such product innovations as microfinance and mobile banking but also issues of data accuracy, impact assessment, risk mitigation, technology adaptation, financial literacy, and local context. In *Banking the World*, experts take up these topics, reporting on new research that will guide both policy makers and scholars in a broader push to extend financial markets. The contributors consider such topics as the complexity of surveying people about their use of financial services; evidence of the impact of financial services on income; the occasional negative effects of financial services on poor households, including disincentives to work and overindebtedness; and tools for improving

access such as nontraditional credit scores, financial incentives for banking, and identification technologies that can dramatically reduce loan default rates.

Universal Access in Human-Computer Interaction: Applications and Services for Quality of Life
2013-07-01 Constantine Stephanidis The three-volume set LNCS 8009-8011 constitutes the refereed proceedings of the 7th International Conference on Universal Access in Human-Computer Interaction, UAHCI 2013, held as part of the 15th International Conference on Human-Computer Interaction, HCII 2013, held in Las Vegas, USA in July 2013, jointly with 12 other thematically similar conferences. The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for

presentation thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 230 contributions included in the UAHCI proceedings were carefully reviewed and selected for inclusion in this three-volume set. The 78 papers included in this volume are organized in the following topical sections: universal access to smart environments and ambient assisted living; universal access to learning and education; universal access to text, books, ebooks and digital libraries; health, well-being, rehabilitation and medical applications; access to mobile interaction.

Manual for facilitators 2022-03-23 László Milutinovits The Council of Europe youth sector aims at enabling young people across Europe to actively uphold, defend, promote and benefit from the Council of Europe's core values of human rights,

democracy and the rule of law, notably by strengthening young people's access to rights, deepening youth knowledge and broadening youth participation. The activities of the European Youth Centres of Budapest and Strasbourg play a central role in the education and training of young 'multipliers' of Council of Europe values. The core of these activities is the programme of study sessions, week-long intercultural non-formal learning activities that are held in cooperation with European youth organisations and networks. These activities bring to the Youth for Democracy programme of the Council of Europe the unique experiences, expectations and concerns of young people regarding contemporary issues and challenges that affect their access to rights and of participating in all spheres of society. The study sessions of the European Youth Centres have been trendsetters in European youth work and remain a benchmark for intercultural youth activities. This manual is published to support the quality of study sessions

and other educational activities in the Youth for Democracy programme. Preparing facilitators and developing their competences is one of the essential prerequisites for enabling exchanges of views and dialogical learning, preparing the participants to act as multipliers in their day-to-day lives, and ultimately contributing to the values and priorities of the Council of Europe and its youth sector. This Manual for Facilitators provides essential information, insights and practical tips in the planning and delivering of non-formal education intercultural activities while taking into account essential approaches of intercultural learning, human rights education and youth participation. This manual is a contribution to the quality of intercultural non-formal education activities of youth organisations and at making those activities a truly learning experience for young people in the Council of Europe.

Guidelines for the Treatment of Alcohol Problems
2021-04-01 Paul S. Haber
The Australian Guidelines for the Treatment of Alcohol Problems have been periodically developed over the past 25 years. In 1993, the first version of these guidelines, titled: 'An outline for the management of alcohol

problems: Quality assurance in the treatment of drug dependence project' was published (Mattick & Jarvis 1993). The Australian Government commissioned an update a decade later (Shand et al. 2003) and a further edition in 2009 to integrate the Guidelines with the Australian Guidelines to Reduce Health Risks from Drinking Alcohol (National Health and Medical Research Council, NHMRC 2009; Haber et al., 2009). The present version of the Guidelines was also commissioned by the Commonwealth of Australia to remain current and integrated with the updated NHMRC consumption guidelines (2020). In order to ensure that guidelines remain relevant, the next set of guidelines should be updated in 2025, consistent with NHMRC recommendation that guidelines be updated every five years. These guidelines aim to provide up-to-date, evidence-based information to clinicians on available treatments for people with alcohol problems and are largely directed towards individual clinicians in practice, such as primary

care physicians (general practitioners, nursing staff), specialist medical practitioners, psychologists and other counsellors, and other health professionals. Some chapters highlight service or system level issues that impact on clinicians and their patients. These include recommendations concerning Aboriginal and Torres Strait Islander peoples, culturally and linguistically diverse groups, stigma, and discrimination. Elsewhere, organisation capacity is implied, such as medical resources for withdrawal management where recommendations indicate use of medications. As all forms of treatment will not be readily available or suitable for all populations or settings, these guidelines may require interpretation and adaptation.

Bennett & Brachman's Hospital Infections
2022-10-21 William R Jarvis Written by the world's foremost leaders in the field of nosocomial infections, Bennett & Brachman's Hospital Infections, 7th Edition, is a must-have text for

preventing Hospital-Acquired Infections (HAIs) in all inpatient and outpatient healthcare settings. This comprehensive volume provides up-to-date, authoritative coverage on all aspects of this vital topic, with editor Dr. William R. Jarvis leading a team of notable contributors from the U.S. Centers for Disease Control and Prevention, as well as additional authors who provide an international perspective on HAIs. The newly revised and expanded seventh edition continues to be an invaluable resource for anyone working in infection prevention and control, quality assurance or risk management in healthcare settings.

The Cambridge Handbook of Psychology and Human Rights 2020-10-15 Neal S. Rubin Written by psychologists, historians, and lawyers, this handbook demonstrates the central role psychological science plays in addressing some of the world's most pressing problems. Over 100 experts from around the world work together to

supply an integrated history of human rights and psychological science using a rights and strengths-based perspective. It highlights what psychologists have done to promote human rights and what continues to be done at the United Nations. With emerging visions for the future uses of psychological theory, education, evidence-based research, and best practices, the chapters offer advice on how to advance the 2030 Global Agenda on Sustainable Development. Challenging the view that human rights are best understood through a political lens, this scholarly collection of essays shows how psychological science may hold the key to nurturing humanitarian values and respect for human dignity.

Principles of Biomedical Sciences and Industry

2022-07-22 Markus Hinder Principles of Biomedical Sciences and Industry Improve your product development skills to bring new ideas to biomedicine The development of innovative healthcare products, such as biodegradable implants, biopharmaceuticals, or companion diagnostics, requires a multi-disciplinary approach that incorporates scientific evidence with novel and innovative ideas to create new and improved products and treatments. Indeed, product development and the integration of science with commercial aspects have become key challenges for scientists working in the pharmaceutical, biotech, and medtech industries. Using a multi-pronged approach to development, Principles of Biomedical Sciences and Industry combines ideas and methodologies from four of the central areas of focus in the biomedical arena: pharmaceuticals, diagnostics, biomaterials, and medical devices. In doing so, the book covers the entire product lifecycle, from translating a scientific idea into a

prototype to product development, launch, and management. Principles of Biomedical Sciences and Industry readers will also find: Several case studies from the most important product categories (pharmaceuticals, diagnostics, medical devices, combination products) Chapters dealing with toxicology and safety risks in development, as well as regulatory approval Key business aspects including how to secure funding, managing intellectual property, and price regulation in the market An ideal resource for teachers and students that conveys the information in an easily-digestible format Ideal for advanced students and young professionals pursuing a career in the biomedical and healthcare industries, Principles of Biomedical Sciences and Industry is an essential reference for those in pharmaceutical industry, biotechnologists, medicinal chemists, bio-engineers, pharma engineers, and management consultants.

Emergency Response Guidebook 2013-06-04 U.S.

Department of Transportation Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the Emergency Response Guidebook. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous

substances or dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials.

Biobetters 2015-08-21 Amy Rosenberg “Biobetters: Protein Engineering to Approach the Curative” discusses the optimization of protein therapeutic products for treatment of human diseases. It is based on the fact that though numerous important therapeutic protein products have been developed for life threatening and chronic diseases that possess acceptable safety and efficacy profiles, these products have generally not been reexamined and modified for an improved clinical performance, with enhancements both to safety and efficacy profiles. Advances in protein engineering, coupled with greatly enhanced understanding of critical

product quality attributes for efficacy and safety, make it possible to optimize predecessor products for clinical performance, thereby enhancing patient quality of life and with the potential for great savings in health care costs. Yet despite such knowledge, there is little movement towards such modifications. This book examines engineering protein therapeutic products such that they exhibit an optimal, not just an adequate, clinical performance profile. Two product classes, therapeutic enzymes for lysosomal storage diseases (enzyme replacement therapies, ERT) and monoclonal antibodies (mAbs), are used as examples of what modifications to such proteins could be made to enhance clinical performance, “closer to a cure” as it were. For ERT, the key to optimizing clinical performance is to ensure the ERT is endowed with moieties that target the protein to the relevant target tissue. Thus, for Gaucher Disease, our best example of how to optimize an ERT to address a disease that manifests in specific target tissues (macrophages and monocytes), the

enzyme has been extensively modified to target macrophages. For diseases such as Pompe Disease, largely a disorder of muscle, optimal performance of ERT will depend on endowing the enzyme with the ability to be taken up via the Mannose 6 Phosphate Receptor, and so one of the chapters in the book will discuss such approaches. Moreover, a major failure of biotechnology based products is to gain access to the CNS, a key target tissue in numerous diseases. Thus, a chapter has been devoted to strategies to access the CNS. Additionally, immune responses to therapeutic proteins can be highly problematic, eliminating the efficacy of life saving or highly effective protein therapeutics. This is especially poignant in the case of Pompe Disease wherein great improvement in muscle strength and functionality is lost following development of an immune response to the ERT with consequent patient deterioration and death. Thus, a chapter regarding protein engineering, as well as other non-clinical approaches to diminishing

immunogenicity is a valuable part of the book. Monoclonal antibodies (mAbs) can be engineered to bind targets relevant to a wide variety of diseases; binding affinity, however, is only part of the equation and one of the chapters will present a molecular assessment approach that balances affinity with pharmacokinetics and manufacturability. As with other proteins immunogenicity can be problematic, being responsible for loss of efficacy of anti-TNF mAbs, often after prolonged successful treatment. The authors will also share their perspective on the consequences of physico-chemical modifications occurring to mAbs once they reach the circulation or their target, a research area open to further development from a protein engineering as well as analytical perspective. This book will also discuss novel platforms for protein therapeutics, technologies that exceed mAbs with respect to potency, and hence, potentially efficacy. These platforms consist largely of repeat domain proteins with very high affinity for their target ligands, but

while potentially more efficacious, immunogenicity may be a major problem limiting use. The economics surrounding the issue of biobetters is another high-profile issue - this final chapter will explore the incentives and disincentives for developing biobetters and consider incentives that might make their pursuit more rewarding.
