Created by Lloyd M. Dunn and Douglas M. Dunn, the assessment is crafted to measure receptive vocabulary for Standard American English. It is fast and easy to administer, saving precious time so that attention can be set on executing successful strategies.

The PPVT-4 test subject matter encompasses a wide array of receptive vocabulary levels, extending from pre-kindergarten through adulthood. The assessment problems widely sample words that depict 20 topic fields (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and home and school vocabulary.

The evaluation offers two equivalent forms which contain different vocabulary items, ensuring that the test-taker has not “learned” the evaluation. One edition can be employed prior to intervention implementation to measure individuals’ vocabulary comprehension and the second form can be utilized for re-assessment to evaluate and record progress. The PPVT-4 also features a distinctive Growth Scale Value (GSV) which is reactive to small changes with time.
