evaluation that has been in use for almost half a century. Created by Lloyd M. Dunn and Douglas M. Dunn, the evaluation is designed to assess vocabulary comprehension for American English. It is fast and effortless to carry out, saving precious time so that attention can be set on executing intelligent approaches.

The PPVT-4 assessment material includes a extensive scope of vocabulary comprehension ranks, spanning from pre-kindergarten through adult age. The evaluation items widely sample words that depict 20 content domains (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and household and school vocabulary. The assessment provides two identical editions which include different vocabulary terms, ensuring that the individual has not "memorized" the assessment. One version can be used before intervention to evaluate people's vocabulary comprehension and the second version can be utilized for re-evaluation to measure and note advancement. The PPVT-4 also contains a special Growth Scale Value (GSV) which is sensitive to slight changes over time.
