Microhistories of Communication Studies 2018-04-19 Pat J. organizations. Using twelve histories of micro-dimensions of communication studies, this volume shows how sometimes small decisions, single scholars, individual departments, and marginalized voices can have dramatic roles in the history and future of an academic discipline. As a compilation of micro-histories with macro-lessons this volume stands alone in communication studies. Read as a companion to *A Century of Communication Studies*, the National Communication Association's centennial volume, it offers rich detail, missing links, and local narratives that fully flesh out the discipline. In either case, no education in communication studies is complete without an understanding of the themes, challenges, and triumphs embodied by the twelve micro-histories offered in this book. *Media Convergence Handbook - Vol. 1 2015-11-20 Artur Lugmayr* The *Media Convergence Handbook* sheds new light on the complexity of media convergence and the related business challenges. Approaching the topic from a managerial, technological as well as end-consumer perspective, it acts as a reference book and educational resource in the field. Media convergence at business level may imply transforming business models and using multiplatform content production and distribution tools. However, it is shown that the implementation of convergence strategies can only succeed when expectations and aspirations of every actor involved are taken into account. Media consumers, content producers and managers face different challenges in the process of media convergence.

Cristiano Bee This book evaluates the role that civic engagement, political participation and active citizenship can play in promoting the establishment of a European polity. The chapters included here examine how the practice of active citizenship is managed and constructed in the context of a European drive to increase civic engagement and political participation in three member states (Portugal, Italy and the UK) and one accession country (Turkey). Looking at both processes and policies promoting active citizenship at the European and national levels, this book uncovers current discourses as well as political priorities and values that surround the

Of particular interest are debates about the nature and level of civic and political participation and engagement of marginal groups (women, youths, migrants and minorities) as they are particularly vulnerable to social exclusion. The book focuses on the interaction between institutions and civil society actors, addressing a number of questions related to their reciprocal role in influencing, shaping, criticising or disregarding certain political priorities. insights on decolonising media and communication studies education from diverse African scholars at different stages of their careers. These academics, located on the continent and in the diaspora, share an interest in decolonising higher education broadly and media and communication studies teaching and learning in particular. Although many African countries gained flag independence from different European colonial powers between the 1950s and the 1970s, this book argues that former colonies remain ensnared in a colonial power matrix. Many African universities did not jettison ways of teaching and learning established during colonialism, and even those journalism, communication, and media studies training programmes which were established after the attainment of flag independence did not place decolonial agendas **Downloaded from [vla.ramtech.uri.edu](http://vla.ramtech.uri.edu) on December 6, 2023 by Dona e Williamson**

and centre when setting them up. Starting with big picture thematic questions around decolonisation, the book goes on to consider what the implications of change would be for students and instructors, before reflecting on how far it is possible to decolonise curricula and syllabi and what this might look like in practice across a range of subject areas and country contexts. Overall, this book presents a nuanced picture of what a decolonised media and communication studies education could look like in sub-Saharan Africa. This book is essential for researchers in Africa in disciplines such as media and communication studies, journalism, film studies, cultural studies, and higher education studies. More broadly, the concepts and ideas on decolonising teaching and learning discussed in the book are relevant to instructors in any discipline who are interested in

doing the decolonial work of contesting coloniality.

Faced with a general atmosphere of disillusionment in the European project, one of the core questions tackled by the volume's contributors is: what scope is there for European media policy that can exist beyond the national level? Uniquely, the volume's chapters are structured around four key policy themes: media convergence; the continued role and position of public regulatory intervention in media policy; policy issues arising from the development of new electronic communication network environments; and lessons for European media policy from cases beyond the EU. In its chapters, the volume provides enriched understandings of the role and significance of policy actors, institutions, structures, instruments and processes in communication and media policy.

### The Education Invasion

2017-03-14 Joy Pullmann Most Americans had no idea what Common Core was in 2013, according to polls. But it had been creeping into schools nationwide over the previous three years, and children were feeling its effects. They cried over math homework so mystifying their parents could not help them, even in elementary school. They read motley assortments of

How did this latest and most sweeping “reform” of American education come in mostly under the radar? Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers, and it led to a big tangle of history and politics, intrigue and arrogance. She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K–12 classes, and how the Obama administration pressured states to adopt them. Thus a federalized education scheme took root, despite legal prohibitions against federal involvement in curriculum. Common Core and its testing regime were touted as “an

Drawing on a wealth of research, this book examines how social and territorial boundaries strongly influenced police practices and behaviour in South Africa, and how social delineations amplify and distort existing police prejudices against those communities on the other side of the boundary. Focusing on cases of high-density police operations, public-order policing and the recent policing of the COVID-19 lockdown, this book argues that poor economic conditions combined with an increased militarisation of the SAPS and a decline in public trust in the police will result in boundaries continuing to fundamentally inform police work in South Africa. Knowledge and expertise, especially of the kind that can shape public opinion, have been traditionally the domain of individuals holding degrees awarded by higher learning institutions or occupying formal positions in notable organizations. Expertise is validated by reputations established in an institutionalized marketplace of ideas with a limited number of “available seats” and a stringent process of selection and retention of names, ideas, topics and facts of interest. However, the social media revolution, which has enabled over two billion Internet users not only to consume, but also to produce information and knowledge, has created a secondary and very active informal marketplace of ideas and knowledge. Anchored by platforms like Wikipedia, YouTube, Facebook and Twitter, this informal marketplace has low barriers to entry and has become a gigantic and potentially

questionable, knowledge resource for the public at large. Roles, Trust and Reputation in Social Media Knowledge Markets will discuss some of the emerging trends in defining, measuring and operationalizing reputation as a new and essential component of the knowledge that is generated and consumed online. The book will propose a future research agenda related to these issues. The ultimate goal of research agenda being to shape the next generation of theoretical and analytic strategies needed for understanding how knowledge markets are influenced by social interactions and reputations built around functional roles. The authors, including leading scholars and young innovators, will share with the readers some of the main lessons they have learned from their own work in these areas and will discuss the issues, topics and sub-areas that they find under-studied or that promise the greatest

payoff in the future. The discussion will be placed in the context of social network analysis and “big data” research. Roles, Trust and Reputation in Social Media Knowledge Markets exposes issues that have not been satisfactorily dealt with in the current literature, as the research agenda in reputation and authorship is still emerging. In a broader sense, the volume aims to change the way in which knowledge generation in social media spaces is understood and utilized. ownership and concentration has major implications for politics, business, culture, regulation, and innovation. It is also a highly contentious subject of public debate in many countries around the world. In Italy, Silvio Berlusconi's companies have dominated Italian politics. Televisa has been accused of taking cash for positive coverage of politicians in Mexico. Even in tiny Iceland, the regulation of media concentration led to that country's first and only public referendum. Who Owns the World's Media? moves beyond the rhetoric of free media and free markets to provide a dispassionate and data-driven analysis of global media ownership trends and their drivers. Based on an extensive data collection effort from scholars around the world, the book covers thirteen media industries, including television, newspapers, book publishing, film, search engines, ISPs, wireless

telecommunication and others, across a ten to twenty-five year period in thirty countries. In many countries--like Egypt, China, or Russia--little to no data exists and the publication of these chapters will become authoritative resources on the subject in those regions. After examining each country, Noam and his collaborators offer comparisons and analysis across industries, regions, and development levels. They also calculate overall national concentration trends beyond specific media industries, the market share of individual companies in the overall national media sector, and the size and trends of transnational companies in overall global media. This definitive global study of the extent and impact of media concentration will be an invaluable resource for communications, public policy, law, and business scholars in doing research and also for media,

telecom, and IT companies and financial institutions in the private sector.

Trilingual Education in Hong Kong Primary Schools 2019-02-26  
Lixun Wang This book focuses on Hong Kong as a multilingual society. It investigates how trilingual education is implemented in Hong Kong primary schools. Based on a large scale survey of 155 Hong Kong schools and in-depth case studies in 3 selected schools, the book gives an overview of trilingual education in Hong Kong primary schools, revealing the views on trilingual education of all stakeholders: school principals, panel chairs, subject teachers, students, and parents. The research findings presented in this book suggest that the implementation of trilingual education varies significantly from school to school, as does the effectiveness of the trilingual education models

how students' views towards the use of different media of instruction (MoIs) also vary, and how their mother-tongue backgrounds affect their perceptions. By documenting views, policies and implementation methods, the book provides insight into the practice of trilingual education in Hong Kong and offers suggestions on potentially effective implementation methods.

mingled faiths, and the Hindu, Muslim and Sikh renaissances that created a twentieth-century clash of communities and led to partition. Political Conflict in Pakistan addresses multiple clashes: between the high culture as a mission to transform society, and the low culture of the land and the people; between those committed to the establishment's institutional constitutional framework and those seeking to dismantle the "colonial" state; between the corrupt and those seeking to hold them to account; between the political class and the middle class; and between civil and military power. The author exposes how the ruling elite centralised power through the militarisation and judicialization of politics, rendering the federalist arrangement an empty shell and thus grossly alienating the provinces. He sets all this within the contexts of education and media as breeders

Cognitive Interviewing Practice  
2014-11-10 Debbie Collins The use of the cognitive interviewing method for survey question testing has proliferated and evolved over the past 30 years. In more recent years the method has been applied to the evaluation of information letters and leaflets and to research consent forms. This book provides a practical handbook for implementing cognitive interviewing methods in the context of applied social policy research, based on the approach used by the authors at the NatCen Social Research (NatCen) where cognitive interviewing methods have been used for well over a decade. The book provides

Throughout the book, the focus is on providing practical and hands-on guidance around elements such as sampling and recruitment, designing probes, interviewing skills, data management and analysis and how to interpret the findings and use them to improve survey questions and other documents. The book also covers cognitive interviewing in different survey modes, in cross national, cross cultural and multilingual settings and discusses some other potential uses of the method.
