Nurse Writers of the Great War 2016-02-15 Christine Hallett This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. The First World War was the first 'total war'. Its industrial weaponry damaged millions of men and drove whole armies underground into dangerously unhealthy trenches. Many were killed. Many more suffered terrible, life-threatening injuries: wound infections such as gas gangrene and tetanus, exposure to extremes of temperature, emotional trauma and systemic disease. In an effort to alleviate this suffering, tens of thousands of women volunteered to serve as nurses. Of these, some were experienced professionals, while others had undergone only minimal training. But regardless of their preparation, they would all gain a unique understanding of the conditions of industrial warfare. Until recently their contributions, both to the saving of lives and to our understanding of warfare, have remained largely hidden from view. By combining biographical research with textual analysis, Nurse writers of the great war opens a window onto their insights into the nature of nursing and the impact of warfare.

Italy In The Second World War: Memories And Documents 2015-11-06 Marshal Pietro Badoglio Marshal Pietro Badoglio was involved in the highest levels of the Italian political hierarchy ever since his early successes in the First World War, for which he was promoted General. He was head of the Italian Armed Forces from 1925 to 1940, and did his best to raise the military to a level that might match the expansionist views of Mussolini. He presided over the brutal invasion of Ethiopia, but nationally he acted as a counter-balance to Mussolini's pre-World War II schemes. Unable to stop the inevitable disaster following the Italian-German Pact of Steel and the onset of war, he resigned as Chief Of Staff after the humiliating reverses of the Italian invasion of Greece. He was brought back into the political spotlight in 1943, after the fall of Mussolini, and was named Prime Minister of Italy during the turbulent months of their volte face change of sides. His position was unenviable, caught between the Italian people who cried out for peace and the Allied powers who pursued German defeat in Italy by armed force. In this fascinating book he recounts his memories and recollections of Italy during the Second World War, particularly focussed on his attempts to hold the country together in 1943 and 1944.

Committee of Ministers Education plays an essential role in the promotion of the core values of the Council of Europe: democracy, human rights And The rule of law, As well as in the prevention of human rights violations. More generally, education is increasingly seen as a defence against the rise of violence, racism, extremism, xenophobia, discrimination and intolerance. Transatlantic Memories of Slavery: Remembering the Past, Changing the Future 2015-08-10 Elisa Bordin While the memorialization of slavery has generated an impressive number of publications, relatively few studies deal with this subject from a transnational, transdisciplinary and transracial standpoint. As a historical phenomenon that crossed borders and traversed national communities and ethnic groups producing alliances that did not overlap with received identities, slavery as well as its memory call for comparative investigations that may bring to light aspects obscured by the predominant visibility of US-American and British narratives of the past. This study addresses the memory of slavery from a transnational perspective. It brings into dialogue texts and practices from the transatlantic world, offering comparative analyses which interlace the variety of memories emerging in diverse national contexts and fields of study and shed light on the ways local countermemories have interacted with and responded to hegemonic narratives of slavery. The inclusion of Brazil and the French, English, and Spanish Caribbean alongside the United States and Europe, and the variety of investigative approaches-ranging from cinema, popular culture and visual culture studies to anthropology and literary studies-expand the current understanding of the slave past and how it is reimagined today. This fascinating book brings freshness to the topic by considering objects of investigation which have so far remained marginal in the academic debate, such as heroic memorials, civic landscape, white family sagas, Young Adult literature of slavery, Latin American telenovelas and filmic narrations within and beyond Hollywood. What emerges is a multifarious set of memories, which keep changing according to generation, race, gender, nation and political urgency and indicate the advancing of a dynamic, mobilized memorialization of slavery willing to move beyond mourning towards a more militant stand for justice. This is an important book for those interested in African American, American, and Latin American studies and working across literature, cinema, visual arts, and public culture. It will also be useful to public official and civil servants interested in the question of slavery and its present memory.

White on Arrival 2004-09-30 Thomas A. Guglielmo Taking the mass Italian immigration of the late 19th century as his starting point and drawing on dozens of oral histories and a diverse array of primary sources in English and Italian, Guglielmo focuses on how perceptions of Italians' race and color were shaped in one of America's great centers of immigration and labor, Chicago. His account skillfully weaves together the major events of Chicago immigrant history--the "Chicago Color Riot" of 1919, the rise of Italian organized crime, and the rise of industrial unionism--with national and international events--such as the rise of fascism and the Italian-Ethiopian War of 1935-36--to present the story of how Italians approached, learned, and lived race. By tracking their evolving position in the city's racial hierarchy, Guglielmo reveals the impact of racial classification--both formal and informal--on immigrants' abilities to acquire homes and jobs, start families, and gain opportunities in America. White on Arrival was the winner of the 2004 Frederick Jackson Turner Award of the Organization of American Historians

The Making of Modern Japan 2009-07-01 Marius B. Jansen Magisterial in vision, sweeping in scope, this monumental work presents a seamless account of Japanese society during the modern era, from 1600 to the present. A distillation of more than fifty years' engagement with Japan and its history, it is the crowning work of our leading interpreter of the modern Japanese experience. Since 1600 Japan has undergone three periods of wrenching social and institutional change, following the imposition of hegemonic order on feudal society by the Tokugawa shogun; the opening of Japan's ports by Commodore Perry; and defeat in World War II. The Making of Modern Japan charts these changes: the social engineering begun with the founding of the shogunate in 1600, the emergence of village and castle towns with consumer populations, and the diffusion of samurai values in the culture. Marius Jansen covers the making of the modern state, the adaptation of Western models, growing international trade, the broadening opportunity in Japanese society with industrialization, and the postwar occupation reforms imposed by General MacArthur. Throughout, the book gives voice to the individuals and views that have shaped the actions and beliefs of the Japanese, with writers, artists, and thinkers, as well as political leaders given their due. The story this book tells, though marked by profound changes, is also one of remarkable consistency, in which continuities outweigh upheavals in the development of society, and successive waves of outside influence have only served to strengthen a sense of what is unique and native to Japanese experience. The Making of Modern Japan takes us to the core of this experience as it illuminates one of the contemporary world's most compelling transformations.

On Racial Icons 2015-07-15 Nicole R. Fleetwood What meaning does the American public attach to images of key black political, social, and cultural figures? Considering photography's role as a means of documenting historical progress, what is the representational currency of these images? How do racial icons "signify"? Nicole R. Fleetwood's answers to these questions will change the way you think about the next photograph that you see depicting a racial event, black celebrity, or public figure. In *On Racial Icons*, Fleetwood focuses a sustained look on photography in documenting black public life, exploring the ways in which iconic images function as celebrations of national and racial progress at times or as a gauge of collective racial wounds in moments of crisis. Offering an overview of photography's ability to capture shifting race relations, Fleetwood spotlights in each chapter a different set of iconic images in key sectors of public life. She considers flash points of racialized violence in photographs of Trayvon Martin and Emmett Till; the political, aesthetic, and cultural shifts marked by the rise of pop stars such as Diana Ross; and the power and precarity of such black sports icons as Serena Williams and LeBron James; and she does not miss Barack Obama and his family along the way. *On Racial Icons* is an eye-opener in every sense of the phrase. Women and Men on the Overland Trail 2008-10-01 John Mack Faragher This classic book offers a lively and penetrating analysis of what the overland journey was really like for midwestern farm families in the mid-1800s. Through the subtle use of contemporary diaries, memoirs, and even folk songs, John Mack Faragher dispels the common stereotypes of male and female roles and reveals the dynamic of pioneer family relationships. This edition includes a new preface in which Faragher looks back on the social context in which he formulated his original thesis and provides a new supplemental bibliography. Praise for the earlier edition: 'Faragher has made excellent use of the Overland Trail materials, using them to illuminate the society the emigrants left as well as the one they constructed en route. His study should be important to a wide range of readers, especially those interested in family history, migration and western history, and women's history.'--Kathryn Kish Sklar 'An enlightening study.'--American West 'A helpful study which not only illuminates the daily life of rural Americans but which also begins to compensate for the male orientation of so much of western history.'--Journal of Social History

Gender and imperialism 2017-03-01 Clare Midgley This book marks an important new intervention into a vibrant area of scholarship, creating a dialogue between the histories of imperialism and of women and gender. By engaging critically with both traditional British imperial history and colonial discourse analysis, the essays demonstrate how feminist historians can play a central role in creating new histories of British imperialism. Chronologically, the focus is on the late eighteenth to early twentieth centuries, while geographically the essays range from the Caribbean to Australia and span India, Africa, Ireland and Britain itself. Topics explored include the question of female agency in imperial contexts, the relationships between feminism and nationalism, and questions of sexuality, masculinity and imperial power.

Ota Benga under My Mother's Roof 2012-08-27 Carrie Allen McCray In Ota Benga under My Mother's Roof, Carrie Allen McCray (1913–2008) uses poignant and personal verse to trace the ill-fated life of the Congolese pygmy who was famously exhibited in the Bronx Zoo in 1906 before being taken in by the McCray family of Lynchburg, Virginia. Rooted in the rich historical and autobiographic context of her own experiences with Benga, McCray offers compelling, dexterous poems that place Benga's story within the racial milieu of the early twentieth century as the burgeoning science of social anthropology worked to classify humans based on race

European Women and the Second British Empire 1991-05-22 Margaret Strobel "It enhances our understanding of intracultural and cross-cultural relationships and raises significant questions about the complexities of the colonial phenomenon in the modern era." —Journal of World History "Provides a powerful and important analysis foregrounding the ideological construction of whiteness in understandings of gender and sexuality. . . . Margaret Strobel manages to provide a convincing analysis of the contradictory and often challenging space occupied by European women in the project of empire." —Signs "Strobel is to be highly commended for an historical analysis that brings critical light to bear on the complex interactions of gender, race, and class that have shadowed both European men's and women's participation in colonialism." —Women and Politics " . . . a clear exposition and synthesis . . . In this useful introduction to a new field, Strobel lays out clearly the arguments on which it is built. Her book makes it possible to acquaint students with the initial array of scholarship that is already growing. She also demonstrates that rewriting an imperial history that is sensitive to gender, culture, race, sexuality, and power is an exhilarating enterprise." —American Historical Review Based on the published accounts of travelers and officials' wives, biographies and other materials, this is a lively, fast-paced account of the roles of white women in the British empire, from about 1880 to the recent past. The European women of the second British empire carved out a space for themselves amid the options made available to them by British expansion, but they too were treated as inferiors—the inferior sex within the superior race.

Diplomacy and Intelligence in the Nineteenth-Century Mediterranean World 2019-02-21 Mika Suonpää Diplomacy and Intelligence in the Nineteenth-Century Mediterranean World examines the activities of diplomats in the expansion of their home country's informal imperial ambitions. Taking a comparative approach, the book combines a focus on the extension of the informal British Empire with an exploration of the imperial ambitions of other states, such as France, Austro-Hungary and Japan. The authors combine approaches from diplomatic history, intelligence history and microhistory in order to give new insights into the Mediterranean as a 'contested space' between competing informal empires. This study will be of great interest to anyone interested in the history of the Mediterranean region during the 19th century.

Postcolonial Theory 1997 B. J. Moore-Gilbert Much controversy has recently come to surround the status and value of postcolonial modes of cultural analysis. Postcolonial theory has been challenged on several fronts: on its interdisciplinary competence, on the politics of its institutional location, and its implicit will to have power over other kinds of postcolonial analysis, many of which have been established for much longer than postcolonial theory itself. The ensuing debate has often become so heated, even personalized, that the issues at stake have been obscured. In what is the most comprehensive and accessible survey of the field to date, Bart Moore-Gilbert systematically examines the objections that have been raised against postcolonial theory, revealing the simplifications and exaggerations on both sides of the argument. He provides a detailed institutional history of the ways in which the relationship between culture and colonialism was traditionally studied in the West, then traces the emergence of alternative forms of postcolonial analysis of such questions. He gives an extremely careful presentation of the complex and elusive work of the three principal representatives of postcolonial theory, Gayatri Spivak, Edward Said and Homi Bhabha, and considers the criticisms they have faced, from an alleged Eurocentrism to an obfuscatory prose style. And he assesses the overlaps and differences between postcolonial theory and other forms of postcolonial criticism. Finally he considers the ways in which postcolonial analysis may be connected with different histories of oppression, and looks at how such a heterogeneous theory can be reconciled with political questions of solidarity and alliance in the continuing struggle for cultural decolonization.

Ishi the Last Yahi 1979 Robert F. Heizer From the Introduction by Theodora Kroeber, Editor: The number of documents having to do with Ishi is finite. For the reader who wishes to know something of the sources from which the story flows, there are reproduced here the principal out-of-print and most inaccessible primary materials on Ishi and the Yahi Indians. Of first importance are monographs on Ishi, his people, his languages, his medical history, whose authors are Professors Thomas T. Waterman, Alfred L. Kroeber, Edward Sapir, and Saxton T. Pope, M.D. Most of these monographs are here reprinted in full. Next in interest and importance are the books of reminiscences concerning the Yahi Indians written by white settlers in or adjacent to Yahi country in the years following closely upon the gold rush. These are usually in small editions, long out of print. Two, those written by Carson and R. A. Anderson, are reprinted in full; the others, only those parts having to do with Ishi and the Yahi. There are letters bearing on our subject, newspaper accounts, and pictures, of which we include significant examples. There are as well books and articles having to do only in part with Ishi and his people. We reprint only those parts. Beyond these essential primary materials, the editors made hard choices to keep the number of pages realistic. Readers with areas of special interest will regret some of our exclusions among the secondary but often fascinating accounts: of archaeological findings in the Yahi home\^ of linguistic quirks and grammatical technicalities—a large literature, difficult for the uninitiate; of medical history when it adds nothing to our understanding of the man Ishi. Our order of presentation is chronological, beginning with the background materials, then going to Ishi's first entry into the outside world, then to his years at the museum, and, finally, to his death. We have not included the occasional newspaper stories of still-living Yahi Indians supposed to have been seen or heard in the Yahi hills and caves after Ishi's departure, since none were ever substantiated. When in 1914 Ishi returned to his old home for a few weeks with Waterman, Kroeber, Pope, and Pope's son, Saxton, Jr., he found the land, the caves, and the village sites as he had left them.

Rebel and Saint 2023-04-28 Julia A. Clancy-Smith Julia Clancy-Smith's unprecedented study brings us a remarkable view of North African history from the perspective of the North Africans themselves. Focusing on the religious beliefs and political actions of Muslim elites and their followers in Algeria and Tunisia, she provides a richly detailed analysis of resistance and accommodation to colonial rule. Clancy-Smith demonstrates the continuities between the eras of Turkish and French rule as well as the importance of regional ties among elite families in defining Saharan political cultures. She rejects the position that Algerians and Tunisians were invariably victims of western colonial aggression, arguing instead that Muslim notables understood the outside world and were quite capable of manipulating the massive changes occurring around them.

Colonialism and Homosexuality 2008-01-28 Robert Aldrich Colonialism and Homosexuality is a thorough investigation of the connections of homosexuality and imperialism from the late 1800s - the era of 'new imperialism' - until the era of decolonization. Robert Aldrich reconstructs the context of a number of liaisons, including those of famous men such as Cecil Rhodes, E.M. Forster or André Gide, and the historical situations which produced both the Europeans and their non-Western lovers. Colonial lands, which in the late nineteenth and early twentieth century included most of Africa, South and Southeast Asia and the islands of the Pacific and Indian Oceans and the Caribbean, provided a haven for many Europeans whose sexual inclinations did not fit neatly into the constraints of European society. Each of the case-studies is a micro-history of a particular colonial situation, a sexual encounter, and its wider implications for cultural and political life. Students both of colonial history, and of gender and queer studies, will find this an informative read.

Empire and sexuality 2017-03-01 Ronald Hyam Established in the belief that imperialism as a cultural phenomenon had as significant an effect on the dominant as it did on the subordinate societies, the "Studies in Imperialism" series seeks to develop the new socio-cultural approach which has emerged through cross-disciplinary work on popular culture, media studies, art history, the study of education and religion, sports history and children's literature. The cultural emphasis embraces studies of migration and race, while the older political, and constitutional, economic and military concerns are never far away. It incorporates comparative work on European and American empire-building, with the chronological focus primarily, though not exclusively, on the 19th and 20th centuries, when these cultural exchanges were most powerfully at work. This work explores the sexual attitudes and activities of those who ran the British Empire. The study explains the pervasive importance of sexuality in the Victorian Empire, both for individuals and as a general dynamic in the working of the system. Among the topics included in the book are prostitution, the manners and mores of missionaries and aspects of race in sexual behaviour.

Historical Dictionary of United States-Japan Relations 2007-01-29 John Van Sant The Historical Dictionary of United States-Japan Relations traces this one hundred and fifty year relationship through a chronology, an introduction, appendixes, a bibliography, and cross-referenced dictionary entries on key persons, places, events, institutions, and organizations. Covering everything from Walt Whitman's poem, A Broadway Pageant, commemorating the visit of the Shogun's Embassy to the U.S. in 1860, to zaibatsu, this ready reference is an excellent starting point for the study of Japan's dealings with the U.S.

Masculinity and Male Codes of Honor in Modern France 1998-11-30 Robert A. Nye In this study of upper-class masculinity from the end of the ancien régime in 1789

to the end of World War I, Robert Nye argues that manhood, masculinity, and male sexuality is, like femininity, a cultural construct, comprising a strict set of heroic ideals and codes of honor which few men have been able to realize in practice. In doing so, Nye destabilizes and historicizes the male body, and incorporates gender into the brand of cultural history inaugurated by Norbert Elias in the 1930s.

Japanese styles of acupuncture referred to as "meridian therapy," tend to put more emphasis on needling technique and feeling meridians in diagnosis.

The needles used in acupuncture are very small and you will probably feel a slight twitch when the needle goes in. They will be inserted carefully to ¼ or an inch in depth and will stay there from 45 minutes to an hour depending on the condition of the patient.

If inserted properly, you should feel some cramping, distention, electric sensation or tingling which means that the treatment is working.

Needles used for acupuncture especially in the US are clean because they are required to be disposable. This prevents any chance that those who go for treatment will be contaminated by a communicable disease like hepatitis or HIV.

They can determine what created the profits as well as the losses. Accountants form some sort of business equation so justify the profits & losses of a business. By doing so, they can easily tell a company's net worth.

It seems that by simply starting to define one accounting term, it eventually leads to defining other terms as well. Net worth is another term that is quite difficult to understand. It refers to the resulting amount after deducting the liabilities of a company from the assets. Private companies refer to net worth as owner's equity.

Why owner's equity? Well, after deducting all the liabilities, what's left basically belongs to the owner. In the case of public companies, the profit of the business is returned as dividends to shareholders. As you can see, before owner or shareholders of a company can take hold of the profits, all liabilities must be deducted first.

Unlike smoking cessation medications and nicotine replacement therapy products, acupuncture does not employ chemically manufactured substances. There is also no risk of weight gain during therapy. In conjunction with helping a patient quit smoking, it can also curb appetite, thus reducing food cravings. If you have tried several methods in smoking cessation to no avail, perhaps it is high time you consider the alternative method that is acupuncture. Primary amenorrhoea develops from the onset of menstrual periods. In this condition, the adolescent might not get periods when she enters puberty. Secondary amenorrhoea is a condition where periods become irregular after a period of time and not from the start.

There are many causes of amenorrhoea such as ovulation abnormality, eating disorders, birth defects, anatomical abnormalities, malnourishment, anorexia, bulimia, pregnancy, over exercising, thyroid disorder, obesity and other medical conditions. Out of these ovulation abnormalities are a common cause for absent or irregular periods. It is a must that an adolescent start getting menses at least by the age of sixteen. If not, anatomical abnormality, birth defect and other medical conditions are the cause. Adolescents who participate in sports actively and are athletic have a lower body fat content because of which they have absent menses. A specific area or point on the ear corresponds to a particular organ, such as the heart, kidneys, or liver. Thus, the needles are placed in particular points around the ear and on the ear cartilage.

Staplepnuncture is a method used in smoking cessation, wherein staples are placed for a certain period anywhere on the ear area to provide stimulation.

As a result, a person may feel persistent headaches, muscle pain, fever, weakness, or in the worst case, becomes afflicted with more serious health conditions.

Acupuncture has its origins in ancient Chinese philosophy and practice. More than ten thousand years ago, during the Old Stone Age of China, stones were fashioned into knives for medical purposes. These accounts are further evidenced by unearthed stone needles found to be of the same types used during the New Stone Age.

When adolescents wear braces they have to take certain precautions in order to avoid any more oral health complications. The most important precautionary measure is to brush the teeth regularly after every meal. Since the food can be easily lodged in braces, it is a good idea to brush carefully with soft bristles toothbrush and fluoride toothpaste. In the morning, the adolescent must floss between the braces and teeth. Food stuffs which are sticky or hard must be avoided as they are very difficult to remove. Foods like caramel, chew candy, popcorn, and nuts must be avoided. Cleaning must be done by the orthodontist or general dentist, every five to six months.

The wisdom teeth or third molars can grow in people of the age fifteen to twenty five. These teeth cause problem, because most of the mouths are too small to adjust new teeth and hence they need to be removed. If the wisdom tooth has place to grow, without affecting other teeth, they can be left to themselves. But if the adolescent experiences pain, facial swelling, mouth infection and gum-line swelling, then they should be extracted immediately. They can also destroy the second molars and impact other tooth. Various gum and jaw diseases can be caused. There can be a tumor development; cysts development and plaque build up. Hence, a surgery is performed to remove the tooth or teeth. The gum tissue covering the wisdom tooth is removed and the connective tissue connecting the tooth to the bone is detached. The tooth is then removed and the opening is sutured. A general dentist can perform wisdom tooth surgery in the local office using anesthesia.

Five times common than asthma is tooth cavities. The tooth above the gum line is made up of enamel, the hardest tissue within the human body. The tooth below the gum-line comprise of nerves, roots and dentin. Dentin is another type of tissue and isn't as hard as the enamel. The acid which leads to tooth decay is produced by bacteria. These acids, along with dietary sugar, attack the enamel and eat away the minerals within the enamel, until a cavity is formed. This is known as tooth cavity. The biggest prevention against dental cavities is brushing teeth twice a day and even better, after every meal with fluoride toothpaste and soft bristle toothbrush. Carbonated drinks must be avoided strictly and must be replaced with fruit juices and sugary food must be avoided. Intake of fluoridated water also helps a lot or fluoride supplements can be used as replacement.

Cholesterol in Adolescents

Parts of adolescent's body are filled with a waxy stuff identified as cholesterol. It helps to produce vitamin D, cell membranes and certain hormones. Blood cholesterol comes from two different sources, liver within the body and food. The adolescent's liver produces enough cholesterol to carry out proper functioning.

The blood acts as the carrier of cholesterol and transports it to different parts of the body. They are transported in round particle form known as lipoproteins. There are two types of lipoproteins called the low density lipoproteins or LDL and high density lipoproteins or HDL. Low density lipoprotein or LDL cholesterol is commonly known as bad cholesterol. It helps in the building up of plaque in arteries and this condition is known as atherosclerosis. The LDL level must be low in the blood and if it is high it must be decreased. Healthy weight must be maintained and exercise should be done regularly. Food items which have high contents of calories, dietary cholesterol and saturated fat must be avoided.

High density lipoprotein or HDL cholesterol is the good cholesterol. It is actually a kind of fat in blood which helps to remove bad cholesterol from the body and stops the build up of plaque in the arteries. The more the HDL cholesterol in the blood the better it is. The HDL can be raised by at least twenty minutes of exercising daily, decreasing body mass and keeping away from food with saturated fat. Some adolescents need to take medications in order to increase HDL. In such cases, increasing HDL can be a complicated procedure and the physician can make a therapeutic plan to increase HDL in the blood stream.

When somebody is allergic to something the immune system of that person gets confused and thinks that the substance is detrimental to the body. The substances causing allergic reactions are known as allergens. The examples of allergens are dust, food, plant pollen, medicine etc. The body produces antibodies to protect itself from these allergens. The antibodies make certain cells present in the system to let chemicals to mix with the bloodstream and one of them is histamine. This chemical then acts on nose, eyes, skin, lungs, gastrointestinal tract and results in allergic reaction symptoms. Exposure to the same chemicals in future triggers same response to the antibodies again meaning every time one comes in contact with the same allergen, allergic reaction is produced in the body.
