The publication "Analyzing Casual Conversation" by Suzanne Eggins and Diana Slade, first published in 1997, establishes a organized model for the study and portrayal of casual conversation in English. The authors assert that in spite of its at times aimless seeming and ostensibly unstructured material, casual conversation is an extremely structured task and performs a crucial function in the social formation of reality. The book proceeds through genuine examples of casual conversations entailing participants differing in age, gender, ethnicity, and socio-economic class<sup>12</sup>. Pulling on perspectives from sociology, linguistics, and critical semiotics, the work furnishes readers with the analytical skills to describe the layers of structure and critical interpretive structures to elucidate the 'social work' that happens on through chat.
