Future Jobs 2013-08-26 Edward E. Gordon A pervasive disconnect exists between the job/career culture and the present economic reality in America. This book offers powerful strategies for stemming the employment crisis and proposes comprehensive solutions for businesses, government, and job seekers alike. America's low unemployment rate overshadows the fact that more than 20 million Americans are still unemployed. Moreover, more than eight million jobs are vacant because employers cannot find qualified candidates. It is projected that if this imbalance between available positions and skills is not quickly addressed, more than 14 million jobs will be vacant by 2020, and that many more people out of work. In Future Jobs, historical economist Edward E. Gordon explains how increasingly complex technologies, global demographic shifts, and outdated education-to-employment systems are converging and may imminently cause a labor-market crisis. How can we ensure that enough people possess the skills necessary to holding the jobs of today and tomorrow? This book points to a solution gaining traction across the United States: Regional Talent Innovation Networks (RETAINs), alliances of businesses, educators, government agencies, and nonprofit organizations that successfully bridge the talent gap. Additionally, it provides information on the most promising jobs and careers of the next decade for early-career job seekers and for workers who are looking to change career paths.

Transition Economies after 2008 2014-04-07 Martin Myant The economic crisis of 2008, starting from the crisis in banking in the USA in 2008, affected economic and political development in varied ways around the world. This edited volume covers the impact and policy responses in Eastern Europe and Russia. Taken as a whole, the economies of the former state socialist countries - frequently still referred to for convenience as transition economies - were hit hard by the crisis, suffering falls in GDP in 2009 that were deeper than the average around the world. However, there was considerable variety in the effects on individual countries, with a few continuing to grow while some others suffered quite exceptional falls in output. Policy responses were also quite diverse and do not obviously fit with the nature and severity of economic factors. The more general impacts on political life were also varied. In many cases very much the same governments continued in power, while in others there were significant changes and signs of a growing instability in party and political structures. The articles in this book explore these differences between countries and to set them in a wider international context. This book was published as a special issue of Europe-Asia Studies.

International Perspectives on Mathematics Curriculum 2018-01-01 Denise R Thompson Curriculum can be defined in a variety of ways. It might be viewed as a body of knowledge, a product, or a process. Curricula can differ as they are conceptualized from various theoretical perspectives to address the needs of teachers, students, and the context of schooling. One reason to study curriculum is "to reveal the expectations, processes and outcomes of students' school learning experiences that are situated in different cultural and system contexts. ... further studies of curriculum practices and changes are much needed to help ensure the success of educational reforms in the different cultural and system contexts" (Kulm & Li, 2009, p. 709). This volume highlights international perspectives on curriculum and aims to broaden the wider mathematics education community's understandings of mathematics curriculum through viewing a variety of ways that curricula are developed, understood, and implemented in different jurisdictions/countries. Within this volume, we define curriculum broadly as the set of mathematics standards or outcomes, the messages inherent in mathematics curriculum documents and resources, how these standards are understood by a variety of stakeholders, and how they are enacted in classrooms. The focus is on the written, implied, and enacted curriculum in various educational settings throughout the world.

The Gülen Movement in Turkey 2016-09-06 Caroline Tee What is the Gulen Movement and why is Turkey's President Erdogan so convinced that the organisation and its charismatic leader were behind the failed military coup of 15th July 2016? The Gulen, or Hizmet, movement in Turkey was until recently the country's most powerful and affluent religious organisation. At its head is the exiled Muslim preacher Fethullah Gulen, who leads from a gated compound in the Pocono Mountains of the USA. The movement's central tenet is that Muslims should engage positively with modernity, especially through mastering the sciences. At hundreds of Gulen-run schools and universities, not only in Turkey but also worldwide and particularly in the United States, instructors have cultivated the next generation of Muslim bankers, biologists, software engineers and entrepreneurs. In this groundbreaking study, Caroline Tee, an expert on the Gulen Movement, analyses the complex attitudes of Gulen and his followers towards secular modernity. Considered against the backdrop of Turkish politics, Gulenist engagement with modern science is revealed as a key source of the influence the movement has exerted.

The Great African Land Grab? 2013-07-11 Lorenzo Cotula Over the past few years, large-scale land acquisitions in Africa have stoked controversy, making headlines in media reports across the world. Land that only a short time ago seemed of little outside interest is now being sought by international investors to the tune of hundreds of thousands of hectares. Private-sector expectations of higher world food and commodity prices and government concerns about longer-term national food and energy security have both made land a more attractive asset. Dubbed 'land grabs' in the media, large-scale land acquisitions have become one of the most talked about and contentious topics amongst those studying, working in or writing about Africa. Some commentators have welcomed this trend as a bearer of new livelihood opportunities. Others have countered by pointing to negative social impacts, including loss of local land rights, threats to local food security and the risk that large-scale investments may marginalize family farming. Lorenzo Cotula, a leading expert in the field, casts a critical eye over the most reliable evidence on this hotly contested topic, examining the implications of land deals in Africa both for its people and for world agriculture and food security.

The Lawyer Bubble 2016-03-08 Steven Harper A noble profession is facing its defining moment. From law schools to the prestigious firms that represent the pinnacle of a legal career, a crisis is unfolding. News headlines tell part of the story—the growing oversupply of new lawyers, widespread career dissatisfaction, and spectacular implosions of pre-eminent law firms. Yet eager hordes of bright young people continue to step over each other as they seek jobs with high rates of depression, life-consuming hours, and little assurance of financial stability. The Great Recession has only worsened these trends, but correction is possible and, now, imperative. In *The Lawyer Bubble*, Steven J. Harper reveals how a culture of short-term thinking has blinded some of the nation's finest minds to the long-run implications of their actions. Law school deans have ceded independent judgment to flawed U.S. News & World Report rankings criteria in the quest to maximize immediate results. Senior partners in the nation's large law firms have focused on current profits to enhance American Lawyer rankings and individual wealth at great cost to their institutions. Yet, wiser decisions—being honest about the legal job market, revisiting the financial incentives currently driving bad behavior, eliminating the billable hour model, and more—can take the profession to a better place. A devastating indictment of the greed, shortsightedness, and dishonesty that now permeate the legal profession, this insider account is essential reading for anyone who wants to know how things went so wrong and how the profession can right itself once again.

Third-Party Funding in International Arbitration 2016-04-24 Lisa Bench Nieuwveld Since the first edition of this invaluable book in 2012, third-party funding has become more mainstream in international arbitration practice. However, since even the existence of a third-party funding agreement in a dispute is often kept secret, it can be difficult to glean the specifics of successful funding agreements. This welcome book, now updated, expertly reveals the nuances of third-party funding in international arbitration, examines the phenomenon in key jurisdictions, and provides a reliable resource for users and potential users that may wish to tap into and make use of this distinctive funding tool. Focusing on Australia, the United Kingdom, the United States, Germany, the Netherlands, Canada, and South Africa, the authors analyze and assess the

legal regime based upon legislation, judicial opinions, ethics opinions, and practitioner anecdotes describing the state of third-party funding in each jurisdiction. In addition to updating summaries of the law of the various jurisdictions, the second edition includes a new chapter addressing third-party funding in investor-state arbitration. Among the issues raised and examined are the following: · payment of adverse costs; · "Before-the-Event" (BTE) and "After-the-Event" (ATE) insurance; · attorney financing: pro bono representation, contingency representation, conditional fee arrangements; · loans; · ethical doctrines affecting the third-party funding industry; · possible future bundling, securitization, and trading of legal claims; · risk that the funder may put its own interests ahead of the client's interests; and · whether the existence of a funding agreement must or should be disclosed to the decision maker. The second edition also includes discussion of recent institutional developments as they relate to third-party funding, including the work of the ICCA-Queen Mary Task Force on Third-Party Funding and how third-party funding is being incorporated into arbitral rules and investment treaties. Aply providing a thorough understanding of what third-party funding entails and what legal parameters exist, this book will be of compelling interest to parties aiming to take advantage of the high values, speed, reduced evidentiary costs, outcome predictability, industry expertise, and high award enforceability characteristic of the third-party funding arrangements available in international arbitration.

What lesbian, gay, bisexual, and transgender p

Higher Education in the Global Age 2013-11-20 Daniel Araya Discussions on globalization now routinely focus on the economic impact of developing countries in Asia, Africa, the Middle East, the former Soviet Union and Latin America. Only twenty-five years ago, many developing countries were largely closed societies. Today, the growing power of "emerging markets" is reordering the geopolitical landscape. On a purchasing power parity basis, emerging economies now constitute half of the world's economic activity. Financial markets too are seeing growing integration: Asia now accounts for 1/3 of world stock markets, more than double that of just 15 years ago. Given current trajectories, most economists predict that China and India alone will account for half of global output by 2050 (almost a complete return to their positions prior to the Industrial Revolution). How is higher education shaping and being shaped by these massive tectonic shifts? As education rises as a geopolitical priority, it has converged with discussions on economic policy and a global labor market. As part of the Routledge Studies in Emerging Societies series, this edited collection focuses on the globalization of higher education, particularly the increasing symbiosis between advanced and developing countries. Bringing together senior scholars, journalists, and practitioners from around the world, this collection explores the relatively new and changing higher education landscape.

A term paper is a research paper written by students over an academic term, accounting for a significant part of a grade. Its a essential component of your college education, often assigned towards the conclusion of a semester. The paper is a vehicle through which educators gauge your comprehension of the course content. Writing a term paper isnt just about summarizing facts. It requires a combination of organization, deep research, and the art of presenting your findings in a way thats both clear and analytical. This means structuring your arguments logically, citing relevant sources, and critically evaluating the information youve gathered. When grading a term paper, there are three important aspects to consider. First, the paper should be passionately written and captivating to read. Second, it should have good grammar and style (following MLA, APA, or CMS style). Third, it should be well documented with in-text references (in parentheses) linking their assertions to scholarly articles in the list of references at the end of the paper.

Mystery of the Missing Diamond

It was a gloomy and turbulent night. The drizzle was falling heavily, and the wind was roaring. In the center of the city, there was a museum, where a priceless diamond was on display. The diamond was named the Star of Africa, and it was the largest and most beautiful diamond in the world. It was guarded by a advanced security mechanism, and a squad of weaponized guards. No one could rob it, or so they thought. But somebody did. Someone succeeded to circumvent the security, to avoid the watchmen, to break the pane, and to steal the diamond. And no one noticed them, no one heard them, no one knew who they were. They exited no trace, no hint, no testimony. They faded into the night, with the African Star. And the enigma of the lost diamond commenced.
