The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a widely recognized vocabulary test that has been in practice for nearly half a century. Created by Lloyd M. Dunn and Douglas M. Dunn, the test is crafted to measure receptive vocabulary for American English. It is quick and effortless to carry out, conserving precious time so that concentration can be set on executing successful interventions.

The PPVT-4 evaluation content covers a extensive range of vocabulary comprehension grades, extending from pre-kindergarten through adult age. The test questions broadly feature words that portray 20 content fields (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and home and educational vocabulary. The assessment provides two identical versions which hold various vocabulary words, ensuring that the person has not "learned" the test. One edition can be employed ahead of intervention implementation to evaluate test-takers' vocabulary comprehension and the other version can be used for re-evaluation to measure and record progress. The PPVT-4 also includes a distinctive Growth Scale Value (GSV) which is sensitive to slight changes over time.
