Assessing Competence in Professional Performance across Disciplines and Professions 2016-04-19 Paul F. Wimmers This book examines the challenges of cross-professional comparisons and proposes new forms of performance assessment to be used in professions education. It addresses how complex issues are learned and assessed across and within different disciplines and professions in order to move the process of "performance assessment for learning" to the next level. In order to be better equipped to cope with increasing complexity, change and diversity in professional education and performance assessment, administrators and educators will engage in crucial systems thinking. The main question discussed by the book is how the required competence in the performance of students can be assessed during their professional education at both undergraduate and graduate levels. To answer this question, the book identifies unresolved issues and clarifies conceptual elements for performance assessment. It reviews the development of constructs that cross disciplines and professions such as critical thinking, clinical reasoning, and problem solving. It discusses what it means to instruct and assess students within their own domain of study and across various roles in multiple contexts, but also what it means to instruct and assess students across domains of study in order to judge integration and transfer of learning outcomes. Finally, the book examines what it takes for administrators and educators to develop competence in assessment, such as reliably judging student work in relation to criteria from multiple sources. "... the co-editors of this volume, Marcia Mentkowski and Paul F. Wimmers, are associated with two institutions whose characters are so intimately associated

with the insight that assessment must be integrated with curriculum and instructional program if it is to become a powerful influence on the educational process ..." Lee Shulman, Stanford University

Dean And Me 2011-07-22 Jerry Lewis For ten years after WWII, Dean Martin and Jerry Lewis weren't only the most successful show business act in history, they were history. Starting as a fill-in for another act in Atlantic city, their improvised, anarchic routines soon sold out all the greatest venues in America. They made films, they made millions. They made a legend. But amidst the dazzling success and the late night laughter, tensions developed between the reserved straight man, Martin, and the manic goon, Lewis. When the duo, who had reinvented the comic

double-act, split acrimoniously in 1956 they didn't speak to one another for the next 20 years. This is an intimate memoir of those years of fame and success by one of the only surviving legends of the rat-pack era. Jerry Lewis remembers everything - the casinos, the mobsters, the endless pranks, the cocktails, the women, the meteoric rise to stardom. Here for the first and only time and in his own inimitable, wise-cracking voice he re-lives his days of glory with Dean Martin and gives a frank account of their relationship and break-up. A hilarious ride and heart-breaking, cautionary tale of what fame and fortune can do to love and friendship.

Mars 2009-12-07 Viorel Badescu th th Mars, the Red Planet, fourth planet from the Sun, forever linked with 19 and 20 Century fantasy of a bellicose, intelligent Martian civilization. The romance and excitement of that fiction remains today, even as technologically sophisticated - botic orbiters, landers, and rovers

seek to unveil Mars' secrets; but so far, they have yet to find evidence of life. The aura of excitement, though, is justified for another reason: Mars is a very special place. It is the only planetary surface in the Solar System where humans, once free from the bounds of Earth, might hope to establish habitable, self-sufficient colonies. Endowed with an insatiable drive, focused motivation, and a keen sense of exploration and adventure, humans will undergo the extremes of physical hardship and danger to push the envelope, to do what has not yet been done. Because of their very nature, there is little doubt that humans will in fact conquer Mars. But even earth-bound extremes, such those experienced by the early polar explorers, may seem like a walk in the park compared to future experiences on Mars.

The Social Psychology of English as a Global Language
2010-08-18 Robert M. McKenzie This ground-breaking work is a detailed account of an innovative and in-depth study of the attitudes of in excess of 500 Japanese learners towards a number of standard and non-standard as well as native and non-native varieties of English speech. The research conducted refines the investigation of learner attitudes by employing a range of pioneering techniques of attitude measurement. These methods are largely incorporated from the strong traditions that exist in the fields of social psychology and second language acquisition and utilize both direct and indirect techniques of attitude measurement. The author locates the findings in the context of the wealth of literature on native speaker evaluations of languages and language varieties. The study is unique in that the results provide clear evidence of both attitude change and high levels of linguistic awareness among the informants of social and geographical diversity within the English language. These findings are analyzed in detail in relation to the global spread of English as well as in terms of the pedagogical implications for the choice of linguistic model employed in English language

classrooms both inside and outside Japan. The issues examined are of particular interest to educators, researchers and students in the fields of applied linguistics, TESOL, second language acquisition, social psychology of language and sociolinguistics. The pedagogical and language policy implications of the findings obtained make essential reading for those with a specific focus on the role of the English language and English language teaching, both in Japan and beyond.

Girls' Education in the Twenty-first Century 2008-01-01 Mercy Tembon Persuasive evidence demonstrates that gender equality in education is central to economic development. Despite more than two decades of accumulated knowledge and evidence of what works in improving gender equality, progress on the ground remains slow and uneven across countries. What is missing? Given that education is a critical path to accelerate progress toward gender equality and the empowerment of women, what is holding us back? These questions were discussed at the global symposium Education: A Critical Path to Gender Equality and Women's Empowerment, which was sponsored by the World Bank in October 2007. Girls' Education in the 21st Century is based on background papers developed for the symposium. The book's chapters reflect the current state of knowledge on education from a gender perspective and highlight the importance of, and challenges to, female education, as well as the interdependence of education and development objectives. The last chapter presents five strategic directions for advancing gender equality in education and their implications for World Bank operations. Girls' Education in the 21st Century will be of particular interest to researchers, educators, school administrators, and policy makers at the global, national, regional, and municipal levels.

Securing Reasonable Caseloads 2011 Norman Lefstein For the criminal justice system to work, adequate resources must be available for police, prosecutors and public defense. This timely, incisive and important book by Professor Norman Lefstein looks carefully at one leg of the justice system's "three-legged stool" public defense and the chronic overload of cases faced by

public defenders and other lawyers who represent the indigent. Fortunately, the publication does far more than bemoan the current lack of adequate funding, staffing and other difficulties faced by public defense systems in the U.S. and offers concrete suggestions for dealing with these serious issues.

500 Mpre Practice Questions for 2021 2021-02-08 Drury Stevenson These 500 sample questions have the same format and style as the questions on the current Multistate Professional Responsibility Exam (MPRE). The multiple-choice format also provides a useful way to test students' knowledge of each provision or clause in each of the American Bar Association's Model Rules of Professional Conduct, as well as the ABA official Comments (which the MPRE tests along with the Model Rules themselves). Questions also cover recent ABA Formal Ethics Opinions and sections of the Restatement (Third) of the Law Governing Lawyers that are most relevant for upcoming MPRE exams. No other MPRE practice book currently on the market has as many sample questions, or as broad coverage, as this book. The practice questions are also extremely useful in mastering the material covered in every Professional Responsibility/Legal Ethics course, which is a required course at every American law school. The arrangement of topics in this book follows the order of how heavily the MPRE tests each Rule. An Index helps students find the sections devoted to individual Model Rules in case their Professional Responsibility course arranges topics in a different order. NOTE: THIS BOOK DOES NOT CONTAIN EXPLANATIONS. Most questions have a citation or reference immediately beneath the question to the specific Model Rule provision, Comment, Restatement section, or case that will explain the question and the correct answer. Professor Stevenson's YouTube channel has corresponding video lectures about each rule. Customers wanting a book with complete explanations for every question should get the author's Glannon Guide for Professional Responsibility.

Musical Sense-Making 2020-11-29 Mark Reybrouck Musical Sense-Making: Enaction, Experience, and Computation broadens the scope of musical sense-making from a disembodied cognitivist approach to an experiential approach. Revolving around the definition of music as a temporal and sounding art, it argues for an interactional and experiential approach that brings together the richness of sensory experience and principles of cognitive economy. Starting from the major distinction between in-time and outside-of-time processing of the sounds, this volume provides a conceptual and operational framework for dealing with sounds in a real-time listening situation, relying heavily on the theoretical groundings of ecology, cybernetics, and systems theory, and stressing the role of epistemic interactions with the sounds. These interactions are considered from different perspectives, bringing together insights from previous theoretical groundings and more recent empirical research. The author's findings are framed within the context of the broader field of enactive and embodied cognition, recent action and perception studies, and the emerging field of neurophenomenology and dynamical systems theory. This volume will particularly appeal to scholars and researchers interested in the intersection between music, philosophy, and/or psychology.

Nanostructured Materials for Next-Generation Energy Storage and Conversion 2018-04-17 Fan Li The energy crisis and pollution have posed significant risks to the environment, transportation, and economy over the last century. Design and characterization of new nanoscaled materials with controllable particle size, structure, shape, porosity and band gap to enhance next generation energy systems are also included. The technical topics covered in this series are metal organic frameworks, nanoparticles, nanocomposites, proton exchange membrane fuel cell catalysts, solid oxide fuel cell electrode design, trapping of carbon dioxide, and hydrogen gas storage.

Gideon's Promise 2020-08-18 Jonathan Rapping A blueprint for criminal justice reform that lays the foundation for how model public defense programs should work to end mass incarceration. Combining wisdom drawn from over a dozen years as a public defender and cutting-edge research in the fields of organizational and cultural psychology, Jonathan Rapping proposes a radical cultural shift to a "fiercely client-based ethos" driven by values-based recruitment training, awakening defenders to their role in upholding an unjust status quo, and a renewed pride in the essential role of moral lawyering in a democratic society. Public defenders represent over 80% of those who interact with the court system, a disproportionate number of whom are poor, non-white citizens who rely on them to navigate the law on their behalf. More often than not, even the most well-meaning of those

defenders are over-worked, under-funded, and incentivized to put the interests of judges and politicians above those of their clients in a culture that beats the passion out of talented, driven advocates, and has led to an embarrassingly low standard of justice for those who depend on the promises of Gideon v. Wainwright. However, rather than arguing for a change in rules that govern the actions of lawyers, judges, and other advocates, Rapping proposes a radical cultural shift to a "fiercely client-based ethos" driven by values-based recruitment and training, awakening defenders to their role in upholding an unjust status quo, and a renewed pride in the essential role of moral lawyering in a democratic society. Through the story of founding Gideon's Promise and anecdotes of his time as a defender and teacher, Rapping reanimates the possibility of public defenders serving as a radical bulwark against government oppression and a megaphone to amplify the voices of those they serve.
