The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a highly regarded vocabulary test that has been in operation for close to half a century. Created by Lloyd M. Dunn and Douglas M. Dunn, the evaluation is designed to assess receptive vocabulary for American English. It is swift and effortless to carry out, saving important time so that concentration can be put on implementing intelligent interventions.

The PPVT-4 assessment subject matter encompasses a broad scope of vocabulary comprehension levels, ranging from preschool through adulthood. The

evaluation items broadly feature words that represent 20 topic domains (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and household and educational vocabulary.

The assessment gives two identical versions which contain different vocabulary terms, guaranteeing that the person has not “mastered” the assessment. One version can be employed before intervention to assess people’s vocabulary comprehension and the other form can be used for re-testing to assess and document improvement. The PPVT-4 also features a distinctive Growth Scale Value (GSV) which is reactive to small changes over time.
