Murder at the Abbey

2021-11-11 Frances Evesham The Brand NEW instalment in the bestselling Exham-on-Sea series. An unsolved murder echoes down the corridors of Cleeve Abbey for years. The Exham-on-Sea's History Society's annual summer picnic comes to an abrupt end when human bones are discovered in Washford River, beside historic Cleeve Abbey. Thrilled to find evidence of a possible centuries-old murder mystery, the members of the society organise a ghost-hunting night in the ruins of Cleeve Abbey, despite amateur sleuth Libby Forest's reservations. Libby is a woman of many talents, a baker, chocolatier, even a reluctant sleuth, but she's no fan of the supernatural. and her doubts are justified when a friend is attacked under cover of darkness at the ghost-hunt. Distressed and angry, Libby sets out with her new husband Max and their two dogs Bear and Shipley to uncover the connection between the murder of a sixteenth century monk and a present-day attack in picturesque Somerset. With friends and neighbours as suspects, Libby and Max close in on the culprit only to find that others are still in danger. There's no time to lose as the sins of the past threaten lives in the community. Murder at the Abbey is the eighth in a series of Exham-on-Sea Murder Mysteries from the small English seaside town full of quirky characters, sea air, and gossip. If you love Agatha Christie-style mysteries, cosy crime, clever dogs and cake, then you'll love these

Murder at the Gorge

2020-11-17 Frances Evesham A joke? A prank? Or something more sinister? When the Exham-on-Sea residents are targeted by anonymous emails containing apparently harmless nursery rhymes, no one knows whether to laugh or shudder until an unexplained death touches the town. Libby Forest, baker, chocolatier and Exham's very own resident private investigator, alongside her partner Max Ramshore, set out to solve the puzzle before more people die. But when Max's ex-wife arrives on the scene, ahead of Max and Libby's long-awaited nuptials, things go from bad to worse. With the town and their relationship under threat, Max and Libby need the help of the Exham History Society if they're going to find the nursery rhyme killer in time. Unlike smoking cessation medications and nicotine replacement therapy products, acupuncture does not employ chemically manufactured substances. There is also no risk of weight gain during therapy. In conjunction with helping a patient quit smoking, it can also curb appetite, thus reducing food cravings. If you have tried several methods in smoking cessation to no avail, perhaps it is high time you consider the alternative method that is acupuncture. With the right practitioner and the right frame of mind, there is no reason

Revenge murder at the cathedral an exham on~There are basically two types of diabetes that will affect an adolescent. It is type 1 diabetes and type 2 diabetes. Type 1 diabetes affects the immune system's function as the systems attacks the pancreas' insulin producing cells, also known as the beta cells. Because of this, the pancreas loses the ability to manufacture insulin. This is the reason why people with type 1 diabetes take insulin everyday. The symptoms are weight loss, increase in urination & thirst, blurred vision, tiredness and constant hunger. And if the adolescent isn't treated at the right time, he/she can slip in to diabetic coma which can endanger his/her life. In type2 diabetes, the body is incapable of properly using the insulin produced by the body and requires insulin from an external source, too. The symptoms of type 2 diabetes are similar to type 1 diabetes. The teenager feels sick, tired, nauseated, and thirsty. The wounds will recover very slowly; he/she will get infections frequently, will develop blurred vision and will experience weight loss.

Parents play a vital role in determining the problem. They should constantly observe their child for eating disorders or signs of depression. Although cigarette, drugs and alcohol should be avoided by all adolescents and children, it is even more important that youngster with diabetes should stay away from these things as they can worsen the situation. A person with diabetes, who switches to smoking, is at risk of developing cardiovascular diseases and circulatory problems. Consumption of alcohol can cause hypoglycemia or low blood sugar. It is the duty of the parents to make their child aware of the possible risk they would face if they start to smoke, drink alcohol or take drugs.

Children and adolescents, who have diabetes, face many challenges while trying to lead a normal life. They have to think twice before doing simple things as going to a party, playing sports and even when staying over with friends. This is because they require to intake oral medication or insulin. Their blood sugar level must be checked many times through out the day. Also, at gatherings, they have to avoid many food items. Because of this they will feel different from the crowd and can feel left out. Not only does diabetes pose behavioral challenges, but also emotional challenges.

Results have showed that of 30 respondents in the test, majority showed functional improvement of various degrees depending on the age and severity of their disabilities. Some improvement was

noticeable within a few TAC sessions, especially for drooling, spasticity (scissoring or tiptoeing), ataxia, and poor balance in walking. Functional improvement was noted after one to two courses of TAC. Most children tolerated TAC well, with only occasional pain and minor bleeding in some patients. The reason why tongue acupuncture is being experimented with is because there is a connection between the tongue and the heart through the meridians that spread to all the organs in the body. It is believed that the points on the tongue can influence the state of the other body organs thus giving relief to the one suffering from autism.

But many believe that acupuncture alone cannot help autism sufferers. It has to be combined with other things like maintaining a certain diet to help improve one's mood and communication skills. Although it is only short term, it is better than nothing until a cure is found.

Symptoms of depression in adolescents are eating disorders, weight change, irritable mood, excessive sleeping in daytime, excessive temper, criminal behavior, memory loss, fatigue, self preoccupation, sadness, difficulty in concentrating, worthlessness feelings, loss of interest, self hatred, obsession with death and thought & attempts of suicides. When these symptoms are being noticed for more than two weeks, it is important to get treatment for the adolescent. Depression not only affects interpersonal relationships, but school performance as well. Depressed adolescents are more prone to take onto drugs and alcohol as an attempt to overcome their depression. Such problems require intensive treatment.

The doctor will take blood test and perform physical examination to determine the cause of depression. The adolescent can also be tested for substance abuse such as smoking, heavy alcohol consumption, marijuana smoking, and usage of other drugs. After the physical examination, psychiatric evaluation is also done to understand the cause of sadness, loss of interest and irritability. Depression can also lead to the development of other psychiatric disorders such as schizophrenia, mania and anxiety. It is also important to determine whether the adolescent poses a risk for himself/herself and others. Family and school personnel can provide valuable information about the adolescent to the doctor.

Treatment for depression for adolescent is similar to the treatment of depression for adults. Along with the treatment, the adolescent are given antidepressant medication and psychotherapy. Antidepressant medications include tricyclics, Prozac, selective serotonin reuptake inhibitors or SSRI. Some of the medicines increase the risk, so it is a good idea that parents discuss the possible risks with the doctor.

Only some of the antidepressant medications are meant for children and adolescents. Adolescents

with severe depression need to be hospitalized as they are more prone to kill themselves.

Properly used, it can help in the management of many medical conditions including chronic pain and fatigue.

How does needle puncture work?

Practitioners of Chinese traditional medicine believe in energy flows. This energy, called Qi, circulates around the body using pathways called meridians. Meridians run very close to the surface of the skin in certain areas and can be accessed by needles. Much like plumbing, these pipes can get blocked or go the wrong way, causing health problems. The insertion of needles at these points is aimed to help loosen blocks and normalize flow.

The bone marrow replaces small amounts of blood is lost due to some reason without making a person anemic. But in cases where considerable amount of blood flows in small amount of time as a result of an injury due to a serious example for instance, it may not be possible for bone marrow to replace RBCs so quickly resulting in anemia. Also, losing small amounts of blood over long periods of time may also lead to anemia. Example of this situation can be seen in girls who get heavy periods attributed mainly to deficiency of iron in the diet.

Anemia due to iron deficiency is the most common kind of anemia in the United States. It occurs mainly due to lack of iron in a person's diet. A teen with iron deficiency would have lower hemoglobin production and consequently lower RBCs. When the production of RBCs is low the person is regarded as anemic. The signs of anemia are paleness and tiredness. There can be other reasons as to why enough RBCs are not produced in the body. Folic acid and Vitamin B-12 are also essential to produce RBCs. Getting these in adequate quantities is this important too. There can be a problem with bone marrow's working too resulting in anemia.

Hemolytic anemia occurs when a person has RBCs whose lifespan is shorter. The bone marrow may not be able to produce new blood cells if the blood cells die too early. This can result due to many reasons including person having disorders like sphenocytosis or sickle cell anemia. In some cases the immune system of the body may itself destroy the RBCs. In some cases certain antibodies can form in the blood as a result of reaction to certain drugs or infections and may attack the RBCs.

Teens get anemia as they grow rapidly the amount of iron intake may not be enough to keep up with the pace of the growth as it needs more nutrients in this process. In the case of girls they need more iron after puberty and are at risk due to heavy blood loss during menstrual periods. In some cases pregnancies also leads to anemia. Also, teens who diet excessively to lose weight may also be at risk of having iron deficiency. Meat eaters especially red meat eaters are at less risk compared to

vegetarians as meat has rich iron in it.

Asthma in Adolescents

Most of the teenagers who have asthma are also allergic to many things. The asthma can get severe even if the people with asthma are exposed to allergens of low grade. Allergies play an important role in asthma cases which are undiagnosed. Other factors that also trigger childhood asthma include upper respiratory infections like colds, second hand smoke, and certain climate conditions like cold air and due to emotional physical expressions like laughing, crying or yelling. However, it is not the end of the road for asthmatics as they can live active and healthy if they manage asthma properly by avoiding asthma triggers, regular intake of prescribed medications, being alert of the warnings and be aware of the ways to deal with an asthma attack.

One can follow certain things to avoid allergies like people who have food allergies that contain should peanuts and any food containing smallest amount of peanuts. Also avoid using cosmetic that contain chemicals allergic to the skin. One can also avoid airborne allergies by keeping pets in restricted areas and away from bedroom. Replace carpets and rugs from time to time. Avoid keeping things that accumulate dust. And also clean the room and house frequently.

Anemia in Adolescents

To understand what is anemia one should begin with breathing. The oxygen that is inhaled simply doesn't stop in lungs. It circulates though out the body and fuels the brains also. Oxygen travels to all parts of the body though bloodstream and to be precise in the RBCs I.e. red blood cells. Now, these RBCs are produced in the bone marrow of the body and they serve as boats carrying oxygen in the bloodstream. RBCs have something called hemoglobin, a protein which holds oxygen. To make adequate hemoglobin body requires iron in plenty. The iron is supplied by the foods that we take along with other nutrients. When these RBCs are fewer in number than what is needed anemia occurs in the body. There can be 3 primary reasons: RBCs are lost due to some reason, the production of RBCs is slower than what is needed and lastly the body is destroying the RBCs. Different types of anemia are linked to at least one of these causes.

Like other strategies used in treating health conditions, acupuncture may have some side effects.

Medications have side effects and allergic reactions, surgeries have risk of infection and complications.

For needle puncture, there is a risk of injury, rare infections, minor bleeding, small bruises, and some dizziness.

You can minimize the possible side effects by choosing a licensed acupuncturist. Most countries either have government licensing in place or have professional organizations with very strict rules and regulations.

How do treatments go?

An acupuncturist will do an initial evaluation of your medical history and your body's current state.

Multiple pressure points are palpated, and a regimen of treatment is formulated. Most courses involve a series of 10 to 20 treatment sessions, each lasting 30 to 90 minutes. Needles will be carefully placed at the required points and kept in place for some time. Most patients report a feeling of mild sensation at the site of the puncture, but no real pain.

It has been found that weight gain is directly related to emotions. Other than physical hunger, people reach for a huge chocolate bar or a big platter of burger and fries because of the sense of comfort derived from food and eating. More often than not, excessive weight gain is an emotional issue, rather than a mere physical one. You may not realize it, but you tend to take in more food whenever you're stressed, upset, or pressured.

In Acupuncture, there are specific spots on the body being targeted by the hair-like needles. These spots are linked to certain areas in the body and by stimulating these spots; the patient will achieve a greater sense of inner balance. As these points are inserted by the needles, certain hormones are released throughout the body. These substances work by helping you manage hunger and efficiently control the impulse to overeat.

When you think about it, that might be something that the practice has going for it. If it has existed already for thousands of years and is still being practiced by millions up to now, then it must have worked already for quite a number of people.

What typically happens when you go to an acupuncturist?

When you go to an acupuncturist, you would typically first be asked about your medical history, how you're feeling and any symptoms of sicknesses you might have. The specialist would observe features of your face, including your tongue. According to specialists, your tongue is a good indicator of the health of your internal organs. The acupuncturist would listen to sounds that your body makes like the sounds coming from your lungs. How your body smells could also be an indicator of your overall health for the acupuncturist's diagnosis.

Acupuncture is an Example of Holistic Healthcare

Holistic healthcare by definition is being able to cure an illness through the use of alternative means. This means no medication is given to the patient and an instrument like a bunch of needles could do the trick.

Acupuncture has been around for more than 2000 years. It is only recently that this holistic form of healthcare has reached the US. Studies have shown that it can treat minor problems and prevent some from happening.

The needles used in acupuncture are very thin but thicker than the human hair. This makes it smaller than those used on hypodermic needles.

Is Acupuncture The Remedy for You?

With the growing acceptance of alternative medicine in Western cultures, acupuncture is quickly becoming a popular practice. More and more people today are choosing acupuncture over western medicine to treat bodily pains, relieve stress, or to promote overall health. If you are thinking about

trying acupuncture but are wondering if it is safe or if it's the right treatment for you, the following information may aid you in making a more informed decision.

Description and Origin

Acupuncture is the practice of inserting fine needles into specific points in the body for therapeutic purposes. According to theory, these specific points called "acupuncture points" lie along pathways of the body along which one's vital energy is said to flow. The needles are used to promote free-flow of energy in areas of the body that circulation may have stagnated. Although acupuncture is practiced in many Asian cultures such as Japan, Tibet, and Korea the practice is commonly known to have originated in China.

As a result, various schools have been built and those who want to become licensed acupuncturists are now able to practice their profession.

Despite that, there were a lot of people who are not yet convinced on the positive effects of alternative forms of medication. It was only in 1995 that the US Food and Drug Administration decided to classify the needles used for acupuncture as medical instruments and assured the public that they are both safe and effective.

To further promote acupuncture, the NIH or National Institute of Health in 1997 has stated that this technique is very useful in treating various health conditions. These include ear, nose, throat, respiratory, gastrointestinal, eye, nervous system and muscular disorders. In some cases, acupuncture is able to prevent some of them from happening.

The History of Acupuncture

Acupuncture comes from two Latin words namely "acus" which means needle in English and "pungere" which means prick. Its history originated in China more than 2000 years ago and has evolved into various forms.

Some of the techniques of acupuncture do not even use needles anymore. Vibrating objects, ultrasound and even the fingers of the practitioner have taken some of the work to make the person feel better.

Accountants can also work as professors, or as researchers in schools or colleges. They can also become reviewers. If you have a knack for teaching, then this career path is for you. Although you won't directly get experience as an accountant, you will see that this career path in accountancy can also provide you with great opportunities.

You can also enter the government. Whether it is the local, state or federal government, you will see that they will constantly have openings for accounting jobs.

Being in the government can also produce a lot of great opportunities in your field. It will let you meet important people who can help you in advancing in your career and it will also provide you with great intensive training as an accountant.

Acupuncture has become a popular alternative to common remedies such as sleeping pills. It works at the nerve levels, relaxing and soothing your senses. Acupuncture is thought to be a safer route for insomnia because it brings back your natural sleeping cycle through natural means and not through chemicals, which can turn into an addiction. Using acupuncture for insomnia usually starts working after the very first session. The treatment is usually stretched out for a period of time, until your body returns to its natural sleeping cycle.

Infertility

Studies show that acupuncture is a beneficial form of complementary therapy for women who are having or undergoing treatments for fertility problems. Acupuncture is believed to relieve the anxiety of women undergoing fertility treatment. Also, acupuncture's success in aiding fertility is more pronounced in in-vitro fertilization. In addition, the rate of miscarriages has been found to be lower for women who do acupuncture.

How does sticking needles into your body help manage the stress?

In traditional Chinese medicine, much of the treatments depend on an understanding of the balance in our bodies and its internal organs. The sicknesses we sometimes develop are seen to be caused by imbalances in our lifestyles and environment. Stress is also affected by this imbalance. That is why when there is something wrong with your body, youd typically have less of an ability to deal with stress. Youd get more irritable and find it really to difficult to relax.

By sticking these very thin needles past the surface of our skin, the acupuncturist stimulates nerves in our body. These nerves send signals to our brain and scientists believe that the brain then releases its natural painkillers into our system. This immediately causes a feeling of relaxation for many people. The needles could also help your body by stimulating its circulation. With the circulation between the organs of the body improved, a lot of the bodys wastes could be cleansed properly. Your organs would also receive the full benefit of the oxygen from your lungs making its way into the cells of your body without any blockages. This makes your organs much healthier and leaves you feeling much better in the long term as well.

An infant will have a normal blood pressure reading of 80/45, where as an adolescent will have a normal blood pressure reading of 110/70. Therefore, age, gender, and height are important factor

when determining the normal blood pressure level. Adults will have a higher blood pressure than the infants and teenagers. Also, boys have a higher blood pressure when compared to girls and tall people have a higher blood pressure than short people. An adolescent is said to have high blood pressure when the blood pressure is more than the blood pressure of ninety percent people of his/her age, gender and height.

There are many risks associated with hypertension or high blood pressure. The risk of developing coronary heart disease increases proportionally. The arteries will develop greater resistance towards the blood flow, because of which the heart will pump blood harder. Stroke is also another risk.

Adolescents who have had high blood pressure as a child, develop harmful effects on the blood vessels and heart till the time they turn twenty.

The causes of high blood pressure can be classified as primary and secondary. If the causes are definite, they are primary and if the cause is linked to some illness, it is secondary. Primary causes are high blood cholesterol levels, smoking, stagnant lifestyle and overweight. Secondary causes are obesity, immobility due to chronic illness, prescription drugs, intense pain due to burns or cancer and illegal drugs. High blood pressure can develop due to hereditary reasons.

Heat related illnesses are caused due to prolonged exposure to heat and also humidity without any reprieve and due to inadequate intake of fluids. Kids and teens adjust to the variations in heat compared to adults who adapt more quickly. However the heat production is high in them when compared to adults but sweat relatively less. Sweating is the natural action of the body and cooling mechanism to counter heat. Kids and teens often ignore these facts and do not hydrate themselves enough while playing, participating in sports and exercises.

Kids and teens with health problems that are chronic or those who are on certain prescription could be more susceptible to heat related problems. Overweight adolescents or those who wear heavy clothing in times of exertion also suffer heat related illnesses. Heat related illnesses are basically classified into three types. They are: Heat cramps, heat stroke and heat exhaustion.

While acupuncture itself is a painless procedure, some smokers have claimed that they felt a prick or get sleepy.

Most smokers will have to come to the clinic 4 to 6 times before seeing any significant results. Just to give you an idea, one study shows that the respondents reported a decrease in the number of cravings to smoke just after one or two sessions. Seven out of 10 of the respondents were able to kick the habit after 5 or 6 sessions.

Because the number of test subjects is small, there are some who doubt the effectiveness of acupuncture. This is because although there are positive signs with regards to the short term effects of this technique, its effects were not sustained. This is why some medical journals have stated that it is unclear what acupuncture can do in smoking cessation.
