Throughout, reference to supplementary regulations and standards are provided for further reading, and where appropriate, design calculations are included. Online lecture resources are provided, with power point slides available for a selection of topics, featuring essential illustrations for use with presentations and handouts. The Handbook is an invaluable reference for students. It consolidates several years of study material into one comprehensive volume, suitable for a wide range of building and construction courses, including NVQs in Construction and the Built Environment, BTEC Nationals and Higher Nationals in Building Services Engineering, Construction and Civil Engineering, as well as construction related undergraduate degrees (such as Built Environment, Civil Engineering, Building Surveying, Construction Management, Quantity Surveying, Building, Architectural Technology and Facilities Management) and professional examinations. Management of Construction Projects

2014-10-24 Brian Cooke Construction Management is a wide ranging discipline, but ultimately it is a demanding, hands-on discipline concerned with the management of people, plant and materials, all mobilised to complete a building project safely, on time, on budget and to the client's satisfaction. Management of Construction Projects is a highly illustrated series of case studies based on seven live construction management projects, demonstrating the very practical nature of managing projects. The detailed case studies cover a variety of construction projects, varying in value from £1million to £117 million, including a major inner city office block, a portal framed factory unit, a university refurbishment project, a superstore & car park and a new school building. The case studies emphasise detailed on site management procedures and identify a predominantly functional approach to managing projects. A number of related chapters covering practical and theoretical aspects of construction management support and illustrate the individual case studies. With a strong emphasis on the practical nature of the subject, Management of Construction Projects is an ideal introduction to the subject for all students on construction and related degree and diploma programmes. It will be of particular interest to students preparing for the CIOB EPA programme and the new NVQ courses at level 4 and 5 in construction management.
