Are you very much interested in accounting? Well, if you are, you should take up accounting education. By doing so, you will gain systematic knowledge about the different practices and skills involved in accountancy and business.

What is the meaning of accounting? It is defined as the art of systematic recording and analyzing of financial business transactions. The history of accounting dates back many years ago. Accounting is already an essential part of modern education. Every nation needs accounting because it is the key to economic development.

If you want to pursue an accounting course, you should first choose a university or college. There are local universities and colleges that you can enroll in for an accounting course. If you prefer attending college abroad, you may do so. But make sure that you choose the university or college wisely. You also have to determine where you will stay when you're already there; you can either stay at the dormitory or you can rent an apartment. Expenses are a great consideration as well.

Patients of acupuncture typically experience very minimal or no pain at all, however most of the points are located near nerve endings and muscle tissues. As the needles are embedded in the body, signals are sent to the brain thus promoting the release of endorphins from the pituitary gland. There are also other points in the body that serve as gateways for better weight management. One of these placements promotes a decrease in an individual's appetite, while another has the ability to reduce water retention in the body. Treatment from Acupuncture Experts

It is very essential for a patient to consult with a skilled acupuncturist. A more personalized service will be provided by an expert, as well as added counseling for the patient. Moreover, an acupuncturist may prescribe herbal supplements to aid the patient in quitting efforts.

During treatment, filiform needles are inserted into specific points on the ear cartilage, as well as the hands and wrists. Normal procedures last for about 30 minutes. Body acupuncture can be used in combination with the ear and wrist needle placements. An acupuncturist may also utilize a mild electric current, to enhance the effect of the needles through the body.

This is the same substance that makes quitting a big challenge for most smokers. The nicotine that you get from smoking will attach itself to the pleasure areas in the brain, making it hard for you to stop. Without a steady stream of this substance, a smoker will tend to feel depressed and uncomfortable.

People who have undergone acupuncture treatment reported that they no longer find cigarettes as tempting or as satisfying. Oftentimes, smoking would leave an awful taste in their mouths prompting them to stop their habit for once. Some patients would even resort to eating mints or lozenges to clear to get rid of the terrible aftertaste.

According to skilled practitioners, approximately 7 out of 10 smokers will successfully extricate themselves from their smoking habit after 2 or 3 weeks. While the others are unable to quit totally, these smokers will be able to cut down on their cigarette consumption quite significantly.

What is acupuncture?

Acupuncture has surged in popularity for the last few decades as brought on by the recent health trend. Mostly known as a traditional Chinese medical technique, acupuncture is seen as a homeopathic method of treatment. While alternative medicine does raise a lot of eyebrows for the scientifically-inclined, it does merit attention before being dismissed as a quack cure.

Basic Procedure

Basically, needles are inserted into the skin, each corresponding to one of the numerous pressure points located throughout the body. According to Traditional Chinese Medicine, by inserting a needle into the pressure point, an acupuncturist can manipulate the flow of chi or life force, thus relieving pain and gradually treating the patient. While most would say that the whole chi thing is a bunch of nonsense, science has suggested that with the needles inserted, the body's natural painkillers called endorphins are released, thus helping with pain relief.

Accountants form some sort of business equation so justify the profits & losses of a business. By doing so, they can easily tell a company's net worth.

It seems that by simply starting to define one accounting term, it eventually leads to defining other terms as well. Net worth is another term that is quite difficult to understand. It refers to the resulting amount after deducting the liabilities of a company from the assets. Private companies refer to net worth as owner's equity.

Why owner's equity? Well, after deducting all the liabilities, what's left basically belongs to the owner. In the case of public companies, the profit of the business is returned as dividends to shareholders. As you can see, before owner or shareholders of a company can take hold of the profits, all liabilities must be deducted first.

When these symptoms are being noticed for more than two weeks, it is important to get treatment for the adolescent. Depression not only affects interpersonal relationships, but school performance as well. Depressed adolescents are more prone to take onto drugs and alcohol as an attempt to overcome their depression. Such problems require intensive treatment.

The doctor will take blood test and perform physical examination to determine the cause of depression. The adolescent can also be tested for substance abuse such as smoking, heavy alcohol consumption, marijuana smoking, and usage of other drugs. After the physical examination, psychiatric evaluation is also done to understand the cause of sadness, loss of interest and

irritability. Depression can also lead to the development of other psychiatric disorders such as schizophrenia, mania and anxiety. It is also important to determine whether the adolescent poses a risk for himself/herself and others. Family and school personnel can provide valuable information about the adolescent to the doctor. Treatment for depression for adolescent is similar to the treatment of depression for adults. Along with the treatment, the adolescent are given antidepressant medication and psychotherapy. Antidepressant medications include tricyclics, Prozac, selective serotonin reuptake inhibitors or SSRI. Some of the medicines increase the risk, so it is a good idea that parents discuss the possible risks with the doctor. Only some of the antidepressant medications are meant for children and adolescents. Adolescents with severe depression need to be hospitalized as they are more prone to kill themselves.

There are two subcategories of eating disorders, anorexia nervosa and bulimia nervosa. Anorexia nervosa is the restrictive form, where the intake of food is limited severely. In bulimia nervosa is the eating disorder where the adolescent binges on food and then tries to minimize the effects by forcibly vomiting, fasting, and catharsis or over exercising. When handling adolescence eating disorders, they must be handled differently from adult eating disorders. Adolescents face problems such as growth retardation, suppressed height, abnormal weight, pubertal delay, menstrual periods absence, and menses unpredictability. When the adolescent is growing there will be critical tissue components loss like loss of body fat, muscle mass and bone mineral.

Nutritional imbalance is also caused which reflect abnormalities in the levels of vitamins, mineral and other trace elements. The problem is that these abnormalities cannot be recognized clinically. But since protein and calories are essential to the growth of the adolescent, it is important to trace their abnormalities. Because of the problems, healthy adulthood is not a possible thing. Because of all these reasons, it is important to diagnose adolescence eating disorders as early as possible. Eating disorders give rise to peak bone mass impaired acquisition in case of adolescents. When they turn into adults, this problem aggravates to osteoporosis. Even internal organs get affected due to eating disorders. All this can be prevented by early intervention so as to limit, prevent and ameliorate medical complications, which can turn become life threatening.

Adolescents who practice unhealthy weight control practices and are obsessive about figure, weight, food or exercise should be treated clinically. Not only should the symptoms be checked, but their duration, intensity and frequency should also be checked. Although most of the physical complications caused due to eating disorders get solved with the help of nutritional rehabilitation some of the conditions become irreversible and the long term consequences of this are very dangerous. It is best if the eating disorders are recognized in the early stages as it won't result in irreparable damage. The medical monitoring should be pursued till the adolescent returns back to appropriate psychological and medical health.

Have you ever had an uncontrollable urge to be pierced by a dozen needles? This is the image most people get when someone mentions the word "acupuncture". It comes as no surprise that most view this technique with suspicion, even downright horror. The fact is, however, that this relatively painless ancient Chinese technique has helped relieve the symptoms of millions of people. Properly used, it can help in the management of many medical conditions including chronic pain and fatigue.

How does needle puncture work?

Practitioners of Chinese traditional medicine believe in energy flows. This energy, called Qi, circulates around the body using pathways called meridians. Meridians run very close to the surface of the skin in certain areas and can be accessed by needles. Much like plumbing, these pipes can get blocked or go the wrong way, causing health problems. The insertion of needles at these points is aimed to help loosen blocks and normalize flow.

Allergies in Adolescents

Allergies are reactions by immune system that are abnormal in nature to stuff that are normally harmless to majority of the people. When somebody is

allergic to something the immune system of that person gets confused and thinks that the substance is detrimental to the body. The substances causing allergic reactions are known as allergens. The examples of allergens are dust, food, plant pollen, medicine etc. The body produces antibodies to protect itself from these allergens. The antibodies make certain cells present in the system to let chemicals to mix with the bloodstream and one of them is histamine. This chemical then acts on nose, eyes, skin, lungs, gastrointestinal tract and results in allergic reaction symptoms. Exposure to the same chemicals in future triggers same response to the antibodies again meaning every time one comes in contact with the same allergen, allergic reaction is produced in the body.

Children and adolescents with normal cholesterol level is a thing of the past. Because of the changing lifestyle and junk food trend, even they have a high risk to develop high levels of cholesterol which also increases the risk of developing heart diseases which can affect the blood vessels and the coronary arteries. The main cause of this change is obesity, junk food high in fat, fast food diets, sedentary lifestyle and high cholesterol level in family history. Keeping the blood cholesterol levels at normal is a good way of avoiding high blood pressure and coronary artery diseases.

The blood cholesterol level can vary from individual to individual. Healthy levels of LDL is less than one hundred and thirty milligrams, HDL is greater than thirty five milligrams. If the HDL is less than thirty five milligrams then the adolescent is at a higher risk of developing heart diseases. And LDL more than one hundred and thirty milligrams is dangerous. But a high level of LDL cholesterol is a problem in many citizens of America. And there is an expected increase in number, the figure is unknown, of adolescents who have a family history of high cholesterol levels.

An adolescent or a child who has a parent having high levels of blood cholesterol and family history of heart diseases at an early age, should take cholesterol test from the age of two. Four out of ten adolescent females get pregnant, before they turn twenty, at least once. Twenty five percent of adolescent deliveries aren't the mother's first child. When a teenager gives birth to her first child, she increases the risk of begetting another child. One third of the adolescent parents are themselves result of adolescent pregnancies. There are many reasons why adolescents choose to become sexually active at an early stage in life. The reasons can be early pubertal development, poverty, sexual abuse in childhood, lack of parent's attention, lack of career goals, family and cultural patterns of early sex, substance abuse, dropping out from school and poor school performance. Factors which discourage an adolescent to become sexually active are stable family environment, parental supervision, good family income, regular prayers, connectedness with parents and living with complete family and both the parents. The factors which are responsible for the consistent use of contraceptive among adolescents are academic success, anticipation for successful future, and involvement in a stable relationship.

There are many medical risks associated with adolescent pregnancies. Adolescents who are less than seventeen years are at a greater risk of developing medical complications, when compared to adult females. The risk is even more in teenagers below seventeen. The weight of the child, given birth by an adolescent, is very low in these pregnancies. It is usually below 2.5 kilogram. The rate of neonatal birth is also three times greater in adolescents, when compared to adults. Other problems caused by adolescent pregnancies are prematurity of the child, birth of underweight child, poor maternal weight gain, poor nutritional status, anemia, STDs and hypertension induced due to pregnancy.

The contents of this book date somewhere around 200 BC. Back then, they did not use metal needles and instead used those made out of stone, moxibustion and herbs to treat a patient.

Acupuncture prevents and treats diseases by inserting very fine needles into the skin specifically at the anatomic points of the body.

The principle behind this concept is that illnesses occur because there is an imbalance in your life force otherwise known as Qi. It is believed that this flows in 14 channels in the human body known as meridians which branch out to bodily organs and functions. If there is a blockage or obstruction in any of them, this is when you succumb to a disease or an illness.

At the same time, you have to find ways to prevent yourself from picking up a cigarette. You can do this by staying away from people who smoke since you will be tempted to ask for a stick. You can create your own personal mantra which you repeat to yourself every time you have an urge.

Remember that this craving is only short term and will last only for a few minutes. You have worked so hard to leave this behind so stick to the path and stay smoke free.

It might not be something to replace regular trips to the doctor but with its many possible benefits, acupuncture might be worth trying out very soon.

Part of the curriculum will also include basic courses in traditional medicine covering subjects such as anatomy, biosciences, medical terminology, herbal medicine, moxibustion, and acupressure. In some schools, they may require students to also learn about nutrition and various kinds of research. Once they graduate, they may start in an entry level position earning \$40,000 or more which will soon double or triple after years of experience and working themselves up the ladder.

If you want to look for a school that offers acupuncture degrees, it is best to go online and see which one has the best program that suits your requirements.

Curse preparacion dele escolar a2 b1 claves con...There are many premenstrual syndrome symptoms which can be broadly classified as neurologic & vascular symptoms, psychological symptoms, gastrointestinal symptoms, fluid retention, eye problems and respiratory problems. The cause of premenstrual syndrome are fluctuations in the levels of progesterone & estrogen, hypoglycemia, hyperprolactinemia, psychogenic factors, changes in carbohydrate metabolism, excessive aldosterone, progesterone allergy and water retention by kidneys. The good thing is that premenstrual syndrome can be prevented by exercising regularly, eating balanced diet and sleeping adequately.

Dysmenorrhea is feeling intense menstrual pain and cramps. Depending on the severity, dysmenorrhea is stated as primary dysmenorrhea or secondary dysmenorrhea. Primary dysmenorrhea symptoms are felt from the onset of the menstrual periods and are felt life-long. Because of abnormal uterine contractions due to chemical imbalance, severe menstrual cramping is experienced. Secondary dysmenorrhea starts in the later stages. The causes are different for primary and secondary dysmenorrhea. Secondary dysmenorrhea can be blamed on medical conditions such as endometriosis, uterine fibroids, pelvic inflammatory disease, tumors, infections, and abnormal pregnancy.

Dysmenorrhea symptoms are lower abdomen cramping & pain, lower back pain, nausea, diarrhea, vomiting, fatigue, fainting, weakness and headaches.

Females who are overweight, smoke, and have started to menstruate before turning eleven are at a higher risk of developing dysmenorrheal. Females who drink alcohol during menstrual period experience prolonged pain. After studying the health conditions, age, cause of dysmenorrhea, and extent of condition of the individual, corresponding treatment will be recommended.

Heat-Related Illnesses in Teens

Heat related illnesses are caused due to prolonged exposure to heat and also humidity without any reprieve and due to inadequate intake of fluids. Kids and teens adjust to the variations in heat compared to adults who adapt more quickly. However the heat production is high in them when compared to adults but sweat relatively less. Sweating is the natural action of the body and cooling mechanism to counter heat. Kids and teens often ignore these facts and do not hydrate themselves enough while playing, participating in sports and exercises.

Kids and teens with health problems that are chronic or those who are on certain prescription could be more susceptible to heat related problems. Overweight adolescents or those who wear heavy clothing in times of exertion also suffer heat related illnesses. Heat related illnesses are basically classified into three types. They are: Heat cramps, heat stroke and heat exhaustion.

Review preparacion dele escolar a2 b1 claves con; Heat cramps are the mildest of all heat related injuries and constitute aching muscle cramps and also spasms that occur during intense exercising and also after intense exercising and also sweating in high heat. The symptoms of heat cramps include cramps that are painful in the legs. Flushed and moist skin is also symptoms of heat cramps. The symptoms could also include mild fever generally below 102 degree Fahrenheit. Teens suffering from heat cramps should move to a cool place and take adequate rest. Remove any excessive clothing and wear or put cool clothing on skin or cool skin using air conditioner or fan. Sports drinks which are cool and which contains sugars and salts can also be taken. Stretching out cramped muscles slowly and steadily also helps reduce heat cramps.

On the other hand heat exhaustion is more serious and severe compared to heat cramps and occur due to heavy loss of salt and water from the body. Extreme heat conditions, inadequate fluid intake and excessive sweating results in this conditions. Also, heat exhaustion occurs as a result of inability of the body to maintain the body temperature below the normal which can deteriorate further and also result in a heat stroke which is even worse. The symptoms of heat exhaustion are: muscle cramps, moist skin, pale skin, nausea, fever above 102 degree Fahrenheit, diarrhea, vomiting, fatigue, headache, weakness, anxiety and faint feeling. Teens suffering from heat exhaustion should stay in cool surrounding and take enough rest. Removing excessive clothing, putting on cool clothes and sitting in fan or air conditioning also helps the situation. Intake of cold sports drinks which contains salts and sugars are also advisable. If a teen doesn't show any signs of improvement even after taking all these measures a physician should be consulted immediately.

*Challenge preparacion dele escolar a2 b1 claves con*___There are basically 14 pathways throughout the body where chi flows continuously. These are called the meridian points. In order for chi to course through the body unobstructed, there has to be a balance between the strengths of yin and yang. In ancient Chinese philosophy, yin and yang represent the forces of the universe- yin is for feminine, while yang is for masculine. Every single thing in the universe is believed to contain both yin and yang for harmony. When the yin and yang are not balanced, chi cannot stream through the body liberally. Therefore, the meridian points through which chi courses through need to be stimulated. This is done by the insertion of hair-thin, disposable needles in specific areas on a person's body to induce bodily harmony and bring about healing.

The history of acupuncture is first discussed in an ancient Chinese medical text called the "Huang Di Nei Jing" or The Yellow Emperors Classic of Internal Medicine.

But there have been a few who are skeptic as archaeologists have found a 5,000 year old mummy in the Alps with similar acupuncture points in the body. This gives some people the idea that it was used even before the Chinese did but sine there is no written text to prove that, no one is certain and credit to this ancient practice goes back to the Chinese.

In the 6th century, this knowledge moved to Japan. In the 17th century, a man by the name of Waichi Sugiyama wanted to make this procedure painless for the patient so he developed the insertion tube, a small cylindrical tube through which the needle is inserted. Believe it or not, this technique is still being used today.

in maintaining bodily and mental health. It is believed that chi is present in every living creature, and flows through specific pathways in the body. Health problems arise when the flow of chi on the body is blocked. As a result, a person may feel persistent headaches, muscle pain, fever, weakness, or in the worst case, becomes afflicted with more serious health conditions.

A Deeper Explanation of Acupuncture

Acupuncture has its origins in ancient Chinese philosophy and practice. More than ten thousand years ago, during the Old Stone Age of China, stones were fashioned into knives for medical purposes. After several years, during the New Stone Age, these stones were eventually made into needles intended for the same therapeutic end. These accounts are further evidenced by unearthed stone needles found to be of the same types used during the New Stone Age.

Liberation preparacion dele escolar a2 b1 claves con~**Acupuncture in the Western World**

One of the most debated issues between the East and the West is the use of acupuncture as a western means of medical treatment. Even though this form of medicine has been used as an effective method for over five thousand years in China, there is no concrete evidence from scientific research studies that have proven the healing properties of acupuncture.

Skeptics shrug off the positive effects of acupuncture as merely placebo effects. Believers in acupuncture, however, say that the benefits have simply not yet been proven. Believers promote that the treatment is harmless and can be used as a complement to western medicine.

Revenge preparacion dele escolar a2 b1 claves con

Unfortunately, standards of acupuncture have not been fully approved by the FDA due to many unregulated practices that still exist such as the re-use of needles. Furthermore, acupuncture certification today is mostly a sham, used to make money on desperate patients who have not benefited from western medical treatments. The National Council Against Health Fraud has even declared acupuncture as an unproven means of treatment whose concepts of healing are primitive and false.

Should You Try It

One thing that Western science can agree upon is that there are no proven harmful effects of acupuncture. Many doctors agree that as long as a medication is not detrimental to one's health, then there is no reason why it should not be used if there are noticeable benefits. Most scientists would also state that it is simply due to a lack of research that the therapeutic properties of acupuncture have not yet been proven.
