The Principles of Personal Property Law 2017-05-18 Duncan Sheehan The law of personal property covers a very wide spectrum of scenarios and, unfortunately, has had little detailed scrutiny of its overarching structure over the years. It is a system and can best be understood as a system. Indeed, without understanding it as a system, it becomes much more difficult to comprehend. The second edition of this acclaimed textbook continues to provide a comprehensive yet detailed coverage of the law of personal property in England and Wales. It includes transfer of legal title to chattels, the nemo dat rule, negotiable instruments and assignment of choses in action. It also looks at defective transfers of property and the resulting proprietary claims, including those contingent on tracing, the tort of conversion, bailment and security interests. By bringing together areas often scattered throughout company law, commercial law, trusts and tort textbooks, it enables readers to see common themes and issues and to make otherwise impossible generalisations across different contexts about the nature of the concepts English law applies. Throughout the book, concepts are explained rigorously, with reference to how they are used in commercial practice and everyday life. The new edition also includes a new chapter on secured transactions law reform, and introduces new material on the Cape Town Convention, IP rights and other intangible property. The book will be of primary interest to academics and practitioners in the area. However, it will also be of use to students studying commercial or personal property law.

International and Comparative Secured Transactions Law 2017-10-19 Spyridon V Bazinas The law of secured transactions has seen dramatic changes in the last decade. International organisations, particularly the United Nations Commission on

International Trade Law (UNCITRAL), have been working towards the creation of international legal standards aimed at the modernisation and harmonisation of secured financing laws (eg, the United Nations Convention on the Assignment of Receivables in International Trade, the UNCITRAL Legislative Guide on Secured Transactions and its Intellectual Property Supplement, the UNCITRAL Guide on the Implementation of a Security Rights Registry and the UNCITRAL Model Law on Secured Transactions). The overall theme of this book is international (or cross-border) secured transactions law. It assembles contributions from some of the most authoritative academic voices on secured financing law. This publication will be of interest to those involved in secured transactions around the world, including policy-makers, practitioners, judges, arbitrators and academics.

Proprietary Interests in Commercial Transactions 1996 Sarah Worthington One of the most pressing problems now facing commercial lawyers is to explain the principles which determine when a remedy is proprietary and when it is not. This book provides a broad overview of the subject. It examines representative business transactions which commonly give rise to legal or equitable interests in personal property. Its aim is to distil the fundamental principles understanding the relevant legal analyses. The result is to provide a more theoretically rigorous analytical framework for proprietary interests in personal property. The practical advantages of this are potentially twofold: new commercial transactions can be more effectively structured; in addition, disputes between contracting parties can be more reliably resolved. Two features of the analysis are significant. The first is the elastic nature of proprietary interests in personal property.

Although proprietary interests can be broadly classified as ownership or security interests, these are relative concepts which may be affected significantly by impinging contractual arrangements. The second feature is the necessary and intimate integration of law and equity. Equitable proprietary interests are remarkably prevalent; this prevalence is directly related to the apparent ease with which equity is able to convert particular personal obligations into proprietary interests.

International Commercial Sales: The Sale of Goods on Shipment Terms 2016-11-18 Andrea Lista This book comprehensively examines the entire legal process of the international sale of goods, beginning with the creation of the contract and continuing through to either the fulfilment of the sale, or the termination of the contract. Every day goods are globally traded between sellers and buyers in different countries and different jurisdictions. The distances between the parties involved in such transactions, and the relative risks related to that, are a key issue in international commercial sales. Sales of goods carried by sea, thus, differ quite drastically from domestic sales; the goods will be normally shipped at a port very distant from the buyer, preventing his physical presence at the port of loading. Further, the goods will travel in the custody of a carrier, a party normally quite independent from either trader. Finally, transactions concluded on shipment terms are normally irreversible, in the sense that shipping the goods back to the seller represents an unlikely option for the buyer. Traders around the world very frequently choose English law to govern their contracts, with disputes to be resolved through London arbitration or litigation. The basis of that law is to be found in the English Sale of Goods Act 1979, and the book consequently also includes an examination of the fundamental principles of that Act, as well as considering use of the Vienna Convention on the International Sale of Goods. This book will be an invaluable reference point for legal practitioners specialising in the sale of goods, as well as postgraduate students and academic researchers working in sales of goods and the international trade sector.

Debattista on Bills of Lading in Commodities Trade 2021-04-23 Charles Debattista Debattista on Bills of Lading in Commodity Trade provides not so much a linear road-map as a GPS system, allowing the reader to locate which aspect of the bill of lading is central to the dispute they are dealing with and evaluating that aspect from the perspective of each of: (1) the contract of sale; (2) carriage contract and (3) letter of credit. The title examines questions such as: How can a buyer ensure in their sale contract that the bill of lading the buyer receives from the seller gives them secure title to sue the carrier? What impact does the choice of a particular Incoterms rule have on whom the carrier can sue under the contract of carriage? Where there is a claim by a buyer/cargo-claimant for loss, damage or delay to goods, must they factor any gains or benefits made under the sale contract claim/settlement into the quantum claimed in the cargo-claim against the carrier? What is a 'charterparty bill of lading' - and can it be tendered under a letter of credit? When and why might a seller need to "switch" bills of lading for its buyer or its bank - and does the seller have a right to demand the switching of bills under the Hague-Visby Rules? All of these questions - and many others like them - cut across areas of law normally siloed in academic and practitioner texts. The purpose of this title is to make links and draw out connections, with a view to assisting lawyers when a dispute arises - and others drafting different contracts seeking to avoid problems arising in the first place. The fourth edition of this work, now bearing a new title and benefitting from the arrival of a co-author, has been fully revised to take account of case-law and regulatory developments in the twelve years since the last edition.

The Law of Security and Title-Based Financing 2012-03-22 Hugh Beale Personal property security is an important subject in commercial practice, as it is the key to much of the law of banking and sale. This second edition has been fully updated and expanded to cover all important issues and changes within this highly complex area of law. It explains traditional methods of securing debts (such as mortgages, charges, and pledges) on property other than land, describing how these are created, how they must be registered (or otherwise 'perfected') if they are to be valid, the rights and duties of the parties, and how the security is enforced if

the debt is not paid. The new edition includes an expanded section on priorities in which it explains how 'priority' disputes between competing interests over the same property are resolved. In addition the book covers the law governing other transactions that perform a similar economic function (such as finance leases, retention of title clauses, and sales of a company's book debts). These are not currently treated by the law as security and are therefore subject to different rules on perfection, priority, and enforcement. There is much expansion of the discussion relating to enforcement including the issue of 'right of use' following Lehman, more analysis on administration and all forms of non-possessory security and quasi-security, and a new chapter on enforcement of security addressing the right of appropriation under FC/FCAR and the Cukurova case. The conflict of laws section includes developments under the Rome I Regulation affecting assignment issues, the UNIDROIT Convention 2009 in relation to tiered holdings and the Cape Town Convention's extensions made to coverage of asset-backed security over equipment. It also addresses the changes brought about by the abolition of Slavenburg registration. This edition contains relevant points from the Banking Act 2009 concerning its impact on security, such as the power to protect certain interests on a transfer of property, and also considers amendments regarding liquidators' expenses under the Insolvency Rules. The authors additionally deal with the role of step-in rights and why they are part of the statutory definition of project finance in the Enterprise Act. Previously published as *The Law of Personal Property Security*, this new edition brings together all of the law on this complex area, providing guidance in the context of commercial practice, especially with increased coverage of conflict of laws, priority, insolvency, and enforcement.

England and Wales, Ireland, Scotland, Cyprus 2009-04-27 Wolfgang Faber This is the second volume of a series of national reports on basic issues concerning the acquisition and loss of ownership of movable assets. The series is planned to cover 27 European legal systems, distributed over six volumes. Starting with general property law issues like the concepts of ownership and possession employed in the different legal systems, and the means by which they are protected, the reports primarily focus on the "derivative" transfer of ownership, but their scope extends to good faith acquisition from a non-owner, acquisitive prescription, processing and commingling, and further related issues. The reports, prepared by national property law experts, provide the reader with detailed information about the rules, case law and legal literature in the jurisdictions concerned. They serve as a starting point for further comparative research in property law and also as a tool for practitioners searching for information on foreign legal systems.

Proprietary Remedies in Context 2002-04-23 Craig Rotherham There is a tension in English law between the idea that the courts might provide a remedy by creating new property rights and the understanding that the judiciary's role is limited to the protection of existing proprietary interests with the power to redistribute property residing in the legislature alone. While there are numerous instances in which the courts intervene to readjust property rights, these are disguised in metaphor and fiction. However, this has meant that the law in this area has developed without open consideration of justifications for redistributing property. The result of this is that there is little coherence in the law of proprietary remedies as a whole and a good deal of it is indefensible. The book examines redistributive processes such as tracing, subrogation and proprietary estoppel and the use of the constructive trust in the context of contracts to assign property, vitiated transactions, the profits of wrongdoing and the breakdown of intimate relationships. It contrasts the English treatment of this area of law with developments in other common law jurisdictions where a more dynamic understanding of property has permitted more open acknowledgement of the judicial role in redistributing proprietary rights.

The Payment Order of Antiquity and the Middle Ages 2011-11-01 Benjamin Geva Examining the legal history of the order to pay money initiating a funds transfer, the author tracks basic principles of modern law to those that governed the payment order of Antiquity and the Middle Ages. Exploring the legal nature of the payment order and its underpinning in light of contemporary institutions and payment mechanisms, the book traces the evolution of money, payment mechanisms and the law that governs them, from developments in Ancient Mesopotamia, Ancient Greece, Rome, and Greco-Roman Egypt, through medieval Europe and post-medieval England. Doctrine is examined in Jewish, Islamic, Roman, common and civil laws. Investigating such diverse legal systems and doctrines at the intersection of laws governing bank deposits, obligations, the assignment of debts, and negotiable instruments, the author identifies the common denominator for the evolving legal principles and speculates on possible reciprocity. At the same time he challenges the idea of 'law merchant' as a mercantile creation. The book provides an account of the evolution of payment law as a distinct cohesive body of legal doctrine applicable to funds transfers. It shows how principles of law developed in tandem with the evolution of banking and in response to changing circumstances and proposes a redefinition of 'law merchant'. The author points to deposit banking and emerging technologies as embodying a great potential for future non-cash payment system growth. However, he recommends caution in predicting both the future of deposit banking and the overall impact of technology. At the same time he expresses confidence in the durability of legal doctrine to continue to evolve and accommodate future payment system developments.

Personal Property Security Law Reform in the UK 2009-12-16 John de Lacy There has been much discussion in the last ten years about the need to reform the law governing company charge registration, with many bodies including the Department of Trade and Industry and Law Commissions considering the case for reform of this area in the context of a wider scheme of personal property security reform. This has culminated in the coming into force of Part 25 of the Companies Act 2006, which is concerned with company charge registration. This major book features the work of international experts on personal property security law. It focuses on the reform of UK company charge law and argues that the Companies Act 2006 did not go far enough in reforming the law. It addresses the question as to whether the UK should follow the lead of other jurisdictions that have adopted US Article 9 type personal property security schemes. As well as considering current UK law the book also addresses the changes proposed by the Law Commissions and, despite current government inaction, considers whether these reform proposals should be adopted. The book contains major international comparisons and, in particular, looks at law reform in the USA, Canada, Australia, New Zealand, Singapore and Europe. This comparative treatment gives the reader a full perspective on this difficult and

constantly developing area of law.

****The Life and Legacy of Nelson Mandela****

Nelson Mandela stands as one of the most influential leaders of the 20th century. His life journey began on July 18, 1918, in the tranquil village of Mvezo, South Africa. Born into the Thembu royal family, he was bestowed with the name Rolihlahla, meaning "troublemaker" in Xhosa. Mandelas upbringing unfolded amidst a backdrop of racial oppression, where he witnessed firsthand the harsh realities inflicted upon the Black majority by the ruling white minority government. Driven by a deep sense of justice, he dedicated his life to the struggle for freedom and justice, joining the African National Congress (ANC), a political organization dedicated to dismantling apartheid, the system of racial separation that plagued South Africa. Emerging as a compelling lawyer, activist, and leader, Mandela faced numerous arrests and imprisonments for his unwavering resistance and defiance. For 27 years, he endured the harsh conditions and isolation of Robben Island, a notorious prison island, where his hope never wavered. His unwavering commitment to justice continued to inspire and mobilize his people and the world at large. In 1990, he walked out of prison, free at last, and in 1994, he made history as South Africas first democratically elected Black president. Mandelas leadership ushered in a period of peaceful transition, transforming South Africa into a nation of equal opportunity. His global impact extended far beyond South Africas borders, as he became a beacon of peace, recognized for his unwavering dedication to these ideals. In 1993, he was awarded the Nobel Peace Prize, alongside numerous other accolades and honors. On December 5, 2013, at the age of 95, Mandela passed away, leaving behind a legacy of courage, wisdom, and compassion. Revered as the father of the nation and one of historys greatest heroes, Mandelas legacy continues to inspire generations to come.
