The Last Jedi Controversy: How Star Wars Episode VIII Let the Fans Down 2018-05-23 Stuart Carapola Star Wars Episode VII: The Force Awakens left us with a lot of unanswered questions: The galaxy was again at war, but weren't sure why. The Empire was reborn as the First Order under Supreme Leader Snoke, but we didn't know where he came from or how he wound up taking control. We didn't learn what caused Kylo Ren to betray his family. The reasons Luke Skywalker disappeared were unknown. Rey discovered her immense power in the Force, but we didn't know where she got it from, who her parents were, or why they abandoned her on Jakku and never returned. Fans went to see Episode VIII with an understandable expectation to learn the answers to these mysteries, but to say that many of them went home sorely disappointed would be an understatement. In this book, we'll explore the stark contrast between the mysteries that were set up in Episode VII and the resolutions we got in Episode VIII, how it may be the product of two conflicting visions of different directors (JJ Abrams and Rian Johnson), what it all means for the future of the Star Wars saga, whether there's any way back, and what new mysteries the Last Jedi left us with that could be answered in Episode IX (if they feel like it).

How Disney Ruined Star Wars, How The Star Wars Series Became A Global Phenomenon, Strategies For How Disney Can Salvage The Dying Star Wars Franchise, And How An Average Gamer Can Earn A Living Playing Star Wars Video Games 2020-02-15 Dr Harrison Sachs This essay sheds light on how the how Disney ruined Star Wars and elucidates how the Star Wars series became a global phenomenon, Moreover, strategies for how Disney can salvage the dying Star Wars franchise are identified and how an average gamer can earn a living playing Star Wars video games is delineated in this essay. Much to the dismay of avid Star Wars fans, the once beloved Star Wars franchise has been egregiously by ruined Disney. The consensus that Star Wars Episode 7: The Force Awakens and Star Wars Episode 8: The Last Jedi are eminently appalling and devoid of a modicum of merit has attributed to Star Wars losing its luster and becoming more or less of a dying franchise. The imprudent decision of Disney to take the masterpiece of the Star Wars franchise into a new direction for the worse and become fraught with terrible plot points, vapid narratives, uninteresting characters, and a lack of merit in all facets is something that has been spurned by the Star Wars community and ruined the once legendary Star Wars franchise. After George Lucas decided to sell Lucasfilm and the Star Wars property in 2012, the Star Wars franchise would never again be the same much and would inexplicably be degraded in merit, much to the dismay of devout Star Wars fans. Disney neglected to utilized the scripts for the sequel trilogy for Star Wars Episodes 7-9 that they bought from George Lucas. They also decided to not utilize George Lucas's Star Wars canon material nor produce a Star Wars film based on the Star Wars' lore. The Star Wars franchise would be all the more bastardized and become an abomination of its former glorious, legendary self with the releases of JJ Abrams' Star Wars: Episode VII: The Force Awakens and Rian Johnson's Star Wars Episode 8: The Last Jedi by Disney. These Disney Star Wars movies were eminently atrocious in all facets and each deserve a 0/10 review score for their ratings at best. This is because, Star Wars fans felt that Star Wars Episode 7 was far too reliant on the familiarity and environmental settings of the original trilogy, but without any of the merits of the original trilogy. Additionally, Star War Episode 8 was did not fare any better than its predecessor film since Star Wars fans have been in an uproar regarding plot points, vapid narratives, and lack of character development which have tainted the Star Wars sequel trilogy produced by Disney. Disney has become infamous and notorious among the Star Wars community for completely ruining the once legendary Star Wars franchise and bastardizing the direction of its future by steering its trajectory into a future that many would contend is beyond salvation, especially if the multibillion dollar entertainment conglomerate that produces Mickey Mouse cartoons for children continue to stray away from following the Star Wars cannon material when producing Star Wars films. Star Wars Episode 9: The Rise Of Skywalker is destined to also be a 0/10 just like its previous sequel trilogy installments. Star Wars Episode 9 The Rise Of Skywalker will inevitably also be plagued with the issues of terrible plot points, vapid narratives, uninteresting characters, and a lack of merit in all facets just as like its other Star Wars sequel installments. Therefore, Star Wars Episode 9 The Rise Of Skywalker is unequivocally worthy of a 0/10 review score rating based on its resounding lack of merit. Disney, the entertainment conglomerate, only knows how to produce kids films and the adult Star Wars fandom eagerly craves to not watch another Star Wars film geared toward the child demographic cohort. The extended to which Disney ruined the Star Wars franchise is truly disgraceful. While deviating away from the cannon material when producing films does not always ruin a franchise, the crux of the issue in this content is that Disney replaced George Lucas's Star cannon material with something far inferior when they produced Star Wars Episodes 7-9 that forever tarnished the series.

Dark Warning 2005 Jude Watson Obi-Wan Kenobi tries to keep the Jedi's most important secret safe from the Empire and search for another Jedi who, besides Yoda, survived the Emperor's annihilation of the Order.

There is no tissue damage when the needle is inserted into the skin or pulled out and only in very rare cases are there traces of bruising.

The second myth is that you can get hepatitis or AIDS from acupuncture. This is true only if the needles used are not sterilized. In the US, this will never happen because acupuncturists are required to use disposable needles thus you are not at risk from these two diseases.

The history of acupuncture is first discussed in an ancient Chinese medical text called the "Huang Di Nei Jing" or The Yellow Emperors Classic of Internal Medicine.

But there have been a few who are skeptic as archaeologists have found a 5,000 year old mummy in the Alps with similar acupuncture points in the body. This gives some people the idea that it was used even before the Chinese did but since there is no written text to prove that, no one is certain and credit to this ancient practice goes back to the Chinese.

In the 6th century, this knowledge moved to Japan. In the 17th century, a man by the name of Waichi Sugiyama wanted to make this procedure painless for the patient so he developed the insertion tube, a small cylindrical tube through which the needle is inserted. Believe it or not, this technique is still being used today.

Acne is one of the most common problems in adolescent teens affecting nearly seventeen million people in the United States. Acne is nothing but a disorder involving sebaceous glands and hair follicles. Acne results from the clogging of sebaceous glands leading to the formation of pimples and cysts. The condition usually begins with the onset of puberty. Going by the facts, as teens attain puberty the androgens also called male sex hormones are produced in high number leading to sebaceous glands becoming over active which results in sebum being produced in high proportions. Sebum, which is nothing but oil is produced by sebaceous glands which travel to the skin surface through hair follicles. But, skin cells block the follicles which results in oil also being blocked. When these hair follicles are blocked it results in the development of skin bacteria known as Propionibacterium Acnes within the follicles which in turn results in swelling of the skin called Acne. If the hair follicles are partially blocked it results in blackheads. If the follicles are completely blocked they result in whiteheads. But if these plugged follicles are not treated they ultimately burst causing the oil, bacteria and skin cells to spill all over the skin resulting in irritation and formation of pimples. Acne can be shallow as well as deep in various individuals depending on the nature of skin and amount of oil produced.

#### **Cholesterol in Adolescents**

Parts of adolescent's body are filled with a waxy stuff identified as cholesterol. It helps to produce vitamin D, cell membranes and certain hormones. Blood cholesterol comes from two different sources, liver within the body and food. The adolescent's liver produces enough cholesterol to carry out proper functioning.

The blood acts as the carrier of cholesterol and transports it to different parts of the body. They are transported in round particle form known as lipoproteins. There are two types of lipoproteins called the low density lipoproteins or LDL and high density lipoproteins or HDL. Low density lipoprotein or LDL cholesterol is commonly known as bad cholesterol. It helps in the building up of plaque in arteries and this condition is known as atherosclerosis. The LDL level must be low in the blood and if it is high it must be decreased. Healthy weight must be maintained and exercise should be done regularly. Food items which have high contents of calories, dietary cholesterol and saturated fat must be avoided.

High density lipoprotein or HDL cholesterol is the good cholesterol. It is actually a kind of fat in blood which helps to remove bad cholesterol from the body and stops the build up of plaque in the

arteries. The more the HDL cholesterol in the blood the better it is. The HDL can be raised by at least twenty minutes of exercising daily, decreasing body mass and keeping away from food with saturated fat. Some adolescents need to take medications in order to increase HDL. In such cases, increasing HDL can be a complicated procedure and the physician can make a therapeutic plan to increase HDL in the blood stream.

History star wars episode viii the last jedi-In TCM, practitioners adhere to the concept of Qi, or energy flow, and the meridians in which they travel. They use longer needles and insert them deeper in order to reach the acupuncture points. Modern science has found little evidence to prove the existence of these energy channels, but this is the technique that has been used effectively for thousands of years.

In medical acupuncture, the practitioners are graduates of western medical schools. Their application of needles is not based on the traditional acupuncture points, but on anatomic data. These acupuncturists use shorter needles and the insertions are shallower. They also tend to use fewer needles and leave them inserted for shorter periods of time. Adherents to TCM feel this is a watered-down version of the real thing. Nevertheless, many patients have felt relief of symptoms through this method.

Conditions for Puncture Application

There is a broad and extensive list of ailments which can be treated with acupuncture. The conditions run the gamut from asthma to constipation, anxiety to weight loss. Most TCM practitioners believe that any health condition results from an imbalance in Qi flow, therefore amenable to needle therapy. Western acupuncturists tend to have a more limited list of indications, the most common of which is undoubtedly control of pain.

#### **What This Ancient Method Does**

One of the foremost effects of acupuncture on the body is relaxation. Stress is frequently pinpointed as the main precursor for a host of physical ailments. There are particular points all over the body that direct the flow of harmony and relaxation and when these are enthused, the patient becomes more at ease.

Another positive effect of this alternative therapy is increased pain control. During a session, a patient will usually feel very minimal pain as the thin needles are being inserted gradually. However, the needles are deliberately placed in varying depths, depending on the health requirements of the patient. When the needles reach the right depth, the patient will feel deeper pain, although the entire procedure is not necessarily painful.

It is also recommended for relief from chemotherapy fatigue as well as chemotherapy-related nausea. It has also been found to be largely effective for back pains, migraines, menstrual cramps, and as a pain controller for patients after undergoing surgical operations.

**History star wars episode viii the last jedi.**The treatment is finished after an hour and when the needles are removed, you are advised to wear ear magnets so your session continues even when you leave the clinic. While acupuncture itself is a painless procedure, some smokers have claimed that they felt a prick or get sleepy.

Most smokers will have to come to the clinic 4 to 6 times before seeing any significant results. Just to give you an idea, one study shows that the respondents reported a decrease in the number of cravings to smoke just after one or two sessions. Seven out of 10 of the respondents were able to kick the habit after 5 or 6 sessions.

Because the number of test subjects is small, there are some who doubt the effectiveness of acupuncture. This is because although there are positive signs with regards to the short term effects of this technique, its effects were not sustained. This is why some medical journals have stated that it is unclear what acupuncture can do in smoking cessation.
