Castration and the Heavenly Kingdom 2018-09-05 Laura Engelstein Of the many sects that broke from the official Russian Orthodox church in the eighteenth century, one was universally despised. Its members were peasants from the Russian heartland skilled in the arts of animal husbandry who turned their knives on themselves to become "eunuchs for the kingdom of heaven's sake." Convinced that salvation came only with the literal excision of the instruments of sin, they were known as Skoptsy (the self-castrated). Their community thrived well into the twentieth century, when it was destroyed in the Stalinist Terror. In a major feat of historical reconstruction, Laura Engelstein tells the sect's astonishing tale. She describes the horrified reactions to the sect by outsiders, including outraged bureaucrats, physicians, and theologians. More important, she allows the Skoptsy a say in defining the contours of their history and the meaning behind their sacrifice. Her deft handling of their letters and notebooks lends her book unusual depth and pathos, and she provides a heartbreaking account of willing exile and of religious belief so strong that its adherents accepted terrible pain and the denial of a basic human experience. Although the Skoptsy express joy at their salvation, the words of even the most fervent believers reveal the psychological suffering of life on society's margins. No foreign tribe or exotic import, the sect drew its members from the larger peasant society where marriage was expected and adulthood began with the wedding night. Set apart by the very act that guaranteed their redemption, these "lambs of God" became adept at concealing their sectarian identity as they interacted with their Orthodox neighbors. Interaction was necessary, Engelstein explains, since the survival of the Skoptsy depended upon recruitment of new members and on success in agriculture and trade. Realizing that some prejudices have changed little over the centuries, Engelstein cautions that "we must not cast the shadow of our own distress on the story of the Skoptsy. Their physical suffering was something they willingly embraced." In *Castration and the Heavenly Kingdom*, she has produced a remarkable history that also illuminates the mysteries of the human heart.

Applied Linguistics Review 2010 Li Wei The *Applied Linguistics Review* is a peer reviewed annual publication. It brings together new empirical and theoretical research and serves as a testing ground for the articulation of original ideas and approaches in the study of real-world issues in which language plays a crucial role. Such issues range from aspects of the linguistic and communicative competence of the individual such as bilingualism and multilingualism, first or second language acquisition, literacy, language disorders, to language and communication related problems in and between societies such as linguistic discrimination, language conflict, communication in the workplace, language policy and language planning.

Sustainable Human Resource Management 2020-08-13 Sita Vanka This book provides a multi-stakeholder perspective on sustainable HRM for the policymakers, managers and academics, addressing issues, approaches, research studies/frameworks and emerging patterns relating to the subject. It discusses various aspects of sustainability, such as making HR more responsible for ensuring sustainability focusing on the triple bottom line, characteristics of sustainable HRM, psychological contracts, emotional intelligence, and psychological capital. The book also explores organizational citizenship behavior, employment relations, employee engagement, sustainable leadership, disruptive HR practices, sustaining employee motivation, educational sustainability, sustainable career management, sustainable environment, employer and employee branding, sustainable organizations, organization culture, training for sustainability, sustainable employee performance, business sustainability and sustainable employability. It provides an update on the concept, processes, issues and emerging paradigms from multidimensional and cross-country perspectives to showcase sustainable HR practices, and appeals to the academics, practitioners and policymakers in the area of HRM.

Routledge Encyclopedia of Translation Technology 2014-11-13 Sin-Wai Chan The *Routledge Encyclopedia of Translation Technology* provides a state-of-the-art survey of the field of computer-assisted translation. It is the first definitive reference to provide a comprehensive overview of the general, regional and topical aspects of this increasingly significant area of study. The Encyclopedia is divided into three parts: Part One presents general issues in translation technology, such as its history and development, translator training and various aspects of machine translation, including a valuable case study of its teaching at a major university; Part Two discusses national and regional developments in translation technology, offering contributions covering the crucial territories of China, Canada, France, Hong Kong, Japan, South Africa, Taiwan, the Netherlands and Belgium, the United Kingdom and the United States Part Three evaluates specific matters in translation technology, with entries focused on subjects such as alignment, bitext, computational lexicography, corpus, editing, online translation, subtitling and technology and translation management systems. The *Routledge Encyclopedia of Translation Technology* draws on the expertise of over fifty contributors from around the world and an international panel of consultant editors to provide a selection of articles on the most pertinent topics in the discipline. All the articles are self-contained, extensively cross-referenced, and include useful and up-to-date references and information for further reading. It will be an invaluable reference work for anyone with a professional or academic interest in the subject.

English Medium Instruction 2018-02-19 Ernesto Macaro, Ernesto Macaro brings together a wealth of research on the rapidly expanding phenomenon of English Medium Instruction. Against a backdrop of theory, policy documents, and examples of practice, he weaves together research in both secondary and tertiary education, with a particular focus on the key stakeholders involved in EMI: the teachers and the students. Whilst acknowledging that the momentum of EMI is unlikely to be diminished, and identifying its potential benefits, the author raises questions about the ways it has been introduced and developed, and explores how we can arrive at a true cost-benefit analysis of its future impact. "This state-of-the-art monograph presents a wide-ranging, multi-perspectival yet coherent overview of research, policy, and practice of English Medium Instruction around the globe. It gives a thorough, in-depth, and

thought-provoking treatment of an educational phenomenon that is spreading on an unprecedented scale." Guangwei Hu, National Institute of Education, Singapore Additional online resources are available at www.oup.com/elt/teacher/emi Ernesto Macaro is Professor of Applied Linguistics at the University of Oxford and is the founding Director of the Centre for Research and Development on English Medium Instruction at the university. Exploded View 2018 Dustin Parsons In Exploded View "graphic" essays play with the conventions of telling a life story and with how illustration and text work together in print. This mixture of the machine-like and the lyrical helps the reader engage with the author's mind and imagination more fully.

Articulating Design Thinking 2012 Paul Rodgers Articulating Design Thinking contains a collection of thought-provoking papers from researchers based in eight different countries around the world Sweden, Italy, Denmark, Israel, UK, USA, Australia and Turkey that all deal with articulations of design thinking from a variety of disciplinary perspectives. These include: architecture, inclusive design, industrial design and interaction design. The phrase design thinking has become cemented in our everyday lexicon. Design thinking now routinely extends, so it is claimed, to contemporary forms of design, engineering, business and management practice. Often viewed as a particular style of creative thinking-in-action design thinking, we are told, can transform the way we develop products, services, processes and even strategy. A lot of work has been published in recent years on the subject of design thinking and how designers think and act. A frequently held consensus across this work is the notion that design thinking has a number of common features that are typified and manifested in strong commitment and personal motivation of the individual. It is widely suggested that designers possess the courage to take risks, they are prepared to fail and that they are motivated and committed to work hard. Designers, during their design thinking activities, regularly (re)define and/or frame problems; they adopt holistic thinking and they sketch, visualise and model possible ideas throughout their design processes. This book examines the many facets of design thinking across a range of different design domains through comparing and contrasting the processes, methods and approaches contained within this thought-provoking collection of papers.

Wind as a Geological Process 1987-08-28 Ronald Greeley This book gives an account of geological aspects of windblown material. Aeolian processes play an important role in modifying the surface of the Earth, and they are also active on Mars. Additionally, they are thought to occur on Venus and possibly Titan as well. The authors describe the following aspects: wind as a geological process, the aeolian environment, physics of particle motion, aeolian abrasion and erosion; aeolian sand deposits and bedforms, interaction of wind and topography and windblown dust. A particular strength of the book is that it deals with aeolian processes in a planetary context, rather than as a purely terrestrial phenomenon. In so doing, the authors ably demonstrate how we can gain better understanding of the Earth through comparative planetology. This paperback reissue will enable the book to be used as a text for advanced students in planetary science. Special terms are defined when they are first used. There is a glossary and an exhaustive bibliography.

Adobe GoLive 5.0 2000 A guide to GoLive 5.0. This book helps readers learn the features of GoLive 5.0. It covers toolbars, palettes, site management tools, layout design, and more. It is useful to beginning to intermediate level course in Computer Graphics, Web Graphics, Graphic Design, Digital Imaging, or Visual Communications that uses Adobe software applications.

Technical English 4 2011 David Bonamy 'Technical English' provides English language instruction for students who are involved in vocational and technical education. The course contains the core language and skills which are common to a range of industrial specialisations. It presents key technical concepts concisely with labelled illustrations.

Qualitative Research in European Migration Studies 2018-06-19 Ricard Zapata-Barrero This open access book covers the main issues, challenges and techniques concerning the application of qualitative methodologies to the study of migration. It discusses theoretical, epistemological and empirical questions that must be considered before, during, and after undertaking qualitative research in migration studies. It also covers recent innovative developments and addresses the key issues and major challenges that qualitative migration research may face at different stages i.e. crafting the research questions, defining approaches, developing concepts and theoretical frameworks, mapping categories, selecting cases, dealing with concerns of self-reflection, collecting and processing empirical evidence through various techniques, including visual data, dealing with ethical issues, and developing policy-research dialogues. Each chapter discusses relative strengths and limitations of qualitative research. The chapters also identify the main drivers for qualitative research development in migration studies. It is a unique volume as it brings together a multidisciplinary perspective as well as illustrations of different issues derived from the research experience of the recognized authors. One additional value of this book is its geographic focus on Europe. It seeks to explore theoretical and methodological issues that are raised by distinctive features of the European context. This volume will be a useful reference source for scholars and professionals in migration studies and in social sciences as well. The publication is also addressed to graduate and post-graduate students and, more generally, to those who embark on the task of doing qualitative research for the first time in the field of migration.

Before the Dissertation 2014-09-15 Christine Pearson Casanave "This very readable book is what every graduate student needs as they start their program. I wish my own MA and PhD students, during my 40 years of supervising, could have been demystified by having Casanave's 'textual mentor' as a companion." --Merrill Swain, Professor Emerita, OISE, University of Toronto "Before the Dissertation is an insightful, relevant, and accessible resource for doctoral students at any stage. Full of reflections and advice not found in other books, it serves as an indispensable guide for students and their supervisors. And the dispelling of myths is a superb idea!" --Robert Kohls, PhD candidate, University of Toronto Unlike other books on doctoral dissertation writing, Before the Dissertation is designed for students in the social sciences who are still in the early stages of doctoral study or for master's-level students considering entering doctoral programs. It addresses concerns pertinent to both first and second language users of English. It focuses on purposes for doctoral dissertation writing, topic choice and development, choosing and working with advisers, reading and informal writing, and quality-of-life issues. Faculty advisers who wish to reduce student attrition are also urged to read this book and to work with students at early stages of dissertation projects. Each of the nine chapters begins with a common myth about advanced academic work that is then dispelled. The chapters also pose questions that connect issues directly with individual readers so as to help them make sensible decisions about their

doctoral work. The book could be used in graduate classes on issues in doctoral study or dissertation planning, and it can be a companion (textual mentor) to individual students who wish to reflect on their decision to pursue doctoral study/doctoral project. This book may also help instructors and advisers understand the kinds of obstacles faced by students that tend to impede or halt progress.

An Introduction to the Theory of Functional Equations and Inequalities 2009-03-12 Marek Kuczma Marek Kuczma was born in 1935 in Katowice, Poland, and died there in 1991. After finishing high school in his home town, he studied at the Jagiellonian University in Kraków. He defended his doctoral dissertation under the supervision of Stanislaw Golab. In the year of his habilitation, in 1963, he obtained a position at the Katowice branch of the Jagiellonian University (now University of Silesia, Katowice), and worked there till his death. Besides his several administrative positions and his outstanding teaching activity, he accomplished excellent and rich scientific work publishing three monographs and 180 scientific papers. He is considered to be the founder of the celebrated Polish school of functional equations and inequalities. "The second half of the title of this book describes its contents adequately. Probably even the most devoted specialist would not have thought that about 300 pages can be written just about the Cauchy equation (and on some closely related equations and inequalities). And the book is by no means chatty, and does not even claim completeness. Part I lists the required preliminary knowledge in set and measure theory, topology and algebra. Part II gives details on solutions of the Cauchy equation and of the Jensen inequality [...], in particular on continuous convex functions, Hamel bases, on inequalities following from the Jensen inequality [...]. Part III deals with related equations and inequalities (in particular, Pexider, Hosszú, and conditional equations, derivations, convex functions of higher order, subadditive functions and stability theorems). It concludes with an excursion into the field of extensions of homomorphisms in general." (Janos Aczel, Mathematical Reviews) "This book is a real holiday for all the mathematicians independently of their strict speciality. One can imagine what deliciousness represents this book for functional equationists." (B. Crstici, Zentralblatt für Mathematik)

Ethnopolitics in Cyberspace 2010-12-28 Robert A. Saunders Ethnopolitics in Cyberspace examines the central role of the Internet in shaping national identity among stateless nations and national minorities in the twenty-first century. By creating new spaces for political discourse, alternative avenues for cultural production, and novel means of social organization, the author argues that the Web is remaking what it means to be part of nation.

Rome, Ostia, Pompeii 2011-11-24 Ray Laurence Rome, Ostia, Pompeii: Movement and Space demonstrates how studies of the Roman city are shifting focus from static architecture to activities and motion within urban spaces. This volume provides detailed case studies from the three best-known cities from Roman Italy, revealing how movement contributes to our understanding of the ways different elements of society interacted in space, and how the movement of people and materials shaped urban development. The chapters in this book examine the impressions left by the movement of people and vehicles as indentations in the archaeological and historical record, and as impressions upon the Roman urban consciousness. Through a broad range of historical issues, this volume studies movement as it is found at the city gate, in public squares and on the street, and as it is represented in texts. Its broad objective is to make movement meaningful for understanding the economic, cultural, political, religious, and infrastructural behaviours that produced different types and rhythms of interaction in the Roman city. This volume's interdisciplinary approach will inform the understanding of the city in classics, ancient history, archaeology and architectural history, as well as cultural studies, town

planning, urban geography, and sociology.

Reading Science 2005-07-15 J.R. Martin Reading Science looks at the distinctive language of science and technology and the role it plays in building up scientific understandings of the world. It brings together discourse analysis and critical theory for the first time in a single volume. This edited collection examines science discourse from a number of perspectives, drawing on new rhetoric, functional linguistics and critical theory. It explores this language in research and industrial contexts as well as in educational settings and in popular science writing and science fiction. The papers also include consideration of the role of images (tables and figures) in science writing and the importance of reading science discourse as multi-modal text. The internationally renowned contributors include M. A. K. Halliday, Charles Bazerman and Jay Lemke.

A Decade of the Berkeley Math Circle 2008-11-26 Zvezdelina Stankova Many mathematicians have been drawn to mathematics through their experience with math circles: extracurricular programs exposing teenage students to advanced mathematical topics and a myriad of problem solving techniques and inspiring in them a lifelong love for mathematics. Founded in 1998, the Berkeley Math Circle (BMC) is a pioneering model of a U.S. math circle, aspiring to prepare our best young minds for their future roles as mathematics leaders. Over the last decade, 50 instructors--from university professors to high school teachers to business tycoons--have shared their passion for mathematics by delivering more than 320 BMC sessions full of mathematical challenges and wonders. Based on a dozen of these sessions, this book encompasses a wide variety of enticing mathematical topics: from inversion in the plane to circle geometry; from combinatorics to Rubik's cube and abstract algebra; from number theory to mass point theory; from complex numbers to game theory via invariants and monovariants. The treatments of these subjects encompass every significant method of proof and emphasize ways of thinking and reasoning via 100 problem solving techniques. Also featured are 300 problems, ranging from beginner to intermediate level, with occasional peaks of advanced problems and even some open questions. The book presents possible paths to studying mathematics and inevitably falling in love with it, via teaching two important skills: thinking creatively while still "obeying the rules," and making connections between problems, ideas, and theories. The book encourages you to apply the newly acquired knowledge to problems and guides you along the way, but rarely gives you ready answers. "Learning from our own mistakes" often occurs through discussions of non-proofs and common problem solving pitfalls. The reader has to commit to mastering the new theories and techniques by "getting your hands dirty" with the problems, going back and reviewing necessary problem solving techniques and theory, and persistently moving forward in the book. The mathematical world is huge: you'll never know everything, but you'll learn where to find things, how to connect and use them. The rewards will be substantial. In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life, MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people, their parents and teachers, and the mathematics profession.

Information Sources in Grey Literature 2017-06-12 Peter Auger The aim of each volume of this series Guides to Information Sources is to reduce the time which needs to be spent on patient searching and to recommend the best starting point and sources most likely to yield the desired information. The criteria for selection provide a way into a subject to those new to the field and assists in identifying major new or possibly unexplored sources to those who already have some acquaintance with it. The series attempts to achieve evaluation through a careful selection of sources and through the comments provided on those sources.

PBL in Engineering Education 2017-09-13 Aida Guerra PBL in Engineering Education: International Perspectives on Curriculum Change presents diverse views on the implementation of PBL from across the globe. The purpose is to exemplify curriculum changes in engineering education. Drivers for change, implementation descriptions, challenges and future perspectives are addressed. Cases of PBL models are presented from Singapore, Malaysia, Tunisia, Portugal, Spain and the USA. These cases are stories of thriving success that can be an inspiration for those who aim to implement PBL and change their engineering education practices. In the examples presented, the change processes imply a transformation of vision and values of what learning should be, triggering a transition from traditional learning to PBL. In this sense, PBL is also a learning philosophy and different drivers, facing diverse challenges and involving different actors, trigger its implementation. This book gathers experiences, practices and models, through which is given a grasp of the complexity, multidimensional, systemic and dynamic nature of change processes. Anette Kolmos, director of Aalborg PBL Centre, leads off the book by presenting different strategies to curriculum change, addressing three main strategies of curriculum change, allowing the identification of three types of institutions depending on the type of strategy used. Following chapters describe each of the PBL cases based upon how they implement the seven components of PBL: (i) objectives and knowledge; (ii) types of problems, projects and lectures; (iii) progression, size and duration; (iv) students' learning; (v) academic staff and facilitation; (vi) space and organization; and (vii) assessment and evolution. The book concludes with a chapter summarizing all chapters and providing an holistic perspective of change processes.

Researching Business and Management 2017-09-16 Harvey Maylor This core textbook combines a highly engaging approach with academic rigour to guide students through understanding and using research methods. Now in its second edition, this text has been fully updated and revised throughout. With a focus that is fresh and applied, Researching Business and Management goes beyond the theory to demonstrate how to actually do research. The unique 4-Ds model shows students how to define, design, do and describe their research and, in this way, offers them a definitive guide to the research process as a system and a lifecycle that they can relate to their own work. Its user-friendly style enlivens the text and makes even some of the most complex issues accessible. Written by a dynamic author team of leading experts in the field, this is an ideal textbook for undergraduate, postgraduate and MBA students studying research methods, and essential reading for any business student doing a research project. New to this Edition: - Even more cases and examples to highlight real-life examples of student research that helps bring the process to life - Increased coverage of the internet and online research - Expanded material on quantitative analysis to provide a truly balanced overview of the discipline - New dedicated chapter on research ethics and avoiding plagiarism Accompanying online resources for this title can be found at bloomsburyonlineresources.com/researching-business-and-management-2e. These resources are designed to support teaching and learning when using this textbook and are available at no extra cost.

LaTeX in 24 Hours 2017-06-27 Dilip Datta This book presents direct and concise explanations and examples to many LaTeX syntax and structures, allowing students and researchers to quickly understand the basics that are required for writing and preparing book manuscripts, journal articles, reports, presentation slides and academic theses and dissertations for publication. Unlike much of the literature currently available on LaTeX, which takes a more technical stance, focusing on the details of the software itself, this book presents a user-focused

guide that is concerned with its application to everyday tasks and scenarios. It is packed with exercises and looks at topics like formatting text, drawing and inserting tables and figures, bibliographies and indexes, equations, slides, and provides valuable explanations to error and warning messages so you can get work done with the least time and effort needed. This means LaTeX in 24 Hours can be used by students and researchers with little or no previous experience with LaTeX to gain quick and noticeable results, as well as being used as a quick reference guide for those more experienced who want to refresh their knowledge on the subject.

Geography Education Promoting Sustainability 2020-04-15 Eila Jeronen Through out the current period of educational change, Geography education has also changed. The innovations may be the starting point to affect conceptual change and paradigm shifts. Geography education assimilates and integrates knowledge, skills and scientific methodologies. The ten articles in this book illuminate a wide range of topics of interest to Geography education. In their article, Skarstein and Wolff discuss how the interplay between the environment, society and economy pillars of sustainability thinking play out on scales of time, space and multitude and how geography teachers can support the students' understanding of sustainability. Yli-Panula et al. analysed used teaching and learning methods to find out good ones for promoting sustainability in geography. The same idea can be found in Duffin's and Perry's article on Place-Based Ecology Education. In their article, Dür and Keller discuss the topics of quality of life, sustainability and global justice based on the goals of Education for Sustainable Development. Evaluation is an important part of learning. It is reviewed by Schauss and Sprenger regarding climate change education. The following two articles deal with students' views of landscapes worth conserving. In both studies, students expressed concern about the state of the environment. Yli-Panula et al. found that the Mexican students seldom considered their own activities in relation to the environment while Yli-Panula et al. stated that only some of the Finnish and Swedish students act as observers while others actively care for their environment. The remaining three articles deal with teaching methods and models. Benninghaus et al. present a benchmark method, which allows statements about the quality of the maps/diagrams in general. Álvarez-Otero and De Lázaro y Torres, on the other hand, describe their Technological Pedagogical Content Knowledge model. Kopnina and Saari discusses student assignments reflecting on the documentary film through critical pedagogy and ecopedagogy.

Hypothetical Learning Trajectories 2012-12-06 Douglas H. Clements The purpose of this special issue is to present several research perspectives on learning trajectories with the intention of encouraging the broader community to reflect on, better define, adopt, adapt, or challenge the concept. The issue begins by briefly introducing learning trajectories. The remaining articles provide elaboration, examples, and discussion of the construct. They purposefully are intended to be illustrative, exploratory, and provocative with regard to learning trajectories construct; they are not a set of verification studies.

Judging a Book by Its Cover 2016-12-05 Nickianne Moody How do books attract their readers? This collection takes a closer look at book covers and their role in promoting sales and shaping readers' responses. Judging a Book by Its Cover brings together leading scholars, many with experience in the publishing industry, who examine the marketing of popular fiction across the twentieth century and beyond. Using case studies, and grounding their discussions historically and methodologically, the contributors address key themes in contemporary media, literary, publishing, and business studies related to globalisation, the correlation between text and image, identity politics, and reader reception. Topics include book covers and the internet bookstore; the links between books, the music industry, and film; literary prizes and the selling of books;

subcultures and sales of young adult fiction; the cover as a signifier of literary value; and the marketing of ethnicity and lesbian pulp fiction. This exciting collection opens a new field of enquiry for scholars of book history, literature, media and communication studies, marketing, and cultural studies.

Under New Public Management 2014-09-17 Alison I. Griffith The institutional ethnographies collected in Under New Public Management explore how new managerial governance practices coordinate the work of people doing front-line work in public sectors such as health, education, social services, and international development, and people management in the private sector. In these fields, organizations have increasingly adopted private-sector management techniques, such as standardized and quantitative measures of performance and an obsession with cost reductions and efficiency. These practices of "new public management" are changing the ways in which front-line workers engage with their clients, students, or patients. Using research drawn from Canada, the United States, Australia, and Denmark, the contributors expose how standardized managerial requirements are created and applied, and how they affect the practicalities of working with people whose lives and experiences are complex and unique.

The Implied Author 2006-01-01 Tom Kindt This book addresses itself to the concept of the implied author, which has been the cause of controversy in cultural studies for some fifty years. The opening chapters examine the introduction of the concept in Wayne C. Booth's "Rhetoric of Fiction" and the discussion of the concept in narratology and in the theory and practice of interpretation. The final chapter develops proposals for clarifying or replacing the concept.

Crosscutting Concepts 2021 Jeffrey Nordine "If you've been trying to figure out how crosscutting concepts (CCCs) fit into three-dimensional learning, this in-depth resource will show you their usefulness across the sciences. Crosscutting Concepts: Strengthening Science and Engineering Learning is designed to help teachers at all grade levels (1) promote students' sensemaking and problem-solving abilities by integrating CCCs with science and engineering practices and disciplinary core ideas; (2) support connections across multiple disciplines and diverse contexts; and (3) use CCCs as a set of lenses through which students can learn about the world around them. The book is divided into the following four sections. Foundational issues that undergird crosscutting concepts. You'll see how CCCs can change your instruction, engage your students in science, and broaden access and inclusion for all students in the science classroom. An in-depth look at individual CCCs. You'll learn to use each CCC across disciplines, understand the challenges students face in learning CCCs, and adopt exemplary teaching strategies. Ways to use CCCs to strengthen how you teach key topics in science. These topics include the nature of matter, plant growth, and weather and climate, as well as engineering design. Ways that CCCs can enhance the work of science teaching. These topics include student assessment and teacher professional collaboration. Throughout the book, vignettes drawn from the authors' own classroom experiences will help you put theory into practice. Instructional Applications show how CCCs can strengthen your planning. Classroom Snapshots offer practical ways to use CCCs in discussions and lessons. No matter how you use this book to enrich your thinking, it will help you leverage the power of CCCs to strengthen students' science and engineering learning. As the book says, "CCCs can often provide deeper insight into phenomena and problems by providing complementary perspectives that both broaden and sharpen our view on the rapidly changing world that students will inherit."--

The Oxford Handbook of Applied Ethnomusicology 2015-07-01 Svanibor Pettan Applied studies scholarship has triggered a not-so-quiet revolution in the discipline of ethnomusicology. The current generation of applied ethnomusicologists has moved toward participatory action research, involving themselves in musical communities and working directly on their behalf. The

essays in The Oxford Handbook of Applied Ethnomusicology, edited by Svanibor Pettan and Jeff Todd Titon, theorize applied ethnomusicology, offer histories, and detail practical examples with the goal of stimulating further development in the field. The essays in the book, all newly commissioned for the volume, reflect scholarship and data gleaned from eleven countries by over twenty contributors. Themes and locations of the research discussed encompass all world continents. The authors present case studies encompassing multiple places; other that discuss circumstances within a geopolitical unit, either near or far. Many of the authors consider marginalized peoples and communities; others argue for participatory action research. All are united in their interest in overarching themes such as conflict, education, archives, and the status of indigenous peoples and immigrants. A volume that at once defines its field, advances it, and even acts as a large-scale applied ethnomusicology project in the way it connects ideas and methodology, The Oxford Handbook of Applied Ethnomusicology is a seminal contribution to the study of ethnomusicology, theoretical and applied.

New Directions in the Analysis of Multimodal Discourse 2013-01-11 Terry D. Royce New Directions in the Analysis of Multimodal Discourse offers a comprehensive international view of multimodal discourse and presents new directions for research and application in this growing field. With contributions from top scholars around the world, this work opens up the field of multimodal discourse analysis as it covers a wide range of interests such as computational linguistics, education, ideology, and media discourse. The range and scope of the chapters in this book provide groundbreaking insights into exploring and accounting for the various facets of multimodality in a range of texts and contexts. Initial chapters specifically aim to tackle theoretical issues, while subsequent chapters focus on important research areas such as writing and graphology, genre, ideology, computational concordancing, literacy, and cross cultural and cross linguistic issues. In the final chapters, an emphasis is placed on the educational implications of multimodality in first and second language contexts, a particularly new and interesting contribution.

Reading Television 1989 John Fiske How is it that television has come to play such an important role in our culture? What, in fact, does it tell us, and how are its messages conveyed? What is it we find so satisfying in the format of television police series, or in quiz or sports programmes, that we enjoy watching them again and again? "Reading Television" pushes the boundaries of television studies beyond the insights offered by cultural studies and textual analysis, creating a vibrant new field of study. Using the tools and techniques in this book, it is possible for everyone who has access to a television set to produce illuminating analyses not only of the programmes themselves, but also of the culture which produces them.

NGSS for All Students 2015 Okhee Lee It's challenging to teach science well to all students while connecting your lessons to the Next Generation Science Standards (NGSS). This unique book portrays real teaching scenarios written by the teachers on the NGSS Diversity and Equity Team. The seven authentic case studies vividly illustrate research- and standards-based classroom strategies you can use to engage seven diverse demographic groups: - Economically disadvantaged students - Students from major racial and ethnic groups - Students with disabilities - English language learners - Girls - Students in alternative education - Gifted and talented students Supplementing the case studies are additional chapters to deepen your understanding of the strategies and make what you learn more usable. These chapters address how to design units with the NGSS and diversity in mind, apply a rubric to improve your teaching using the NGSS with diverse student groups, and use the case studies in teacher study groups. Furthermore, leaders of the NGSS-- including Helen Quinn, Stephen Pruitt, André s Henrí quez, and Joe Krajcik-- offer their insights and commitments to diversity and equity. NGSS for All Students will help you make the instructional shifts necessary to prepare all your students

for college and careers.

What If? 1991-11-20 Anne Bernays What If? is the first handbook for writers based on the idea that specific exercises are one of the most useful and provocative methods for mastering the art of writing fiction. With more than twenty-five years of experience teaching creative writing between them, Anne Bernays and Pamela Painter offer more than seventy-five exercises for both beginners and more experienced writers. These exercises are designed to develop and refine two basic skills: writing like a writer and, just as important, thinking like a writer. They deal with such topics as discovering where to start and end a story; learning when to use dialogue and when to use indirect discourse; transforming real events into fiction; and finding language that both sings and communicates precisely. What If? will be an essential addition to every writer's library, a welcome and much-used companion, a book that gracefully borrows a whisper from the muse.

Miracle technical english for geosciences a textwork book~Cholesterol screening helps to determine the cholesterol and fat levels in the blood. Children and adolescents with normal cholesterol level is a thing of the past. Because of the changing lifestyle and junk food trend, even they have a high risk to develop high levels of cholesterol which also increases the risk of developing heart diseases which can affect the blood vessels and the coronary arteries. The main cause of this change is obesity, junk food high in fat, fast food diets, sedentary lifestyle and high cholesterol level in family history. Keeping the blood cholesterol levels at normal is a good way of avoiding high blood pressure and coronary artery diseases.

The blood cholesterol level can vary from individual to individual. Healthy levels of LDL is less than one hundred and thirty milligrams, HDL is greater than thirty five milligrams. If the HDL is less than thirty five milligrams then the adolescent is at a higher risk of developing heart diseases. And LDL more than one hundred and thirty milligrams is dangerous. But a high level of LDL cholesterol is a problem in many citizens of America. And there is an expected increase in number, the figure is unknown, of adolescents who have a family history of high cholesterol levels. An adolescent or a child who has a parent having high levels of blood cholesterol and family history of heart diseases at an early age, should take cholesterol test from the age of two. Adolescents who are obese also should have lipid test along with cholesterol test. The lipid test shows levels of kinds of fats in blood such as triglycerides, LDL and HDL.

Right after each acupuncture session, you will feel a bit tired and may need to rest. Some people feel an increase in their energy levels. The response to acupuncture is very individual. In some cases there is immediate relief of symptoms. For some patients, the beneficial effects may only be noticed after undergoing a few sessions. Do not be alarmed and keep your acupuncturist updated on what you are feeling to ensure everything is going as expected.

You need never fear the thought of needles ever again. Acupuncture is a beneficial treatment with a long history of effectiveness. It is used to complement current medical therapy and should not replace currently existing medications or treatments.

The safe application of this once exclusively Chinese therapy can now be experienced by chronic disease sufferers worldwide.

Obsession technical english for geosciences a textwork book:Teens get anemia as they grow rapidly the amount of iron intake may not be enough to keep up with the pace of the growth as it needs more nutrients in this process. In the case of girls they need more iron after puberty and are at risk due to heavy blood loss during menstrual periods. In some cases pregnancies also leads to anemia. Also, teens who diet excessively to lose weight may also be at risk of having iron deficiency. Meat eaters especially red meat eaters are at less risk compared to vegetarians as meat has rich iron in it.

Asthma in Adolescents

Most of the teenagers who have asthma are also allergic to many things. The asthma can get severe even if the people with asthma are exposed to allergens of low grade. Allergies play an important role in asthma cases which are undiagnosed. Other factors that also trigger childhood asthma include upper respiratory infections like colds, second hand smoke, and certain climate conditions like cold air and due to emotional physical expressions like laughing, crying or yelling. However, it is not the end of the road for asthmatics as they can live active and healthy if they manage asthma properly by avoiding asthma triggers, regular intake of prescribed medications, being alert of the warnings and be aware of the ways to deal with an asthma attack.

Miracle technical english for geosciences a textwork book:OCD is a sign of brain circuitry's unusual functioning and it involves the striatum part of the brain. The brain activity patterns of such people differ from normal people and people with other mental disorders. Researchers have concluded that OCD is usually a family problem and is a disorder of the brain. Streptococcal bacterial infection can create or worsen the condition of OCD. Adolescents with no family history of OCD can also develop it. Most of the adolescents feel embarrassed to talk about their OCDs. They think that people will label them as crazy and this will make them feel ashamed. This will make it difficult for the parents to talk to their children about their OCD, in order to solve them. Parents need to develop good communication skills for this purpose. Parent's support is also very important to the adolescent. Cooperation is extremely important along with treatment, because if the problem is not treated the adolescent will grow into a disturbed adult.

Most of the adolescents with OCD can receive effective treatment. The treatment can include psychotherapy and intake of medications such as fluoxetine, clomipramine, fluvoxamine, paroxetine, sertraline and other serotonin reuptake inhibitors. When OCD is caused due to streptococcal infection, the adolescent can be administered with antibiotics to kill the bacterium which is causing it. Exposure and response prevention behavioral therapy is very useful in solving OCD. In this therapy, the adolescent is wontedly exposed to his/her fears which give him/her obsessive thought. After that he/she is trained to avoid these thoughts and the rituals which he/she carries out to tackle the anxiety.

An adolescent having OCD can also have depression, substance abuse, attention deficit hyperactivity disorder, eating disorders, and other types of anxiety disorders. When a person with OCD and

other mental illness, is treated, OCD becomes more difficult to treat and even diagnose.

Obesity can be caused due to complex reasons including biological, genetic, cultural and behavioral factors. Usually a person gets obese when he/she consumes more calories than the body burns. Also there are fifty percent chances of becoming obese when both one of the parent is obese and when obesity has affected both the parents, the chances increase to eighty percent. One percent of obese people can have that fat because of health reasons, as obesity can be caused due to few medical disorders. The causes of obesity in adolescence are overeating, family history, bad eating habits, little or no exercise, medical illness, low self esteem, medications, depression, emotional problems, stressful life, and family problem.

Obesity can cause many major problems. Some of them are diabetes, sleeping disorders, high blood pressure, breathing problems, emotional problems and increase in heart disease risk. Teenagers are more prone to get emotional problems. Because of the weight, they develop low self esteem. They get into depression, obsessive compulsion disorder and anxiety.

Adolescents who want to tackle the obesity problem should approach a pediatrician who will thoroughly evaluate the cause. If no physical disorder is to be blamed, the weight is reduced by limiting the calorie intake and increasing physical activity. The doctor can advise a weight management program and change the eating habits of the teenager, slowly. The patient must avoid oily, fatty, fast and junk food. The portions must be reduced in order to decrease the calorie intake. If the adolescent has developed emotional problems because of obesity, an adolescent psychiatrist can collaborate with the pediatrician in order to make a comprehensive plan for treatment. The plan includes reasonable goals, behavior modification, family participation, and management of physical activity.

Church Accounting Software

The church is a respected institution since it commands the people's general faith. It is always given utmost respect. The secular welfare and religious functions of the church are performed through the faith of its constituents. Church activities need funding and the funds come from Christians all over the world. Are you aware that the Christian contributions can reach billions?

That's true and with such great amount of money, the church should make use of accounting. One way to do this is through a church accounting software. The church should be accountable for their people's money; church officials should therefore monitor where all the money came from and where it is being spent.

The church is a large institution and so are its financial transactions. In order to manage the accounts, the church will need a skilled force of financial experts. However, that would mean additional cost to the church since they have to pay for the services. It can consume so much time and money.

Concepts technical english for geosciences a textwork book__ Although there are risks if you decide to go undergo acupuncture, these can be avoided as long as the one doing it is a licensed professional who makes sure that the needles used are sterilized before they are inserted into the body.

These days, a lot of people in the medical field have accepted the fact that alternative medicine such as this can also help the patient which is why they may refer someone when it is needed.

So, if you are tired of experiencing the side effects of conventional medicine and want to try a holistic form of healthcare, why don't you see what acupuncture can do for you? It is painless and cost effective. In fact, it is just one of many you can try to help treat a chronic condition.

Solutions technical english for geosciences a textwork book: **A Primer on Medical Acupuncture**

Have you ever had an uncontrollable urge to be pierced by a dozen needles? This is the image most people get when someone mentions the word "acupuncture". It comes as no surprise that most view this technique with suspicion, even downright horror. The fact is, however, that this relatively painless ancient Chinese technique has helped relieve the symptoms of millions of people.

Properly used, it can help in the management of many medical conditions including chronic pain and fatigue.

How does needle puncture work?

Practitioners of Chinese traditional medicine believe in energy flows. This energy, called Qi, circulates around the body using pathways called meridians. Meridians run very close to the surface of the skin in certain areas and can be accessed by needles. Much like plumbing, these pipes can get blocked or go the wrong way, causing health problems. The insertion of needles at these points is aimed to help loosen blocks and normalize flow.

Services in Financial Accounting

Offices and companies have various activities everyday and that includes accounting. Whether the company is private or government-owned, it still makes use of accounting. Companies, offices, and various organizations or institutions cannot operate successfully without an accounting staff. However, having an accounting staff can get very expensive and so most companies resort to

auditing services or financial accounting services. Chartered accountants are not hard to find; with the use of the internet, you can easily locate them and hire their services.

A company needs to seek help from a competent and experienced auditor or accountant so that all financial activities of the company are monitored and evaluated. This way, the company can gain a lot of benefits which can lead to its success. It is now easy to monitor the sales as well the operating expenses. All expenditures and income are recorded and the accountant can even provide you with strategies to help increase the profit and sales of a company.

Outsourcing is quite popular nowadays because it is a cost-effective measure for companies who want to cut-down their operation costs. That is why most companies are looking for services of chartered accountants. These accounting services can provide any company or organization with auditing services, company laws, taxation, and other related matters.

Most patients that undergo acupuncture will not feel any significant change after one session which is why a few sessions are needed. Best of all, it is painless so your body will not feel sore afterwards.

Several studies have been conducted about acupuncture and there have been positive results. For instance in the UK, 400 participants who were suffering from migraines claimed they felt better after 3 months worth of sessions.

In the US, acupuncture has also proven to be effective in helping people deal with arthritis because the needles help the body fight against this chronic illness that is much cheaper and more effective than conventional medicine.

Life Lessons from technical english for geosciences a textwork book

There are basically 14 pathways throughout the body where chi flows continuously. These are called the meridian points. In order for chi to course through the body unobstructed, there has to be a balance between the strengths of yin and yang. In ancient Chinese philosophy, yin and yang represent the forces of the universe- yin is for feminine, while yang is for masculine. Every single thing in the universe is believed to contain both yin and yang for harmony.

When the yin and yang are not balanced, chi cannot stream through the body liberally. Therefore, the meridian points through which chi courses through need to be stimulated. This is done by the insertion of hair-thin, disposable needles in specific areas on a person's body to induce bodily harmony and bring about healing.

A certified and trained acupuncturist will be able to carry out an excellent therapy session for the patient. Trainings for acupuncturists are given in order for them to obtain their licenses. A poor practitioner may not be proficient enough with the practice and could end up jeopardizing the results of the entire procedure. Nowadays, it is wise to verify on a practitioner's credentials to ensure a safe and effective acupuncture treatment.

Amenorrhea is the condition in which the female skips her menses for more than three consecutive menstrual cycles. Amenorrhea is also classified as primary amenorrhea and secondary amenorrhea. Primary amenorrhea develops from the onset of menstrual periods. In this condition, the adolescent might not get periods when she enters puberty. Secondary amenorrhea is a condition where periods become irregular after a period of time and not from the start.

There are many causes of amenorrhea such as ovulation abnormality, eating disorders, birth defects, anatomical abnormalities, malnourishment, anorexia, bulimia, pregnancy, over exercising, thyroid disorder, obesity and other medical conditions. Out of these ovulation abnormalities are a common cause for absent or irregular periods. It is a must that an adolescent start getting menses at least by the age of sixteen. If not, anatomical abnormality, birth defect and other medical conditions are the cause. Adolescents who participate in sports actively and are athletic have a lower body fat content because of which they have absent menses. Even because of malnourishment, the body is incapable of sustaining pregnancy. So in turn the body itself shuts down the reproductive system and menses. Extra fat cells in the body interfere with ovulation and that is the reason why obese female have irregular menses. Amenorrhea is treated by dietary modifications, ovulation inhibitors and hormone treatment.

Liberation technical english for geosciences a textwork book: Variations of Conventional Acupuncture

Auriculotherapy or ear acupuncture is one of the variations of conventional acupuncture. In this practice, it is believed that the ear provides a map for all the major bodily organs. A specific area or point on the ear corresponds to a particular organ, such as the heart, kidneys, or liver. Thus, the needles are placed in particular points around the ear and on the ear cartilage.

Staple-puncture is a method used in smoking cessation, wherein staples are placed for a certain period anywhere on the ear area to provide stimulation.

Indeed there is growing evidence that this traditional Oriental practice can rival any modern forms of treatment. If you are one of the many people who are looking for a widely recognized and time honored therapeutic practice, acupuncture may just be the alternative treatment for you.

Investment technical english for geosciences a textwork book-Heat cramps are the mildest of all heat related injuries and constitute aching muscle cramps and also spasms that occur during intense exercising and also after intense exercising and also sweating in high heat. The symptoms of heat cramps include cramps that are painful in the legs. Flushed and moist skin is also symptoms of heat cramps. The symptoms could also include mild fever generally below 102 degree Fahrenheit. Teens suffering from heat cramps should move to a cool place and take adequate rest. Remove any excessive clothing and wear or put cool clothing on skin or cool skin using air conditioner or fan. Sports drinks which are cool and which contains sugars and salts can also be taken. Stretching out cramped muscles slowly and steadily also helps reduce heat cramps.

On the other hand heat exhaustion is more serious and severe compared to heat cramps and occur due to heavy loss of salt and water from the body. Extreme heat conditions, inadequate fluid intake and excessive sweating results in this conditions. Also, heat exhaustion occurs as a result of inability of the body to maintain the body temperature below the normal which can deteriorate further and also result in a heat stroke which is even worse. The symptoms of heat exhaustion are: muscle cramps, moist skin, pale skin, nausea, fever above 102 degree Fahrenheit, diarrhea, vomiting, fatigue, headache, weakness, anxiety and faint feeling. Teens suffering from heat exhaustion should stay in cool surrounding and take enough rest. Removing excessive clothing, putting

on cool clothes and sitting in fan or air conditioning also helps the situation. Intake of cold sports drinks which contains salts and sugars are also advisable. If a teen doesn't show any signs of improvement even after taking all these measures a physician should be consulted immediately.

The treatment is finished after an hour and when the needles are removed, you are advised to wear ear magnets so your session continues even when you leave the clinic. While acupuncture itself is a painless procedure, some smokers have claimed that they felt a prick or get sleepy. Most smokers will have to come to the clinic 4 to 6 times before seeing any significant results. Just to give you an idea, one study shows that the respondents reported a decrease in the number of cravings to smoke just after one or two sessions. Seven out of 10 of the respondents were able to kick the habit after 5 or 6 sessions. Because the number of test subjects is small, there are some who doubt the effectiveness of acupuncture. This is because although there are positive signs with regards to the short term effects of this technique, its effects were not sustained. This is why some medical journals have stated that it is unclear what acupuncture can do in smoking cessation.

Course technical english for geosciences a textwork book__ What is acupuncture?

Acupuncture has surged in popularity for the last few decades as brought on by the recent health trend. Mostly known as a traditional Chinese medical technique, acupuncture is seen as a homeopathic method of treatment. While alternative medicine does raise a lot of eyebrows for the scientifically-inclined, it does merit attention before being dismissed as a quack cure.

Basic Procedure

Basically, needles are inserted into the skin, each corresponding to one of the numerous pressure points located throughout the body. According to Traditional Chinese Medicine, by inserting a needle into the pressure point, an acupuncturist can manipulate the flow of chi or life force, thus relieving pain and gradually treating the patient. While most would say that the whole chi thing is a bunch of nonsense, science has suggested that with the needles inserted, the body's natural painkillers called endorphins are released, thus helping with pain relief.

In some cases, acupuncture is more effective when the needles are first heated. This technique is known as "moxibustion." Here, the acupuncturist lights a small bunch of the dried herb called moxa or mugwort and holds it above the needles. The herb, which burns slowly and gives off a little smoke and a pleasant, incense-like smell, will never directly touch your body.

Another variation is electrical acupuncture. Here, electrical wires are hooked up to the needles and a weak current runs through it which may cause no or little sensation at all.

It is also possible that herbal medications will also be prescribed by the acupuncturist for your treatment to be successful.

The imbalance in the Qi may go one way or the other because of Yin and Yang. The person can only be normal if there is harmony between the two which is what acupuncture is trying to achieve.

This can only be restored by stimulating these acupuncture points so your Qi can be adjusted, balanced and harmonized.

Apart from using needles, practitioners also use friction, heat, impulses of electromagnetic energy and pressure to stimulate these points in order to balance the movement of energy in the body to reduce one's health.

An example of this is sonopuncture where an ultrasound device that transmits sound waves is applied to these points in the body. Some use a tuning fork and other vibration devices.

Parents can get their children admitted in emotional growth schools, boot camps or wilderness programs, to solve the behavioral problems. These programs consist of non medical staff and confrontational therapies. But care must be taken as some of the programs can in turn harm children who are depressed and sensitive. Adolescents, who get caught due to criminal offense, should be taken special care of by their parents. It is best that the child face the consequences and learn a lesson from it. Depressed adolescents respond well to treatment if they are treated comprehensively and early. More than half of the adults are

known to have depression when they were in their teens.

Diabetes in adolescents

Diabetes is a rapidly growing, serious health problem among youngster today. Above thirteen thousand adolescents are diagnosed for type 1 diabetes, every year in America. There has also been an increase in the number of teenagers with type 2 diabetes, which was more common among adults above forty and who were overweight. Clinics are reporting that nearly half of the new childhood diabetes cases are of type 2. Adolescents, who are obese and had type 2 diabetes in the family history, are at a greater risk of developing diabetes.

Part of examination is to help the acupuncturist figure out where the needles will be inserted. Your pulse will give the person an idea on your general state of energy and the general health of your stomach.

You will also have to open your mouth and show your tongue to check for cracks, peelings or puffiness on the stomach area as this provides clues to why you are overweight.

Behind the technical english for geosciences a textwork book;There are two subcategories of eating disorders, anorexia nervosa and bulimia nervosa. Anorexia nervosa is the restrictive form, where the intake of food is limited severely. In bulimia nervosa is the eating disorder where the adolescent binges on food and then tries to minimize the effects by forcibly vomiting, fasting, and catharsis or over exercising. When handling adolescence eating disorders, they must be handled differently from adult eating disorders. Adolescents face problems such as growth retardation, suppressed height, abnormal weight, pubertal delay, menstrual periods absence, and menses unpredictability. When the adolescent is growing there will be critical tissue components loss like loss of body fat, muscle mass and bone mineral.

Nutritional imbalance is also caused which reflect abnormalities in the levels of vitamins, mineral and other trace elements. The problem is that these abnormalities cannot be recognized clinically. But since protein and calories are essential to the growth of the adolescent, it is important to trace their abnormalities. Because of the problems, healthy adulthood is not a possible thing. Because of all these reasons, it is important to diagnose adolescence eating disorders as early as possible. Eating disorders give rise to peak bone mass impaired acquisition in case of adolescents. When they turn into adults, this problem aggravates to osteoporosis. Even internal organs get affected due to eating disorders. All this can be prevented by early intervention so as to limit, prevent and ameliorate medical complications, which can turn become life threatening.

Adolescents who practice unhealthy weight control practices and are obsessive about figure, weight, food or exercise should be treated clinically. Not only should the symptoms be checked, but their duration, intensity and frequency should also be checked. Although most of the physical complications caused due to eating disorders get solved with the help of nutritional rehabilitation some of the conditions become irreversible and the long term consequences of this are very dangerous. It is best if the eating disorders are recognized in the early stages as it won't result in irreparable damage. The medical monitoring should be pursued till the adolescent returns back to appropriate psychological and medical health.

Precautions should not only be taken indoors, but outdoors too. This is because; more than forty thousand people get eye injuries outdoors. Ninety nine percent of the injuries are caused while playing sports. So it is necessary for the youngsters to wear protective eyewear while playing sports or when involved in outdoor recreational activities. A special helmet is designed with wire shield or polycarbonate face mask which is not only safe, but comfortable, too. Protective eyewear should also be worn while performing experiments in science lab. Fireworks must only be handled by adults.

Because of increasing use of computers, more and more youngsters are getting eye strains. The symptoms of eye strain caused by computer are red & watery eyes, focusing problems, aching & tired eyelids, eye muscle spasm, backache and headache. In such an environment, eye exercise must be done regularly. The eyes must be made to focus on distant objects and should be rotated from side to side. It is extremely important to give ample rest to the eyes. Glasses with UV shield must be worn when looking at the computer screen. Eye strain can be avoided by increasing the distance from the monitor.

Eye hazards are also caused when cosmetics are used improperly by contact lens wearers. Some of the adverse reactions are injury, eye irritation, allergy, dryness, infection, and lens deposition. That is the reason why adolescents must be made aware of the risk they will face when opting for contact lens. Girls should understand that they should buy hypoallergenic cosmetics and especially the non-scented variety, manufactured by big brand names. Cosmetics should not be shared with anything else. The applicator brushes must be washed regularly and old mascara must be disposed and not refilled. Eye shadows which are glittery, pearlized, frosted or iridescent contain ground tinsel or oyster shell, which should be always avoided. Eyeliner should not be applied in the inner lid edge. Loose powder should be avoided. Cream should not be applied near the eyes. The wearer should wash hands while handling contact lens. No crying, washing of face or bathing should be

done with the contact lens on.

Eight Myths About Acupuncture

There are a lot of myths with regards to acupuncture. Some of these are true; others are silly while the rest only have a half truth. As you read on, you will learn which ones are worth believing.

The first myth is that acupuncture is painful. This is not true because those who have tried it claimed they only experienced a tiny prick while others did not feel anything at all. There is no tissue damage when the needle is inserted into the skin or pulled out and only in very rare cases are there traces of bruising.

The second myth is that you can get hepatitis or AIDS from acupuncture. This is true only if the needles used are not sterilized. In the US, this will never happen because acupuncturists are required to use disposable needles thus you are not at risk from these two diseases.

How It Stops the Addiction

The placement of needles is usually located behind the ear, or on the ear cartilage. This is where the calming effect takes place, curbing the patient's cravings for more cigarettes. People who have a smoking habit are bound to take up the nicotine stick more often whenever they feel stressed, bored, or depressed. Needles are also often inserted on the hand and wrists to promote a steadier flow of bodily energy. The feeling of relaxation will help an individual think twice about lighting a cigarette again.

Furthermore, this treatment has been found to help an individual deal with the withdrawal symptoms better. This alternative medicine promotes better tolerance to pain and discomfort during smoking cessation. Withdrawal symptoms can range from mild to severe and may involve nausea, palpitations, and dizziness. Oftentimes, these same conditions will propel an individual back to his smoking tendencies sooner than later.
