Development Crises and Alternative Visions 2013-11-05 Gita Sen More than half of the world's farmers are women. They are the majority of the poor, the uneducated and are the first to suffer from drought and famine. Yet their subordination is reinforced by well-meaning development policies that perpetuate social inequalities. During the 1975-85 United Nations Decade for the Advancement of Women their position actually worsened. This book analyses three decades of policies towards Third World women. Focusing on global economic and political crises - debt, famine, militarization, fundamentalism - the authors show how women's moves to organize effective strategies for basic survival are central to an understanding of the development process.

Primary Gymnastics 2016-12-09 Niels Bukh Primary Gymnastics' is a form of gymnastics pioneered in 1915 by Dutch gymnastics instructor and leader of the Danish Olympic Gymnastic Team, Herr Niels Bukh. This style of gymnastics is based on the importance of rhythm and is outlined in this volume after over twenty years of testing and refining. 'Primary Gymnastics' was written by Niels Bukh and translated and adapted by Frank N. Punchard. Contents include: 'Primary Gymnastics or Fundamental Gymnastics', 'Danish (Primary) Gymnastics', 'The Gymnastic Leaders', 'Posture', 'Postural Faults', 'The Stock of Gymnastic Exercises', 'The Effect of Gymnastics', 'The Table or Programme', 'Gymnasium and Apparatus', 'Commanding', 'Teaching', 'Starting Positions', etc. Many vintage books such as this are becoming increasingly scarce and expensive. We are republishing this volume now in an affordable, high-quality, modern edition complete with the original text and images.

Handbook of Sports Medicine and Science 2013-07-18 Dennis J. Caine This new volume in the Handbook of Sports Medicine and Science series, published in conjunction with the Medical Commission of the International Olympic Committee, offers comprehensive and practical guidance on the training and medical care of competitive gymnasts. Written and edited by leading trainers, team doctors, coaches and other professionals with unparalleled experience in elite gymnastics, this book covers all the key aspects of caring for gymnasts, minimizing the unique risks these athletes face, and treating injuries when they happen. The book is organized into 4 sections covering: The evolution of gymnastics Growth and development Training and performance Sports medicine Individual chapters cover key topics such as energy needs and body weight management; biomechanics; psychology; the epidemiology of gymnastic injuries; treatment and rehabilitation of common injuries; injury prevention; and more. Endorsed by the International Gymnastics Federation (FIG), no other book offers such an in-depth look at the unique considerations and challenges that affect the growth, performance, training, and medical care of athletes in this demanding sport.

Teaching Physical Education 1994 Muska Mosston The definitive source for the groundbreaking ideas of the "Spectrum of Teaching Styles" introduced by Mosston and Ashworth and developed during 35 years in the field. This book offers teachers a foundation for understanding the decision-making structures that exist in all teaching/learning environments and for recognizing the variables that increase effectiveness while teaching physical education. In this thoroughly revised and streamlined edition, all chapters have been updated to include hundreds of real-world examples, concise charts, practical forms, and concrete suggestions for "deliberate teaching" so that teachers can understand their classrooms' flow of events, analyze decision structures, implement adjustments that are appropriate for particular classroom situations, and deliberately combine styles to achieve effective variations. As in prior editions, individual chapters describe the anatomy of the decision structure as it relates to teachers and learners, the objectives (O-T-L-O) of each style, and the application of each style to various activities and educational goals. For physical education teachers.

The Diary of Georgi Dimitrov, 1933-1949 2008-10-01 Georgi Dimitrov Georgi Dimitrov (1882–1949) was a high-ranking Bulgarian and Soviet official, one of the most prominent leaders of the international Communist movement and a trusted member of Stalin's inner circle. Accused by the Nazis of setting the Reichstag fire in 1933, he successfully defended himself at the Leipzig Trial and thereby became an international symbol of resistance to Nazism. Stalin appointed him head of the Communist International (Comintern) in 1935, and he held this position until the Comintern's dissolution in 1943. After the end of the Second World War, Dimitrov returned to Bulgaria and became its first Communist premier. During the years between 1933 and his death in 1949, Dimitrov kept a diary that described his tumultuous career and revealed much about the inner working of the international Communist organizations, the opinions and actions of the Soviet leadership, and the Soviet Union's role in shaping the postwar Eastern Europe. This important document, edited and introduced by renowned historian Ivo Banac, is now available for the first time in English. It is an essential source for information about international Communism, Stalin and Soviet policy, and the origins of the Cold War.

Contemplation: 2018-09-15 Malik Badri The human race is in crisis and very few of us – if any – are able to understand what is wrong with our lives and the world at large. How did this happen and how did humans become so 'disconnected' with humanity? Why are psychological disorders such as depression, anxiety, fear, and suicide on the increase, and why are conventional Western therapies unable to stem the tide? To approach this we must first look inside ourselves – to explore our own purpose in life and extend that principle to the rest of humanity. Despite the advances of modern Western psychology and the development of therapies that do help many, one area that is largely unexplored is that of the 'human spirit' and spirituality since it is more convenient to consider the human mind as 'machine' that responds to external stimuli. In this powerful exploration into the human mind and its relationship with the human spirit, Malik Badri invites the reader to open the door to self-discovery, purpose and spirituality through the practice of contemplation, reflection and meditation – understanding the true meaning and experience of spirituality as well as one's own place in Creation. Whilst central to worship in Islam, this will also be of great interest to, and help any reader wishing to explore the notion of spirituality whether as part of worship or simply as part of self development and inner healing.

Pandemic Outbreaks in the 21st Century 2021-08-24 Buddolla Viswanath In the past two decades, several pandemics have ravaged the globe, giving us several lessons on infectious disease epidemiology, the importance of initial detection and characterization of outbreak viruses, the importance of viral epidemic prevention steps, and the importance of modern vaccines. Pandemic Outbreaks in the Twenty-First Century: Epidemiology, Pathogenesis, Prevention, and Treatment summarizes the improvements in the 21st century to overcome / prevent / treat global pandemic with future prospective. Divided into 9 chapters, the book begins with an in-depth introduction to the lessons learned from the first pandemic of the 21st century. It describes the history, present and future in terms of detection, prevention and treatment. Followed by chapters on the outbreak, treatment strategies and clinical management of several infectious diseases like MERS, SARD and COVID 19, Pandemic Outbreaks in the Twenty-First Century: Epidemiology, Pathogenesis, Prevention, and Treatment, presents chapters on immunotherapies and vaccine technologies to combat pandemic outbreak and challenges. The book finishes with a chapter on the current knowledge and technology to control pandemic outbreaks. All are presented in a practical short format, making this volume a valuable resource for very broad academic audience. Provides insight to the lessons learned from past pandemics Gives recommendations, future direction in terms of detection, prevention and treatment of pandemics Guides readers through the status and recent developments of vaccines to overcome

or prevent pandemics Shows how to enhance the host innate immunity in infectious diseases Includes a chapter on immunotherapies to combat pandemic outbreaks

Sustainable eco-technologies for water and wastewater treatment 2020-03-15 Eldon Rene One of the major challenges in the world is to provide clean water and sanitation for all. With 3% fresh water reserves in the earth, there are more than 1 billion people who still lack access to clean drinking water. The declining water quality has not only reduced the life expectancy of humans, but it has also contributed to the deleterious negative impacts on aquatic/marine life, flora, fauna and the ecosystem. However, with rapid technological advancements and the availability of advanced scientific instruments, there has been substantial improvement in the design and operation of water and wastewater treatment systems. Recently, these sustainable eco-technologies have been designed and operated to offer the following advantages: (i) a smaller footprint, (ii) less maintenance, (iii) >99% removal of contaminants, (iv) provides the option for resource recovery, (v) less energy consumption, (vi) minimal use of chemicals, and (vii) less investment and operational costs. This book highlights the technologies used for the removal of pollutants such as dyes, uranium, cyanotoxins, faecal contamination and P/N compounds from water environments, and shows that ecotechnologies are becoming more and more important and playing critical role in removing a wide variety of organic and inorganic pollutants from water. In Focus – a book series that showcases the latest accomplishments in water research. Each book focuses on a specialist area with papers from top experts in the field. It aims to be a vehicle for in-depth understanding and inspire further conversations in the sector.

History and Class Consciousness 1972-11-15 Georg Lukacs This is the first time one of the most important of Lukács' early theoretical writings, published in Germany in 1923, has been made available in English. The book consists of a series of essays treating, among other topics, the definition of orthodox Marxism, the question of legality and illegality, Rosa Luxemburg as a Marxist, the changing function of Historic Marxism, class consciousness, and the substantiation and consciousness of the Proletariat. Writing in 1968, on the occasion of the appearance of his collected works, Lukács evaluated the influence of this book as follows: "For the historical effect of History and Class Consciousness and also for the actuality of the present time one problem is of decisive importance: alienation, which is here treated for the first time since Marx as the central question of a revolutionary critique of capitalism, and whose historical as well as methodological origins are deeply rooted in Hegelian dialectic. It goes without saying that the problem was omnipresent. A few years after History and Class Consciousness was published, it was moved into the focus of philosophical discussion by Heidegger in his Being and Time, a place which it maintains to this day largely as a result of the position occupied by Sartre and his followers. The philologic question raised by L. Goldmann, who considered Heidegger's work partly as a polemic reply to my (admittedly unnamed) work, need not be discussed here. It suffices today to say that the problem was in the air, particularly if we analyze its background in detail in order to clarify its effect, the mixture of Marxist and Existentialist thought processes, which prevailed especially in France immediately after the Second World War. In this connection priorities, influences, and so on are not particularly significant. What is important is that the alienation of man was recognized and appreciated as the central problem of the time in which we live, by bourgeois as well as proletarian, by politically rightist and leftist thinkers. Thus, History and Class Consciousness exerted a profound effect in the circles of the youthful intelligentsia."

Investigating the Role of Bats in Emerging Zoonoses 2011 Scott H. Newman Capacity development is one of the pillars through which the Food and Agriculture Organisation of the United Nations supports member countries. This manual serves as a resource for better understanding the ecology of bats, their natural history, their role in providing ecosystem services, techniques used for monitoring populations, and for the detection, identification and monitoring of viruses naturally circulating in bats and that can have significant implication if they are transmitted to people either through direct contact, or indirectly, through livestock. This manual will engage professionals from multiple disciplines ranging from public health and veterinary medicine to natural resource managers and biologists, but most importantly, highlights the need to understand the anthropogenic drivers resulting in disease transmission from bats to people.

The Electrification of Russia, 1880–1926 2016-11-01 Jonathan Coopersmith The Electrification of Russia, 1880–1926 is the first full account of the widespread adoption of electricity in Russia, from the beginning in the 1880s to its early years as a state technology under Soviet rule. Jonathan Coopersmith has mined the archives for both the tsarist and the Soviet periods to examine a crucial element in the modernization of Russia. Coopersmith shows how the Communist Party forged an alliance with engineers to harness the socially transformative power of this science-based enterprise. A centralized plan of electrification triumphed, to the benefit of the Communist Party and the detriment of local governments and the electrical engineers. Coopersmith's narrative of how this came to be elucidates the deep-seated and chronic conflict between the utopianism of Soviet ideology and the reality of Soviet politics and economics.

The Boatowner's Guide to Corrosion 2006-07-12 Everett Collier "The best explanation that I have seen of corrosion on boats."—Nigel Calder, author of Boatowner's Mechanical and Electrical Manual "A powerful weapon in the war against metal deterioration."—Cruising World Corrosion is a constant, often expensive, and sometimes dangerous problem for boaters. Moisture, salt, electrical currents, and chemicals create a potent combination that can attack the metallic (and sometimes nonmetallic) parts of your boat. Everett Collier, an expert in marine technology, details all the types of corrosion—including simple galvanic, electrochemical, and electrolytic—and explains how to identify, combat, and prevent them. The most comprehensive book on this subject, The Boatowner's Guide to Corrosion shows you how to: Prevent corrosion with proper grounding, cathodic protection, protective coatings, and careful selection and matching of metal parts Protect your boat's hull, deck gear, masts, and rigging, as well as its propulsion, electrical, plumbing, and steering systems Recognize and cure developing corrosion before it can damage your boat

The Emergence of Phonology 2013-11-07 Marilyn M. Vihman How well have classic ideas on whole-word phonology stood the test of time? Waterson claimed that each child has a system of their own; Ferguson and Farwell emphasised the relative accuracy of first words; Menn noted the occurrence of regression and the emergence of phonological systematicity. This volume brings together classic texts such as these with current data-rich studies of British and American English, Arabic, Brazilian Portuguese, Finnish, French, Japanese, Polish and Spanish. This combination of classic and contemporary work from the last 30 years presents the reader with cutting-edge perspectives on child language by linking historical approaches with current ideas such as exemplar

theory and usage-based phonology and contrasting state-of-the-art perspectives from developmental psychology and linguistics. This is a valuable resource for cognitive scientists, developmentalists, linguists, psychologists, speech scientists and therapists interested in understanding how children begin to use language without the benefit of language-specific innate knowledge.

The Marine Electrical and Electronics Bible 1998 John C. Payne More and more sailors and powerboaters are buying and relying on electronic and electric devices aboard their boats, but few are aware of proper installation procedures or how to safely troubleshoot these devices if they go on the blink.

Sport and Physical Education in Germany 2005-07-26 Ken Hardman Sport and physical education represent important components of German national life, from school and community participation, to elite, international level sport. This unique and comprehensive collection brings together material from leading German scholars to examine the role of sport and PE in Germany from a range of historical and contemporary perspectives. Key topics include: \* sport and PE in pre-war, post war and re-unified Germany \* sport and PE in schools \* coach education \* elite sport and sport science \* women and sport \* sport and recreation facilities. This book offers an illuminating insight into how sport and PE have helped to shape Germany. It represents fascinating reading for anyone with an interest in the history and sociology of sport, and those working in German studies.

Managing Creativity in Organizations 2005-09-20 A. Styhre Managing Creativity in Organizations addresses the notion of organizational creativity and innovation in general, and explores in some detail how it is achieved. The first part of the book critically reviews the literature on creativity. The second half explores the management of organizational creativity in the pharmaceutical industry. Here issues such as technology, cognition and leadership are introduced as central resources and practices in the management of organizational creativity and innovation. The research is based on management practices in four companies, all of whom have demonstrated a significant ability to exploit their organizational creativity.

Jews and Germans in Eastern Europe 2018-09-24 Tobias Grill For many centuries Jews and Germans were economically and culturally of significant importance in East-Central and Eastern Europe. Since both groups had a very similar background of origin (Central Europe) and spoke languages which are related to each other (German/Yiddish), the question arises to what extent Jews and Germans in Eastern Europe share common historical developments and experiences. This volume aims to explore not only entanglements and interdependences of Jews and Germans in Eastern Europe from the late middle ages to the 20th century, but also comparative aspects of these two communities. Moreover, the perception of Jews as Germans in this region is also discussed in detail.

Computational Linguistics: Concepts, Methodologies, Tools, and Applications 2014-05-31 Management Association, Information Resources In a globalized society, effective communication is critical, and study of language from a mathematical perspective can shed light on new ways in which to express meaning across cultures and nations. Computational Linguistics: Concepts, Methodologies, Tools, and Applications explores language by dissecting the phonemic aspects of various communication systems in order to identify similarities and pitfalls in the expression of meaning. With applications in a variety of areas, from psycholinguistics and cognitive science to computer science and artificial intelligence, this multivolume reference work will be of use to researchers, professionals, and educators on the cutting edge of language acquisition and communication science.

Boatowner's Mechanical and Electrical Manual 2017-04-17 Nigel Calder This manual takes both novice and experienced boatowner through minor to major repairs of electrical systems, engines, electronics, steering systems, generators, pumps, cookers, spars and rigging. When it was first published in 1990, the Boatowner's Mechanical & Electrical Manual broke new ground. It was hailed as the first truly DIY manual for boatowners and has sold in its thousands ever since. There have been significant changes in boat systems since then, particularly electrical systems, and this fourth edition has been fully updated to reflect these developments and expand its predecessor's worldwide popularity. 'Probably the best technical reference and troubleshooting book in the world' Yachting Monthly 'It deserves to come standard with every boat' Yachting World

Induction Accelerators 2010-10-05 Ken Takayama A broad class of accelerators rests on the induction principle whereby the accelerating electrical fields are generated by time-varying magnetic fluxes. Particularly suitable for the transport of bright and high-intensity beams of electrons, protons or heavy ions in any geometry (linear or circular) the research and development of induction accelerators is a thriving subfield of accelerator physics. This text is the first comprehensive account of both the fundamentals and the state of the art about the modern conceptual design and implementation of such devices. Accordingly, the first part of the book is devoted to the essential features of and key technologies used for induction accelerators at a level suitable for postgraduate students and newcomers to the field. Subsequent chapters deal with more specialized and advanced topics.

The Zelmenyaners 2013-10-15 Moyshe Kulbak A "masterpiece" of a comic novel following four generations of a Jewish family in Minsk torn asunder by the new Soviet reality (Forward). This is the first complete English-language translation of a classic of Yiddish literature, one of the great comic novels of the twentieth century. The Zelmenyaners describes the travails of a Jewish family in Minsk that is torn asunder by the new Soviet reality. Four generations are depicted in riveting and often uproarious detail as they face the profound changes brought on by the demands of the Soviet regime and its collectivist, radical secularism. The resultant intergenerational showdowns—including disputes over the introduction of electricity, radio, or electric trolley—are rendered with humor, pathos, and a finely controlled satiric pen. Moyshe Kulbak, a contemporary of the Soviet Jewish writer Isaac

Babel, picks up where Sholem Aleichem left off a generation before, exploring in this book the transformation of Jewish life.

Music from a Speeding Train 2011-08-15 Harriet Murav Music from a Speeding Train explores the uniquely Jewish space created by Jewish authors working within the limitations of the Soviet cultural system. It situates Russian- and Yiddish- language authors in the same literary universe—one in which modernism, revolution, socialist realism, violence, and catastrophe join traditional Jewish texts to provide the framework for literary creativity. These writers represented, attacked, reformed, and mourned Jewish life in the pre-revolutionary shtetl as they created new forms of Jewish culture. The book emphasizes the Soviet Jewish response to World War II and the Nazi destruction of the Jews, disputing the claim that Jews in Soviet Russia did not and could not react to the killings of Jews. It reveals a largely unknown body of Jewish literature beginning as early as 1942 that responds to the mass killings. By exploring works through the early twenty-first century, the book reveals a complex, emotionally rich, and intensely vibrant Soviet Jewish culture that persisted beyond Stalinist oppression.

Recent Advances in Natural Language Processing 1997-01-01 Ruslan Mitkov This volume is based on contributions from the First International Conference on Recent Advances in Natural Language Processing (RANLP'95) held in Tzigov Chark, Bulgaria, 14-16 September 1995. This conference was one of the most important and competitively reviewed conferences in Natural Language Processing (NLP) for 1995 with submissions from more than 30 countries. Of the 48 papers presented at RANLP'95, the best (revised) papers have been selected for this book, in the hope that they reflect the most significant and promising trends (and latest successful results) in NLP. The book is organised thematically and the contributions are grouped according to the traditional topics found in NLP: morphology, syntax, grammars, parsing, semantics, discourse, grammars, generation, machine translation, corpus processing and multimedia. To help the reader find his/her way, the authors have prepared an extensive index which contains major terms used in NLP; an index of authors which lists the names of the authors and the page numbers of their paper(s); a list of figures; and a list of tables. This book will be of interest to researchers, lecturers and graduate students interested in Natural Language Processing and more specifically to those who work in Computational Linguistics, Corpus Linguistics and Machine Translation.

Creating Experience Value in Tourism 2021-12-12 Nina K. Prebensen Research delivers a multitude of approaches to value creation, represented here as a set of definitions, perspectives, and interpretations of how tourists, as customers, create value alone and with others. Updated to include new studies, the second edition of Creating Experience Value in Tourism introduces the concept of co-creation of value in the tourist experience, looking at the definitions, structures and models available; provides new chapters addressing stakeholder perspective and concretion, the role of the experience setting in creating experience, the connection between co-creation and subjective well-being and global perspectives on value creation; and considers consumer behavior and factors affecting value creation from both physiological and psychological perspectives.

The Mystery of the Missing Diamond

It was a gloomy and tempestuous night. The drizzle was pouring down, and the breeze was whistling. In the middle of the city, there was a museum, where a invaluable diamond was on exhibit. The diamond was named the African Star, and it was the largest and most stunning diamond in the globe. It was guarded by a sophisticated security system, and a squad of weaponized guards. No one could pilfer it, or so they believed. But somebody did. Someone succeeded to bypass the security, to avoid the watchmen, to break the glass, and to steal the diamond. And no one observed them, no one heard them, no one knew who they were. They exited no mark, no hint, no evidence. They disappeared into the night, with the African Star. And the riddle of the missing diamond commenced.

Chapter four of Holt Chemistry, titled "Periodic Table", provides a thorough overview of the table of elements and its constituents. The chapter opens with a discussion on the properties of groupings and periods, elucidating how the Russian chemist Dmitri Mendeleev arranged elements by their atomic weight in ascending order<sup>1</sup>. It then explores the idea of valence electrons and energy levels of atoms, highlighting the part of valence electrons in chemical reactions and changes to atomic structures and molecular structures.

The chapter moreover distinguishes between transition elements and main group elements, elaborating on their properties and traits. It also explains the idea of ionization energy and its patterns among groupings and periodic groups on the table of elements<sup>1</sup>. The chapter converses about atom's and ionic, and how these can be anticipated based on an element's place on the table of elements.

The concept of electronegativity, which measures an element's tendency to attract a pair of bonding electrons, is another crucial subject covered in this section<sup>1</sup>. The chapter concludes with a conversation on the relationship

diagonally, character of metals, and point of boiling of constituents.

In terms of questions, the chapter provides a variety of questions and test preparation resources to bolster the concepts understood. These questions cover a range of subjects, from comprehending the arrangement of components to investigating the tendencies in the periodic table.
