an instrument of promoting the rule of law to third states. In doing so, the book combines development economics, foreign policy and legal perspectives at three levels of analysis of four sectors to introduce the concept of "EU value-promoting RTAs". The book demonstrates that the EU RTAs bear considerable potential to be strategized as instruments of promoting the rule of law in third states, requiring, however, overcoming strict divides between EU political and economic cooperation, and values and acquis conditionality in its relations with third countries. This book will be of key interest to scholars and students of European Studies, European Union Law, EU external action/foreign policy, EU trade agreements and Development Studies, as well as to NGOs and think tanks that work on European affairs.

problem-solving and object-oriented programming using a fundamentals-first approach. Beginning programmers learn critical problem-solving techniques then move on to grasp the key concepts of object-oriented, GUI programming, advanced GUI and Web programming using Java. Regardless of major, students will be able to grasp concepts of problem-solving and programming — thanks to Authors' fundamentals-first approach, students learn critical problem solving skills and core constructs before object-oriented programming. Authors' approach has been extended to application-rich programming examples, which go beyond the traditional math-based problems found in most texts. Students are introduced to topics like control statements, methods, and arrays before learning to create classes. Later chapters introduce advanced topics including graphical user interface, exception handling, I/O, and data structures. Small, simple

examples demonstrate concepts and techniques while longer examples are presented in case studies with overall discussions and thorough line-by-line explanations. Increased data structures chapters make the Tenth Edition ideal for a full course on data structures. BRIEF CONTENTS-

With a wealth of homework problems (and a solutions manual for instructors online), real-life case studies and examples throughout, and an appendix detailing key numerical methods and links to additional online resources, this is a must-have guide for senior and first year graduate students looking to gain a thorough understanding of the topic along with practical tools that can be applied in industry.

Major Infrastructure Projects 2017-09-16 Edward Ochieng In this unique and comprehensive textbook, the authors examine the challenges faced all around the world with regard to major infrastructure project management, and they champion a fresh approach that takes into account the interdependencies between economic, social, political, technological and legislative environments. Managing, developing and investing in crucial infrastructure is essential to keep up with the challenges of a fast-paced and globalised world, but affecting and overseeing change requires a deep understanding of complex interlocking systems. To this end the book is neatly divided into three key parts: project appraisal, maximising integrated supply chains, and implementing value-enhancing practices. This is the ideal companion for courses on any aspect of civil engineering and construction project management including modules in

infrastructure planning, infrastructure management, construction management and business management. The book will also appeal to practitioners involved in the management of capital and infrastructure projects.

and defines it on the basis of plant variety innovations that, by their very nature, (i) permit the in situ conservation of agrobiodiversity and genetic variability in diverse geographic and climatic conditions, (ii) do not exclude any potential innovators from the process of innovation, and thereby (iii) ensure that both formal and informal innovations can continue to take place in the generations to come (in both the developed and developing world). The book studies the Indian Plant Variety Protection Act, the UPOV Acts and associated agricultural policies from a legal, philosophical, historical and economic perspective with the aim of determining the means of promoting sustainable innovations in plant varieties and identifying laws, policies and practices that are currently acting as impediments to promoting the same.

Excellence Gaps in Education 2020-01-15 Jonathan A. Plucker 2017 Texas Association for Gifted and Talented Legacy Scholar Book Award 2017 National Association of Gifted Children Scholar Book of the Year Award In Excellence Gaps in Education, Jonathan A. Plucker and Scott J. Peters shine a spotlight on “excellence gaps”—the achievement gaps among subgroups of students performing at the highest levels of achievement. Much of the focus of recent education reform has been on closing gaps in achievement between students from different racial, ethnic, or socioeconomic backgrounds by bringing all students up to minimum levels of proficiency. Yet issues related to excellence gaps have been largely absent from discussions about how to improve our schools and communities. Plucker and Peters argue that these significant gaps reflect the existence of a persistent talent underclass in the United States among African American,

**Chapters Of Sslc 2014 15 Pdf Pdf upload

Hispanic, Native American, and poor students, resulting in an incalculable loss of potential among our fastest growing populations. Drawing on the latest research and a wide range of national and international data, the authors outline the scope of the problem and make the case that excellence gaps should be targeted for elimination. They identify promising interventions for talent development already underway in schools and provide a detailed review of potential strategies, including universal screening, flexible grouping, targeted programs, and psychosocial interventions. Excellence Gaps in Education has the potential for changing our national conversation about equity and excellence and bringing fresh attention to the needs of high-potential students from underrepresented backgrounds.

Competition Law in Kenya 2017-11-20 Brenda Pamela Mey Derived from the renowned multi-volume International Encyclopaedia of Laws, this

practical analysis of competition law and its interpretation in the Kenya covers every aspect of the subject – the various forms of restrictive agreements and abuse of dominance prohibited by law and the rules on merger control; tests of illegality; filing obligations; administrative investigation and enforcement procedures; civil remedies and criminal penalties; and raising challenges to administrative decisions. Lawyers who handle transnational commercial transactions will appreciate the explanation of fundamental differences in procedure from one legal system to another, as well as the international aspects of competition law. Throughout the book, the treatment emphasizes enforcement, with relevant cases analysed where appropriate. An informative introductory chapter provides detailed information on the economic, legal, and historical background, including national and international sources, scope of

application, an overview of substantive provisions and main notions, and a comprehensive description of the enforcement system including private enforcement. The book proceeds to a detailed analysis of substantive prohibitions, including cartels and other horizontal agreements, vertical restraints, the various types of abusive conduct by the dominant firms and the appraisal of concentrations, and then goes on to the administrative enforcement of competition law, with a focus on the antitrust authorities' powers of investigation and the right of defence of suspected companies. This part also covers voluntary merger notifications and clearance decisions, as well as a description of the judicial review of administrative decisions. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties

with interests in the Kenya will welcome this very useful guide, and academics and researchers will appreciate its value in the study of international and comparative competition law.

Search 2016-11-03 Stefan Weitz Search is as old as language. We've always needed to find something in the jumble of human creation. The first web was nothing more than passing verbal histories down the generations so others could find and remember how not to get eaten; the first search used the power of written language to build simple indexes in printed books, leading to the Dewey Decimal system and reverse indices in more modern times. Then digital happened. Besides having profound societal impacts, it also made the act of searching almost impossibly complex for both engines and searchers. Information isn't just words; it is pictures, videos, thoughts tagged with geocode data, routes,

physical world data, and, increasingly, the machines themselves reporting their condition and listening to others'. Search: How the Data Explosion Makes Us Smarter holds up a mirror to our time to see if search can keep up. Author Stefan Weitz explores the idea of access to help readers understand how we are inventing new ways to search and access data through devices in more places and with more capabilities. We are at the cusp of imbuing our generation with superpowers, but only if we fundamentally rethink what search is, how people can use it, and what we should demand of it. "Search: How The Data Explosion Makes Us Smarter" is the first title from GreenHouse Collection. Created by the founders of Insight Labs, the world's first philanthropic think tank, GreenHouse Collection features books that encourage deeper exploration and inquiry to inform new models for social good.

Consumer Involvement in Private EU Competition Law Enforcement 2015-09-03 Maria Ioannidou
Despite the growing importance of 'consumer welfare' in EU competition law debates, there remains a significant disconnect between rhetoric and reality, as consumers and their interests still play only an ancillary role in this area of law.

Consumer Involvement in Private EU Competition Law Enforcement is the first monograph to exclusively address this highly topical and much debated subject, providing a timely and wide-ranging examination of the need for more active consumer participation in competition law. Written by an expert in the field, it sets out a comprehensive framework of policy implications and arguments for greater involvement, positioning the debate in the context of a broader EU law perspective. It outlines pragmatic approaches to remedial and procedural measures that would

Proceedings of the 10th Focus Conference (TFC 2023) 2023-12-05 Manyane Makua This is an open access book. The 2023 Focus Conference will focus on Goal Four (Quality Education) of the United Nations (UN) Sustainable Development Goals (SGD). Goal Four is seized with providing “equal access for all women and men to affordable and quality technical, vocational and tertiary education including university.” Quality education, in this

context, means the ability to function, provide and derive value in society. The theme of the conference is therefore coined as “The Role of Higher Education in the Attainment of Sustainable Quality Education.” Through this theme, the conference will provide a space for participants to share practical knowledge, experiences, and possible solutions to the myriad of problems that confront the higher education sector. Universities are often thought of as ivory towers far removed from the realities that confront global societies. To compound this, higher education is increasingly being questioned for its relevance in providing practical and innovative solutions to existing societal problems. Such questions often navigate around the relevance of the academic programmes being offered, curriculum, the capacity of staff, employability of graduates, and generally the ability of these institutions to understand why they exist.

Indeed, higher education’s role in creating a sustainable future will presumably take on greater importance as the world continues to become increasingly globalised and interdependent.

Essential Texts on International and European Criminal Law (10th revised edition) 2019 Gert Vermeulen This book comprises the principal multilateral legal instruments on international and European criminal law, with a special institutional focus on Europol and Eurojust and a substantive focus on international, organised and serious crime, including terrorism. Given the relevance thereof for international information exchange in criminal matters, relevant data protection instruments have also been included in the selection. The texts have been ordered according to the corresponding multilateral co-operation level: either Prüm, the European Union (comprising Schengen-related texts), the Council of Europe or the United Nations. This edition provides students as well as practitioners (judicial and law enforcement

Charter in 2008, ASEAN has transformed itself from a loose economic cooperation, into a formal intergovernmental organization designed to create an “ASEAN Community” forged together in three pillar communities – the ASEAN Political-Security Community, ASEAN Economic Community, and ASEAN Socio-Cultural Community. Forty years of pre-Charter ASEAN practices, coupled with over ten years of post-Charter ASEAN practices thus far, has witnessed the conclusion of hundreds of legally binding regional treaties and similarly binding international instruments in all areas of economic, political-security, and socio-cultural concerns for Southeast Asia to achieve ASEAN’s rule of law-based development objective. Pre-Charter and post-Charter ASEAN Law is variably implemented under a hybrid governance system that depends heavily on ASEAN Member State national implementation alongside ASEAN’s evolving

regional institutions. The result is not a model of deep integration as in the case of the European Union, but a particular paradigm of horizontal embeddedness of ASEAN Law – in all its norms and operational practices – contingent on the capacities and compliance of national government bureaucracies in Southeast Asia. This edited collection is a concise authoritative volume covering the practical, doctrinal, legal, and policy aspects of the new regime of ASEAN Law and its consequences for realizing rule of law-based development in Southeast Asia’s emerging single market and production base. Drawing together contributions from a range of key thinkers in the field, the editors present the legal and policy-making issues implicated in the practical implementation of Southeast Asia’s single market and its regime for the free movement of goods, services, foreign investment, and cross-border labor.

The book also examines the nature of regional law-making under ASEAN before and after the commencement of regional integration in 2015, the nature of ASEAN's economic regulators, as well as the evolving structure for enforcement and harmonization of "ASEAN Law" through the array of Southeast Asian national courts, arbitral tribunals, and incipient mechanisms for inter-State, intra-regional, and individual-State conflict management and dispute resolution. This book is highly relevant to students, scholars, and policy-makers with an interest in ASEAN Law and regional policy, and to Southeast Asian studies in general.

To End a Plague 2021-07-06 Emily Bass "Randy Shilts and Laurie Garrett told the story of the HIV/AIDS epidemic through the late 1980s and the early 1990s, respectively. Now journalist-historian-activist Emily Bass tells the story of US engagement

in HIV/AIDS control in sub-Saharan Africa. There is far to go on the path, but Bass tells us how far we've come." —Sten H. Vermund, professor and dean, Yale School of Public Health With his 2003 announcement of a program known as PEPFAR, George W. Bush launched an astonishingly successful American war against a global pandemic. PEPFAR played a key role in slashing HIV cases and AIDS deaths in sub-Saharan Africa, leading to the brink of epidemic control. Resilient in the face of flatlined funding and political headwinds, PEPFAR is America's singular example of how to fight long-term plague—and win. To End a Plague is not merely the definitive history of this extraordinary program; it traces the lives of the activists who first impelled President Bush to take action, and later sought to prevent AIDS deaths at the whims of American politics. Moving from raucous street protests to the marbled halls of

Washington and the clinics and homes where Ugandan people living with HIV fight to survive, it reveals an America that was once capable of real and meaningful change—and illuminates imperatives for future pandemic wars. Exhaustively researched and vividly written, this is the true story of an American moonshot.

The Conversational Interface 2016-05-19 Michael McTear This book provides a comprehensive introduction to the conversational interface, which is becoming the main mode of interaction with virtual personal assistants, smart devices, various types of wearable, and social robots. The book consists of four parts. Part I presents the background to conversational interfaces, examining past and present work on spoken language interaction with computers. Part II covers the various technologies that are required to build a conversational interface

Part III looks at interactions with smart devices, wearables, and robots, and discusses the role of emotion and personality in the conversational interface. Part IV examines methods for evaluating conversational interfaces and discusses future directions.

Robert F. Kennedy and the Shaping of Civil Rights, 1960-1964 2012-11-06 Philip A. Goduti, Jr. From the 1960 John F. Kennedy presidential campaign to the signing of the Civil Rights Act of 1964, Attorney General Robert F. Kennedy and the Department of Justice worked tirelessly to change the climate of civil rights in the nation. This book explores how the Kennedy brothers and leaders such as Martin Luther King, Jr., John Lewis and James Meredith, among others, pushed for change at a critical time. Through an analysis of White House memoranda,

The Future of African Peace Operations 2016-03-15
Cedric De Coning Facing threats ranging from Islamist insurgencies to the Ebola pandemic, African regional actors are playing an increasingly vital role in safeguarding peace and stability across the continent. But while the African Union has demonstrated its ability to deploy forces on short notice and in difficult circumstances, the challenges posed by increasingly complex conflict zones have revealed a widening divide between the theory and practice of peacekeeping. With the AU's African Standby Force becoming fully operational in 2016, this timely and much-needed work argues that responding to these challenges will require a new and distinctively African model of

peacekeeping, as well as a radical revision of the current African security framework. The first book to provide a comprehensive overview and analysis of African peace operations, *The Future of African Peace Operations* gives a long overdue assessment of the ways in which peacekeeping on the continent has evolved over the past decade. It will be a vital resource for policy makers, researchers and all those seeking solutions and insights into the immense security challenges which Africa is facing today.

Zara had always yearned to embark on a worldwide expedition, but she never envisioned that she would stumble upon a hidden civilization. Driven by an unwavering desire to uncover the truth behind her fathers disappearance, she joined an expedition to the alluring Amazon rainforest. Her father, a renowned

explorer, had vanished while seeking the legendary city of Z, leaving behind a legacy of exploration. Zara, inheriting his indomitable spirit and a journal brimming with maps and cryptic notes, was determined to unravel the mysteries that had captivated her father. As she ventured deeper into the heart of the rainforest, Zara discovered that she was not alone in her quest. A ruthless treasure hunter, harboring a deep-seated grudge against her father, was also hot on the trail of Z. Obsessed with claiming the city's secrets for himself, he would stop at nothing to achieve his malevolent goals.
