## Ideas and Integritys

2009-10-29 R. Buckminster Fuller In “Ideas and Integritys” Buckminster Fuller describes the revolutionary designs and concepts he has pioneered – among them the geodesic dome, the Dymaxion world map, the Dymaxion 4-D house, the Dymaxion 4-D automobile, and the countless other structures and creations that have changed the face of America and the world. And he sets forth his amazing and challenging ideas for the world of the future – ideas that would revolutionize everything from university education to bathroom design, ideas that, above all, demonstrate how we can and must make far more imaginative and efficient use of the resources now available to us to ensure a better standard of living for all men. ## Grunch\* of Giants

1983-04-15 R. Buckminster Fuller With the appearance of Grunch of Giants, R. Buckminster Fuller consummates his literary canon, his panoramic lifetime survey of all aspects of the responsibility of human beings for their own destiny. This book is a modern allegory - his long-gestated myth-of the villainy of capitalism and the fecklessness of classic economics. For Fuller, the academic discipline of economics is irrelevant since it derives from an invalid assumption of scarcity. In fact, he has long argued that future historians of our era may subsume our business practices as a branch of mythology; thus it is not surprising that the word economic appears nowhere in his text. Fuller’s myth is no idle fairy tale, since he faces his question - the question of a technological imperative which only he could raise with the deadly seriousness of satire. That question is: Can our system of national political sovereigntys and corporate profits survive the inevitable technology revolution require to obviate wars by effecting a worldwide rise in the standard of living. One of the functions of myth is to resolve contradictions in our culture. Grunch of Giants portrays the rising of multinational corporations in the paradoxical role of function both as the epitome of capitalistic selfishness and as the inadvertent vehicle for the dissolution of national political boundaries - the last deterrent to a one-world economy. The result is more subversive of the property and profit values of the capitalist system than anything dreamed of since Karl Marx. —E.J. Applewhite, collaborator with RBF on Synergetics and Synergetics 2, author of Cosmic Fishing: A Memoir of Working With R. Buckminster Fuller

## Your Private Sky

2001 Richard Buckminster Fuller This title, which complements the volume Your Private Sky: The Art of Design Science (see page 44), gives an authentic insight into the development of Fuller's architectonic, technical, & anthropological concepts. Fuller was the epitome of the poet as engineer, the thinker as designer, the artist as researcher. He left behind a voluminous quantity of writing, including texts of visionary importance & penetrating linguistic force, as well as of urgent topicality. The book documents various aspects of Fuller's widely respected texts. These testaments were intended to be shared with the whole world, or, as Fuller coined it in 1950, with "Spaceship Earth."###3-7643-6072-0

## Operating Manual for Spaceship Earth

2008-07-15 R. Buckminster Fuller One of Fuller’s most popular works, Operating Manual for Spaceship Earth, is a brilliant synthesis of his world view. In this very accessible volume, Fuller investigates the great challenges facing humanity. How will humanity survive? How does automation influence individualization? How can we utilize our resources more effectively to realize our potential to end poverty in this generation? He questions the concept of specialization, calls for a design revolution of innovation, and offers advice on how to guide “spaceship earth” toward a sustainable future. ## Nine Chains to the Moon

2019-08-19 Richard Buckminster Fuller New edition of Buckminster Fuller’s first work published in 1938, which was promoted by Albert Einstein. In 43 chapters the constructor, visionary, inventor, designer, creator of language, and spectacular performer rolls out the art of independent thought. Fuller lays out an enormous horizon and Nine Chains to the Moon is equivalent to a navigation across the world we live in: "What Is a House?", "Death and Life", "Longing Crosses the Sea", "Dollarability", "We Call it Earth", "Stomach Rhythms", "Ephemerization"—from the microscopic to the automobile, to the house, to urbanity, to the image of the cosmos in constant movement. The title, said Fuller, is meant to stimulate open thinking: the 1938 world population, one person on the shoulders of another, will reach from the earth to the moon nine times!

## Critical Path

1982-02-15 R. Buckminster Fuller The masterwork of a brilliant career, and an important document of the crisis now facing mankind. Today we find ourselves in the midst of the greatest crisis in the history of the human race. Technology has placed in our hands almost unlimited power at the very moment when we have run up against the limits of our resources aboard Spaceship Earth, as the crises of the late twentieth century—political, economic, environmental, and ethical—determine whether or not humanity survives. In this masterful summing up of an entire lifetime’s thought and concern, R. Buckminster Fuller addresses these crucial issues in his most significant, accessible, and urgent work. Critical Path traces the origins and evolution of humanity’s social, political, and economic systems from the obscure mists of prehistory, through the development of the great political empires, to the vast international corporate and political systems that control our destiny today to show how we got to our present situation and what options are available to man. With his customary brilliance, extraordinary energy, and unlimited devotion, Bucky Fuller shows how mankind can survive, and how each individual can respond to the unprecedented threat we face today. The crowning achievement of an extraordinary career, Critical Path offers the reader the excitement of understanding the essential dilemmas of our time and how responsible citizens can rise to meet this ultimate challenge to our future.

## You Belong to the Universe

2016 Jonathon Keats A self-professed "comprehensive anticipatory design scientist," the inventor Buckminster Fuller (1895-1983) was undoubtedly a visionary and his creations often bordered on the realm of science fiction. You Belong to the Universe documents Fuller's six-decade quest to "make the world work for one hundred percent of humanity." Critic and experimental philosopher Jonathon Keats sets out to revive Fuller's unconventional practice of comprehensive anticipatory design, placing Fuller's philosophy in a modern context and dispelling much of the mythology surrounding Fuller's life. Keats argues that Fuller's life and ideas, namely doing "the most with the least," are now more relevant than ever as humanity struggles to meet the demands of an exploding world population with finite resources.

She had spent her childhood in a normal family, living in a quaint town, devoid of any signs of the supernatural. However, on her sixteenth birthday, her life took an unexpected turn. A intriguing package arrived, sent by her grandmother, who had departed years ago. Within the package lay an ancient leather-bound book, its cover adorned with the inscription, "The Book of Shadows". As Eva opened the book, a torrent of magic coursed through her veins.
