The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a widely recognized vocabulary evaluation that has been in use for nearly half a century. Developed by Lloyd M. Dunn and Douglas M. Dunn, the test is crafted to assess vocabulary comprehension for American English. It is fast and easy to carry out, preserving valuable time so that focus can be put on applying successful strategies.

The PPVT-4 assessment material encompasses a broad array of receptive vocabulary grades, extending from preschool through adult age. The assessment questions widely feature words that represent 20 content areas (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and home and educational vocabulary.

The evaluation offers two equal versions which include different vocabulary terms, guaranteeing that the person has not “learned” the evaluation. One edition can be utilized before intervention to evaluate individuals’ vocabulary knowledge and the alternative form can be employed for re-evaluation to assess and record advancement. The PPVT-4 also features a unique Growth Scale Value (GSV) which is responsive to small changes with time.
