Acne is one of the most common problems in adolescent teens affecting nearly seventeen million people in the United States. Acne is nothing but a disorder involving sebaceous glands and hair follicles. Acne results from the clogging of sebaceous glands leading to the formation of pimples and cysts. The condition usually begins with the onset of puberty. Going by the facts, as teens attain puberty the androgens also called male sex hormones are produced in high number leading to sebaceous glands becoming over active which results in sebum being produced in high proportions.

Sebum, which is nothing but oil is produced by sebaceous glands which travel to the skin surface through hair follicles. But, skin cells block the follicles which results in oil also being blocked. When these hair follicles are blocked it results in the development of skin bacteria known as Propionibacterium Acnes within the follicles which in turn results in swelling of the skin called Acne. If the hair follicles are partially blocked it results in blackheads. If the follicles are completely blocked they result in whiteheads. But if these plugged follicles are not treated they ultimately burst causing the oil, bacteria and skin cells to spill all over the skin resulting in irritation and formation of pimples. Acne can be shallow as well as deep in various individuals depending on the nature of skin and amount of oil produced.

The imbalance in the Qi may go one way or the other because of Yin and Yang. The person can only be normal if there is harmony between the two which is what acupuncture is trying to achieve. This can only be restored by stimulating these acupuncture points so your Qi can be adjusted, balanced and harmonized.

Apart from using needles, practitioners also use friction, heat, impulses of electromagnetic energy and pressure to stimulate these points in order to balance the movement of energy in the body to reduce one's health.

An example of this is sonopuncture where an ultrasound device that transmits sound waves is applied to these points in the body. Some use a tuning fork and other vibration devices.

There are basically 14 pathways throughout the body where chi flows continuously. These are called the meridian points. In order for chi to course through the body unobstructed, there has to be a balance between the strengths of yin and yang. In ancient Chinese philosophy, yin and yang represent the forces of the universe- yin is for feminine, while yang is for masculine. Every single thing in the universe is believed to contain both yin and yang for harmony.

When the yin and yang are not balanced, chi cannot stream through the body liberally. Therefore, the meridian points through which chi courses through need to be stimulated. This is done by the insertion of hair-thin, disposable needles in specific areas on a person's body to induce bodily harmony and bring about healing.

### **Concepts automatic millionaire un one step plan per...How does sticking needles into your body help manage the stress?**

In traditional Chinese medicine, much of the treatments depend on an understanding of the balance in our bodies and its internal organs. The sicknesses we sometimes develop are seen to be caused by imbalances in our lifestyles and environment. Stress is also affected by this imbalance. That is why when there is something wrong with your body, you typically have less of an ability to deal with stress. You get more irritable and find it really difficult to relax.

By sticking these very thin needles past the surface of our skin, the acupuncturist stimulates nerves in our body. These nerves send signals to our brain and scientists believe that the brain then releases its natural painkillers into our system. This immediately causes a feeling of relaxation for many people.

The needles could also help your body by stimulating its circulation. With the circulation between the organs of the body improved, a lot of the body's wastes could be cleansed properly. Your organs would also receive the full benefit of the oxygen from your lungs making its way into the cells of your body without any blockages. This makes your organs much healthier and leaves you feeling much better in the long term as well.

When the adolescent is growing there will be critical tissue components loss like loss of body fat, muscle mass and bone mineral.

Nutritional imbalance is also caused which reflect abnormalities in the levels of vitamins, mineral and other trace elements. The problem is that these abnormalities cannot be recognized clinically. But since protein and calories are essential to the growth of the adolescent, it is important to trace their abnormalities. Because of the problems, healthy adulthood is not a possible thing. The most important precautionary measure is to brush the teeth regularly after every meal. Since the food can be easily lodged in braces, it is a good idea to

brush carefully with soft bristles toothbrush and fluoride toothpaste. In the morning, the adolescent must floss between the braces and teeth. Food stuffs which are sticky or hard must be avoided as they are very difficult to remove. Foods like caramel, chew candy, popcorn, and nuts must be avoided. Cleaning must be done by the orthodontist or general dentist, every five to six months.

The wisdom teeth or third molars can grow in people of the age fifteen to twenty five. These teeth cause problem, because most of the mouths are too small to adjust new teeth and hence they need to be removed. If the wisdom tooth has place to grow, without affecting other teeth, they can be left to themselves. But if the adolescent experiences pain, facial swelling, mouth infection and gum-line swelling, then they should be extracted immediately. They can also destroy the second molars and impact other tooth. Various gum and jaw diseases can be caused. There can be a tumor development; cysts development and plaque build up. Hence, a surgery is performed to remove the tooth or teeth. The gum tissue covering the wisdom tooth is removed and the connective tissue connecting the tooth to the bone is detached. The tooth is then removed and the opening is sutured. A general dentist can perform wisdom tooth surgery in the local office using anesthesia.

Five times common than asthma is tooth cavities. The tooth above the gum line is made up of enamel, the hardest tissue within the human body. The tooth below the gum-line comprise of nerves, roots and dentin. Dentin is another type of tissue and isn't as hard as the enamel. The acid which leads to tooth decay is produced by bacteria. These acids, along with dietary sugar, attach the enamel and eat away the minerals within the enamel, until a cavity is formed. This is known as tooth cavity. The biggest prevention against dental cavities is brushing teeth twice a day and even better, after every meal with fluoride toothpaste and soft bristle toothbrush. Carbonated drinks must be avoided strictly and must be replaced with fruit juices and sugary food must be avoided. Intake of fluoridated water also helps a lot or fluoride supplements can be used as replacement.
