The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a highly regarded vocabulary test that has been in use for nearly 50 years. Developed by Lloyd M. Dunn and Douglas M. Dunn, the test is designed to evaluate vocabulary comprehension for Standard American English. It is swift and easy to administer, preserving valuable time so that attention can be placed on applying intelligent strategies.

The PPVT-4 assessment content includes a wide array of receptive vocabulary grades, extending from preschool through adulthood. The test questions widely sample words that represent 20 subject areas (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and home and school vocabulary.

The evaluation provides two identical versions which include different vocabulary terms, ensuring that the person has not "memorized" the test. One version can be used before intervention implementation to assess people's vocabulary knowledge and the second form can be utilized for re-evaluation to evaluate and record progress. The PPVT-4 also contains a unique Growth Scale Value (GSV) which is reactive to small changes with time.
