Sleep Disorders and Sleep Deprivation 2006-10-13 Institute of Medicine Clinical practice related to sleep problems and sleep disorders has been expanding rapidly in the last few years, but scientific research is not keeping pace. Sleep apnea, insomnia, and restless legs syndrome are three examples of very common disorders for which we have little biological information. This new book cuts across a variety of medical disciplines such as neurology, pulmonology, pediatrics, internal medicine, psychiatry, psychology, otolaryngology, and nursing, as well as other medical practices with an interest in the management of sleep pathology. This area of research is not limited to very young and old patients—sleep disorders reach across all ages and ethnicities. Sleep Disorders and Sleep Deprivation presents a structured analysis that explores the following: Improving awareness among the general public and health care professionals. Increasing investment in interdisciplinary somnology and sleep medicine research training and mentoring activities. Validating and developing new and existing technologies for diagnosis and treatment. This book will be of interest to those looking to learn more about the enormous public health burden of sleep disorders and sleep deprivation and the strikingly limited capacity of the health care enterprise to identify and treat the majority of individuals suffering from sleep problems.

The Trachtenberg Speed System of Basic Mathematics 2011-03-01 Jakow Trachtenberg Ever find yourself struggling to check a bill or tax on a payslip? The Trachtenberg Speed System provides a course in refining basic mathematics skills to tackle large sums before simplifying to increase concentration and ability in day-to-day arithmetic. The Trachtenberg system has been described as the 'shorthand of mathematics' and only requires the ability to count from one to eleven. Using a series of simplified keys, it allows anyone to master numbers and calculations giving greater speed, ease in handling numbers and increasing accuracy. Jakow Trachtenberg believed that everyone is born with phenomenal abilities to calculate. He devised a set of rules that allows every child to make multiplication, division, addition, subtraction and square-root calculations with unerring accuracy and at remarkable speed. A perfect entry into gaining confidence with numbers.

Introduction to Internet of Things in Management Science and Operations Research 2021-09-28 Fausto Pedro García Márquez This book aims to provide relevant theoretical frameworks and the latest empirical research findings in Internet of Things (IoT) in Management Science and Operations Research. It starts with basic concept and present cases, applications, theory, and potential future. The contributed chapters to the book cover wide array of topics as space permits. Examples are

from smart industry; city; transportation; home and smart devices. They present future applications, trends, and potential future of this new discipline. Specifically, this book provides an interface between the main disciplines of engineering/technology and the organizational, administrative, and planning capabilities of managing IoT. This book deals with the implementation of latest IoT research findings in practice at the global economy level, at networks and organizations, at teams and work groups and, finally, IoT at the level of players in the networked environments. This book is intended for professionals in the field of engineering, information science, mathematics, economics, and researchers who wish to develop new skills in IoT, or who employ the IoT discipline as part of their work. It will improve their understanding of the strategic role of IoT at various levels of the information and knowledge organization. The book is complemented by a second volume of the same editors with practical cases.

The Role of International Large-Scale Assessments: Perspectives from Technology, Economy, and Educational Research 2014-08-09 Matthias von Davier This volume offers contributions by thought leaders from a variety of disciplines and different perspectives, which are brought together in a final chapter. The contributions give insight in the role of large-scale international assessments as change agents. As national leaders recognize the growing importance of human capital and how it is distributed, policymakers, economists and decision makers in education have become increasingly interested in results from comparative international surveys. These assessments offer important information on the development of cognitive skills and the consequences of differences in the distribution of these skills. Researchers use the data to assess the role of human capital in predicting outcomes and to identify factors that may contribute to the development of more human capital. An invaluable resource for researchers in international comparative education, policy studies, economics, civics education, educational technology, and policy makers.

Gendered Choices 2011-03-02 Sue Jackson This important book breaks new ground in addressing issues of gendered learning in different contexts across the (adult) life span at the start of the 21st century. Adult learning sits within a shifting landscape of educational policy, profoundly influenced by the skills agenda, by complex funding policies, new qualifications and the widening/narrowing participation debate. The book is unique in highlighting the centrality of gendered choices to these developments which shape participation in and experiences of lifelong learning. Gendered Choices critically examines the continued expansion of a skills-based approach in areas of lifelong learning, including career decisions, professional identities and informal networks. It explores key intersections of adult learning from a gender perspective: notably participation, workplace learning and informal pathways. Drawing on research from a range of contexts, Gendered Choices demonstrates that for women the public/private spaces of work and home are often conflated, although the gendering of 'choice' has largely been ignored by policy makers. The themes of the book bring together some of these critical issues, explored through the multiple and fractured identities which constitute gendered lives. The book addresses these in an international context, with contributions from Canada, Spain and Iran that provide a wider international perspective on shared issues.

Differential Ion Mobility Spectrometry 2008-12-24 Alexandre A. Shvartsburg Over the last decade, scientific and engineering interests have been shifting from conventional ion mobility spectrometry (IMS) to field asymmetric waveform ion mobility spectrometry (FAIMS). Differential Ion Mobility Spectrometry: Nonlinear Ion Transport and Fundamentals of FAIMS explores this new analytical technology that separates and characterizes ions by the difference between their mobility in gases at high and low electric fields. It also covers the novel topics of higher-order differential IMS and IMS with alignment of dipole direction. The book relates the fundamentals of FAIMS and other nonlinear IMS methods to the physics of gas-phase ion transport. It begins with the basics of ion diffusion and mobility in gases, covering the main attributes of conventional IMS that are relevant to all IMS approaches. Building on this foundation, the author reviews diverse high-field transport phenomena that underlie differential IMS. He discusses the conceptual implementation and first-principles optimization of FAIMS as a filtering technique, emphasizing the dependence of FAIMS performance metrics on instrumental parameters and properties of ion species. He also explores ion reactions in FAIMS caused by field heating and the effects of inhomogeneous electric field in curved FAIMS gaps. Written by an accomplished scientist in the field, this state-of-the-art book supplies the foundation to understand the new technology of nonlinear IMS methods.

Generative Programming and Component Engineering 2002-09-23 Don Batory This volume constitutes the proceedings of the 1st ACM SIGPLAN/SIGSOFT International Conference on Generative Programming and Component Engineering (GPCE 2002), held October 6–8, 2002, in Pittsburgh, PA, USA, as part of the PLI 2002 event, which also included ICFP, PDP, and affiliated workshops. The future of Software Engineering lies in the automation of tasks that are performed manually today. Generative Programming (developing programs that synthesize other programs), Component Engineering (raising the level of modularization and analysis in application design), and Domain-Specific Languages (elevating program specifications to compact domain-specific notations that are easier to write and maintain) are key technologies for automating program development. In a time of conference and workshop proliferation, GPCE represents a counter-trend in the merging of two distinct communities with strongly overlapping interests: the Generative and Component-Based Software Engineering Conference (GCSE) and the International Workshop on the Semantics, Applications, and Implementation of Program Generation (SAIG). Researchers in the GCSE community address the topic of program automation from a contemporary software engineering viewpoint; SAIG correspondingly represents a community attacking automation from a more formal programming languages viewpoint. Together, their combination provides the depth of theory and practice that one would expect in a premier research conference. Three prominent PLI invited speakers lectured at GPCE 2002: Neil Jones (University of Copenhagen), Catuscia Palamidessi (Penn State University), and Janos Sztipanovits (Vanderbilt University). GPCE 2002 received 39 submissions, of which 18 were accepted.

Children's Drawings 2001 Georges Henri Luquet Interest in children's drawings is contemporary with the birth of modern psychology but as yet there is no psychological theory that successfully accounts for the nature of children's drawing. The two main theories, visual realism and intellectual realism, fall short. The work of Georges-Henri Luquet is important because it goes beyond both theories. Luquet's work, though important and of interest to developmental psychologists, remains untranslated to date and so is often inaccurately cited. This translation of *Le Dessin Enfantin* makes Luquet's ideas available to a wider readership for the first time.

Higher education 2011-06-28 Great Britain: Department for Business, Innovation and Skills This White Paper sets out the government's policies for the reform of higher education. The reforms seek to tackle three challenges (i) Putting higher education on a sustainable footing; (ii) Seeking to deliver a better student experience - that is, improvements in teaching, assessment, feedback and preparing the student for the world of work; (iii) Pushing for higher education institutions to take more responsibility for increasing social mobility. The Paper is divided into six chapters, with an annex. Chapter 1: Sustainable and fair funding; Chapter 2: Well-informed students driving teaching excellence; Chapter 3: A better student experience and better-qualified graduates; Chapter 4: A diverse and responsive sector; Chapter 5: Improved social mobility through fairer access; Chapter 6: A new, fit-for-purpose regulatory framework. By shifting public spending away from teaching grants and towards repayable tuition loans, the government believes higher education will receive the funding it needs whilst making savings on public expenditure. The reforms aim to deliver a more responsive higher education sector in which funding follows the decisions of learners and successful institutions are freed to thrive. Also, creating an environment in which there is a new focus on the student experience and the quality of teaching and in which further education colleges and other alternative providers are encouraged to offer a diverse range of higher education provision. The Government, through the Office for Fair Access (OFFA), will be introducing a National Scholarship Programme and will also increase maintenance grants and loans for nearly all students. New Technology Innovation Centres will also be rolled out followed by publication of an innovation and research strategy, exploring the roles of knowledge creation, business investment, skills and training.

The Class Ceiling 2020-01-06 Friedman, Sam Politicians continually tell us that anyone can get ahead. But is that really

true? This important best-selling book takes readers behind the closed doors of elite employers to reveal how class affects who gets to the top. Friedman and Laurison show that a powerful 'class pay gap' exists in Britain's elite occupations. Even when those from working-class backgrounds make it into prestigious jobs, they earn, on average, 16% less than colleagues from privileged backgrounds. But why is this the case? . Drawing on 175 interviews across four case studies - television, accountancy, architecture, and acting – they explore the complex barriers facing the upwardly mobile. This is a rich, ambitious book that demands we take seriously not just the glass but also the class ceiling.

Public Private Partnerships in Education 2012-01-01 Susan Robertson 'Far from simply being a form of cost sharing between the "state" and the "market," PPP has been celebrated by some, and condemned by others, as the champion of change in the new millennium. This book has been written by the best minds in education policy, political economy, and development studies. They convincingly argue that public private partnership represents a new mode of governance that ranges from covert support of the private sector (vouchers, subsidies) to overt collaboration with corporate actors in the rapidly growing education industry. The analyses are simply brilliant and indispensable for understanding how and why this particular best/worst practice went global.' – Gita Steiner-Khamsi, Columbia University, New York, US This insightful book brings together both academics and researchers from a variety of international organizations and aid agencies to explore the complexities of public private partnerships (PPPs) as a resurgent, hybrid mode of educational governance that operates across scales, from the community to the global. The contributors expertly study the different types of partnership arrangements and thoroughly critique the value of PPPs. Some chapters explore how PPPs, as a policy idea, have been constructed in transnational agendas for educational development and circulated globally, whilst other chapters explore the role and implications of PPPs in developing countries, providing arguments for and against an expanding reliance on PPPs in national educational systems. The theoretical framing of the book draws upon leading theories of international relations to develop a unique perspective on the global governance of education. It will prove insightful for both scholars and policymakers in public policy and education.

UK Design as a Global Industry 2016 Lucy Montgomery The importance of design to the UK economy is widely recognised. It is one of the key pillars of the knowledge economy, it plays an important role in the innovation process, and it is one of a number of specialisms that help to set the UK apart from global competition. But despite this importance, the nature of design-intensive industries - the businesses that practice and sell design - is remarkably hard to pin down. This uncertainty renders it hard to analyse, and makes it difficult to develop clear, consistent policies to support the designers. The Hargreaves Review recommended that more research was needed to develop a clear evidence base for improving the intellectual property system for design. This report forms part of that evidence base. It examines how UK design figures in the global economy, and considers how the intellectual property system can best support its growth.

Plantagenet Ancestry of Seventeenth-century Colonists 1996 David Faris Prepared by David Faris, who had assisted Mr. Sheppard with the last two editions of "Ancestral Roots, Plantagenet Ancestry" provides the descent from the later Plantagenet kings of England (Henry III, Edward I, Edward II, and Edward III) of more than one hundred emigrants from England and Wales to the North American colonies before 1701, including many colonists not included in former editions of "Ancestral Roots." All 137 lines in this new volume include the consecutive generations of married couples with the spouse of Plantagenet descent on the left margin, each such individual being the child of the previous generation. Generation 1 names the parents of an emigrant, and the preceding generations are numbered back in time to the Plantagenet kings. Considerable biographical information is provided together with documentation for each generation.

Artificial Intelligence, Automation, and the Economy 2017-01-14 Executive Office of the President of the United States of America Advances in Artificial Intelligence (AI) technology and related fields have opened up new markets and new opportunities for progress in critical areas such as health, education, energy, economic inclusion, social welfare, and the environment. In recent years, machines have surpassed humans in the performance of certain tasks related to intelligence, such as aspects of image recognition. Experts forecast that rapid progress in the field of specialized artificial intelligence will continue. Although it is unlikely that machines will exhibit broadly-applicable intelligence comparable to or exceeding that

of humans in the next 20 years, it is to be expected that machines will continue to reach and exceed human performance on more and more tasks. AI-driven automation will continue to create wealth and expand the American economy in the coming years, but, while many will benefit, that growth will not be costless and will be accompanied by changes in the skills that workers need to succeed in the economy, and structural changes in the economy. Aggressive policy action will be needed to help Americans who are disadvantaged by these changes and to ensure that the enormous benefits of AI and automation are developed by and available to all. Following up on the Administration's previous report, *Preparing for the Future of Artificial Intelligence*, which was published in October 2016, this report further investigates the effects of AI-driven automation on the U.S. job market and economy, and outlines recommended policy responses. This report was produced by a team from the Executive Office of the President including staff from the Council of Economic Advisers, Domestic Policy Council, National Economic Council, Office of Management and Budget, and Office of Science and Technology Policy. The analysis and recommendations included herein draw on insights learned over the course of the Future of AI Initiative, which was announced in May of 2016, and included Federal Government coordination efforts and crosssector and public outreach on AI and related policy matters. Beyond this report, more work remains, to further explore the policy implications of AI. Most notably, AI creates important opportunities in cyberdefense, and can improve systems to detect fraudulent transactions and messages.

*Producing Queer Youth 2020-08-14* LAUREN S. BERLINER *Producing Queer Youth* challenges popular ideas about online media culture as a platform for empowerment, cultural transformation, and social progress. Based on over three years of participant action research with queer teen media-makers and textual analysis of hundreds of youth-produced videos and popular media campaigns, the book unsettles assumptions that having a "voice" and gaining visibility and recognition necessarily equate to securing rights and resources. Instead, Berliner offers a nuanced picture of openings that emerge for youth media producers as they negotiate the structures of funding and publicity and manage their identities with digital self-representations. Examining youth media practices within broader communication history and critical media pedagogy, she forwards an approach to media production that re-centers the process of making as the site of potential learning and social connection. Ultimately, she reframes digital media participation as a struggle for—rather than, in itself, evidence of—power. Book jacket.
