Developed by Lloyd M. Dunn and Douglas M. Dunn, the evaluation is designed to evaluate vocabulary comprehension for Standard American English. It is fast and simple to administer, preserving valuable time so that concentration can be put on executing successful interventions.

The PPVT-4 test content encompasses a wide array of vocabulary comprehension ranks, ranging from pre-kindergarten through adult age. The test questions broadly sample words that portray 20 subject areas (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and home and educational vocabulary. The test provides two equivalent editions which include various vocabulary words, ensuring that the test-taker has not "learned" the assessment. One edition can be utilized prior to intervention implementation to measure test-takers' vocabulary comprehension and the second edition can be used for re-testing to measure and record progress. The PPVT-4 also contains a distinctive Growth Scale Value (GSV) which is reactive to minor changes with time.
