The Enchantment of Modern Life

2001-08-05 Jane Bennett It is a commonplace that the modern world cannot be experienced as enchanted--that the very concept of enchantment belongs to past ages of superstition. Jane Bennett challenges that view. She seeks to rehabilitate enchantment, showing not only how it is still possible to experience genuine wonder, but how such experience is crucial to motivating ethical behavior. A creative blend of political theory, philosophy, and literary studies, this book is a powerful and innovative contribution to an emerging interdisciplinary conversation about the deep connections between ethics, aesthetics, and politics. As Bennett describes it, enchantment is a sense of openness to the unusual, the captivating, and the disturbing in everyday life. She guides us through a wide and often surprising range of sources of enchantment, showing that we can still find enchantment in nature, for example, but also in such unexpected places as modern technology, advertising, and even bureaucracy. She then explains how everyday moments of enchantment can be cultivated to build an ethics of generosity, stimulating the emotional energy and honing the perceptual refinement necessary to follow moral codes. Throughout, Bennett draws on thinkers and writers as diverse as Kant, Schiller, Thoreau, Kafka, Marx, Weber, Adorno, and Deleuze. With its range and daring, The Enchantment of Modern Life is a provocative challenge to the centuries-old "narrative of disenchantment," one that presents a new "alter-tale" that discloses our profound attachment to the human and nonhuman world.

Urban Awakenings

2020-11-21 Samuel Alexander This book presents a series of urban investigations undertaken in the metropolis of Melbourne. It is based on the idea that 'enchantment' as an affective state is important to ethical and political engagement. Alexander and Gleeson argue that a sense of enchantment can give people the impulse to care and engage in an increasingly troubled world, whereas disenchantment can lead to resignation. Applying and extending this theory to the urban landscape, the authors walk their home city with eyes open to the possibility of seeing and experiencing the industrial city in different ways. This unique methodology, described as 'urban tramping', positions the authors as freethinking freewalkers of the city, encumbered only with the duty to look through the delusions of industrial capitalism towards its troubled, contradictory soul. These urban investigations were disrupted midway by COVID-19, a plague that ended up confirming the book's central thesis of a fractured modernity vulnerable to various internal contradictions.

Vibrant Matter

2009-12-14 Jane Bennett In *Vibrant Matter* the political theorist Jane Bennett, renowned for her work on nature, ethics, and affect, shifts her focus from the human experience of things to things themselves. Bennett argues that political theory needs to do a better job of recognizing the active participation of nonhuman forces in events. Toward that end, she theorizes a "vital materiality" that runs through and across bodies, both human and nonhuman. Bennett explores how political analyses of public events might change were we to acknowledge that agency always emerges as the effect of ad hoc configurations of human and nonhuman forces. She suggests that recognizing that agency is distributed this way, and is not solely the province of humans, might spur the cultivation of a more responsible, ecologically sound politics: a politics less devoted to blaming and condemning individuals than to discerning the web of forces affecting situations and events. Bennett examines the political and theoretical implications of vital materialism through extended discussions of commonplace things and physical phenomena including stem cells, fish oils, electricity, metal, and trash. She reflects on the vital power of material formations such as landfills, which generate lively streams of chemicals, and omega-3 fatty acids, which can transform brain chemistry and mood. Along the way, she engages with the concepts and claims of Spinoza, Nietzsche, Thoreau, Darwin, Adorno, and Deleuze, disclosing a long history of thinking about vibrant matter in Western philosophy, including attempts by Kant, Bergson, and the embryologist Hans Driesch to name the "vital force" inherent in material forms. Bennett concludes by sketching the contours of a "green materialist" ecophilosophy.

Deleuzian Encounters

2007-11-13 Anna Hickey-Moody Deleuzian Encounters brings together sixteen accessible, thought-provoking essays that examine the practical and ethical implications of Deleuze's philosophy for different contemporary social issues. Topics explored include: the environment, terrorism, refugees, indigenous reconciliation, gender, suicide, intellectual disability, injecting drug use, classroom teaching and global activism. Each contribution provides practical examples of how to make use of Deleuze's thought in social research, and offers fresh insights into the creative and innovative potentials Deleuze's philosophy holds for social thought and action.

A Blessing Not a Curse

Ancient & Modern

2004 Stephen Muecke How might we think and talk about indigenous philosophy? Why has Aboriginal knowledge not been given the status of philosophical knowledge?
