The State of the Global Education Crisis

2021-12-09 UNESCO "The global disruption to education caused by the COVID-19 pandemic is without parallel and the effects on learning are severe. The crisis brought education systems across the world to a halt, with school closures affecting more than 1.6 billion learners. While nearly every country in the world offered remote learning opportunities for students, the quality and reach of such initiatives varied greatly and were at best partial substitutes for in-person learning. Now, 21 months later, schools remain closed for millions of children and youth, and millions more are at risk of never returning to education. Evidence of the detrimental impacts of school closures on children's learning offer a harrowing reality: learning losses are substantial, with the most marginalized children and youth often disproportionately affected. Countries have an opportunity to accelerate learning recovery and make schools more efficient, equitable, and resilient by building on investments made and lessons learned during the crisis. Now is the time to shift from crisis to recovery - and beyond recovery, to resilient and transformative education systems that truly deliver learning and well-being for all children and youth."--The World Bank website.

Understanding Steel Design

2013-03-04 Terri Meyer Boake Understanding Steel Design is based on an overall approach to understand how to design and build with steel from the perspective of its architectural applications. Steel is a material whose qualities have enormous potential for the creation of dynamic architecture. In an innovative approach to the reality of working with steel, the book takes a new look both at the state of tried-and-tested techniques and at emerging projects. Hundreds of steel structures have been observed, analyzed and appraised for this book. In-depth construction photographs by the author are complemented by technical illustrations created to look more closely at systems and details. Buddhist Understanding of Childhood Spirituality

2017-07-21 Alexander von Gontard In this book, Alexander von Gontard, a child psychiatrist, uses the language, thought and imagery of Buddhism to explore the spirituality of children. The book begins by exploring the Buddha's own childhood and the 'divine child' in Buddhism, a key archetype in Jungian psychology. The author defines the spirituality and religiosity of children and adolescents and identifies manifestations of spirituality in children, such as experiences of awe and wonder, and favourable conditions for spirituality, such as silence, nature, extreme conditions and mindfulness. Drawing on his own experience working with children in therapeutic practice, von Gontard discusses the parallels between spontaneous spirituality seen in childhood and the Buddha's teachings. Revealing how the spiritual insights and experiences of children and adolescents can uncover a deep and wise understanding of human life that is compatible with the Buddha's teachings, this book will be of particular interest to professionals and academics in psychology, psychiatry, psychotherapy, education and religious studies.
