Optimal operation, configuration and sizing of energy storage and energy conversion technologies for residential house energy systems 2020-06-23 Tobias Alexander Beck In recent years a rapid growth in the interest in self-consumption of electricity generated by distributed electricity generation technologies such as rooftop photovoltaic (PV) systems has been observed in the residential sector. Due to this development, future residential house energy systems will face an increased complexity with respect to operation, system configuration and sizing of generation and storage technologies. In this thesis, a mixed integer linear programming model for the integrated operation, configuration and sizing of house energy systems is developed and discussed with respect to its applicability to the specifics of self-consumption in residential dwellings. The conducted scenario analysis shows, that over a wide range of assumptions, PV is a robust measure to decrease the total cost of ownership for heat pump and gas boiler based house energy systems. The existence of a feed-in-tariff and the electricity price structure have a much larger influence on the results than the energy price development. A feed-in-tariff generally incentivizes larger PV systems with higher levels of self-sufficiency, whereas small demand-driven PV systems with high levels of self-consumption are favored in absence of a feed-in-tariff. Overall, the proposed model is regarded as applicable for the identified minimum flexibility requirements for the employed generation technologies. The results from the scenario computations provide a clear and robust picture of the role of electricity generation technologies and flexibility options for future house energy systems.

An Unlikely Dilemma 2011-08-01 Goran Gunner In a world where armed conflict, repression, and authoritarian rule are too frequent, human rights and peace-building present key concepts and agendas for the global and local struggle for peace and development. But are these agendas congruent? Do they support each other? Many organizations, states, and individuals have experienced how priorities of one agenda create friction with the other. For instance, are justice and reconciliation incompatible goals? If not, do they lead to counteracting initiatives? How can local and international actors develop support to societies that search a way out of violence and repression without violating universal moral standards, in an imperfect and resource-scarce situation? This study departs from the view that both human rights and peace-building are agendas with specific and unique contributions. In order to deal with overlapping claims that the two agendas sometimes formulate, in both conflict and post-conflict situations, this study suggests specific approaches in order to create synergy effects of agenda cooperation.

Cruise Tourism in the Caribbean 2019-06-17 Martha Honey This book explores the lessons learned from half a century of Caribbean cruise tourism; one of the most popular and profitable sectors of the tourism industry. The modern-day cruise industry dates from the 1960s when the three major cruise lines, Carnival, Royal Caribbean, and Norwegian, set up shop in Florida and began selling winter cruises to the Caribbean targeting American retirees. For geopolitical reasons, the US initially excluded cruises to Cuba. This changed in 2016, following the historic Obama-Castro agreement to move towards diplomatic, trade and travel normalization. Cuba quickly became the Caribbean's fastest growing cruise destination. This book considers the limited economic benefits of cruise tourism, its environmental and social impacts, and the effects of climate change, and "overtourism." Based on this analysis and case studies of key Caribbean and Mediterranean destinations, this book cautions against overdependence on cruise tourism and outlines reforms needed to bring more benefits and equity to Caribbean countries. It will be valuable to professionals, businesses, development agencies, NGOs, and academics interested in a sustainable cruise industry and the economic well-being of Caribbean island nations.

The Handbook of Salutogenesis 2022-01-01 Maurice B. Mittelmark This open access book is a thorough update and expansion of the 2017 edition of The Handbook of Salutogenesis, responding to the rapidly growing salutogenesis research and application arena. Revised and updated from the first edition are background and historical chapters that trace the development of the salutogenic model of health and flesh out the central concepts, most notably generalized resistance resources and the sense of coherence that differentiate salutogenesis from pathogenesis. From there, experts describe a range of real-world applications within and outside health contexts. Many new chapters emphasize intervention research findings. Readers will find numerous practical examples of how to implement salutogenesis to enhance the health and well-being of families, infants and young children, adolescents, unemployed young people, pre-retirement adults, and older people. A dedicated section addresses how salutogenesis helps tackle vulnerability, with chapters on at-risk children, migrants, prisoners, emergency workers, and disaster-stricken communities. Wide-ranging coverage includes new topics beyond health, like intergroup conflict, politics and policy-making, and architecture. The book also focuses on applying salutogenesis in birth and neonatal care clinics, hospitals and primary care, schools and universities, workplaces, and towns and cities. A special section focuses on developments in salutogenesis methods and theory. With its comprehensive coverage, The Handbook of Salutogenesis, 2nd Edition, is the standard reference for researchers, practitioners, and health policy-makers who wish to have a thorough grounding in the topic. It is also written to support post-graduate education courses and self-study in public health, nursing, psychology, medicine, and social sciences.

Making a Difference? 2015-01-01 Susanna Price Social assessment for projects in China is an important emerging field. This collection of essays — from authors whose formative work has influenced the policies that shape practice in development-affected communities — locates recent Chinese experience of the development of social assessment practices (including in displacement and resettlement) in a historical and comparative perspective. Contributors — social scientists employed by international development banks, national government agencies, and sub-contracting groups — examine projects from a practitioner's perspective. Real-life experiences are presented as case-specific praxis, theoretically informed insight, and pragmatic lessons-learned, grounded in the history of this field of development practice. They reflect on work where economic determinism reigns supreme, yet project failure or success often hinges upon sociopolitical and cultural factors.

Distributed Learning Ecosystems 2023-02-20 Daniel Otto This open-access book is based on the observation that learning ecosystems are increasingly established in higher education institutions. However, an important aspect that is still missing is their interconnectedness. Consequently, the book intends to close this gap by introducing the concept of a distributed learning ecosystem (DLE). A DLE follows the idea of establishing an interlinkage between decentralised learning ecosystems (consisting of content repositories and educational resources) and thus serves as an integrated approach that enables learners to access and use learning content and share resources.

Handbook of Research on Sustainability Challenges in the Wine Industry 2023-04-18 Marco-Lajara, Bartolomé In the wine industry, sustainability is an extremely important issue for two main reasons: Firstly, the industry faces serious threats as a consequence of climate change, as well as water and energy scarcity. Secondly, proper sustainable management of wineries can mean obtaining a competitive advantage by allowing them to increase market share and organizational innovation processes. In this sense, previous work has shown that customers tend to select wines that have been developed following sustainable practices, despite not knowing what this means in practice. The Handbook of Research on Sustainability Challenges in the Wine Industry serves as a guide for study, reflection, and critique to understand sustainability in the wine industry in its triple aspect (economic, social, and environmental). The book sheds light on the new trends and challenges of the wine industry, making it a must-read for academicians and managers who want to deepen their knowledge of the wine industry as well as its link with sustainability. Covering key topics such as wine tourism, green innovation, and consumer behavior, this major reference work is ideal for industry professionals, business owners, managers, entrepreneurs, researchers, scholars, academicians, practitioners, instructors, and students.

Handbook of Research on the Impacts, Challenges, and Policy Responses to Overtourism 2020-02-28 Ribeiro de Almeida, Cláudia In recent years, the increasing number of tourists traveling to specific urban and resort destinations has caused challenges for the effective management of tourism in these areas, with a resulting negative impact on towns, cities, and host communities. Such issues have included placing undue pressure on infrastructure; destruction of the physical, economic, and socio-cultural environment; and affecting the quality of residents' daily lives by impacting their mobility and, in some cases, the price and rent of resident accommodation, goods, and services. To achieve a certain level of balance between the interests of local residents and visitors, new regulatory measures and legislation in high tourism areas must be discussed. The Handbook of Research on the Impacts, Challenges, and Policy Responses to Overtourism is a collection of innovative research on best practices and legislative solutions for the management of tourism destinations suffering from overtourism, tourismophobia, or antitourism movement issues. While highlighting topics including overcrowding, social displacement, and tourism management, this book is ideally designed for local government officials, policymakers, lawmakers, researchers, entrepreneurs, industry professionals, travel agencies, hotels, academicians, and students seeking current innovative empirical research on destination-management practices and application techniques.
