[Evidence-Based Climate Science](#)

2011-08-31 Don Easterbrook Global warming and human-induced climate change are perhaps the most important scientific issues of our time. These issues continue to be debated in the scientific community and in the media without true consensus about the role of greenhouse gas emissions as a contributing factor. Evidence-Based Climate Science: Data opposing CO2 emissions as the primary source of global warming objectively gathers and analyzes scientific data concerning patterns of past climate changes, influences of changes in ocean temperatures, the effect of solar variation on global climate, and the effect of CO2 on global climate to clearly and objectively present counter-global-warming evidence not embraced by proponents of CO2. An unbiased, evidence-based analysis of the scientific data concerning climate change and global warming Authored by 8 of the world's leading climate scientists, each with more than 25 years of experience in the field Extensive analysis of the physics of CO2 as a greenhouse gas and its role in global warming Comprehensive citations, references, and bibliography Adaptation strategies are presented as alternative reactions to greenhouse gas emission reductions

[Fake Science](#)

2017-07-17 Austin Ruse If you listen to any political argument, you're eventually bound to hear something like: "The science is settled on this." Or: "Just look at the statistics!" Or: "There have been studies that say..." You'd think we were living in the golden age of science and reason. But the truth is far more sinister, says Austin Ruse. We're actually living in the age of the low information voter, easily misled by all-too-convincing false statistics and studies. In Fake Science, Ruse debunks so-called "facts" used to advance political causes one after the other, revealing how poorly they stand up to actual science.

Monitoring and Evaluation of Climate Change Adaptation: A Review of the Landscape

2015-09-17 Dennis Bours Monitoring and evaluation (M&E) of climate change adaptation (CCA) poses an assortment of thorny methodological challenges. Individually, none are unique to CCA, but together they represent a very distinctive conundrum facing practitioners and policy makers. Adding to this complexity further, climate change may be global in nature but its impacts, and how we respond to them through adaptation efforts, cut across scales, sectors, and levels of intervention. As investments in climate adaptation increase, organizations are seeking to measure, assess and understand an array of adaptation initiatives, and derive learnings to inform policy and praxis. This issue presents findings from many of the most important contemporary CCA program evaluation research initiatives. The chapters represent the most coherent and current collection of CCA M&E research in this emerging and important field, written by many of its leading experts. Filled with examples and insights in formulating coherent responses to methodological challenges, it will be of interest to M&E scholars and practitioners globally. This is the 147th issue in the New Directions for Evaluation series from Jossey-Bass. It is an official publication of the American Evaluation Association.

[The Routledge Handbook of Religion, Spirituality and Social Work](#)

2017-04-07 Beth R. Crisp This international volume provides a comprehensive account of contemporary research, new perspectives and cutting-edge issues surrounding religion and spirituality in social work. The introduction introduces key themes and conceptual issues such as understandings of religion and spirituality as well as definitions of social work, which can vary between countries. The main body of the book is divided up into sections on regional perspectives; religious and spiritual traditions; faith-based service provision; religion and spirituality across the lifespan; and social work practice. The final chapter identifies key challenges and opportunities for developing both social work scholarship and practice in this area. Including a wide range of international perspectives from Australia, Canada, Hong Kong, India, Ireland, Israel, Malta, New Zealand, South Africa, Sweden, the UK and the USA, this Handbook succeeds in extending the dominant paradigms and comprises a mix of authors including major names, significant contributors and emerging scholars in the field, as well as leading contributors in other fields of social work who have an interest in religion and spirituality. The Routledge Handbook of Religion, Spirituality and Social Work is an authoritative and comprehensive reference for academics and researchers as well as for organisations and practitioners committed to exploring why, and how, religion and spirituality should be integral to social work practice.

Sustainability in the Gulf

2017-07-31 Elie Azar Sustainability is a topic of great interest today, particularly for the Gulf Cooperation Council (GCC) countries, which have witnessed very rapid economic and demographic growth over the past decade. The observed growth has led to unsustainable consumption patterns of vital resources such as water, energy, and food, highlighting the need for an urgent shift towards green growth and sustainable development strategies. Sustainability in the Gulf covers the region's contemporary development challenges through the lens of the UN's Sustainable Development Goals (SDGs), which place sustainability at the centre of the solution to the current environmental, economic, and social imbalances facing GCC countries. The book presents multiple analyses of Gulf-specific sustainability topics, examining the current status, challenges, and opportunities, as well as identifying key lessons learned. Innovative and practical policy recommendations are provided, as well as new conceptual angles to the evolving academic debates on the post-oil era in the Gulf. Through chapters covering sector-related studies, as well as the socio-economic dimensions of the sustainability paradigm, this volume offers valuable insights into current research efforts made by the GCC states, proposing a way forward based on lessons learned. This is a valuable resource for students, academics, and researchers in the areas of Environmental Studies, Political Economy, and Economics of the GCC states.

The Great Climate Change Debate, Karoly vs Happer

2022-09-04 Andy May February 15, 2016 was the beginning of a debate on man-made climate change between two well-known experts in the field, Dr. William Happer and Dr. David Karoly, hosted by James Barham and his team at TheBestSchools.org. Both have been heavily involved in atmospheric research since the 1980s. Happer believes that burning fossil fuels will have a minimal effect on climate but a large benefit to plant life and humanity. Karoly believes the opposite. How certain is the conclusion by some scientists that burning fossil fuels will lead to a climate disaster? Only debates can ferret out their certainty or lack of it. Burning fossil fuels may cause some harm, but if we stop burning them, we will face certain harm. Which is worse? Debates educate the public, they are necessary. This is an in-depth look at both sides of the debate between two prominent experts.
