Antigone; Oedipus the King; Electra
2008-08-14 Sophocles Love and loyalty, hatred and revenge, fear, deprivation, and

political ambition: these are the motives which thrust the characters portrayed in these three Sophoclean masterpieces on to their collision course with catastrophe. Recognized in his own day as perhaps the greatest of the Greek tragedians, Sophocles' reputation has remained undimmed for two and a half thousand years. His greatest innovation in the tragic medium was his development of a central tragic figure, faced with a test of will and character, risking obloquy and death rather than compromise his or her principles: it is striking that Antigone and Electra both have a woman as their intransigent 'hero'. Antigone dies rather neglect her duty to her family,

Oedipus' determination to save his city results in the horrific discovery that he has committed both incest and parricide, and Electra's unremitting anger at her mother and her lover keeps her in servitude and despair. These vivid translations combine elegance and modernity, and are remarkable for their lucidity and accuracy. Their sonorous diction, economy, and sensitivity to the varied metres and modes of the original musical delivery make them equally suitable for reading or theatrical performance. Lucian: Selected Dialogues 2005-12 Luciano de Samosata This is a selection of pieces by the Greek satirist Lucian. Lucian invented the comic dialogue as a satiric tool, and had immense influence on many later European literatures. He is also extremely funny, whether puncturing the pretensions of pompous philosophers or describing the daily lives of Greek courtesans. The translation aims to be lively and modern in idiom, while maintaining accuracy.

The First Philosophers 2009-03-26 Robin Waterfield These first philosophers paved the way for the work of Plato and Aristotle - and hence for the whole of Western thought.

This is a unique and invaluable collection of the works of the Presocratics and the Sophists. Waterfield brings together the works of these early thinkers with brilliant new translation and exceptional commentary. This is the ideal anthology for the student of this increasingly appreciated field of classical philosophy.

Heart of Darkness and Other Tales
2008-05-08 Joseph Conrad HEART OF DARKNESS * AN OUTPOST OF PROGRESS * KARAIN * YOUTH The finest of all Conrad's tales, 'Heart of Darkness' is set in an atmosphere of mystery and menace, and tells of Marlow's perilous journey up the Congo River to relieve his employer's agent, the renowned and formidable Mr Kurtz. What he sees on his journey, and his eventual encounter with Kurtz, horrify and perplex him, and call into question the very bases of civilization and human nature.

Endlessly reinterpreted by critics and adapted for film, radio, and television, the story shows Conrad at his most intense and sophisticated. The other three tales in this volume depict corruption and obsession, and question racial assumptions. Set in the exotic surroundings of Africa, Malaysia, and the east, they variously appraise the glamour, folly, and rapacity of imperial adventure. This revised edition uses the English first edition texts and has a new chronology and bibliography. Youth Work: Histories, Policy and Contexts 2015-09-10 Graham Bright Youth work is a means of promoting learning, equality and inclusion with young people. It is an incredibly rewarding profession; however, state regulation means that youth work students and practitioners must continuously wrestle with the challenges of contemporary practice in environments that are complex and changing. This book brings together a collection of voices to speak to these concerns. Drawing on the history of the profession, each chapter focuses on a different aspect of policy and practice. Chapters explore the impact of New Labour; the changes that came with the coalition government; youth work in the voluntary sector, and youth work in a digital world. Graham Bright concludes with a powerful reflection on what the future holds for the

profession. Each chapter features 'Over to You' activity boxes which invite readers to engage collaboratively in developing and applying ideas, with case studies which link discussion to real life examples. This is an important book for students, practitioners and lecturers in the field of youth and community work and related practice with children and young people.

Managing Cyber Risk in the Financial Sector 2016-01-22 Ruth Taplin Cyber risk has become increasingly reported as a major problem for financial sector businesses. It takes many forms including fraud for purely monetary gain, hacking by people hostile to a company causing business interruption or damage to reputation, theft by criminals or malicious individuals of the very large amounts of customer information ("big data") held by many companies, misuse including accidental misuse or lack of use of

such data, loss of key intellectual property, and the theft of health and medical data which can have a profound effect on the insurance sector. This book assesses the major cyber risks to businesses and discusses how they can be managed and the risks reduced. It includes case studies of the situation in different financial sectors and countries in relation to East Asia, Europe and the United States. It takes an interdisciplinary approach assessing cyber risks and management solutions from an economic, management risk, legal, security intelligence, insurance, banking and cultural perspective.

new technologies with multiple modes of meaning-making. Drawing on theories related to cultural studies, media literacy, anthropology, and creativity, the author explores learning strategies with digital media based on an empowering, values-driven framework. The book advances innovative teaching methods, critiquing educational 'reforms' that marginalise media and fail to engage with the complex tensions and textures of modern pedagogy. Positioning film and media-making as vital practices in schools that nurture the skills, dispositions and competencies of modern literacy, the model foregrounds connections between human agency, cognition, and creative practice. This innovative book will appeal to students and scholars of creativity, digital media production, primary education and literacy.

Selected Essays 2008-06-12 David Hume In

his writings, David Hume set out to bridge the gap between the learned world of the academy and the marketplace of polite society. This collection, drawing largely on his *Essays Moral, Political, and Literary* (1776 edition), which was even more popular than his famous *Treatise of Human Nature*, comprehensively shows how far he succeeded. From 'Of Essay Writing' to 'Of the Rise and Progress of the Arts and Sciences' Hume embraces a staggering range of social, cultural, political, demographic, and historical concerns. With the scope typical of the Scottish Enlightenment, he charts the state of civil society, manners, morals, and taste, and the development of political economy in the mid-eighteenth century. These essays represent not only those areas where Hume's arguments are revealingly typical of his day, but also where he is strikingly innovative in a period already famous for its

great thinkers. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. LEVIATHAN (Complete Edition) 2018-11-02
Thomas Hobbes This eBook edition of "Leviathan" has been formatted to the highest digital standards and adjusted for readability on all devices. Leviathan or The Matter, Forme and Power of a Commonwealth Ecclesiasticall and Civil—commonly referred to as Leviathan—is a book written by Thomas Hobbes. Its name derives from the biblical Leviathan. The work concerns the structure of society and legitimate government, and is regarded as one of the earliest and most influential examples of social contract theory. Leviathan ranks as a classic western work on statecraft comparable to Machiavelli's *The Prince*. Written during the English Civil War (1642–1651), Leviathan argues for a social contract and rule by an absolute sovereign.

Deforming the Reform 2022-09-21 Luana Martin-Russu This open access book presents an actor-centered study on Europeanization, based on the assumption that EU-driven reforms are highly dependent on the behavior and interests of the key domestic actors. Whether or not a state pursues a European and democratic agenda depends on domestic lawmakers. Further, political elites are pre-eminent in deciding on the nature, form and content of any law, and on the extent to which the rule of law is actually enforced. Elites can overcome structural or institutional barriers that stand in the way of achieving their goals. The empirical study on Romania presented here lends this observation a more profound

meaning: it shows how, in contexts where high level corruption is the norm rather than the exception, self-serving political elites cannot be expected to genuinely commit to adopting sound anti-corruption reform. The book is an inquiry into the motivations that drive legislators to make particular decisions, but also into the structural characteristics and dynamics of the elite that invite a selfish rather than responsible and responsive behaviour. This publication was supported by funds from the Publication Fund for Open Access Monographs of the Federal State of Brandenburg, Germany.

inclusion in relation to marginalized populations—from women, sexual minorities, minority newcomers, and aboriginal communities. The contributors collected here present well-grounded epistemological, theoretical, and methodological bases from which to account (at least in part) for the processes and dynamics shaping the relationship between diversity and inclusion, on the one hand, and policy and practice on the other. Arising from research derived in part from community work with minorities in North America, particularly Canada, this volume examines common barriers to full minority integration, with important implications for inclusion efforts around the globe.

'Autobiography of a Horse, published in 1877, is one of the bestselling novels in English. It was written not for children, but to expose and prevent cruelty to horses, and is a classic of Victorian literature that continues to captivate readers young and old. Black Beauty's moving story recounts his idyllic colthood and his experiences at the hands of a variety of owners, good and bad. Describing his life as a horse in Victorian England, he tells of his equine companions and human carers, and of the unthinking brutality to which horses were often subjected. A sympathetic hero who faces danger and excitement, Black Beauty never wavers in his principles, and the powerful lessons he teaches influenced animal welfare in England and America. This edition restores the original 1877 text and explores the multiple ways in which the novel has been read: as accessible horse-care manual, protest novel, feminist text,

autobiography, slave narrative, and classic animal story. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Integrating Human Health into Urban and Transport Planning 2018-07-13 Mark Nieuwenhuijsen This volume brings together the world's leading experts on urban and transport planning, environmental exposures, physical activity, health and health impact assessment to discuss challenges and solutions in cities. The book provides a conceptual framework and work

program for actions and outlines future research needs. It presents the current evidence-base, the benefits of and numerous case studies on integrating health and the environment into urban development and transport planning. Within cities there is a considerable variation in the levels of environmental exposures such as ambient air pollution, noise, and temperature, green space availability and physical activity. Many of these exposures, and their adverse health impacts, are related to and are being exacerbated by urban and transport planning and policy. Emerging research suggests that urban and transport planning indicators such as road network, distance to major roads, traffic density, household density, industry, and natural and green space can explain a large proportion of the variability in environmental exposures and therefore represent important and highly modifiable

factors. The urban environment is a complex interlinked system. Decision-makers need not only better data on the complexity of factors in environmental and developmental processes affecting human health, but also an enhanced understanding of the linkages between these factors and health effects to determine at which level to target their actions most effectively. In recent years, there also has been a shift from trying to change at the national level to more comprehensive and ambitious actions being developed and implemented at the regional and local levels. Cities have come to the forefront of providing solutions for environmental issues such as climate change, which has co-benefits for health, but yet need better knowledge for wider health-centric action. This book provides the latest and most up-to-date information and studies for academics and practitioners alike.

The Routledge Education Studies Textbook 2012-11-12 James Arthur The Routledge Education Studies Textbook is an academically wide-ranging and appropriately challenging resource for students beyond the introductory stages of a degree programme in Education Studies. Written in a clear and engaging style, the chapters are divided into three sections that examine fundamental ideas and issues, explore educational contexts, and offer study and research guidance respectively. To support the development of critical thinking, debates between contributors are interspersed within sections and address the following questions: Do private schools legitimise privilege? Should the liberal state support religious schooling? Are developments in post-14 education reducing the divide between the academic and the vocational? Do schools contribute to social and community cohesion? Do traditional and

progressive teaching methods exist or are there only effective and ineffective methods? Educational Research: a foundation for teacher professionalism? Each chapter opens with an overview of the rationale behind it and closes with a summary of the main points. At the end of every chapter key questions are posed, encouraging the student to critically reflect on the content, and suggestions for further reading are made. The Routledge Education Studies Textbook is essential reading for students of Education Studies, especially during second and third years of the undergraduate degree. It will be of interest to trainee teachers, including those working towards M Level. A companion volume, The Routledge Education Studies Reader by the same editors, contains key classic and contemporary academic articles and has been designed to be used alongside this Textbook.

MasterClass in Religious Education
2013-02-14 Liam Gearon MasterClass in Religious Education provides a comprehensive exploration of the major themes in religious education research and pedagogy, drawing on international research. The author draws together historical, theological/religious and comparative and international perspectives to explore religious education's role in confronting controversial issues, and the implications this has for teaching, learning and research. This book incorporates discussions of current, post-9/11 debates on religion in the modern world, focusing particularly on the relationship of religion to secular, political contexts. Liam Gearon pays close attention to debates around religion in liberal democratic societies, looking at topics such as citizenship, human rights, and identity.

Evolutionary Writings 2008-11-13 Charles Darwin 'Man still bears in his bodily frame the indelible stamp of his lowly origin' On topics ranging from intelligent design and climate change to the politics of gender and race, the evolutionary writings of Charles Darwin occupy a pivotal position in contemporary public debate. This volume brings together the key chapters of his most important and accessible books, including the Journal of Researches on the Beagle voyage (1845), the Origin of Species (1871), and the Descent of Man, along with the full text of his delightful autobiography. They

are accompanied by generous selections of responses from Darwin's nineteenth-century readers from across the world. More than anything, they give a keen sense of the controversial nature of Darwin's ideas, and his position within Victorian debates about man's place in nature. The wide-ranging introduction by James A. Secord, Director of the Darwin Correspondence Project, explores the global impact and origins of Darwin's work and the reasons for its unparalleled significance today. And to all the familiar things in the softly lit room—to the picture of the three little bears sitting on chairs, to the clocks and his socks, to the mittens and the kittens, to everything one by one—the

little bunny says goodnight. One of the most beloved books of all time, Goodnight Moon is a must for every bookshelf and a time-honored gift for baby showers and other special events.

Doing Diaspora Missiology Toward "Diaspora Mission Church" 2016-01-05 Luther Jeom Ok Kim In U.S. Population Projections: 2005-2050, Pew Research Center reported that "The nation's population will rise to 438 million in 2050, from 296 million in 2005, and fully 82% of the growth during this period will be due to immigrants arriving from 2005 to 2050 and their descendants." This shows that it is essential to study and understand how our mission, especially in the context of the USA, called the nation of immigrants, will respond to this huge mobility of immigrant diaspora. So far, there has been emphasis on doing diaspora missiology; however, there is no practical

implications and application in local church setting. Now mission is next door, which implies that the ministry of the local church should be emphasized for 21st contemporary mission. This book provides detailed frameworks and methods of diaspora missiology within local churches, called 'diaspora mission church.' According to the Bible, all human beings are theologically and spiritually diaspora, irrespective of ethnicity, because they were banished from the Garden of Eden, and scattered around the world in God's judgment. Now, they walk toward the encounter with Jesus Christ, preach the gospel as the seed of Kingdom, and finally move toward heaven.

Letters of a Peruvian Woman 2009-01-08 Françoise de Graffigny 'It has taken me a long time, my dearest Aza, to fathom the cause of that contempt in which women are

held in this country ...' Zilia, an Inca Virgin of the Sun, is captured by the Spanish conquistadores and brutally separated from her lover, Aza. She is rescued and taken to France by Déterville, a nobleman, who is soon captivated by her. One of the most popular novels of the eighteenth century, the Letters of a Peruvian Woman recounts Zilia's feelings on her separation from both her lover and her culture, and her experience of a new and alien society. Françoise de Graffigny's bold and innovative novel clearly appealed to the contemporary taste for the exotic and the timeless appetite for love stories. But by fusing sentimental fiction and social commentary, she also created a new kind of heroine, defined by her intellect as much as her feelings. The novel's controversial ending calls into question traditional assumptions about the role of women both in fiction and society, and about what constitutes

Things Fall Apart 2009-06-05 Chinua Achebe
THINGS FALL APART tells two overlapping, intertwining stories, both of which center around Okonkwo, a “strong man” of an Ibo village in Nigeria. The first of these stories traces Okonkwo's fall from grace with the tribal world in which he lives, and in its classical purity of line and economical beauty it provides us with a powerful fable about the immemorial conflict between the individual and society. The second story, which is as modern as the first is ancient, and which elevates the book to a tragic plane, concerns the clash of cultures and the destruction of Okonkwo's world through the arrival of aggressive, proselytizing European missionaries. These twin dramas are perfectly harmonized, and they are modulated by an awareness capable of encompassing at once the life of nature, human history, and the mysterious compulsions of the soul. A Pattern Language 2018-09-20 Christopher Alexander You can use this book to design a house for yourself with your family; you can use it to work with your neighbors to improve your town and neighborhood; you

can use it to design an office, or a workshop, or a public building. And you can use it to guide you in the actual process of construction. After a ten-year silence, Christopher Alexander and his colleagues at the Center for Environmental Structure are now publishing a major statement in the form of three books which will, in their words, "lay the basis for an entirely new approach to architecture, building and planning, which will we hope replace existing ideas and practices entirely." The three books are *The Timeless Way of Building*, *The Oregon Experiment*, and this book, *A Pattern Language*. At the core of these books is the idea that people should design for themselves their own houses, streets, and communities. This idea may be radical (it implies a radical transformation of the architectural profession) but it comes simply from the observation that most of the wonderful places of the world were not

made by architects but by the people. At the core of the books, too, is the point that in designing their environments people always rely on certain "languages," which, like the languages we speak, allow them to articulate and communicate an infinite variety of designs within a forma system which gives them coherence. This book provides a language of this kind. It will enable a person to make a design for almost any kind of building, or any part of the built environment. "Patterns," the units of this language, are answers to design problems (How high should a window sill be? How many stories should a building have? How much space in a neighborhood should be devoted to grass and trees?). More than 250 of the patterns in this pattern language are given: each consists of a problem statement, a discussion of the problem with an illustration, and a solution. As the authors say in their introduction, many of

the patterns are archetypal, so deeply rooted in the nature of things that it seems likely that they will be a part of human nature, and human action, as much in five hundred years as they are today.

Tolerance of Uncertainty 2014-08-13 John Bancroft Late in his life, the author came to realize that there was much in his world that was uncertain. How should he deal with that? In this book, he explores how some scientists have tolerated uncertainty and goes on to consider uncertainty in relation to our morals. The subjugation of women has been a major moral problem through history, characterized by certainty. In his view, this has fostered many other immoralities (e.g. slavery). He then reviews the world's main religions. To what extent have they accepted uncertainty, and how have they dealt with sex and women? How do individuals cope with religious

uncertainty? By the end of the book, he makes the clear distinction between unknowability (reflecting the limitations of our comprehension, which we should respect) and uncertainty (which is more relevant to our day-to-day experiences, which we need to cope with and tolerate). For this purpose, he proposes models of reality that we could use, assessing the extent that they have been helpful and modifying them as necessary. He sees this modelism as having general significance, and to illustrate this, he proposes a radical model for incorporating both women and men into our society: a two-team approach. Tolerance of uncertainty is of fundamental importance to us all. Certainty is often problematic and should be viewed with caution.

Democratizing Innovation 2006-02-17 Eric Von Hippel The process of user-centered innovation: how it can benefit both users and manufacturers and how its emergence will bring changes in business models and in public policy. Innovation is rapidly becoming democratized. Users, aided by improvements in computer and communications technology, increasingly can develop their own new products and services. These innovating users—both individuals and firms—often freely share their innovations with others, creating user-innovation communities and a rich intellectual commons. In *Democratizing Innovation*, Eric von Hippel looks closely at this emerging system of user-centered innovation. He explains why and when users

find it profitable to develop new products and services for themselves, and why it often pays users to reveal their innovations freely for the use of all. The trend toward democratized innovation can be seen in software and information products—most notably in the free and open-source software movement—but also in physical products. Von Hippel's many examples of user innovation in action range from surgical equipment to surfboards to software security features. He shows that product and service development is concentrated among "lead users," who are ahead on marketplace trends and whose innovations are often commercially attractive. Von Hippel argues that manufacturers should redesign their innovation processes and that they should systematically seek out innovations developed by users. He points to businesses—the custom semiconductor industry is one example—that have learned

to assist user-innovators by providing them with toolkits for developing new products. User innovation has a positive impact on social welfare, and von Hippel proposes that government policies, including R&D subsidies and tax credits, should be realigned to eliminate biases against it. The goal of a democratized user-centered innovation system, says von Hippel, is well worth striving for. An electronic version of this book is available under a Creative Commons license.

Low Carbon Energy Transitions 2017-11-03 Kathleen Araújo The world is at a pivotal crossroad in energy choices. There is a strong sense that our use of energy must be more sustainable. Moreover, many also

broadly agree that a way must be found to rely increasingly on lower carbon energy sources. However, no single or clear solution exists on the means to carry out such a shift at either a national or international level. Traditional energy planning (when done) has revolved around limited cost projections that often fail to take longer term evidence and interactions of a wider set of factors into account. The good news is that evidence does exist on such change in case studies of different nations shifting toward low-carbon energy approaches. In fact, such shifts can occur quite quickly at times, alongside industrial and societal advance, innovation, and policy learning. These types of insights will be important for informing energy debates and decision-making going forward. Low Carbon Energy Transitions: Turning Points in National Policy and Innovation takes an in-depth look at four energy transitions that have occurred since

the global oil crisis of 1973: Brazilian biofuels, Danish wind power, French nuclear power, and Icelandic geothermal energy. With these cases, Dr. Araújo argues that significant nationwide shifts to low-carbon energy can occur in under fifteen years, and that technological complexity is not necessarily a major impediment to such shifts. Dr. Araújo draws on more than five years of research, and interviews with over 120 different scientists, government workers, academics, and members of civil society in completing this study. *Low Carbon Energy Transitions* is written for for professionals in energy, the environment and policy as well as for students and citizens who are interested in critical decisions about energy sustainability. Technology briefings are provided for each of the major technologies in this book, so that scientific and non-scientific readers can engage in more even discussions about the

choices that are involved.

Supply Chain Management in the Drug Industry 2011-04-06 Hedley Rees This book bridges the gap between practitioners of supply-chain management and pharmaceutical industry experts. It aims to help both these groups understand the different worlds they live in and how to jointly contribute to meaningful improvements in supply-chains within the globally important pharmaceutical sector. Scientific and technical staff must work closely with supply-chain practitioners and other relevant parties to help secure responsive, cost effective and risk mitigated supply chains to compete on a world stage. This should not wait until a drug has been registered, but should start as early as possible in the development process and before registration or clinical trials. The author suggests that CMC (chemistry

manufacturing controls) drug development must reset the line of sight – from supply of drug to the clinic and gaining a registration, to the building of a patient value stream. Capable processes and suppliers, streamlined logistics, flexible plant and equipment, shorter cycle times, effective flow of information and reduced waste. All these factors can and should be addressed at the CMC development stage.

The Souls of Black Folk 2007-09-01 W. E. B. Du Bois The Souls of Black Folk, originally published in 1903, contains a number of groundbreaking essays on race and race relations by scholar and activist W.E.B. DuBois. As an early work in the field of sociology, this book analyzes the interactions between the races and offers a solution for the strife and inequality that had come to characterize those interactions. DuBois believed that education was the route to a better life for all blacks, and his recommendation became the basis for the civil rights movement. Anyone interested in history, race relations, sociology, or the intellectual heritage of the United States will find this an essential read. American writer, civil rights activist, and scholar W.E.B. DUBOIS (1868-1963) was a free-born African American in Great Barrington, Massachusetts. He was the first black man to receive a PhD from Harvard University
