A Merry Christmas 2014-10-08 Louisa May Alcott One of six beloved Christmas classics in collectible hardcover editions A Merry Christmas collects the treasured holiday tales of Louisa May Alcott, from the dearly familiar Yuletide benevolence of Marmee and her "little women" to the timeless "What Love Can Do," wherein the residents of a boarding house come together to make a lovely Christmas for two poor girls. Wildly popular at the time of their publication—readers deluged Alcott with letters demanding sequels—and drawing on Alcott's family and experiences in the abolitionist and women's suffrage movements, these stories have the authentic texture and detail of Christmas in nineteenth-century America, while their emphasis on generosity and charity make them timeless embodiments of the Christmas spirit. Penguin Christmas Classics Give the gift of literature this Christmas. Penguin Christmas Classics honor the power of literature to keep on giving through the ages. The six volumes in the series are not only our most beloved Christmas tales, they also have given us much of what we love about the holiday itself. A Christmas Carol revived in Victorian England such Christmas hallmarks as the Christmas tree, holiday cards, and caroling. The Yuletide yarns of Anthony Trollope popularized throughout the British Empire and around the world the trappings of Christmas in London. The Life and Adventures of Santa Claus created the origin story for the presiding spirit of Christmas as we know it. The holiday tales of Louisa May Alcott shaped the ideal of an American Christmas. The Night Before Christmas brought forth some of our earliest Christmas traditions as passed down through folk tales. And The Nutcracker inspired the most famous ballet in history, one seen by millions in the twilight of every year. Beautifully designed hardcovers—with foil-stamped jackets, decorative endpapers, and nameplates for personalization—in a small trim size that makes them perfect stocking stuffers, Penguin Christmas Classics embody the spirit of giving that is at the heart of our most time-honored stories about the holiday. Collect all six Penguin Christmas Classics: A Christmas Carol by Charles Dickens Christmas at Thompson Hall: And Other Christmas Stories by Anthony Trollope The Life and Adventures of Santa Claus by L. Frank Baum A Merry Christmas: And Other Christmas Stories by Louisa May Alcott The Night Before Christmas by Nikolai Gogol The Nutcracker by E. T. A. Hoffmann For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

Parenting Matters 2016-11-21 National Academies of Sciences, Engineering, and Medicine Decades of research have demonstrated that the parent-child dyad and the environment of the familyâ€ which includes all primary caregiversâ€ care at the foundation of children's well- being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

National Excellence 1993 Pat O'Connell Ross This report on the educational needs of American gifted and talented students identifies indicators of an educational crisis, describes the current status of education for these students, and presents recommendations to meet the educational needs of these students. Indicators demonstrating the need for change include the relatively poor performance by American students on international tests and the small number of students performing at the highest levels on National Assessment of Educational Progress tests. Recent studies have shown that gifted and talented elementary school students have mastered 35-40% of the curriculum in five basic subjects before they begin the school year; most regular classroom teachers make few, if any, provisions for talented students; highest achieving students study less than an hour a day; and only 2 cents out of every \$100 spent on K-12 education supports special opportunities for talented students. A review describes how gifted and talented students are currently identified, the number of students served, the kind of support available, the kind of education most gifted and talented students receive, and characteristics of effective programs for these students. Seven recommendations are offered: (1) set challenging curricular standards; (2) establish high-level learning opportunities; (3) ensure access to early childhood education; (4) increase learning opportunities for disadvantaged and minority children with outstanding talents; (5) broaden the definition of gifted (a broadened definition based on the federal Javits Gifted and Talented Education Act is offered); (6) encourage appropriate teacher training and technical assistance; and (7) match world performance. (Contains 43 references.) (DB)
