This text examines the processes, transformations and continuities related to the topic. Whitlam's Children? 2018 Shaun Crowe Whitlam's Children is the first systematic study of the Labor and Greens relationship in Australia, examining its history, experience in government, and prospects for the future. Based on over forty interviews with party figures - including leaders and senior ministers - the book asks a number of pressing questions about the relationship: what do politicians from both parties think about each other, and what issues unite and divide them; did previous attempts at cooperation, particularly under Julia Gillard, deliver successful government, and how did both parties judge this experiment; and will we ever see a more lasting coalition on the Australian left, to mirror the established arrangement on the Australian right? At its centre, the book examines the minority parliament from 2010 to 2013, the parties' first federal attempt formal cooperation. Exploring both successes and failures, it dedicates chapters to particularly stubborn policy dilemmas, including climate change and refugee settlement. While the interviews revealed a variety of perspectives, even within parties, they uncovered a productive, though often hostile parliamentary relationship; united by a series of shared values, but divided by different approaches to parliament, politics and pragmatism.

Building Executive Function 2017-09-27 Nancy Sulla Educators clamor to provide top-notch lessons and resources for students, but if students lack executive function, even the best materials won't produce the desired results. If students haven't developed the brain-based skills to focus, catch and correct errors, identify cause-and-effect relationships, and more, they can't make sense of lessons. Executive function is the missing link to student achievement. But how can you develop this in the classroom? In this new book, bestselling author Nancy Sulla has the answers. She explains how building executive function requires a combination of activities, structures, and teacher facilitation strategies aimed at six increasingly complex life skills that should be the goal of any school: conscious control, engagement, collaboration, empowerment, efficacy, and leadership. She also offers a variety of examples, activities, and structures fit for every grade level and subject area. With the book's practical strategies and tools, you will be inspired, armed, and ready to establish a clear framework for building executive function in all your students.

The Green Challenge 2006-01-16 Dick Richardson The Green Challenge is an up-to-date and comprehensive account of the development of Green parties in Western Europe, and includes an account of the development since 1989 of an East European Green movement. Blending theory and empirical analysis, the book contains chapters on each of the main western European cases and on a number of other less-studied ones. These are designed to demonstrate the shifting balance of party-political competition the factor the authors believe most strongly influences the fortunes of the Greens. The editors also integrate a valuable analysis of the environmentally-degraded Czech Republic, where the Green parties' lack of electoral success has puzzled many observers.

The New Guard Movement, 1931-1935 1976 Keith Amos

Green Parties in Europe 2016-04-28 Emilie van Haute The emergence of green parties throughout Europe during the 1980s marked the arrival of a new form of political movement, challenging established models of party politics and putting new issues on the political agenda. Since their emergence, green parties in Europe have faced different destinies; in countries such as Germany, Belgium, Finland, France, and Italy, they have accumulated electoral successes, participated in governments, implemented policies and established themselves as part of the party system. In other countries, their political relevance remains very limited. After more than 30 years on the political scene, green parties have proven to be more than just a temporary phenomenon. They have lost their newness, faced success and failure, power and opposition, grassroots enthusiasm and internal conflicts. Green Parties in Europe includes individual case studies and a comparative perspective to bring together international specialists engaged in the study of green parties. It renews and expands our knowledge about the green party family in Europe.

Interpreting Early Modern Europe 2019-09-11 C. Scott Dixon Interpreting Early Modern Europe is a comprehensive collection of essays on the historiography of the early modern period (circa 1450-1800). Concerned with the principles, priorities, theories, and narratives behind the writing of early modern history, the book places particular emphasis on developments in recent scholarship. Each chapter, written by a prominent historian caught up in the debates, is devoted to the varieties of interpretation relating to a specific theme or field considered integral to understanding the age, providing readers with a 'behind-the-scenes' look at how historians have worked, and still work, within these fields. At one level the emphasis is historiographical, with the essays engaged in a direct dialogue with the influential theories, methods, assumptions, and conclusions in each of the fields. At another level the contributions emphasise the historical dimensions of interpretation, providing readers with surveys of the component parts that make up the modern narratives. Supported by extensive bibliographies, primary materials, and appendices with extracts from key secondary debates, Interpreting Early Modern Europe provides a systematic exploration of how historians have shaped the study of the early modern past. It is essential reading for students of early modern history. Why Labor Should Savour Its Greens 2013 Brad Orgill Australia is suffering from crisis of confidence. Globalisation, deregulation, and privatisation have delivered economic growth and enhanced consumption for the past twenty years, but the effects of the 2007-08 financial crisis, rising inequality, job insecurity, and increased corporate power over voters and employees are all eroding our sense of democracy. Meanwhile, with an election looming, the future of progressive politics nationwide is deeply uncertain. The Australian Labor Party and the Greens are splitting the left-of-centre vote - the major party driven rightwards by an increasingly conservative swinging voter, and the minor party holding firm on vital but controversial issues. In Why Labor Should Savour Its Greens, former investment banker and economist Brad Orgill reviews the Greens' major economic, social, and environmental policies; and argues that progressive voters, and the nation as a whole, deserve an aligned ALP-Greens platform incorporating the best elements of each. With an annual government expenditure of \$500 billion at stake - not to mention the future of our social fabric and our very planet - this is a time for visionary thinking, not old divisions and counter-productive rivalries.

Golden Child 1999 David Henry Hwang THE STORY: In the winter of 1918, progressive Chinese landowner Eng Tieng-Bin's interest in Westernization and Christianity sets off a power struggle among his three wives, which will determine the future of his daughter, Ahn, Tieng-Bin's favorite,

Beyond the Two Party System 1995-01-01 Ian Marsh The demands placed on western

governments have increased exponentially over the years, but the fundamental structure of most of these governments - the two party system - has not. Governments are not only required to be competitive in the global economy, but the societies they represent have changed, becoming culturally and ethnically diverse. Ian Marsh's challenging book suggests that the two party regime cannot accommodate these changing needs. It outlines the ways in which politics might change to meet these new demands and achieve genuine participatory democracy. The book explores the nature of citizenship from a historical perspective, proposing a definition of citizenship for the future. Ian Marsh argues that political learning will be central to the development of this new citizen, so that they, and not only the leadership elite, have genuine political input.

The Judas Kiss 1998 David Hare Portraying the two critical moments in Oscar Wilde's late life -- when he decides to stay in England and face imprisonment and the night after his release, two years later -- David Hare's The Judas Kiss presents the consequences of taking an uncompromisingly moral position in a world defined by fear, expedience, and conformity.

The Light on the Hill 1991 Ross McMullin Paperback edition of a book first published in 1991 to commemorate the centenary of the ALP, with a new chapter on Paul Keating's rise to Prime Minister. Chapters cover the development of the six state branches and the Federal parliamentary Labor party, as well as the achievements of the governments under Labor leaders such as Ben Chifley, Billy Hughes and Bob Hawke. Includes many archival photographs and cartoons, extensive bibliographical details, endnotes, an index and an illustration list.

Political Parties in Transition? 2006 Ian Marsh Australian politics have been dominated for nearly a century by two more or less continuous political groupings, Labor and the Liberal-National Coalition. But in recent decades Australians have embraced a new range of issues: gender, the environment, indigenous rights while party membership has collapsed.

Liberalism and the Australian Federation 2001 J. R. Nethercote This book recounts the story of Australia's nationhood as the story of Australian Liberalism. It is a story of great and continuing debates about how best to meet the material needs of the nation, how to care for those who must look to the community for aid and assistance, and how to establish a role for ourselves in the world in trade as much as in diplomatic terms. It is also a story of strong and colourful personalities with deep convictions, formidable characters, and large ambitions for themselves as well as their country.

The Environmental State Under Pressure 2002-04-18 Arthur P. J. Mol In the 1980s, the ideologies of deregulation and privatization formed the start of the debate on the "environmental state" and the 1990s left the debate facing new challenges.
