Knowledge in the Development of Economies 2011-01-01 Silvia Sacchetti This book presents an entirely new approach to knowledge, creativity and social organisation. The first part of the book provides a trenchant critique of current globalisation, of multinational corporations, the WTO, and intellectual property rights. The rest of the book outlines an alternative globalisation based on inclusion, democratic participation, and equality. The role of the universities in this process is given special attention. The alternative globalisation is still based on the market economy but not necessarily one in which the sole objective of the corporations is to maximise profits. The book is a must-read for all economists, including those who are satisfied with the

current state of the subject. The analyses of this volume of outstanding papers edited by Sacchetti and Sugden are fresh, sober and entirely convincing. Ajit Singh, University of Cambridge, UK It is arguable that at the root of the current global crisis lies the ferocious attack on critical thinking indeed freedom of thought that has taken place over the past 30 years or so. The editors of this volume are among the minority voices that kept thinking outside the box and voicing their views during this period. Their present volume offers fascinating readings on diverse issues ranging from uneven development, through university and art management, to motivation, capabilities and democratic governance, as they relate to knowledge and learning. It is hoped that the book will receive the attention it deserves and that more such voices will now be raised and heard. Christos Pitelis, University of Cambridge, UK While the relevance of knowledge in economic development represents a consolidated result, this volume takes some important steps forward in new directions. Highly valuable is the attempt to integrate the study of knowledge production, with its potential for improved creativity, whose expression is now dependent on the social structure and is not merely exogenous any more. The focus on heterodox approaches and on non-traditional organisational and proprietary forms is particularly coherent with both the theoretical premises of the volume and the expected evolution of economies. Carlo Borzaga, University of Trento, Italy This is a collection of essays which escapes the confines of mainstream economics, raising

fundamental questions of the role of academics in policy making. It requires the reader to imagine different worlds to think beyond present realities; a book striving to deal with important issues, not sliding over them to make cheap points. A scholarly work; demanding, in places difficult, but worth persevering with. Should be read by everyone interested in a different way forward for economic development in a global world. Keith Cowling, University of Warwick, UK This innovative book offers a critical perspective on the state of the current global economy, making sense of knowledge-related issues by critically assessing existing institutional choices, as well as pointing to new ways forward. The pioneering chapters reposition knowledge in a number of economic debates including regional development, property rights, social enterprises, corporate governance, the management of universities, and the role of creative activities. They explore the possibility of an institutional dynamism that impacts not only on the characteristics of localities and their place in a hierarchical and ordered system of relationships, but on the nature of the system itself. Conclusions point at the individual and collective dimensions of the knowledge discovery process, suggesting a renewed approach to the assessment of economic choices. This insightful book offers an original perspective on knowledge-related issues and constitutes a valuable read for academics and postgraduate students in international business and economic competitiveness, as well practitioners and policymakers who are interested in alternative analyses and methods for economic develop

Health Equity? 2017-01-31 Silvia Iorio This book by Silvia Iorio takes the reader on interesting journey, towards those crossroads between anthropology and psychiatry. She deals with specific phenomena regarding the mental health of a population living within low-income and assisted housing in the city of Rome, Italy. As we turn the pages of her work we begin to understand the psychiatrist's interpretations and goals, which would be hard

to ignore for a true anthropologist. There is a constant and continuous debate on numerous aspects, from various viewpoints that are constantly changing – a fundamental rule for this type of work. This allows us to overcome the limits of what we know. Seeing that which we could not previously see and think, or that we saw and thought of differently, the act of observing takes on a new face, gaining greater security and also expanding our ability to intervene in this context.

The Taste for Knowledge 2010-12-15 Sylvie Fainzang The Taste for Knowledge: Medical Anthropology Facing Medical Realities demonstrates how medical anthropology is becoming increasingly important in the fields of medical research and public health. The authors examine some of the major issues in medical anthropology today. In this volume, a group of international researchers reflect, for example, on: the way anthropology faces and deals with interdisciplinarity in its encounter with medicine and doctors; the new medical realities and patient strategies that exist in changing medical systems; and the interactions between practice, power and science. The book will appeal to clinicians/practitioners, anthropologists in general, and all those engaged in the interface between medicine and anthropology, but will also be a valuable tool for students of medicine and anthropology who have a special interest in the social realities and interdisciplinarity of health and illness.

Vivere (con) il diabete 2017-01-16 Eugenio Zito I contesti sanitari sono sempre più ambito specifico di analisi antropologica per la peculiarità dei loro codici e regole, la complessità delle pratiche di cura e dei protocolli messi in atto e le conseguenti potenzialità applicative. Il volume della collana Antropologia (double blind peer-review), frutto di un lungo lavoro di ricerca sul campo, un contesto ospedaliero occidentale, descrive e analizza, nella prospettiva dell'antropologia medica e con una rigorosa metodologia etnografica, le problematiche collegate alla diagnosi di diabete mellito di tipo 1 in età evolutiva e le modalità di cura messe in atto dal personale sanitario per fronteggiare la cronicità. L'autore si muove nel reparto pediatrico di un ospedale universitario dedicato alla cura del diabete nella duplice prospettiva di operatore clinico e di etnografo che riesce ad andare al di là del ruolo istituzionale per evidenziare le dinamiche di produzione di una specifica cultura che, includendo quella biomedica e quella dei giovani pazienti e familiari, produce quella globale del diabete, con un preciso sguardo alle dimensioni sociali, alla corporeità dei soggetti, alle rielaborazioni dei vissuti e ai significati culturali delle rappresentazioni. Le storie di malattia narrate fanno emergere le differenti modalità di reazione alla sua comparsa e consentono di ridefinire, in un'ottica più ampia, gli stessi concetti di diagnosi e cura. L'attenzione all'interpretazione del paziente, ai significati continuamente rinegoziabili che questi attribuisce a ciò che gli accade, è una costante di questo lavoro. La ricerca mostra quanto la cura sia un concetto complesso non circoscrivibile alla sola prospettiva biomedica, perché attiene alle relazioni umane e all'umanità delle relazioni e presuppone la tecnica dell'ascolto e del dialogo, che si compone di parole e gesti; la sua efficacia non si esaurisce nella produzione della guarigione, ma si amplia nella strutturazione di processi di

relazione. Questi ultimi costituiscono un potente strumento in grado di attivare quel coinvolgimento che, assicurando un'elaborazione dell'esperienza, aiuta a superare la condizione di passività e dolore e facilita il necessario percorso di accettazione e cura per imparare a convivere creativamente con la malattia, mostrando a se stessi e agli altri tutte le potenzialità umane di un corpo che può, a questo punto, fuori di ogni paradosso, anche "guarire".

I colori del welfare 2004 Mara Tognetti Bordogna Il volume nasce dal presupposto che sempre di più l'utenza immigrata sarà l'utenza dei nostri servizi alla persona, del nostro welfare. Tale presenza richiede di ripensare il nostro welfare, le metodologie operative e le culture organizzative. Di questo si discute nel volume proprio a partire da esperienze sul campo. Abbiamo raccolto e ricostruito alcune sperimentazioni innovative che possiamo considerare a tutti gli effetti buone pratiche organizzative. Di esse si descrive il progetto iniziale, il processo seguito nell'implementazione e in alcuni casi quali cambiamenti organizzativi sono stati necessari per adeguare i servizi all'utenza che cambia. Le costanti che troviamo in tutti i contributi qui proposti, e che possiamo considerare suggerimenti metodologici, sono l'importanza del lavoro in rete e la flessibilità mentale e organizzativa che hanno accompagnato le sperimentazioni e i diversi progetti, in relazione alle specifiche culture organizzative. Dopo un'introduzione contenente un'analisi delle variabili che incidono sull'uso dei servizi in presenza di immigrati e su quali sono le possibili strategie metodologiche e operative necessarie per adeguare le culture organizzative e le prassi, il volume contiene la descrizione di alcune esperienze di eccellenza implementate sul territorio italiano. Le esperienze si riferiscono sia a servizi - o rete di servizi - dell'area materno infantile sia all'area consultoriale, vi sono poi contributi inerenti i servizi per l'infanzia e la famiglia, e organismi di terzo settore, esperienze legate al circuito carcerario. Il volume contiene anche una recente ricerca sui modelli di risposta dei servizi

all'utenza che cambia e un'appendice metodologica utile per comprendere le culture organizzative.

LE NUOVE FORME DI DEVIANZA: BULLISMO E CYBER-BULLISMO

Realtà, osservazione e missione educativa 2023-06-09 Agata Maria Alba Barbagallo il bullismo e il cyberbullismo sono fenomeni multi-causali da inquadrare all'interno delle prospettive socio- psicologiche che caratterizzano la realtà degli adolescenti di oggi e non solo. una realtà segnata, sempre più frequentemente, da una vera e propria "carezza pedagogica". Per questo motivo, alle agenzie educative sono richieste azioni sinergiche, condivise e pianificate allo scopo di riconoscere e arginare il più possibile condotte aggressive e devianti. La scelta di affrontare questo fenomeno è motivata dalla recente esplosione di episodi di violenza che interessano le nostre scuole e che configurano un quadro sociale ed educativo critico. si rende necessario scandagliare le insidie del mondo digitale e virtuale e attivare sinergie tra istituzioni, famiglie e studenti stessi. Per farlo, questo testo si propone come una sorta di vademecum per tutte le scuole di ogni ordine e grado, alle quali l'autrice propone dei moduli di dieci incontri di un'ora e mezza l'uno, che si avvalgono anche dei benefici della Pet Therapy.

(Msna) in Italia elaborata durante il percorso di ricerca dottorale dell'autrice. L'obiettivo del lavoro è quello di presentare un impianto teorico originale relativo al contesto dei Msna che possa tradursi in efficaci linee di intervento per gli operatori del settore. L'epistemologia di riferimento è quella sistemico-costruttivista e della complessità; la scelta metodologica rispecchia sia l'esigenza etica di generare una buona teoria basata sui dati, sia i riferimenti epistemologici: la Grounded Theory Costruttivista di Charmaz è stata scelta come "opzione migliore". La teoria è generata da un lavoro ricorsivo di analisi ed elaborazione dei dati raccolti in tre diverse fasi di campionamento teorico: individuando un doppio vincolo ontologico nel sistema, le core categories elaborate rimandano a una struttura che connette di tipo evolutivo che, superando una chiave interpretativa patogena, propone di "imparare a stare nel disordine".

Itinerários da loucura em território Dogon 2004-01-01 Denise Dias Barros Nesta obra a autora procura tratar das interpretações acerca da loucura a partir da ótica da sociedade Dogon, uma sociedade negro-africana da África do Oeste. Através de contos que foram transmitidos por várias gerações, temos um conjunto de histórias que mostram como esta sociedade procura resolver uma situação que, muitas vezes, traz consigo uma dor emergente que precisa ser explicada e tratada. Em Itinerários da Loucura em Territórios Dogon, podemos perceber como uma sociedade lida com um assunto tão delicado de maneira tão singular. Desta forma, ao trazer questões relativas à saúde mental de seus indivíduos, a obra contribui, mostrando-nos diversos apontamentos que visam à reflexão a respeito de um assunto tão difícil de ser abordado como a loucura e suas implicações na vida individual e social. Dalle lontane Regole di C. De Lellis (1594), attraverso il recente dibattito in campo medico fino agli attuali luoghi di cura, spesso disumanizzanti, ogni azione rinvia al suo termine di riferimento, primo e ultimo: la persona quale misura delle cose. Da un lato le implicazioni della tecnica nel processo di umanizzazione; dall'altro, lo spazio entro il quale tutto ciò accade, l'architettura e, alla scala più ampia, la città. Rintracciare i termini

della questione, indagare le relazioni e scoprirne le possibili sinergie, definirne le regole per realizzare luoghi a misura d'uomo e umanizzanti. Ma soprattutto divenire consapevoli delle basi di un nuovo atteggiamento etico a guida delle nostre ricerche. (A. M.S., G .V.)

Manuale di metodologia operativa per gli operatori dei Servizi Sociali

2012-10-21 Luigi Buffone Il volume vuole offrire agli insegnanti, agli studenti del corso di qualifica d'Operatore dei servizi sociali, a tutti coloro i quali si accingono a "lavorare" nel campo socio-assistenziale, un valido strumento operativo da poter utilizzare per costruire la propria professionalità e comprendere i diversi metodi per poter programmare ed organizzare le attività di lavoro. Questo volume unico tratta differenti argomenti con concetti semplici e chiari per permettere a chi legge di comprendere i reali obiettivi che ci si prefigge di raggiungere nel corso di qualifica per gli operatori dei servizi sociali. La disciplina – Metodologie operative dei servizi sociali – ha l'obiettivo di far acquisire al futuro operatore competenze a: livello teorico-culturale: capacità di lettura critica delle situazioni problematiche e dei bisogni degli utenti, capacità di pianificare, progettare interventi per la soluzione dei problemi; conoscenze teoriche su: utenti (anziani, disabili, bambini, tossicodipendenti, alcolisti, malati mentali ecc.), malattie croniche invalidanti, malattie ricorrenti nella prima infanzia, alimentazione, servizi socio-assistenziali presenti sul territorio, normativa esistente in campo socio-assistenziale, figure professionali dei servizi sociali; livello tecnico-pratico: abilità tecniche di osservazione, abilità tecniche di comunicazione e rapporti interpersonali, abilità ludiche e d'animazione, capacità operativa guidata e acquisizione della capacità professionale. Ho tentato di illustrare nel presente volume il duplice livello del percorso formativo, cosciente dell'importanza di **Gesti Di Cura Elementi Di Metodologia Della Ricerca Etnografica E Di Analisi Socioantropologica Per Il Nursing Pdf Pdf upload Suny u Grant**

poter mettere a disposizione uno strumento capace di creare curiosità e desiderio di approfondimento, di riflessione, non trascurando l'esigenza di un ricorrente processo di integrazione e di sintesi fra le distinte materie di studio. Esprimo simpatia e gratitudine a tutti coloro che hanno cooperato alla elaborazione del testo.

L'ARCHEOLOGIA DEL GRAPHIC NOVEL 2013 Eleonora Brandigi The archaeology of the graphic novel does not shed light on the historical origins of the comic book; on the contrary, it tries to discover the conceptual genesis of this narrative form. If the research methodology is archaeological, in fact, the theoretical approach is the same as neuro-narratology, in the light of which four important stages are suggested. These stages define the comic novel as a "natural" literary genre, a mimesis of the process transposing reality into images and constituting the basis of thought. The figure of Rodolphe Töpffer is not excluded from this process. Thanks to his theories and his work, he leads us to hypothesize that the comic book was more "novelistic" at its origin than it is in its current forms: the path to the novel, then, would not be so much of an evolution, but rather a return to the origins.

mountains 2014-12-11 Anna Maria Stagno Montagne incise. Pietre incise. Archeologia delle risorse nella montagna mediterranea, Atti del Convegno (Borzonasca, 20-22 ottobre 2011), a cura di Anna Maria Stagno Questo volume riprende una delle proposte fondanti dell'archeologia postmedievale italiana: l'archeologia delle risorse ambientali. A partire da oggetti concreti – le montagne e le pietre incise appunto – e attraverso punti di vista eterogenei, i contributi offrono un'ampia rassegna di metodi e percorsi di ricerca, ampliando la discussione a una riflessione sui paesaggi culturali e sui problemi della loro patrimonializzazione. Il volume si caratterizza per il taglio fortemente diacronico (dalla preistoria al XXI secolo) e il confronto tra discipline e procedure di ricerca. L'approccio non è nuovo per la rivista e, in particolare, rimanda al numero 6 (L'approccio storico ambientale al patrimonio rurale delle aree protette) che già aveva proposto alla ricerca archeologica "convenzionale" i temi dell'archeologia ambientale e dell'ecologia storica. Il monografico raccoglie i risultati dell'International Workshop on Archaeology of European Mountain Landscapes (Borzonasca, GE, 20-22 ottobre 2011), promosso dal Laboratorio di Archeologia e Storia Ambientale dell'Università di Genova e finanziato dal Parco Naturale Regionale dell'Aveto.

Nicotine is the addictive and toxic substance present in a cigarette. This is the same substance that makes quitting a big challenge for most smokers. The nicotine that you get from smoking will attach itself to the pleasure areas in the brain, making it hard for you to stop. Without a steady stream of this substance, a smoker will tend to feel depressed and uncomfortable.

People who have undergone acupuncture treatment reported that they no longer find cigarettes as tempting or as satisfying. Oftentimes, smoking would leave an awful taste in their mouths prompting them to stop their habit for once. Some patients would even resort to eating mints or lozenges to clear to get rid of the terrible aftertaste.

According to skilled practitioners, approximately 7 out of 10 smokers will successfully extricate themselves from their smoking habit after 2 or 3 weeks. While the others are unable to quit totally, these smokers will be able to cut down on their cigarette consumption quite significantly.

What risks and side effects are of concern?

Legend gesti di cura elementi di metodologia della;**Cholesterol in Adolescents**

Parts of adolescent's body are filled with a waxy stuff identified as cholesterol. It helps to produce vitamin D, cell membranes and certain hormones. Blood cholesterol comes from two different sources, liver within the body and food. The adolescent's liver produces enough cholesterol to carry out proper functioning.

The blood acts as the carrier of cholesterol and transports it to different parts of the body. They are transported in round particle form known as lipoproteins. There are two types of lipoproteins called the low density lipoproteins or LDL and high density lipoproteins or HDL. Low density lipoprotein or LDL cholesterol is commonly known as bad cholesterol. It helps in the building up of plaque in arteries and this condition is known as atherosclerosis. The LDL level must be low in the blood and if it is high it must be decreased. Healthy weight must be maintained and exercise should be done regularly. Food items which have high contents of calories, dietary cholesterol and saturated fat must be avoided.

High density lipoprotein or HDL cholesterol is the good cholesterol. It is actually a kind of fat in blood which helps to remove bad cholesterol from the body and stops the build up of plaque in the arteries. The more the HDL cholesterol in the blood the better it is. The HDL can be raised by at least twenty minutes of exercising daily, decreasing body mass and keeping away from food with saturated fat. Some adolescents need to take medications in order to increase HDL. In such cases, increasing HDL can be a complicated procedure and the physician can make a therapeutic plan to increase HDL in the blood stream.

Acupuncture and Weight Loss

There are a lot of people who are overweight. For those who are obese, perhaps surgery is the best option but for those who can't, they can try to see if acupuncture can help take out the excess weight.

Acupuncture is a form of holistic healthcare that uses needles to help treat a patient. Unlike the cartoon where the balloon will pop and all the air will go out, the needles that are inserted into the vital points will stimulate the body to release endorphins thus helping the person control their appetite.

But before needles are inserted, the specialist will first ask the patient some questions and perform an examination. This is needed to understand the main cause

for the person to be overweight.

Revenge gesti di cura elementi di metodologia della~A Primer on Medical Acupuncture

Have you ever had an uncontrollable urge to be pierced by a dozen needles? This is the image most people get when someone mentions the word “acupuncture”. It comes as no surprise that most view this technique with suspicion, even downright horror. The fact is, however, that this relatively painless ancient Chinese technique has helped relieve the symptoms of millions of people. Properly used, it can help in the management of many medical conditions including chronic pain and fatigue.

How does needle puncture work?

Practitioners of Chinese traditional medicine believe in energy flows. This energy, called Qi, circulates around the body using pathways called meridians. Meridians run very close to the surface of the skin in certain areas and can be accessed by needles. Much like plumbing, these pipes can get blocked or go the wrong way, causing health problems. The insertion of needles at these points is aimed to help loosen blocks and normalize flow.

It only means that every year, the unemployment rate increases and very few newly-grads land a job. It is very important to choose the college degree that you’re going to take to ensure your professional career in the future.

Among the top college courses of degree is accounting. Accounting involves different tasks which include keeping track of income, assets, liabilities, and a lot more. You can learn more about these tasks if you choose an accountancy course.

In accounting, you will learn a lot of things like how businesses and companies work. Successful businessmen are accountants one way or another. You see, accounting is essential in businesses. It is a way of evaluating the business situation, whether a company is losing or earning profits.

Power gesti di cura elementi di metodologia della-Fifth, medical doctors do not believe in the potential of alternative medicine. This is not true because there are more doctors these days that are open to the idea that there are other ways to help patients aside from conventional medicine. In fact, some of them even recommend an acupuncturist if they know that what they have done is not effective.

Another myth is that every patient will undergo the four needle technique. This is not true and it will only be used when the specialist feels that the energy of the patient is virtually not moving as a last resort.

The seventh myth is that it is better for a medical doctor to perform acupuncture. This is wrong because the training is much different than that taught in medical school. Students who have an acupuncturist license train for 3,000 hours before they are allowed to practice this profession. So between an acupuncturist and a medical doctor, you should go with someone who has learned about this much longer.

Acupuncture and Autism

Studies have shown that there is an increase in the number of children that have been diagnosed with autism. Until now, doctors have not yet found a cure to this illness which is why some parents want to experiment with alternative forms of treatment and one example is acupuncture.

Acupuncture is a holistic approach in treating and preventing certain diseases. Its main tool are very thin needles that are inserted to targeted points in the body. The body has about 400 of them linked through a system known as meridians or pathways. Once these are stimulated, these are supposed to create balance in the body.

Autism on the other hand is a brain disorder that is long term. This disease is characterized by deficits in language, social communication and cognition. Children who are diagnosed with this illness may also suffer from secondary problems such as aggression, irritability, stereotypes, hyperactivity, negativism, volatile emotions, temper tantrums, short attention span and obsessive-compulsive behavior.

Instruction gesti di cura elementi di metodologia della: Results have showed that of 30 respondents in the test, majority showed functional improvement of various degrees depending on the age and severity of their disabilities. Some improvement was noticeable within a few TAC sessions, especially for drooling, spasticity (scissoring or tiptoeing), ataxia, and poor balance in walking. Functional improvement was noted after one to two courses of TAC. Most children tolerated TAC well, with only occasional pain and minor bleeding in some patients.

The reason why tongue acupuncture is being experimented with is because there is a connection between the tongue and the heart through the meridians that spread to all the organs in the body. It is believed that the points on the tongue can influence the state of the other body organs thus giving relief to the one suffering from autism.

But many believe that acupuncture alone cannot help autism sufferers. It has to be combined with other things like maintaining a certain diet to help improve one's mood and communication skills. Although it is only short term, it is better than nothing until a cure is found.

Eating disorders not only result in physical abnormalities, but also psychological abnormalities. Adolescents with eating disorders take onto social isolation, low self esteem, affective disorders, low self concept, substance abuse, anxiety, and depression. Usually adolescents switch to unhealthy eating habits because of depression and lack of knowledge about affective techniques to lose weight. So the patients who are being treated for eating disorders must also be treated for psychiatric illness, if they have any. Every year more than one million people get eye injuries, out of which ninety percent are preventable if safety eyewear is used. One hundred and twenty five thousand eye injury cases are caused by household products.

It is a good habit to wash hands regularly, especially after handling household chemicals. When using detergents and hazardous solvents, the handler must wear chemical safety goggles. While doing household activities proper protective gears such as goggles, gloves, boots and helmet should be worn, if required. The house must be illuminated adequately to avoid accidents in the dark. Stairs should also be illuminated and the rails must also be installed. Children and adolescents should read instructions before handling operating equipment before playing games. All power equipment must be installed with guards. While playing outside, the eyes must be protected by UV protective goggles and it is a bad idea to look at the sun directly.

The patient will have to come back for regular treatment and have to pay attention to one's diet and exercise regularly as needles can only do so much to control one's weight.

The number of treatments for someone who is overweight varies depending on how many pounds they want to lose, the speed at which they want to lose it and their commitment to sticking to the plan.

The average patient on the other hand who wants to lose 5 to 10 pounds will have to come for treatment every three days or twice a week then once this is attained, once every two weeks. It is up to the person until when the treatment will be done which shows that acupuncture can help you lose weight.

These needles will be kept in place for 30 to 45 minutes depending on how much support is needed. These are then removed and replaced with ear tacs with adhesives to make sure they are in the same spot as the needles.

These ear tacs work by applying mild pressure whenever he or she feels hungry. It causes a mild endorphin release and helps the patient relax making it possible to use their willpower and resist the temptation to eat.

The patient will also have to reduce cravings on certain food by cutting down the intake. Some studies suggest that this can also lower insulin levels or lipid levels in the blood.

There are basically two types of diabetes that will affect an adolescent. It is type 1 diabetes and type 2 diabetes. Type 1 diabetes affects the immune system's function as the systems attacks the pancreas' insulin producing cells, also known as the beta cells. Because of this, the pancreas loses the ability to manufacture insulin. This is the reason why people with type 1 diabetes take insulin everyday. The symptoms are weight loss, increase in urination & thirst, blurred vision,

tiredness and constant hunger. And if the adolescent isn't treated at the right time, he/she can slip in to diabetic coma which can endanger his/her life. In type 2 diabetes, the body is incapable of properly using the insulin produced by the body and requires insulin from an external source, too. The symptoms of type 2 diabetes are similar to type 1 diabetes. The teenager feels sick, tired, nauseated, and thirsty. The wounds will recover very slowly; he/she will get infections frequently, will develop blurred vision and will experience weight loss.

Parents play a vital role in determining the problem. They should constantly observe their child for eating disorders or signs of depression. Although cigarette, drugs and alcohol should be avoided by all adolescents and children, it is even more important that youngster with diabetes should stay away from these things as they can worsen the situation. A person with diabetes, who switches to smoking, is at risk of developing cardiovascular diseases and circulatory problems. Consumption of alcohol can cause hypoglycemia or low blood sugar. It is the duty of the parents to make their child aware of the possible risk they would face if they start to smoke, drink alcohol or take drugs.

Children and adolescents, who have diabetes, face many challenges while trying to lead a normal life. They have to think twice before doing simple things as going to a party, playing sports and even when staying over with friends. This is because they require to intake oral medication or insulin. Their blood sugar level must be checked many times through out the day. Also, at gatherings, they have to avoid many food items. Because of this they will feel different from the crowd and can feel left out. Not only does diabetes pose behavioral challenges, but also emotional challenges.

Patients who are suffering from migraine should also check if acupuncture is covered by their HMO. Most insurance providers and HMO's these days cover all or part of the cost but there are restrictions so you should check what is covered by your policy.

Once these spots are identified, these sharp needles are then inserted. Usually 5 needles are placed in various acupoints.
