Created by Lloyd M. Dunn and Douglas M. Dunn, the evaluation is crafted to evaluate receptive vocabulary for American English. It is swift and effortless to conduct, saving important time so that concentration can be placed on executing intelligent strategies.

The PPVT-4 evaluation content encompasses a wide array of receptive vocabulary grades, ranging from pre-kindergarten through adult age. The assessment questions widely feature words that portray 20 topic areas (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and household and educational vocabulary.

The evaluation gives two identical versions which contain different vocabulary terms, guaranteeing that the individual has not "memorized" the test. One form can be utilized ahead of intervention to evaluate individuals' vocabulary comprehension and the alternative form can be utilized for re-evaluation to measure and record improvement. The PPVT-4 also features a unique Growth Scale Value (GSV) which is reactive to slight changes over time.
