## Hacia una enseñanza universitaria centrada en el aprendizaje

2004-01-01 Juan Carlos Torre Punte El profesor homenajeado en este libro es un buen ejemplo de las buenas prácticas de una enseñanza centrada en el aprendizaje. En su caso, el énfasis en el aprendizaje ha estado presente en su pensamiento pedagógico con antelación a su consolidación y cristalización en la literatura psicopedagógica reciente. El libro se estructura en tres partes, precedidas de una semblanza del profesor Pedro Morales. En la primera, se abordan algunas cuestiones que permiten situar la acción educativa en relación con el pensamiento pedagógico de autores como S. Ignacio de Loyola, Rousseau, Pestalozzi o Giner de los Ríos. La segunda trata de la práctica de la enseñanza universitaria centrada en el aprendizaje, donde se resalta la coherencia didáctica en el proceso de enseñar y aprender. La tercera, y última, está dedicada a la temática relacionada con la formación del

profesorado y la investigación.

### **Daniel Goleman Omnibus**

2004 Daniel Goleman Emotional Intelligence Does IQ define our destiny? Daniel Goleman argues that our view of human intelligence is far too narrow, and that our emotions play a major role in thought, decision making and individual success. Self-awareness, impulse control, persistence, motivation, empathy and social deftness are all qualities that mark people who excel: whose relationships flourish, who are stars in the workplace. With new insights into the brain architecture underlying emotion and rationality, Goleman shows precisely how emotional intelligence can be nurtured and strengthened in all of us. Working with Emotional Intelligence Do you want to be more successful at work? Do you want to improve your chances of promotion? Do you want to get on better with your colleagues? Daniel Goleman draws on unparalleled access to business leaders around the world and the thorough research that is his trademark. He demonstrates that emotional intelligence at work matters twice as much as cognitive abilities such as IQ or technical expertise in this inspiring sequel.

*La reparación económica a la víctima en el sistema de justicia.*

2019-06-26 Helena Soletó Muñoz Existe abundante evidencia, y es cada vez más reconocido, que la solución a los problemas a los que se enfrentan las sociedades en el siglo XXI va a requerir enfoques interdisciplinarios, donde la mezcla de conocimientos de expertos de distintos campos genere formas nuevas de abordar viejos problemas. En particular, la digitalización de la información, la capacidad creciente de recoger datos con bajo coste y de transmitirlos y analizarlos a gran velocidad, el llamado entorno Big Data, está aportando nueva evidencia empírica para transformar muchas facetas de nuestra sociedad. Este cambio, sin embargo, no se producido aún en el terreno de la justicia, que tiene hondas raíces ancladas en la tradición. Sin embargo, es patente la necesidad de transformar nuestro sistema legal para adaptarlo a las necesidades actuales: según el Barómetro Externo encargado por el Consejo General de la Abogacía Española, la mayoría de los ciudadanos creen que la Administración de Justicia funciona mal, siendo lenta e

ineficaz. Cualquier propuesta sensata para modificar nuestro sistema legal debe partir de los datos que describan su funcionamiento actual, y este libro es especialmente bienvenido al representar un avance pionero en esta dirección. Los resultados del estudio que describe esta obra ilustran cómo la colaboración entre juristas y estadísticos puede desvelar las deficiencias y sugerir soluciones en problemas legales de gran importancia social. El libro contiene un estudio riguroso del problema y sugiere soluciones realistas para resolverlo. Extraído del prólogo

### *55 respuestas a dudas típicas de estadística*

2010-12 Roberto Behar Gutiérrez Este libro responde a muchas preguntas que los autores se han ido encontrando a lo largo de su larga actividad como profesores y asesores en temas estadísticos. Se ha escrito con la intención de que sea útil tanto a los estudiantes como a los profesionales que quieren refrescar sus ideas o aclarar dudas concretas, y también a todas aquellas personas interesadas en esta disciplina. Las preguntas que se plantean cubren un amplio espectro, desde la estadística descriptiva hasta las ecuaciones de regresión o el diseño de experimentos. Muchas de ellas tienen un carácter general e introductorio y son "aptas para todos los públicos", pero otras tratan de temas específicos en las que se requieren algunos conocimientos previos, aunque si la pregunta despierta interés, ya se sabe lo suficiente para entender la respuesta. En todos los casos se ha intentado utilizar un lenguaje coloquial, recurriendo a la intuición y apoyándose en la metáfora, pero también procurando que no haya pérdida en el rigor. INDICE RESUMIDO: Acerca de los autores. Presentación. Prólogo a la segunda edición- Estadística descriptiva. Distribuciones de probabilidad. Estimación. Contraste de hipótesis. Comparación de tratamientos. Correlación y regresión. Diseño de experimentos. Estudios

de capacidad y control estadístico de procesos. Varios. Créditos y referencias. Roberto Behar Gutiérrez es doctor en matemáticas y profesor de la Universidad del Valle de Calí, Colombia, donde ha sido director de la carrera de estadística. Pere Grima Cintas es doctor ingeniero industrial y profesor de la Universidad Politécnica de Cataluña

Eva had always been fascinated by magic, but she never expected to find out that she was a witch. She had grown up in a normal family, in a normal town, with no signs of anything supernatural. But on her sixteenth birthday, everything changed. She received a mysterious package from her grandmother, who had died years ago. Inside was a leather-bound book with the words "The Book of Shadows" engraved on the cover. Eva opened it and felt a surge of power run through her veins. She realized that the book contained the secrets of her family's magical heritage, and that she was the last of a long line of powerful witches. But she also learned that she was not alone. There were others like her, and some of them wanted to use their magic for evil. Eva had to decide whether to embrace her destiny as a witch, or to reject it and live a normal life. But either way, she knew that her life would never be the same again.
