Excommunicated from the Union

2015-12-01 William B. Kurtz Anti-Catholicism has had a long presence in American history. The Civil War in 1861 gave Catholic Americans a chance to prove their patriotism once and for all. Exploring how Catholics sought to use their participation in the war to counteract religious and political nativism in the United States, Excommunicated from the Union reveals that while the war was an alienating experience for many of 200,000 Catholics who served, they still strove to construct a positive memory of their experiences in order to show that their religion was no barrier to their being loyal American citizens.

Marx's Ecology

2000-03-01 John Bellamy Foster Progress requires the conquest of nature. Or does it? This startling new account overturns conventional interpretations of Marx and in the process outlines a more rational approach to the current environmental crisis. Marx, it is often assumed, cared only about industrial growth and the development of economic forces. John Bellamy Foster examines Marx's neglected writings on capitalist agriculture and soil ecology, philosophical naturalism, and evolutionary theory. He shows that Marx, known as a powerful critic of capitalist society, was also deeply concerned with the changing human relationship to nature. Marx's Ecology covers many other thinkers, including Epicurus, Charles Darwin, Thomas Malthus, Ludwig Feuerbach, P. J. Proudhon, and William Paley. By reconstructing a materialist conception of nature and society, Marx's Ecology challenges the spiritualism prevalent in the modern Green movement, pointing toward a method that offers more lasting and sustainable solutions to the ecological crisis.
