The Peabody Picture Vocabulary Test Fourth Edition (PPVT-4) is a widely recognized vocabulary assessment that has been in operation for close to 50 years. Formulated by Lloyd M. Dunn and Douglas M. Dunn, the assessment is made to assess receptive vocabulary for American English. It is quick and effortless to conduct, conserving precious time so that concentration can be put on executing effective strategies. The PPVT-4 evaluation material encompasses a broad scope of vocabulary comprehension grades, spanning from preschool through adult age. The evaluation problems widely include words that represent 20 subject fields (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and household and educational vocabulary.

The assessment provides two identical versions which hold various vocabulary items, making sure that the person has not “mastered” the test. One form can be employed ahead of intervention implementation to

evaluate people's vocabulary knowledge and the second version can be employed for re-assessment to measure and note progress. The PPVT-4 also includes a special Growth Scale Value (GSV) which is reactive to small changes in time.
