Women Writers of the American West, 1833-1927 2012-08-17 Nina Baym Women Writers of the American West, 1833–1927 recovers the names and works of hundreds of women who wrote about the American West during the nineteenth and early twentieth centuries, some of them long forgotten and others better known novelists, poets, memoirists, and historians such as Willa Cather and Mary Austin Holley. Nina Baym mined literary and cultural histories, anthologies, scholarly essays, catalogs, advertisements, and online resources to debunk critical assumptions that women did not publish about the West as much as they did about other regions. Elucidating a substantial body of nearly 650 books of all kinds by more than 300 writers, Baym reveals how the authors showed women making lives for themselves in the West, how they represented the diverse region, and how they represented themselves. Baym accounts for a wide range of genres and geographies, affirming that the literature of the West was always more than cowboy tales and dime novels. Nor did the West consist of a single landscape, as women living in the expanses of Texas saw a different world from that seen by women in gold rush California. Although many women writers of the American West accepted domestic agendas crucial to the development of families, farms, and businesses, they also found ways to be forceful agents of change, whether by taking on political positions, deriding male arrogance, or, as their voluminous published works show, speaking out when they were expected to be silent.

Compact Anthology of World Literature 2015 Laura Getty “The introductions in this anthology are meant to be just that: a basic overview of what students need to know before they begin reading, with topics that students can research further. An open access literature textbook cannot be a history book at the same time, but history is the great companion of literature: The more history students know, the easier it is for them to interpret literature. In an electronic age, with this text available to anyone with computer access around the world, it has never been more necessary to recognize and understand differences among nationalities and cultures. The literature in this anthology is foundational, in the sense that these works influenced the authors who followed them. A word to the instructor: The texts have been chosen with the idea that they can be compared and contrasted, using common themes. Rather than numerous (and therefore often random) choices of texts from various periods, these selected works are meant to make both teaching and learning easier. While cultural expectations are not universal, many of the themes found in these works are.”--Open Textbook Library.

Reading World Literature 2010-01-01 Sarah Lawall As teachers and readers expand the canon of world literature to include writers whose voices traditionally have been silenced by the dominant culture, fundamental questions arise. What do we mean by “world”? What constitutes “literature”? Who should decide? Reading World Literature is a cumulative study of the concept and evolving practices of “world literature.” Sarah Lawall opens the book with a substantial introduction to the overall topic. Twelve original essays by distinguished specialists run the gamut from close readings of specific texts to problems of translation theory and reader response. The sequence of essays develops from re-examinations of traditional canonical pieces through explorations of less familiar works to discussions of reading itself as a “literacy” dependent on worldview. Reading World Literature will open challenging new vistas for a wide audience in the humanities, from traditionalists to avant-garde specialists in literary theory, cultural studies, and area studies.

Mimesis and Empire 2001 Barbara Fuchs As powerful, pointed imitation, cultural mimesis can effect inclusion in a polity, threaten state legitimacy, or undo the originality upon which such legitimacy is based. In Mimesis and Empire , first published in 2001, Barbara Fuchs explores the intricate dynamics of imitation and contradistinction among early modern European powers in literary and historiographical texts from sixteenth- and early seventeenth-century Spain, Italy, England and the New World. The book considers a broad sweep of material, including European representations of New World subjects and of Islam, both portrayed as ‘other’ in contemporary texts. It supplements the transatlantic perspective on early modern imperialism with an awareness of the situation in the Mediterranean and considers problems of reading and literary transmission; imperial ideology and colonial identities; counterfeits and forgery; and piracy.

Marco Polo and the Encounter of East and West 2008-01-01 John Tulk These essays challenge what many scholars perceived to be an opposition of “East” and “West” in Polo’s writings.

Most courses involve a series of 10 to 20 treatment sessions, each lasting 30 to 90 minutes. Needles will be carefully placed at the required points and kept in place for some time. Allergies are reactions by immune system that are abnormal in nature to stuff that are usually harmless to majority of the people. When somebody is allergic to something the immune system of that person gets confused and thinks that the substance is detrimental to the body. The substances causing allergic reactions are known as allergens. The examples of allergens are dust, food, plant pollen, medicine etc. The body produces antibodies to protect itself from these allergens. The antibodies make certain cells present in the system to let chemicals to mix with the bloodstream and one of them is histamine. This chemical then acts on nose, eyes, skin, lungs, gastrointestinal tract and results in allergic reaction symptoms. Exposure to the same chemicals in future triggers same response to the antibodies again meaning every time one comes in contact with the same allergen, allergic reaction is produced in the body.

Before the onset of the menses, females face many uncomfortable symptoms which last for a short period, stretching from few hours to few days. But some of them can be very intense and can disturb the normal functioning of the person. These symptoms are grouped as premenstrual syndrome. In usual cases, the symptoms come to a halt when the menses begin, but for some they may last even after the menstrual periods are over. Eighty five percent of the females experience some of the symptoms of premenstrual syndrome at one time or the other. Nearly forty percent experience the symptoms so intensely that their daily chores are affected by it and ten percent are disabled by it.
