Created by Lloyd M. Dunn and Douglas M. Dunn, the test is made to assess receptive vocabulary for American English. It is swift and easy to administer, preserving important time so that attention can be put on implementing successful approaches.

The assessment questions broadly sample words that portray 20 subject fields (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and home and educational vocabulary.

The assessment provides two equivalent editions which contain various vocabulary terms, making sure that the person has not "learned" the evaluation. One form can be used ahead of intervention to assess individuals' vocabulary comprehension and the alternative form can be employed for re-evaluation to measure and record progress. The PPVT-4 also includes a distinctive Growth Scale Value (GSV) which is reactive to slight changes in time.
