Created by Lloyd M. Dunn and Douglas M. Dunn, the evaluation is made to assess receptive vocabulary for Standard American English. It is quick and effortless to administer, saving valuable time so that focus can be placed on applying intelligent strategies.

The PPVT-4 assessment material includes a extensive scope of receptive vocabulary ranks, extending from preschool through adult age. The assessment questions extensively include words that portray 20 topic domains (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and home and school vocabulary.

The assessment gives two equivalent forms which include various vocabulary terms, guaranteeing that the test-taker has not "learned" the assessment. One form can be used before intervention to measure individuals' vocabulary understanding and the other version can be utilized for re-evaluation to measure and note improvement. The PPVT-4 also features a special Growth Scale Value (GSV) which is reactive to minor changes with time.
