Developed by Lloyd M. Dunn and Douglas M. Dunn, the evaluation is crafted to measure receptive vocabulary for American English. It is swift and simple to carry out, saving valuable time so that concentration can be put on applying effective interventions.

The PPVT-4 evaluation material includes a broad scope of receptive vocabulary grades, spanning from preschool through adulthood. The assessment questions widely sample words that represent 20 topic areas (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and household and educational vocabulary.

The test offers two equivalent editions which hold distinct vocabulary words, guaranteeing that the test-taker has not “mastered” the evaluation. One form can be employed before intervention to measure individuals’ vocabulary knowledge and the other edition can be used for re-assessment to assess and note progress. The PPVT-4 also features a distinctive Growth Scale Value (GSV) which is responsive to slight changes with time.
