Slow Medicine

2017-10-17 Victoria Sweet "Wonderful... Physicians would do well to learn this most important lesson about caring for patients." —The New York Times Book Review Over the years that Victoria Sweet has been a physician, "healthcare" has replaced medicine, "providers" look at their laptops more than at their patients, and costs keep soaring, all in the ruthless pursuit of efficiency. Yet the remedy that economists and policy makers continue to miss is also miraculously simple. Good medicine takes more than amazing technology; it takes time—time to respond to bodies as well as data, time to arrive at the right diagnosis and the right treatment. Sweet knows this because she has learned and lived it over the course of her remarkable career. Here she relates unforgettable stories of the teachers, doctors, nurses, and patients through whom she discovered the practice of Slow Medicine, in which she has been both pioneer and inspiration. Medicine, she helps us to see, is a craft and an art as well as a science. It is relational, personal, even spiritual. To do it well requires a hard-won wisdom that no algorithm can replace—that brings together "fast" and "slow" in a truly effective, efficient, sustainable, and humane way of healing.

Essential Oils

2021-04-12 AntonC. deGroot Essential Oils: Contact Allergy and Chemical Composition provides a full review of contact allergy to essential oils along with detailed analyses of the chemical composition of essential oils known to cause contact allergy. In addition to literature data, this book presents the results of nearly 6,400 previously unpublished sample analyses, by far the largest set of essential oils analyses ever reported in a single source of scientific literature. Covering 91 essential oils and two absolutes, the book presents an alphabetical list of all 4,350 ingredients that have been identified in them, a list of chemicals known to cause contact allergy and allergic contact dermatitis, and tabular indications of the ingredients that can be found in each essential oil. The book discusses contact allergy and allergic contact dermatitis for each of the oils and absolutes, sometimes able to provide only one or two reports but drawing upon considerable amounts of literature in other cases, such as with tea tree oil, ylang-ylang oil, lavender oil, rose oil, turpentine oil, jasmine absolute, and sandalwood oil. While limited information on the main components and their concentrations would be enough for most dermatologists, this book gives extensive coverage not only to improve levels of medical knowledge and quality of patient care, but also for the benefit of professionals beyond clinical study and practice, such as chemists in the perfume and cosmetics industries, perfumers, academic scientists working with essential oils and fragrances, aromatherapists, legislators, and those involved in the production, sale, and acquisition of essential oils.
