Reverse Engineering of Rubber Products

2013-09-19 Saikat Das Gupta Reverse engineering is widely practiced in the rubber industry. Companies routinely analyze competitors' products to gather information about specifications or compositions. In a competitive market, introducing new products with better features and at a faster pace is critical for any manufacturer. Reverse Engineering of Rubber Products: Concepts, Tools, and Techniques explains the principles and science behind rubber formulation development by reverse engineering methods. The book describes the tools and analytical techniques used to discover which materials and processes were used to produce a particular vulcanized rubber compound from a combination of raw rubber, chemicals, and pigments. A Compendium of Chemical, Analytical, and Physical Test Methods Organized into five chapters, the book first reviews the construction of compounding ingredients and formulations, from elastomers, fillers, and protective agents to vulcanizing chemicals and processing aids. It then discusses chemical and analytical methods, including infrared spectroscopy, thermal analysis, chromatography, and microscopy. It also examines physical test methods for visco-elastic behavior, heat aging, hardness, and other features. A chapter presents important reverse engineering concepts. In addition, the book includes a wide variety of case studies of formula reconstruction, covering large products such as tires and belts as well as smaller products like seals and hoses. Get Practical Insights on Reverse Engineering from the Book's Case Studies Combining scientific principles and practical advice, this book brings together helpful insights on reverse engineering in the rubber industry. It is an invaluable reference for scientists, engineers, and researchers who want to produce comparative

benchmark information, discover formulations used throughout the industry, improve product performance, and shorten the product development cycle.

The Impact of School Infrastructure on Learning

2019-02-04 Peter Barrett 'The Impact of School Infrastructure on Learning: A Synthesis of the Evidence provides an excellent literature review of the resources that explore the areas of focus for improved student learning, particularly the aspiration for "accessible, well-built, child-centered, synergetic and fully realized learning environments.†? Written in a style which is both clear and accessible, it is a practical reference for senior government officials and professionals involved in the planning and design of educational facilities, as well as for educators and school leaders. - Yuri Belfali, Head of Division, Early Childhood and Schools, OECD Directorate for Education and Skills This is an important and welcome addition to the surprisingly small, evidence base on the impacts of school infrastructure given the capital investment involved. It will provide policy makers, practitioners, and those who are about to commission a new build with an important and comprehensive point of reference. The emphasis on safe and healthy spaces for teaching and learning is particularly welcome. --Harry Daniels, Professor of Education, Department of Education, Oxford University, UK This report offers a useful library of recent research to support the, connection between facility quality and student outcomes. At the same time, it also points to the unmet need for research to provide verifiable and reliable information on this connection. With such evidence, decisionmakers will be better positioned to accurately balance the allocation of limited resources among the multiple

competing dimensions of school policy, including the construction and maintenance of the school facility. --David Lever, K-12 Facility Planner, Former Executive Director of the Interagency Committee on School Construction, Maryland Many planners and designers are seeking a succinct body of research defining both the issues surrounding the global planning of facilities as well as the educational outcomes based on the quality of the space provided. The authors have finally brought that body of evidence together in this well-structured report. The case for better educational facilities is clearly defined and resources are succinctly identified to stimulate the dialogue to come. We should all join this conversation to further the process of globally enhancing learning-environment quality! --David Schrader, AIA, Educational Facility Planner and Designer, Former Chairman of the Board of Directors, Association for Learning Environments (A4LE)

The Difficult Airway

2012-12-05 David B. Glick The Difficult Airway provides a comprehensive textual and visual coverage of how to deal with patients who have expected or unexpected difficult airways. The text begins with a description of the incidence and importance of the difficult airway and then describes the ASA Difficult Airway Algorithm created to facilitate the management of “difficult airways.” The majority of the book features a comprehensive step-by-step approach to the rescue techniques listed as part of the ASA Algorithm. Noted experts in each of the techniques have been recruited by the book editors to present the information. Figures throughout the book illustrate important points and procedures. This is a wonderful resource for professionals in the health care field including anesthesiologists, intensive care physicians, emergency room physicians, nurses, and out-of-hospital first responders.

Ultrasound of the Gastrointestinal Tract

2013-09-21 Giovanni Maconi This is the second, updated and extended edition of a well-received book that offers a comprehensive overview of ultrasonographic imaging of acute and chronic gastrointestinal diseases, including acute abdomen, appendicitis, diverticulitis, inflammatory bowel diseases, neoplasms and masses, infections, malabsorption syndromes, and rare conditions. The value of ultrasound in each disorder is clearly explained and illustrated, and limitations identified. Information is also provided on recent technical developments and ultrasound applications that are likely to become of increasing importance, such as functional and 3D ultrasound, contrast agents and intraoperative ultrasound, elastography, and transperineal ultrasound. The authors are all distinguished experts in the topics they address. *Ultrasound of the Gastrointestinal Tract* will be a helpful guide in daily practice not only for radiologists but also for gastroenterologists, abdominal surgeons, pediatricians, and oncologists.

Registries for Evaluating Patient Outcomes

2014-04-01 Agency for Healthcare Research and Quality/AHRQ This User’s Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or

cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.

Patient Safety and Quality

2008 Ronda Hughes "Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based

Celiac Disease and Non-Celiac Gluten Sensitivity

2014-11-07 Luis Rodrigo Celiac disease is a systemic autoimmune process and appears in genetically predisposed individuals, with a well-known cause, consisting in a permanent intolerance to gluten, a protein contained in the flour of wheat, rye, barley and oats. Worldwide celiac disease affects to 1% of the Caucasian and there is recent evidence that the disease is increasing in USA and Finland among other regions in the world. It is considered to be the most prevalent disease with a genetic predisposition. The clinical forms of presentation are varied. The classical form consisting of diarrhea, anemia and failure to thrive is still common in children, but in the adult patients the symptoms resemble the irritable bowel syndrome. Mono-symptomatic forms with extra-intestinal manifestations are frequent. Hematological, cutaneous, articular, hepatic, bone and neurological manifestations are often described. This protean presentation and the lack of awareness explain the delay in diagnosis and suggest that screening in high-risk groups is indicated. The publication of this book written mainly by Spanish and Latin-American clinicians, researchers, and teachers, demonstrates the wide interest and the involvement of different disciplines that are necessary to understand celiac disease and gluten-related pathologies, such as non-celiac gluten-sensitivity. This has a great impact in the general public and in the industry. However, the knowledge of non-celiac gluten-related pathologies remains scarce but presently in the process of being properly defined. This book also highlights the importance of recognizing non-celiac gluten-sensitivity and briefly discusses a new definition. It also provides some perspectives to take into account when studying celiac disease in China and Central America. It describes new observations in Mexico, El Salvador and Costa Rica. The psychosocial impact as studied and reported by Argentinean investigators also adds to the value of this book. Written with a multidisciplinary team, we think that this book

could be of interest to a great variety of medical specialists. Due to the systemic nature and variable presentation of celiac disease it certainly is of interest to pediatricians, gastroenterologists, hepatologists, specialists in internal medicine, general practitioners as well as hematologists, immunologists, geneticists, pathologists, rheumatologists, dermatologists, neurologists, gynecologists, neurologists, psychiatrists, psychologists, orthopedic surgeons, specialists in rehabilitation medicine, endocrinologists. Being gluten the cause of these disorders, the food industry, dietitians and nutritionists will benefit from the valuable information presented in this book.

Perspective! for Comic Book Artists

1997-10-01 David Chelsea This clever book teaches artists the unique skill of drawing perspective for spectacular landscapes, fantastic interiors, and other wildly animated backgrounds to fit comic-strip panels.

observation grade 11 june 2014 egd paper 1,The needles used helps the body balance the serotonin levels since it is a neurotransmitter that affects blood vessels and has a role to play in migraines. In fact the more frequent these sessions are the better. It may even come to a point where the specific point of contact is no longer needed but the general stimulation itself.

The end result of undergoing acupuncture is amazing. If you experience 15 to 20 days of agonizing pain, this may be count down to only 8 days. You won't even need to use that much medication anymore as

before.

For those who are working, this is good so that they are not absent from work that much and there won't be that much deductions in their salary.

Rating : grade 11 june 2014 egd paper 1

But how well acupuncture does for one patient may vary with another. This depends on the condition of the attack and the individual.

The best part about acupuncture is that there are no side effects and it is painless. Skillful professionals can do this so you don't suffer from hematoma or pneumothorax. Another disease is potentially dangerous is HIV or hepatitis which can be prevented of course as long as the needles used are properly sterilized. It will be much better if the person uses disposable needles.

Acupuncture has been practiced in the United States for more than 2 decades. Although tests have shown how effective it can be to treat chronic conditions and certain addictions, more studies need to be done to see where else it can be useful.

First grade 11 june 2014 egd paper 1

Although one test has proven that acupuncture can help migraines, other tests will also have to be done to prove if this is true. Until such time that other results are published, patients will have to rely on conventional medicine that is prescribed by a doctor.

But you don't have to wait for the results to come out. If you think it is worth a try, go for it. Just ask for a referral from your doctor as there are many practitioners who have accepted the fact that alternative forms of medicine can also help a patient.

You can also find someone online. You can be sure they are certified if they are recognized by the National Certification Commission for Acupuncture and Oriental Medicine.

Reading grade 11 june 2014 egd paper 1

Aside from that, you should also make some lifestyle changes as there are trigger factors that have been known to cause migraines. Stress is number one on the list so you get enough rest and exercise as well as a balanced diet.

Patients who are suffering from migraine should also check if acupuncture is covered by their HMO. Most insurance providers and HMO's these days cover all or part of the cost but there are restrictions so you should check what is covered by your policy.

Once these spots are identified, these sharp needles are then inserted. Usually 5 needles are placed in various acupoints.

Discovery grade 11 june 2014 egd paper 1: These needles will be kept in place for 30 to 45 minutes depending on how much support is needed. These are then removed and replaced with ear tacs with adhesives to make sure they are in the same spot as the needles.

These ear tacs work by applying mild pressure whenever he or she feels hungry. It causes a mild endorphin release and helps the patient relax making it possible to use their willpower and resist the temptation to eat.

The patient will also have to reduce cravings on certain food by cutting down the intake. Some studies suggest that this can also lower insulin levels or lipid levels in the blood.

Story of" grade 11 june 2014 egd paper 1.A Quick-Start guide to Acupuncture

Using needles to adjust bodily functions to optimum levels is the principle behind acupuncture. Both ancient Chinese and modern Western practitioners have used this technique to relieve many sufferers of chronic disease. Needling is a relatively safe, beneficial treatment strategy that can be used to reduce pain, improve healing, and increase general well-being. But exactly how is this procedure done and what sort of benefits can be obtained?

Procedure for Needle Puncture

There are two broad categories of acupuncture practice today, traditional Chinese medicine (TCM) and medical acupuncture. Both have their merits, so the choice is individual. The decision for most people hinges upon which philosophy appeals more to them and which technique holds the least apprehension.

Solutions grade 11 june 2014 egd paper 1

Third, acupuncture is used to treat pain. This is only a half truth because this holistic technique has been proven to do other things such as stop a person's addiction, lose weight and prevent certain illnesses. Fourth, there are some who think that Asians are the only ones that can practice acupuncture. Since 1982, there are already 50 schools all across the country that teach students about this technique and become licensed acupuncturists.

This means that anyone who has the desire to learn about this ancient practice can do so and help treat patients. Just to give you an idea, there are at least 3,000 acupuncturists now working in the US.

Discovery grade 11 june 2014 egd paper 1

In the 5th or 7th treatment, this becomes more evident as your face looks more relaxed as though you just came from a vacation.

The end result is that you will look and feel 5 to 15 years younger but of course this depends on how well the patient has taken care of themselves outside the confines of the clinic.

To sum things up, facial acupuncture can do for you. It can eliminate fine lines and reduces wrinkles, improve your overall facial color and add luster to the skin, relaxes tension in the face and furrows in the brow, brightens the eyes and reduce dark circles and puffiness, improve muscle tone for sagging skin, enhance your natural radiance in the skin and eyes, slow the aging process within, promotes overall health and well being as well as relaxes and revitalizes the entire body.

Study grade 11 june 2014 egd paper 1

This has resulted in the establishment of clinics nationwide that only use acupuncture as the means of rehabilitation.

Acupuncturists in the US charge from \$75 to \$150 per session. This usually gets lower in the succeeding treatments. The person will probably have to undergo 10 to 15 treatments 2 to 3 times a week but this really depends on the condition of the patient.

Before you go to one, you should check if this is covered by your insurance. If it isn't, perhaps you should suggest that it should be included as it is much cheaper than having to undergo surgery.

example grade 11 june 2014 egd paper 1:Acupuncture and Autism

Studies have shown that there is an increase in the number of children that have been diagnosed with autism. Until now, doctors have not yet found a cure to this illness which is why some parents want to experiment with alternative forms of treatment and one example is acupuncture.

Acupuncture is a holistic approach in treating and preventing certain diseases. Its main tool are very thin

needles that are inserted to targeted points in the body. The body has about 400 of them linked through a system known as meridians or pathways. Once these are stimulated, these are supposed to create balance in the body.

Autism on the other hand is a brain disorder that is long term. This disease is characterized by deficits in language, social communication and cognition. Children who are diagnosed with this illness may also suffer from secondary problems such as aggression, irritability, stereotypes, hyperactivity, negativism, volatile emotions, temper tantrums, short attention span and obsessive-compulsive behavior.

Opportunity grade 11 june 2014 egd paper 1... Acupuncture can do more than just helping patients deal with arthritis or migraine. Clinical tests have shown that it can help obese people lose weight and those who are suffering from insomnia.

In some countries, acupuncture has even been used to replace chemical anesthesia prior to surgery as there are some patients who are not able to tolerate regular anesthesia.

Another field which acupuncture has proven to be effective is helping patients deal with their addictions such as alcohol, drugs and smoking. One study of smokers revealed that the average patient will cut down by half the number of cigarettes they consume after just one treatment. Just imagine the potential after a few more sessions!

Obsession grade 11 june 2014 egd paper 1

In any type of businesses, a certified public accountant is needed. You have to consider that accounting is basically the communication system in business and having enough knowledge about accountancy is critical for businessmen and women to know the performance of their business. This is why accounting professionals are very much needed today. And, a lot of accountancy professionals have become quite thriving in their field and some have even started their own firm.

The great thing about this career is that it will enable you to interact with various levels of business and you will also learn significantly from it.

So, just what does it take to become a CPA and follow this career?

First of all, you need to know about the eligibility requirements for becoming a CPA.

You need to be a graduate of a 4-year bachelors degree in accountancy or any associated field. Aside from this, an accountant should be able to have strong analytical and technical expertise in accounting software. Good math skills is also a must-have for certified public accountants. And, because computers are now one of the most commonly used tools in computing, you should also have knowledge and the operating skills of a computer.

Another requirement is that you will need a bachelors degree with a minor in a relevant subject. This should be taken from an accredited college or university in order for you to apply for a Masters program in accounting.

You can also pursue this career if you had your course in accounting over online programs or through the internet.

Also, you will need an accreditation or license of certain organization, such as being a certified public accountant should have a license by the State Board of Accountancy or the AICPA.

Most companies also require that you should complete a number of semester hours as well as relevant experience, which are considered for a 4-year bachelors degree. If you become a CPA, you will be taken as a trainee. You will usually start your career as a internal auditor trainee or as cost analyst.

It is recommended that you should have a masters degree in business administration because it is favored

by more companies who are looking for accountants as part of their employees.

The great thing about pursuing accountancy as a career is that it presents a lot of job options. For example, you can get a job as auditors or accountants in government institutions or in the private sector even if you do not have any license.

During the course of your career, you can even get advance to a position, such as the financial director position which presents a lot more great opportunities for your career.

Challenge grade 11 june 2014 egd paper 1

In any type of businesses, a certified public accountant is needed. You have to consider that accounting is basically the communication system in business and having enough knowledge about accountancy is critical for businessmen and women to know the performance of their business. This is why accounting professionals are very much needed today. And, a lot of accountancy professionals have become quite thriving in their field and some have even started their own firm.

The great thing about this career is that it will enable you to interact with various levels of business and you will also learn significantly from it.

So, just what does it take to become a CPA and follow this career?

Reading grade 11 june 2014 egd paper 1

Accounting Terms – Profit & Loss and Other Terms

Different fields of study make use of certain terms that are not easily understood by others. If you're an accounting student or a professional accountant, you know the different terms used in accounting. One very popular term is profit & loss.

So, do you know what the term means? To start with, you have to determine what profit means. Profit can be referred to as net earnings or net income. Businesses can either sell services or even products. Profit will come from the sales of these services and products. If the costs of running a business are controlled, it can add up to the profits.

Profits are also called ROI or return on investment. However, this term is often limited to securities like bonds or stocks. But still, some companies use ROI to mean short or long term business outcomes. Taxable income is another term for profit.

Solutions grade 11 june 2014 egd paper 1-Accounting Principals and Tulsa

Have you ever been to the city of Tulsa? Tulsa is a city that embraces challenges and it also values collaborative solutions. The top officials of the city are trying very hard to promote public safety, green initiatives, innovative educational opportunities, and diversity. Orthopedic Problems in Adolescents

Physical health problems encountered during adolescence can affect the development of the body, if not treated. There are few anatomic regions, such as spine, knee and ankle, in adolescents which can get orthopedic problems such as Osgood-Schlatter disease, and Slipped Capital Femoral Epiphysis.

Osgood-Schlatter disease is caused due to injury or overuse of the knee which causes swelling and pain in the area below the knee, above the shin bone. The patellar tendon and the soft tissues surrounding it gets inflamed, because of the constant pulling of the area where the tendon joins the below knee. Usually, adolescents who participate in sports actively and are athletic, such as football, basketball, soccer, ballet and gymnastics, tend to get the Osgood-Schlatter disease. Boys of age eleven to fifteen and girls of age eight to thirteen are at greater risk. The reason why adolescents get this problem is that their bones grow faster when compared to the tendons and muscles in this age and because of this the muscles and tendons stretch and become tight.

Review grade 11 june 2014 egd paper 1...Obesity in Adolescents

Obesity and overweight are the second most major reasons of preventable deaths in America. Stagnant lifestyle and junk food is to be blamed for more than three hundred thousand deaths per annum. The sad thing is that this problem is on the rise. Obesity is a chronic disease which poses serious health risk to the health of an individual. Also, obesity is the easiest recognizable medical problem, but is very difficult to deal with.

People usually confuse obesity with overweight. Overweight is gaining of a few extra pounds. A person is considered obese when the total body weight is minimum ten percent more than the recommended weight for his/her body structure and height. According to an estimate every year hundred billion dollars are spent on the obesity problem. It is very important to treat the problem as early as possible. Obese children between the age of ten and thirteen have eighty percent chances of growing into obese adults, unless they change their ways and adopt a healthier lifestyle. The obesity problem starts from the age of five and continue till adolescence.

Study case grade 11 june 2014 egd paper 1.It doesn't matter if you are still in high school or if you are already working because a shift in your career could let you achieve your true calling.

The best way to start though is to talk with an acupuncturist about what it takes to become one so he or she will be able to give you an idea of what happens in the job.

If you haven't picked a school, talk to students about the curriculum so you get your money's worth should you decide to attend this college.

Best Seller : grade 11 june 2014 egd paper 1

Unfortunately, standards of acupuncture have not been fully approved by the FDA due to many unregulated practices that still exist such as the re-use of needles. Furthermore, acupuncture certification today is mostly a sham, used to make money on desperate patients who have not benefited from western medical treatments. The National Council Against Health Fraud has even declared acupuncture as an unproven means of treatment whose concepts of healing are primitive and false.

Should You Try It

One thing that Western science can agree upon is that there are no proven harmful effects of acupuncture. Many doctors agree that as long as a medication is not detrimental to ones health, then there is no reason

why it should not be used if there are noticeable benefits. Most scientists would also state that it is simply due to a lack of research that the therapeutic properties of acupuncture have not yet been proven.

First grade 11 june 2014 egd paper 1:Facial Acupuncture

Looking beautiful both inside and out is something we all want to achieve. Since your face is ridden with emotion and hormonal issues, you have to take care of it. Fortunately, there is a technique that can do that using painless mini needles and this is better known as facial acupuncture.

Facial acupuncture is a painless procedure that renews not only the face but the body as well. This is because it can erase lines and eye bags making you look younger. At the same time, it can also help clear up pimples and acne.

For this to work, fine needles are placed in acupuncture points on the eyes, face and neck to stimulate the person's natural energies. As a result, this also improves your facial color.

Discovery grade 11 june 2014 egd paper 1

Acupuncture Can Help You Quit Smoking

Smoking is one hard habit to break. If nicotine patches and gum doesn't work, perhaps you should try something else like an alternative form of healthcare like acupuncture.

Acupuncture is an ancient practice involving the use of needles. This instrument is inserted into the skin to allow you energy or Qi to start flowing freely around your body and thus help you quit smoking.

When you go visit an acupuncturist for the first time and tell him or her that you want to quit smoking, after answering some questions, the specialist will carry out an examination of your ears and search for areas where the energy is low.

Learn grade 11 june 2014 egd paper 1

Acupuncture is an Example of Holistic Healthcare

Holistic healthcare by definition is being able to cure an illness through the use alternative means. This means no medication is given to the patient and an instrument like a bunch of needles could do the trick. Acupuncture has been around for than 2000 years. It is only recently that this holistic form of healthcare has reached the US. Studies have shown that it can treat minor problems and prevent some from happening.

The needles used in acupuncture are very thin but thicker than the human hair. This makes it smaller than those used on hypodermic needles.

Miracle grade 11 june 2014 egd paper 1

In short, the business' language is accounting. All business activities are quantified through accounting and this is where all business reports are derived and later on, communicated to the management level. What career opportunities can you expect if you're a graduate of accountancy?

Public Practice – if you become a CPA, you can do public practice. You can give your services to clients in exchange for an affordable fee. Usually, CPAs work in partnerships and they offer their services to businesses, governments, and even to individuals. The job responsibilities of an accountant in public practice will usually include auditing, taxation, management advisory services, etc. You can gain a lot of work experience in this field.

Education – accountancy graduates can also teach after they get their methods of teaching. They can become a researcher, reviewer, and a professor. If you choose this profession, you can learn a lot of things.

You can clear out certain accounting issues, conduct research, and then distribute the results.

History grade 11 june 2014 egd paper 1

The needles used in acupuncture are very small and you will probably feel a slight twitch when the needle goes in. They will be inserted carefully to $\frac{1}{4}$ or an inch in depth and will stay there from 45 minutes to an hour depending on the condition of the patient.

If inserted properly, you should feel some cramping, distention, electric sensation or tingling which means that the treatment is working.

Needles used for acupuncture especially in the US are clean because they are required to be disposable. This prevents any chance that those who go for treatment will be contaminated by a communicable disease like hepatitis or HIV.

example grade 11 june 2014 egd paper 1—Before this person does anything, you will first have to answer a few questions. You will then be given a physical exam to check your pulse and observe the shape, color and coating of your tongue. Other things that are checked will be the color and texture of the skin and your posture as this will give clues to your health.

Only then will you be told to lie down on a padded examining table and the needles are inserted to the skin. The difference with this kind of needle is that they twirl and jiggle each time they are pushed further into the body.

You may not feel them at all and if you do, it will only be a twitch that soon goes away. Once they are in place, this will be left there for 15 to 60 minutes that may make you feel very relaxed and sleepy that you may even doze off. Once the session is complete, the needles are removed and you will be on your way.

grade 11 june 2014 egd paper 1

The number of treatments you will need depends on the patient's condition. On average this could be from 10 to 5 treatments and 2 to 3 times a week. How much it will cost also varies as this could be from \$40 to \$150. Some insurance companies and HMO's now cover that or partially so you should check if this is included in your policy.

Anyone can try acupuncture to relieve pain or prevent one but many practitioners decline to see someone during pregnancy. But if you have already started, it is generally safe to do so until the infant is born. Some acupuncturists may ask you to take in some herbs as part of the treatment. Since you have no idea what it can do, have this checked first by your local doctor to make sure this is safe as this could interact with the drugs you are taking causing side effects.

grade 11 june 2014 egd paper 1

There is a great consensus among the parents whether their children would outgrow asthma as they grow up. But the truth is it depends from child to child. While some children experience improvement in their teens others see asthma becoming even more severe. But almost half of the children who have asthma outgrow asthma as they grow although some symptoms may come back later.

Many parents have questions like whether their children can take part in sport activities. The answer is both yes and no. Some kids may get an asthma attack when they participate in exercises like running. But with proper management a teenager suffering from asthma can actively participate in sports. Special aerobic exercises can improve airway function. This strengthens the breathing muscles. Some of the ways that one can participate in sports is to follow the regimen of stretching the muscles prior to and after

exercising, nose-breathe instead of breathing through the mouth and make sure that humidified air passes through the airways. Also parents should make sure that the adolescent has taken all prescribed medication supposed to be taken before they begin exercising. Carrying a reliever is a must for asthmatic teens which would come handy if asthma attack occurs. Asthmatic teenagers should make sure that they wear something over their mouth and nose to stop cold air from entering.

It is not easy for adolescent teens to attend school when they have asthma but it is not difficult also at the same time if proper coordination is made among the teenager, doctor, family and school employees. It is a good idea to consult teachers, nurses and other pertaining employees of the school and let them know that the teenager has asthma and may have special requirements. Also, let the school management know on medications the teenager regularly takes and how to help the teenager when an attack occurs. The school staff should be asked to treat the teen normally once the attack subsides. The physical education coach should also be informed about the condition so that he/she can let the kid stretch the muscles before any exercises or to deal with asthma attack induced due to exercises. Also, before admitting the teenager to a new school care must be taken to check the quality of air, irritants and allergens if any present in the school. The school staff should take considerations to avoid symptoms which could hamper the energy level kids. Also asthmatic teens should be assured from time to time that they are no different from others and asthma in any way does not slow them down, They need this emotional confidence otherwise they may have personality problems.

First grade 11 june 2014 egd paper 1.Allergic reactions can range from mild symptoms like runny nose to more severe ones such as difficulty in breathing. Teenagers suffering from asthma often have allergic reaction to cold and get asthma attack is another example of allergies. Some kinds of allergies trigger multiple symptoms. Allergic reactions in very rare cases also produce severe reaction known as “anaphylaxis” for which the signs are difficulty in breathing, difficulty in swallowing, swelling in tongue, lips and throat and dizziness. This allergic reaction occurs as soon as the system is exposed to substances that trigger allergic reactions like peanut although some reactions are delayed by as much as four hours. The reasons why people get allergies can be various and one of the reasons could be hereditary but that that does not necessarily mean that children are bound to get allergies from their parents. Some of the common allergens include food, airborne particles, insect bite and sting, medicines, chemicals etc. Food allergies typically occur in infants and usually vanish as the child grows. The list of food allergens includes milk & dairy products, wheat, soy, eggs, peanuts, and seafood. Some people are allergic to stings and bites of certain insects. The venom in the bite is the one which actually causes reaction and can be as serious as anaphylactic in some teens. Some teens are also allergic to airborne particles which are also known as environmental allergens. They are also the commonest of all the allergens. Examples of these allergens include dust mites, animal dander, mold spores, grass pollens, trees and ragweed. Some adolescents are also allergic to certain antibiotic medicines. Another common allergen is chemical, certain chemicals present in laundry detergents or cosmetics can cause rashes that are itchy in nature. Allergists usually treat allergic problems. They may ask questions like symptoms of the allergy and whether it is hereditary. They may also prescribe certain diagnostic tests like blood or skin test depending on the type of allergy. The best way to treat allergies is to completely avoid the substances that cause allergies. However there are certain medications and injections are also available to treat allergies.

Study grade 11 june 2014 egd paper 1~Teens get anemia as they grow rapidly the amount of iron intake may not be enough to keep up with the pace of the growth as it needs more nutrients in this process. In

the case of girls they need more iron after puberty and are at risk due to heavy blood loss during menstrual periods. In some cases pregnancies also leads to anemia. Also, teens who diet excessively to lose weight may also be at risk of having iron deficiency. Meat eaters especially red meat eaters are at less risk compared to vegetarians as meat has rich iron in it.

Asthma in Adolescents

Most of the teenagers who have asthma are also allergic to many things. The asthma can get severe even if the people with asthma are exposed to allergens of low grade. Allergies play an important role in asthma cases which are undiagnosed. Other factors that also trigger childhood asthma include upper respiratory infections like colds, second hand smoke, and certain climate conditions like cold air and due to emotional physical expressions like laughing, crying or yelling. However, it is not the end of the road for asthmatics as they can live active and healthy if they manage asthma properly by avoiding asthma triggers, regular intake of prescribed medications, being alert of the warnings and be aware of the ways to deal with an asthma attack.

Story of grade 11 june 2014 egd paper 1

One can follow certain things to avoid allergies like people who have food allergies that contain should peanuts and any food containing smallest amount of peanuts. Also avoid using cosmetic that contain chemicals allergic to the skin. One can also avoid airborne allergies by keeping pets in restricted areas and away from bedroom. Replace carpets and rugs from time to time. Avoid keeping things that accumulate dust. And also clean the room and house frequently.

Anemia in Adolescents

To understand what is anemia one should begin with breathing. The oxygen that is inhaled simply doesn't stop in lungs. It circulates though out the body and fuels the brains also. Oxygen travels to all parts of the body though bloodstream and to be precise in the RBCs I.e. red blood cells. Now, these RBCs are produced in the bone marrow of the body and they serve as boats carrying oxygen in the bloodstream. RBCs have something called hemoglobin, a protein which holds oxygen. To make adequate hemoglobin body requires iron in plenty. The iron is supplied by the foods that we take along with other nutrients. When these RBCs are fewer in number than what is needed anemia occurs in the body. There can be 3 primary reasons: RBCs are lost due to some reason, the production of RBCs is slower than what is needed and lastly the body is destroying the RBCs. Different types of anemia are linked to at least one of these causes.

observation grade 11 june 2014 egd paper 1: The bone marrow replaces small amounts of blood is lost due to some reason without making a person anemic. But in cases where considerable amount of blood flows in small amount of time as a result of an injury due to a serious example for instance, it may not be possible for bone marrow to replace RBCs so quickly resulting in anemia. Also, losing small amounts of blood over long periods of time may also lead to anemia. Example of this situation can be seen in girls who get heavy periods attributed mainly to deficiency of iron in the diet.

Anemia due to iron deficiency is the most common kind of anemia in the United States. It occurs mainly due to lack of iron in a person's diet. A teen with iron deficiency would have lower hemoglobin production and consequently lower RBCs. When the production of RBCs is low the person is regarded as anemic. The signs of anemia are paleness and tiredness. There can be other reasons as to why enough RBCs are not produced in the body. Folic acid and Vitamin B-12 are also essential to produce RBCs. Getting these in adequate quantities is this important too. There can be a problem with bone marrow's working too resulting in anemia.

Hemolytic anemia occurs when a person has RBCs whose lifespan is shorter. The bone marrow may not be able to produce new blood cells if the blood cells die too early. This can result due to many reasons including person having disorders like sphenocytosis or sickle cell anemia. In some cases the immune system of the body may itself destroy the RBCs. In some cases certain antibodies can form in the blood as a result of reaction to certain drugs or infections and may attack the RBCs.

Hope grade 11 june 2014 egd paper 1

But acupuncture is not risk free. Hematoma may develop if the needle punctures a circulatory structure. It is also possible that pneumothorax may occur if the needle is inserted too deep. There is also the risk of HIV and hepatitis if the needle was not properly sterilized.

Now that you know what acupuncture is, you must not forget that it is merely an alternative and not a proper form of medical treatment. This means you should still be examined by a professional in the medical field who can determine the severity of your illness or disease.

*Revenge grade 11 june 2014 egd paper 1:*It cannot be argued that an accounting staff is needed to ensure the company's success. Without them, the success of the business is not guaranteed. So the owner of the business should choose the best accounting staff. That way, all the financial transactions and decisions are noted and studied. Only then can the company gain profits.

Profit & loss is just a simple accounting term. Aside from the term, you also learned about net earnings, net income, net worth, dividends, etc.

Legend grade 11 june 2014 egd paper 1~When looking for an acupuncturist, make sure that person is licensed. Before he or she can obtain one, they have to complete 4 years of training at an approved college of oriental medicine. In the state of California, one governing body that gives the person the title is the California Acupuncture Committee.

If they get this from another organization, a copy of their license must always be clearly displayed in the practitioner's office. One example is the National Certification Commission for Acupuncture and Oriental Medicine.

When choosing an acupuncturist, there are a few things you should ask aside from their credentials. You should know what styles of acupuncture is used as there are some techniques that do not use needles to treat a patient.

Study grade 11 june 2014 egd paper 1,Have you looked at the steps carefully? By now, you can already tell if you still have a chance to reach your goals or not. Age should not hinder your ambitions. Besides, by now you're probably a senior accountant in the company and you're earning big money. Still, if you're not contented with your current position, you can always take advanced career trainings to improve and develop up-to-date accounting skills.

Don't be left behind and don't stop learning. Bear in mind that every year, new accounting graduates are produced and you have to stay as competitive as ever to maintain your seniority in the office.

The licensing requirements for accountants vary from state to state. This is a very important consideration when choosing a degree program in accounting. Before you can take the exams to become a CPA, you will need a 150 hours course. By 2009, almost all the states in the US will follow the same requirements.

Behind the grade 11 june 2014 egd paper 1;With only one call, clients can talk with MBAs or CPAs. You see, Accounting Principals is not just a recruiter or a human resource professional, they're more than that.

Their representatives have more or less 5 years experience in recruitment and in the fields of finance and accounting.

The company covers the following job opportunities: accounting, administrative, bank operations, business operation manager, CFO, collector, controller, management consulting, merger/acquisitions, and mortgage banking.

The company offers 100% guaranteed career services because of their wide experience in accounting and finance. In a way, the company is exclusively qualified to understand what the clients want in their career. Their representatives can help clients in meeting their goals through personal interviews. They will also evaluate their clients' unique skills and at the same time, offer them with matching opportunities from leading companies.

Investment grade 11 june 2014 egd paper 1...

Basically, public accountants offer their services in partnerships. They offer their services to individuals, as well as businesses and the government. You need to remember that in order to become a public accountant, you need to be a certified public accountant in order for you to work individually or as part of an accounting firm.

Public accountants basically do jobs, such as taxation, auditing, as well as management advisory services. You should remember that this particular career is considered to be a stepping stone of most accountants. If you want to start your career as an accountant, being a public accountant is usually the first job that you have to take. Here, you will learn a lot of things about running a business and you will also increase your experience.

Another great thing about being a public accountant early on in your accounting career is that it provides a lot of great opportunities as it will give you lots of experiences, and become more in demand by companies to handle their accounts and income.

For Free grade 11 june 2014 egd paper 1, There are things that patients have to be aware of before, during and after surgery. The same goes for those who undergo acupuncture because in order to enhance the value of the treatment, there are some do's and don'ts that patients have to follow.

First, you should not eat a large meal before or after treatment.

You should also avoid over exercising, engaging in a sexual activity or consume alcoholic beverages 6 hours before and after treatment.

Since the acupuncture session will last from 45 minutes to 2 hours depending on how often you have to go to the clinic, you better fix your schedule so you have time to rest.

Challenge grade 11 june 2014 egd paper 1

The greatest advantage of this ancient Oriental procedure is the absence of side-effects during and after treatment. Unlike smoking cessation medications and nicotine replacement therapy products, acupuncture does not employ chemically manufactured substances. There is also no risk of weight gain during therapy. In conjunction with helping a patient quit smoking, it can also curb appetite, thus reducing food cravings. If you have tried several methods in smoking cessation to no avail, perhaps it is high time you consider the alternative method that is acupuncture. With the right practitioner and the right frame of mind, there is no reason why you won't be nicotine-free before long.

The Do's and Don't of Acupuncture

Pain

Acupuncture is most commonly known to treat bodily pains such as muscular pains and arthritis. There are many types of arthritis, and each have a different acupuncture procedure. However, the healing effects may vary from person to person. Acupuncture for arthritis usually takes several sessions and takes a lot of cooperation your therapist for best results.

Other pain related ailments that can be cured by acupuncture are severe headaches and migraines, acute backaches, shoulder and neck aches, leg pains, trapped nerves, muscle related injuries, after surgery, carpal tunnel syndrome, sports injuries, menstrual pains, tooth aches, abdominal pains, and rheumatic pains.

Depression

Acupuncture is widely recommended for symptoms of depression and anxiety such as irritability, insomnia, loss of appetite, loss of interest in social activity and suicidal tendencies. Acupuncture is thought to relieve stress and improve flow of energy that may be causing the depressive symptoms. Improvement in symptoms can be seen as early as the first session. Experts have found acupuncture to be a beneficial complement to other forms of depression therapy such as psychological counseling, and healthier than chemical alternatives such as anti-depressants.

Investment grade 11 june 2014 egd paper 1:Insomnia

Acupuncture has become a popular alternative to common remedies such as sleeping pills. It works at the nerve levels, relaxing and soothing your senses. Acupuncture is thought to be a safer route for insomnia because it brings back your natural sleeping cycle through natural means and not through chemicals, which can turn into an addiction. Using acupuncture for insomnia usually starts working after the very first session. The treatment is usually stretched out for a period of time, until your body returns to its natural sleeping cycle.

Infertility

Studies show that acupuncture is a beneficial form of complementary therapy for women who are having undergoing treatments for fertility problem. Acupuncture is believed to relieve the anxiety of women undergoing fertility treatment. Also, acupuncture's success in aiding fertility is more pronounced in in-vitro fertilization. In addition, the rate of miscarriages has been found to be lower for women who do acupuncture.

The Best grade 11 june 2014 egd paper 1~But acupuncture only reached the US in the early 80's with the establishment of a regulatory board called the National Commission for Acupuncture and Oriental Medicine. As a result, various schools have been built and those who want to become licensed acupuncturists are now able to practice their profession.

Despite that, there were a lot of people who are not yet convinced on the positive effects of alternative forms of medication. It was only in 1995 that the US Food and Drug Administration decided to classify the needles used for acupuncture as medical instruments and assured the public that they are both safe and effective.

To further promote acupuncture, the NIH or National Institute of Health in 1997 has stated that this technique is very useful in treating various health conditions. These include ear, nose, throat, respiratory, gastrointestinal, eye, nervous system and muscular disorders. In some cases, acupuncture is able to prevent some of them from happening.

Others

The following are other ailments that acupuncture has been known to remedy:

- Menopausal problems such as hot flushes, infertility, and premenstrual tension.
- Bladder or bowel problems, difficulty or pain in urination, and urinary infections.
- Digestive disorders including nausea, indigestion, heartburn, and diarrhea.
- Respiratory problems such as rhinitis, hay fever, prickly heat, rashes and ulcers, eczema, and some types of dermatitis and psoriasis.
- Conditions of the eyes and mouth such as cataracts, dry eyes, conjunctivitis, retinitis and toothache, and post extraction pains.
- Heat problems such as poor circulation, stroke recovery, and hypertension.
- Addictions such as smoking, drinking, or other harder drugs.

If you look at the history of acupuncture, not much has changed since the needle technique used back then is still being used today. Even if various forms have developed through the years, one thing for sure is that it works.

In order for you to see how effective it is, you have to see a specialist who is not only qualified to treat your condition but also one is well trained.

The Soothing Effects of Acupuncture

Acupuncture is an ancient form of Chinese medicine that has been practiced for thousands of years. Commonly used to treat bodily pains, acupuncture actually has a wide range of uses that range from addictions, to injuries, to disease prevention. If you are thinking about trying acupuncture, the following will give you a better idea of its many benefits.

Review grade 11 june 2014 egd paper 1

The other virus called cytomegalovirus which also belongs to the family of herpes simplex causes the cells to become enlarged. According to statistics, about eighty percent of adolescents infected with this virus generally don't see any further symptoms. Although EBV has potential to develop infectious mononucleosis in adolescents the virus could make throat and blood cells its home for the lifetime. The virus has the capability to bounce back and reactive from time to time but the consolation is that it would reactivate without symptoms.

The condition usually lasts for 1-2 months. The symptoms may vary from one adolescent to other but may include inflamed lymph glands in areas such as groin, neck and armpits, fever, continuous fatigue, enlarged spleen, sore throat as a result of tonsillitis that can make things difficult to swallow and last but not the least minor liver damage that can lead to short-term jaundice. Some adolescents may also experience symptoms such as abdominal pain, petechial hemorrhage, muscle ache, headache, depression, loss of appetite, skin rash, weakness, dizziness, enlarged prostate, dry cough, swelled genitals and puffy and swollen eyes. Some parents are puzzled by the symptoms of mononucleosis as it may be similar to other medical conditions. It is safe to consult a doctor in such cases.

The viruses are usually transmitted to other people through saliva (the reason why it is also called kissing disease), blood, sharing drinks and sharing utensils. The symptoms usually lasts for 4-6 weeks and do not cross 4 months. The disease is diagnosable but requires a thorough medical history of the adolescent. The

diagnosis also involves physical examination of the adolescent and is based on symptoms reported to the physician. The diagnosis is further supported by laboratory test like blood test, antibody test and test to count white blood cells.

Opportunity grade 11 june 2014 egd paper 1. Hypertension is diagnosed by blood test and urinalysis. The kidney function will also be checked, along with blood cholesterol levels. Family history check is another important factor. Adolescents' eating habits, exercise levels, activities in school and home will also be studied thoroughly. High blood pressure is dealt with by weight reduction, healthy diet, and increase in physical activity. If hypertension is due to illness, the illness is treated first. These treatment measures will decrease the systolic blood pressure and diastolic blood pressure. It will also strengthen the heart and decrease the level of cholesterol in blood. This also helps to keep heart diseases at bay. The good thing is that only one percent of the adolescents, who have high blood pressure, need medication to bring back the blood pressure to normal.

Infectious Mononucleosis

Also known as mononucleosis or mono Pfeiffers disease or glandular fever, infectious mononucleosis can be identified by inflamed lymph glands and constant fatigue. The disease is named so as the amount of mononuclear leukocytes which belong to white cells increase in number. The cause of the disease is EBV (Epstein - Barr virus) or in some cases cytomegalovirus. Both these viruses belong to the family of herpes simplex. According to statistic majority of the adults in the United States are exposed to the virus Epstein – Barr, a very widespread virus. Although the virus does not show any visible affects in children but it does in adolescents which can lead to infectious mononucleosis in nearly fifty percent of cases of exposure to the virus.

Story of grade 11 june 2014 egd paper 1, There are many premenstrual syndrome symptoms which can be broadly classified as neurologic & vascular symptoms, psychological symptoms, gastrointestinal symptoms, fluid retention, eye problems and respiratory problems. The cause of premenstrual syndrome are fluctuations in the levels of progesterone & estrogen, hypoglycemia, hyperprolactinemia, psychogenic factors, changes in carbohydrate metabolism, excessive aldosterone, progesterone allergy and water retention by kidneys. The good thing is that premenstrual syndrome can be prevented by exercising regularly, eating balanced diet and sleeping adequately.

Dysmenorrhea is feeling intense menstrual pain and cramps. Depending on the severity, dysmenorrhea is stated as primary dysmenorrhea or secondary dysmenorrhea. Primary dysmenorrhea symptoms are felt from the onset of the menstrual periods and are felt life-long. Because of abnormal uterine contractions due to chemical imbalance, severe menstrual cramping is experienced. Secondary dysmenorrhea starts in the later stages. The causes are different for primary and secondary dysmenorrhea. Secondary dysmenorrhea can be blamed on medical conditions such as endometriosis, uterine fibroids, pelvic inflammatory disease, tumors, infections, and abnormal pregnancy.

Dysmenorrhea symptoms are lower abdomen cramping & pain, lower back pain, nausea, diarrhea, vomiting, fatigue, fainting, weakness and headaches. Females who are overweight, smoke, and have started to menstruate before turning eleven are at a higher risk of developing dysmenorrhea. Females who drink alcohol during menstrual period experience prolonged pain. After studying the health conditions, age, cause of dysmenorrhea, and extent of condition of the individual, corresponding treatment will be recommended. Regular exercise, abdominal massage, hot bath, vitamin supplements, and dietary modifications can help overcome dysmenorrhea.

Hope grade 11 june 2014 egd paper 1

The treatment is finished after an hour and when the needles are removed, you are advised to wear ear magnets so your session continues even when you leave the clinic. While acupuncture itself is a painless procedure, some smokers have claimed that they felt a prick or get sleepy.

Most smokers will have to come to the clinic 4 to 6 times before seeing any significant results. Just to give you an idea, one study shows that the respondents reported a decrease in the number of cravings to smoke just after one or two sessions. Seven out of 10 of the respondents were able to kick the habit after 5 or 6 sessions.

Because the number of test subjects is small, there are some who doubt the effectiveness of acupuncture. This is because although there are positive signs with regards to the short term effects of this technique, its effects were not sustained. This is why some medical journals have stated that it is unclear what acupuncture can do in smoking cessation.

Study grade 11 june 2014 egd paper 1

It might not be something to replace regular trips to the doctor but with its many possible benefits, acupuncture might be worth trying out very soon.

Part of the curriculum will also include basic courses in traditional medicine covering subjects such as anatomy, biosciences, medical terminology, herbal medicine, moxibustion, and acupressure. In some schools, they may require students to also learn about nutrition and various kinds of research.

Once they graduate, they may start in an entry level position earning \$40,000 or more which will soon double or triple after years of experience and working themselves up the ladder.

If you want to look for a school that offers acupuncture degrees, it is best to go online and see which one has the best program that suits your requirements.

Obsession grade 11 june 2014 egd paper 1: Acupuncture treatment for smokers should only be done by a license professional. You can do some research online to find out if they are accredited by the National Commission for Acupuncture and Oriental Medicine, ask how long they have been in the profession, find out how many smokers they have helped and how much will they charge.

Once you have found one, you have to commit yourself to the program because both you and the acupuncturist have to work together to give up this habit.

Acupuncture can help smokers in the same way that it has helped addicts and alcoholics quit their addictions. You just have to try it even if you may not believe in it.
